

## SCIENTIFIC REPORT 2023

# 1

## Introduction

**Dr. Rafael  
Pérez-Santamarina Feijóo**  
Managing Director of HULP  
Chairman of the Board of  
FIBHULP

**T**his year, 2024, we are celebrating the 60th anniversary of La Paz University Hospital. For 60 years, we have been at the forefront of healthcare in Madrid, Spain, Europe, and the world. We have become a benchmark in patient care, research, and quality. Maintaining this standard year after year is no easy task—it is a monumental effort by thousands of professionals who give their best every day to achieve the highest level of excellence, never losing sight of a fundamental concept for us: the humanization of care. We never forget that the patient is at the center and the motivation behind everything we do.

La Paz is a comprehensive center, both in terms of healthcare and other complementary areas. We are a university hospital with over 700 individuals in training each year. Furthermore, we are the most chosen hospital in Spain by students for their specialization, and we are

often the top choice for those with the highest scores in the MIR, EIR, FIR, etc. However, without a doubt, the cornerstone of our institution is research. We could not be a leading center without also being a top-level research institution.

This brings me to another reason for celebration in 2024: our Research Institute, IdiPAZ, is turning 15 years old. It has become a benchmark in biomedical research in Spain. The global impact factor surpasses its own records year after year, a clear indicator of the institute's excellent position in clinical-translational research. This year alone, it has published over 1,200 articles and conducted 420 clinical trials. I take particular pride in knowing that we have one of the most powerful research centers in our country, and that our professionals have the infrastructure and network that support and drive the research dimension of healthcare.

After 60 years of the hospital and 15 years of the Institute, we look to the future with enthusiasm, firmly committed to remaining at the forefront of healthcare and research. State-of-the-art medical technology and translational research are two fundamental pillars of the hospital's future.

Moreover, the renovation of the hospital complex is an essential part of our future plans. This will elevate the hospital to new heights, both technologically and in terms of care and science. The City of Health project, already underway with an investment of 1 billion euros, will create the most modern and innovative biomedical campus in Europe. This will allow our hospital to continue being one of the best in the world, thanks to our focus on specialization, innovation, and research. The new research facilities will make IdiPAZ one of the most advanced scientific centers, fostering collaboration between healthcare, scientific, and university professionals.

# 1. Introduction

## 1

### Introduction

**Dr. José Luis López-Sendón Henstchel**  
 Scientific Director of IdiPAZ

Number of original research publications in indexed journals\*

\* Indexed journals, excluding reviews and letters to editor <https://www.idipaz.es/PaginaDinamica.aspx?IdPag=549&Lang=EN>

### Celebrating 15 years

The **Hospital Universitario La Paz Institute for Health Research (IdiPAZ)** was founded 15 years ago and completely changed the scientific impact of the Hospital. The scientific productivity progressively increased through the years ([www.idipaz.es/PaginaDinamica.aspx?IdPag=549&Lang=EN](http://www.idipaz.es/PaginaDinamica.aspx?IdPag=549&Lang=EN)). This can be attributed to an increase research activity and the incorporation of new partners. In addition, a systematic central review of PubMed publications helps to identify non reported publications by the institute investigators and could explain the sudden increase of original publications since 2010. Of note, a significant number of publications do not include the appropriate IdiPAZ affiliation. Remember, if you are working at one of the IdiPAZ Institutions you are a member of IdiPAZ, even if you do not belong to any of the 60 research groups. The correct affiliation of research publications is crucial for international benchmarking. Please and thanks, be proud to belong to IdiPAZ.

The 2023 scientific report includes a myriad of activities, accreditations, details of research groups, names of investigators, research lines, research networks, working groups, detailed publications, awards, administrative achievements and more; you name it. You can find the details and compare the evolution through these 15 years in the IdiPAZ website (<https://www.idipaz.es>). Next year, perusal of the information will be easier. The IdiPAZ web site is currently being re-structured and will be dynamic, offering the information in a timely manner.

Certainly, the most important impact of IdiPAZ was the progressive change in the attitude of the hospital staff towards clinical and basic research, including medical directors, physicians, basic researchers, nurses, administrative and nonmedical personal. Right now, research is effectively considered as an important activity in a university hospital, along with patient care and teaching. In the future, I sincerely hope that all IdiPAZ investigators will be proud to belong to the institute, not only the hospital or the university.

