Collaborative platform dedicated to empowering patients who are suffering on cardiovascular disease

PROJECT DESCRIPTION

Proposal Outline: CardioPath is a online collaborative platform dedicated to empowering patients who are suffering on cardiovascular disease.

The object is to inform patients, parents, and health professionals about the different aspects of cardiovascular disease, to foster debate and discussions Europe wide, and to encourage health professionals and patients to cooperate more closely.

The intention is to build a network of experience and expertise, and provide information for people across Europe who work towards easing the suffering of those living with a cardiovascular dis
