

BÉLGICA

Project #890

Project #890 - MULTITEL – Belgium

MULTITEL es una empresa belga que busca socios para desarrollar un biosensor que permita detectar enfermedades. Está interesada en contactar con hospitales para desarrollar bioensayos y validaciones, y empresas con acceso y experiencia en el mercado del diagnóstico de enfermedades.

Date: 2014/02/21	Deadline: 2014/12/31

Contact

Organisation	MULTITEL	Department	Applied Photonics - Biophotonics
Contact person	Dortu, Dr. Ir. Fabian		
Email	dortu@multitel.be		
Address	rue Pierre et Marie Curie 2		
Postcode	7000	City	Mons
Country	Belgium		
Telephone	+32-65-342877	Fax	
Website	www.multitel.be		

Familiar with the European Framework Programme? **YES**

Project

Title: Integrated lab-on-a-chip for label-free screening	Acronym: INLAS
---	-----------------------

Project type	Research and Innovation Action (RIA) - 100% funding scheme
Status	Planned for submission
Call references	Call I

Priorities' Main Research Areas	3d integration of passive photonics, III-V sources, photodiodes, microelectronic, microfluidics and bioprobes at wafer scale.		
Workprogramme Topic (according to each priority workprogramme)			
Project description The objective is to develop a highly-multiplex immunologic label-free biosensor for screening diseases in point-of-care environment.			
Partners already involved			
Project budget (for the running)	nc	Budget reserved for SMEs	nc

projects)			
------------------	--	--	--

Research topics

- | |
|--|
| • PHC10 – 2014: Development of new diagnostic tools and technologies: in vitro devices, assays and platforms |
| • PHC11 – 2015: Development of new diagnostic tools and technologies: in vivo medical imaging technologies |
| • PHC25 – 2015: Advanced ICT systems and services for Integrated Care |
| • PHC27 – 2015: Self-management of health and disease and patient empowerment supported by ICT |

Profile of SME sought

Role	technology development, demonstration
Country /region	europe
Start of partnership	mid-term
Expertise required	* hospital / clinic for development of bioassay and validation in real settings (no clinical trials). * company with access to diagnostic market with expertise in kit developments and commercialization, and preferably in instrument development as well.

Plazo Presentación Expresiones Interés: 14 de octubre de 2014.