This change in attitude is also reflected the growing number of the Institute working groups. Want to belong, just say it. New ideas are always welcome

### The future ahead

Truly, the future could not be more exciting. Both La Paz Hospital and the Universidad Autonoma de Madrid will very soon start a process of total remodeling of the hospital and the Medicine Campus ([www.comunidad.madrid/hospital/lapaz/ciudadanos/ciudad-salud](http://www.comunidad.madrid/hospital/lapaz/ciudadanos/ciudad-salud)) breaking physical and functional barriers, sharing common buildings for teaching and research and making closer and stronger than ever the relationship between the two institutions. A true mind reformer process itself that certainly requires open minded people working as a team. This will be the pathway to become part of the elite of best hospitals and medical universities. The process will take a few years with many inconveniences, but the regard will be immense also for the other IdiPAZ institutions and UAM affiliated hospitals. This opportunity simply cannot be missed.

### Farewell

This will be my last year as Scientific Director of the IdiPAZ Research Institute. I take this opportunity to give my most sincere thanks to the so many people that worked together and discussed and/or supported my opinions: the scientific subdirector, the external and internal scientific committees, the other institutions belonging to IdiPAZ, the directors of the hospital, the researchers and ... of course everyone at FIBHUP, and indispensable partner and a true "Pepito Grillo" for IdiPAZ and really committed to help everyone to navigate through the complicated administrative pathways of research.

I have no doubt that the new Scientific Director will lead IdiPAZ to new heights with more success than ever before, keeping the principles of teamwork within the institutions, basic and clinical research and improving international relationships.

Thanks, and forgive my mistakes. I received more than I gave.

**José López-Sendón**  
 Scientific Director

## 1. Introduction

# 1

## Introduction

### Mission

To become a research institute that develops multidisciplinary biomedical research in the prioritized areas and with cutting-edge technology. Promoting collaboration with internationally renowned centers, and oriented to the translation of knowledge to clinical practice and the improvement of patients' health.

### Vision

To become a benchmark in translational biomedical research of excellence both nationally and internationally, committed to the health of patients.

### Values

- Public engagement
- Continuous improvement through quality fostering
- Orientation towards excellence
- Sense of belonging to the organization
- International vocation
- Leadership in innovation and transfer
- Focus on sustainability
- Encouragement of cooperation and the establishment of alliances.
- Commitment to diversity and equal opportunities

## 2 Executive summary

### 2.1 Global Analysis

- 2.1.1. Scientific Analysis
- 2.1.2. Annual Accounts

### 2.2 Research Structure

### 2.3 Training Report and Teaching

- 2.3.1. Doctoral Theses
- 2.3.2. Master Theses
- 2.3.3. Final Degree Theses
- 2.3.4. Scientific Training Plan
- 2.3.5. Science and Society-Scientific Outreach Initiatives

### 2.4 Innovation and Transfer Activities

- 2.4.1. Innovation and Transfer Activities
- 2.4.2. Patents and trademarks

# 2 Executive summary

## 2.5 Quality Committee

## 2.6 Platforms

- 2.6.1. Biobank
- 2.6.2. Biostatistic
- 2.6.3. Experimental Surgery
- 2.6.4. Documentalist
- 2.6.5. UICEC
- 2.6.6. Internationalisation
- 2.6.7. Flow Cytometry Laboratory
- 2.6.8. Cell Culture Laboratory
- 2.6.9. Molecular Imaging and Immunohistochemistry
- 2.6.10. Radioisotope Unit
- 2.6.11. BSL2-Virology Laboratory
- 2.6.12. Sequencing Platform
- 2.6.13. Bioinformatics Service
- 2.6.14. Pain Platform
- 2.6.15. Food, Nutrition and Health
- 2.6.16. Simulation Platform (CEASEC)
- 2.6.17. Tissue Engineering and 3D Printing Platform

## 2.7 Mentor and Pre-Mentor Program

## 2.8 Scientific Production

## 2.9 CIBERs and RETICs

## 2.10 Communication and Public Engagement

## 2.11 Responsible Research and Innovation

## 2.1 Global Analysis

### 2.1.1 Scientific analysis

In 2023, the scientific production of IdiPAZ included more than 1,500 publications, and almost 43% of the publications (682) are IdiPAZ own documents, so the author the first, the last or the corresponding author of the publication is a researcher of the institute. The original articles and reviews articles by IdiPAZ researchers overcome 1,300 more than 50% in the quartile 1 and more than 17% of then published in journal of the first decile of their subject area.

