

## GRECIA

### Project #897

Project #897 – Greece

El Centro Nacional de Documentación de Grecia busca tanto socios como un coordinador para desarrollar el proyecto titulado “Self management of health and disease in cancer” con la finalidad de crear una plataforma para afectados por enfermedades graves, especialmente cáncer. El objetivo de la plataforma es proporcionar información creíble, herramientas útiles, apoyo psicológico y consejo de expertos.

Date: 2014/03/12

Deadline: 2014/12/31

<b>Priorities' Main Research Areas</b>		CareAcross is an online platform for those affected by serious diseases. Our current focus is Cancer. Our mission is to provide credible information, useful tools, psychological support, and expert advice. We will empower patients and caregivers towards active partnership with their professional healthcare team, and strengthen the support among people facing similar challenges.	
<b>Workprogramme Topic</b> (according to each priority workprogramme)			
<b>Project description</b> In particular, CareAcross will provide information and tools for - Disease awareness - Prevention - Risk assessment - Diagnosis - Disease management - Treatment selection - Treatment adherence - Treatment tracking - Follow-up care - Long term survivorship These will be provided via online tools, always available and updated on a daily basis. Furthermore, CareAcross will host a community of patients who will exchange practical tips but also support each other through the various stages of their disease. CareAcross will build upon the body of knowledge already existing on the disease, and will complement that with the information and data provided by patients themselves. The goal is to enhance the state of the art across disease prevention, diagnosis, management and treatment. The online platform will be facilitating the interaction between patients and medical professionals, and helping these relationships evolve towards ongoing, rich communication that can improve outcomes, lower costs, and enhance quality of life. CareAcross has established access to large number of patients through relationships with patient groups, hospitals, clinics, doctors and other means. In summary, a key goal for CareAcross is to provide a complete and constant companion for patients, which will be reliable and credible in their quest for health management, disease management, community improvement, and interaction with healthcare systems.			
<b>Keywords</b>		cancer, oncology, patient reported outcomes, awareness, prevention, risk assessment, diagnosis, treatment, follow-up, survivorship, big data