2023	Total	%Q1	%D1
<b>Publications</b>	1.581	48,77	17,77
Owned Publications	682	38,86	8,80
Un-owned Publications	899	56,28	24,58
<b>Originals</b>	1.221	48,57	18,01
Owned Originals	466	36,70	8,15
Un-owned Originals	755	55,89	24,11
<b>*JCR Indexed Articles and Reviews</b>	1.332	50,53	17,78
Owned JCR Indexed Articles and Reviews	521	39,92	8,87
Un-owned JCR Indexed Articles and Reviews	811	57,34	24,29

*\*JCR Indexed*

IdiPAZ researchers evidenced their participation in national and international scientific networks, with almost 85% of the total documents published in collaboration (84.88%). Regarding collaborative publications, more than 55% were national collaboration (55.37%) and almos 45% international collaboration (44.63%). Internal collaboration between IdiPAZ research groups is reflected in the publications signed by several IdiPAZ groups. These publications account for around 17% of the documents (16.89%). In terms of articles and reviews, the percentage of intra-institute publications accounts for 40% of the total (40.04%).

2023	Total	% National Collaboration	% International Collaboration
<b>Collaborative Publications</b>	1.342	55,37	44,63
Owned Collaborative Publications	443	63,88	36,12
Un-owned Collaborative Publications	899	51,17	48,83
<b>Collaborative Originals</b>	1.078	54,64	45,36
Owned Collaborative Originals	323	64,09	35,91
Un-owned Collaborative Originals	755	50,60	49,40
<b>*Collaborative JCR Indexed Articles and Reviews</b>	1.177	54,29	45,71
Owned Collaborative JCR Indexed Articles and Reviews	366	63,11	36,89
Un-owned Collaborative JCR Indexed Articles and Reviews	811	50,31	49,69

*\*JCR Indexed*

2023	Total	% Intra-Institute Documents
<b>Intra-Institute Publications</b>	633	40,04
Owned Intra-Institute Publications	339	53,55
Un-owned Intra-Institute Publications	294	46,45
<b>Intra-Institute Originals</b>	498	31,50

Un-owned Intra-Institute JCR Indexed Articles and Reviews	267	49,44

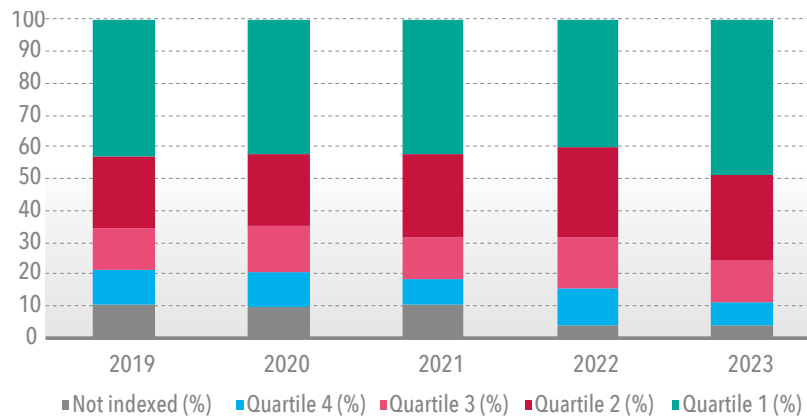

*\*JCR Indexed*

In the year 2023, the production of scientific activity has been maintained with respect to the growth of previous years. The importance of the work of our researchers can be seen in the fact that almost half of the documents have been published (48.77%) in the most relevant journals of their thematic category.

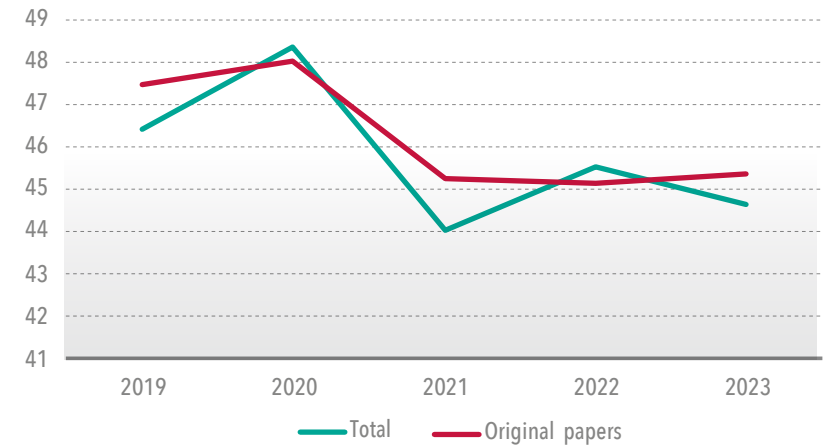

Distribution of publications by quartile 2019-2023

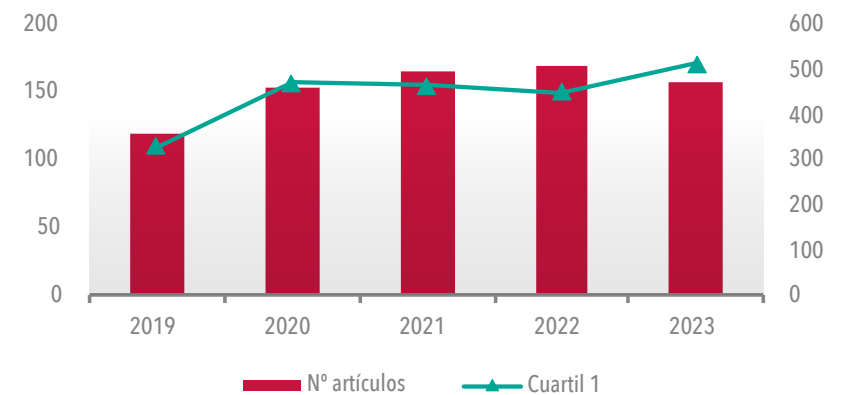

Distribution of originals by quartile 2019-2023

Papers with international collaboration between 2019-2023

Owned originals between 2019-2023

## 2.1.2 Annual Accounts

In accordance with the Law 19/2013, of December 9th, of transparency, access to public information and good governance, the Foundation for Biomedical Research of La Paz University Hospital (FIBHULP) makes their information public, with the objective of guaranteeing institutional transparency:

<b>SURPLUS FOR THE FINANCIAL YEAR</b>	<b>169.614,93</b>	<b>75.730,06</b>

In 2023, the foundation –FIBHULP- received a Nominative Transfer of the *Consejería de Sanidad de la Comunidad de Madrid* in favor of charging the 312D program “Biomedical Research Foundations”, to fund the following items:

- Researchers and personal of support of the I3, I3SNS, Miguel Servet I, Miguel Servet II, Río Hortega, Sara Borrell, Juan de la Cierva, Marie Skłodowska-Curie, and Juan Rodés Programs.
- Intensification Programs of health professionals.
- Activities of promotion and dissemination research and scientific culture.
- Accreditations of the research activity.
- Support to the Technical Units or Platforms for Research and Management of R+D+i

During the year 2023, IdiPAZ has signed with private public entities the numbers of contracts detailed below:

**Agreements: 81**  
**Service contracts: 18**  
**Sponsorship contracts: 52**  
**Training contracts: 11**

The main entities with which these contracts have been signed are:

Organization	Nº Agreements
AJL Ophthalmic S.A.	1
Alcon Healthcare S.A.	1
Alexion Pharma Spain S.L	2

### EQUALITY, DIVERSITY AND CONFLICT RESOLUTION COMMISSION

**Members**

- María Quintanar Jaime. *FIBHULP representative*
- Paloma Gómez Campelo. *FIBHULP representative*
- Aitana López Redondo. *FIBHULP representative*
- Nuria Vilaboa Díaz. *Employee's representative of FIBHULP*
- Juan Ángel Fresno Vara. *Employee's representative of FIBHULP*
- Sara García Barcenilla. *Employees's representative*

23th July of 2019, we decided to join as the Equality and Diversity Committee in the Foundation for Bio-medical Research of La Paz University Hospital (FIB-

HULP) because we think it is important to improve equality in the community respecting the differences, and to contribute to their promotion in science.

In a short period, this committee has achieved significant results:

- Protocol for the prevention of and action against discriminatory harassment, moral and sexual harassment and harassment based on gender
- II Equality and Diversity Plan (2022-2026)
- I Equality and Diversity Plan (2020-2024)
- Preventing and dealing with situations of internal conflict, violence and harassment in Bio-medical Research Foundations
- Action Protocol for the prevention, detection and action in situations of harassment due to sexual orientation, gender identity, gender expression or sexual characteristics in the Bio-medical Research Foundations of the health institutions attached to the SERMAS.

In addition, in December 2019, FIBHULP/IdiPAZ

signed the diversity charter, the initiative of the *Fundación Diversidad* - of the European Institute of Diversity Management and the Alares Foundation with the support of the Spanish Ministry of Equal Opportunities, added at the European diversity Charter.

By signing this document, IdiPAZ/FIBHULP assumes the guidelines of its Decalogue of principles:

1. To sensitize employees in line with the values of equal opportunities and respect for diversity.
2. To advance in the construction of a diverse workforce
3. To promote the inclusion in the workplace
4. To consider policies to promote diversity in the workplace
5. To promote of work-life balance for employees
6. Recognition of the diversity of clients
7. To communicate the compromise around these principles to the employees.
8. To communicate the compromise around these principles to the suppliers.
9. To communicate the compromise around these principles to the public administrations, business organizations, trade unions and other stakeholders.
10. To highlighting activities in support of non-discrimination -and their results- in its Annual Report.

### COMMISSION FOR HUMANIZATION AND SOCIAL AND SCIENTIFIC RESPONSIBILITY

#### President

Paloma Gómez Campelo. *Deputy Director of IdiPAZ - CSR, SDGs and Agenda 2030 Coordinator of IdiPAZ/FIBHULP*

#### Vice President

Manuel Arellano Armisen. *Second Vice-President of the Platform of Patients' Organizations, Vice-President of the ALCER National Federation and member of the Board of the European Patients' Forum.*

#### Members

Ana Coloma Zapatero. *Director of FIBHULP*  
 María Quintanar Jaime. *FIBHULP Human Resources Department - Head of CSR of IdiPAZ/FIBHULP*  
 Ana Cristina García Álvarez. *Deputy Director of continuity of Care representative of the HULP Humanitazation Commission*  
 Sara Gusi Gil. *Environmental Management Technician. HULP representative*  
 Gloria García. *District Council representative*  
 Laura Carrillo. *Representative of patient associations. NUPA Coordinator*  
 Shona Brown. *British embassy representative*

#### Secretary

Aitana López Redondo. *Responsible for SDGs and Agenda 2030 at IdiPAZ/FIBHULP*

#### Contact

[RSC@idipaz.es](mailto:RSC@idipaz.es)

IdiPAZ/FIBHULP has the certification of Corporate Social Responsibility through the IQNet SR10 standard, within the Integrated Management System of the Hospital Universitario La Paz.

In addition, we are working on joining the commitment to the Sustainable Development Goals defined by the United Nations, which includes 17 goals and 169 targets, including new areas such as climate change, economic inequality, innovation, sustainable consumption, peace and justice, among other priorities. To this end, we are working to establish a model that includes the SDGs and we have defined a survey to establish those aspects that are most relevant to our institution.

Thereby, we are immersed in a process of integration of the Sustainable Development Goals and that is why, through the Commission for Social and Scientific Responsibility of IdiPAZ, we have launched the project.

### HEALTH AND SAFETY COMMITTEE

#### Compostion

Gema Vallés Pérez. *FIBHULP Representative/ President*  
 Sara Fernández Morata. *FIBHULP Representative*  
 Estela Sánchez Simón. *FIBHULP Representative*  
 Laura Saldaña Quero. *Risk Prevention Delegate/Secretary*  
 Berta Rodés Soldevilla. *Risk Prevention Delegate*  
 F. G. G. *Prevention delegate*

#### Labour Risk Prevention of IdiPAZ

Aitana López Redondo. *Head of Labour Risk Prevention*  
 Sergio Palomero Lorente. *Prevention Technician*  
 Sonsoles Bedia Olmeda. *Prevention Technician*

#### External Prevention Service

Olivia Barcón Minchán  
*External prevention technician: EMESA Prevención*

**Complement Defects in Human Pathology**

Directors: Margarita López Trascasa  
 Pilar Sánchez-Corral Gómez

**Lymphocyte Pathophysiology in Immunodeficiencies**

Director: Eduardo López Granados

**Drug Hypersensitivity and Innate Immune Response**

Director: Teresa Bellón Heredia

**Immunomediate Gastrointestinal Diseases and other Digestive Pathologies**

Director: María Dolores Martín Arranz

**MicroRNA Regulation of Immune Tolerance, Autoimmunity and Cancer**

Director: Alicia González Martín

### Large System Pathology Area

**Coordinator:** Francisco García Río

#### Internal Medicine and Systemic Diseases

Director: Francisco Arnalich Fernández

#### Organic Dysfunction and Failure in the Aggression

Director: José Manuel Añón Elizalde

#### Respiratory Diseases

Directors: Francisco García Río  
Carolina Cubillos Zapata

#### Regulation of Gene Expression and by Hypoxia

Director: Luis del Peso Ovalle

#### Nephrology

Director: María Gemma Fernández Juárez

#### Diagnosis and Treatment of Allergic Diseases

Director: Santiago Quirce Gancedo

#### Patient Blood Management

Director: Manuel Quintana Díaz

#### Health Care Nurses Research

Director: Esther Rey Cuevas

#### Emergency and Critical Pathology

Director: Alejandro Martín Quirós

#### Hospital Pharmacy

Director: Alicia Herrero Ambrosio

#### Translational Hepatology

Director: Francisco Javier  
García-Samaniego Rey

### Cancer and Human Molecular Genetics Area

**Coordinator:** Javier de Castro Carpeño

#### INGEMM- Institute of Medical and Molecular Genetics

Director: Pablo Lapunzina Badía

#### Translational Oncology

Director: Jaime Feliú Battle

#### Experimental Therapies and Biomarkers in Cancer

Directors: Olga Vera Puente

#### Oto-Neurosurgery Research

Director: Luis Lassaletta Atienza

#### Cancer Molecular Pathology and Therapeutic Targets

Director: David Hardisson Hernández

#### Mechanisms of Tumour Progression

Director: José Manuel González Sancho

#### Research and Diagnosis of Inherited Metabolic Diseases

Director: María Belén Pérez González

#### Dyslipemias of Genetic Origin and Metabolic Diseases

Director: Sonia Rodríguez Novoa

#### Human Genetic Variability

Director: Ana Fernández Santander

### Surgery, Transplant and Health Technologies Area

**Coordinator:** Nuria Vilaboa Díaz

#### Bone Pathophysiology and Biomaterials

Director: Nuria Vilaboa Díaz

#### Cellular Engineering

Director: María Paz de Miguel González

#### Clinical Pharmacology

Director: Antonio J. Carcas Sansuán

#### Osteoarticular surgery research - gicoa

Director: Enrique Gómez Barrena

#### Translational research in maxillofacial surgery and head and neck cancer

Directors: José Luis Cebrián Carretero  
Ana Sastre Perona

#### Patients Safety and Quality Research

Director: Elena Ramírez García

#### Translational Research and Innovation in General and Digestive Surgery

Director: Constantino Fondevila Campo

### Maternal Infant Child and Youth Research

**Coordinator:** Cristina Calvo Rey  
Antonio Pérez Martínez

#### Neonatology

Director: Adelina Pellicer Martínez

#### Molecular Hepatology

Directors: Paloma Jara Vega  
Loreto Hierro Llanillo

#### Maternal and Fetal Medicine

Director: José Luis Bartha Rasero

#### Pediatric Respiratory, Systemic and Neurological Infections & Host Immune Response

Director: Cristina Calvo Rey

#### Pediatric Systemic Infections; HIV, tuberculosis, Imported and Emergent Diseases

Director: Talía Sainz Costa

#### Translational Research in Pediatric Oncology, Hematopoietic Transplantation and Cell Therapy

Director: Antonio Pérez Martínez

#### Congenital Malformations and Transplantation

Director: Francisco Hernández Oliveros

#### Research in Endometriosis

Director: Alicia Hernández Gutiérrez

#### \*Research on Comprehensive Care for Transplanted Children and Adolescents

Directors: María Jesús Pascau González-Garzón,  
Luz Yadira Bravo Gallego

#### \*Food oxidative stress and cardiovascular health

Director: Silvia M. Arribas Rodríguez

*\*Group recently created, December 2023*

### Multidisciplinary Research in Healthy Aging

**Coordinator:** Rocío Menéndez Colino

#### Aging and fragility in the elderly

Director: Rocío Menéndez Colino

#### Frailty and healthy aging

Director: Leocadio Rodríguez Mañas

#### Frailty, multimorbidity patterns and mortality in the elderly population residing in the community

Director: Miguel Ángel Salinero Fort

### PUBLIC RESEARCH CONTRACTS

### Researcher profile

The following graphs show the classification of IdiPAZ researchers according to the EURAXES regulations proposed by the European Union. In addition, in the following image we can see the evolution of this classification that has occurred in the last year.

Euraxess researcher profile

## 2.3 Training Report and Teaching

Some of the goals of IdiPAZ are to generate knowledge, to train specialists in the biomedical, to promote research and to transfer the knowledge not only to clinical practice but the society too.

### 2.3.1. Doctoral Theses

In 2023, 71 Doctoral Theses have been read and/or supervised by IdiPAZ researchers, and 6 of them was thesis with **International Doctorate mention** ★.

Doctoral Student	Title	Directors	University
Alén Alonso, Rosa María	Vesículas extracelulares de tamaño pequeño derivadas de hepatocitos en el interactoma intrahepático e hígado-páncreas en el contexto de la enfermedad de hígado graso no alcohólica	Martínez Valverde A, García Martínez I	UAM
Alonso López P	Evolución pulmonar, cardiológica, ponderoestatural y neurológica de los adolescentes prematuros moderados y tardíos en comparación con los recién nacidos a término	García García ML	UAX
Álvarez Ortega, Carlos Antonio	Predictores biofísicos de eficacia del procedimiento de aislamiento de venas pulmonares mediante criobalón: Análisis del estudio RECABA	Peinado Peinado R,	UAM
Angelès Fité, Martina Aïda	Papel de la cirugía en el cáncer de ovario avanzado	Hernández Gutiérrez MA, Martínez Rodríguez-Marín A	UAM
Arriaza Schiller, Karem Fabiola	Alteración en las vías moleculares del zinc en el circuito cardiopulmonar derecho, en condiciones de hipoxia hipobárica	Arribas Rodríguez SM, Siqués Lee P	UAM
Arribas Carreira, Laura	Implicaciones del metabolismo de la glicina en la salud y la enfermedad humana: Hiperglicemia no Cetósica, una enfermedad con fenotipo clínico neurológico	Rodríguez Pombo P,	UAM
Ballesteros Martínez, Constanza	La prostaglandin E sintasa microsomal-1 participa en las alteraciones metabólicas, cardiovasculares y renales asociadas a la obesidad.	Briones Alonso AM, Salaices Sánchez M	UAM ★
Barcia Aguilar, Cristina	Factores asociados a las secuelas a largo plazo en el estatus epiléptico refractario pediátrico.	Pascual Pascual SI,	UAM
Boldó Roda A	Análisis y resultados en el cambio del paradigma del tratamiento de cancer de ovario avanzado	Domingo del Pozo S, Hernández Gutiérrez A	Universitat de Valencia
Boria Alegre, Félix	Papel del 18F-FDG PET/TC preoperatorio en la evaluación de la resección completa en la cirugía citorreductora primaria de cáncer de ovario. Desarrollo de un modelo predictivo.	Zapardiel Gutiérrez I, Chiva de Agustín L	UAM
Caballero Mora MA	Papel de la marcha y equilibrio en sujetos ancianos (70-79 años) y muy ancianos (>80 años)	Rodríguez Mañas L	UE
Celis Ruiz, Elena de	Terapia reparadora cerebral con células troncales alogénicas derivadas de tejido adiposo en el ictus isquémico	Díez Tejedor E, Fuentes Gimeno B	UAM

## 2. Executive summary

### 2.3. Training Report and Teaching

Doctoral Student	Title	Directors	University
Condorhuamán Alvarado, Patricia Ysabel	Utilidad de los indicadores de calidad del registro nacional de fracturas de cadera para mejorar la atención de los pacientes con fractura de cadera en España	Gutiérrez Misis A, González Montalvo JI	UAM
Consuegra Fernández, Irene	Estudio de miRNAs en pacientes pediátricos infectados por VIH-1 por transmisión vertical y su papel como potencial biomarcador de progreso de la enfermedad y seguimiento del tratamiento. papel decisivo de los biobancos.	Mellado Peña MJ, Muñoz Fernández MA	UAM
Da Silva Ferreira, Vítor Manuel	La modulación de AMPK y de JNK1 en el hipotálamo por Olanzapina controla el balance energético y la lipogénesis hepática: beneficios adicionales de la inhibición de PTP1B.	Martínez Valverde A, Rada Llano P	UAM
Díaz González, Francisca	Caracterización funcional de variantes en los genes PRKG2 e IHH: Implicación en la etiología de nuevas displasias y fenotipos esqueléticos.	Heath KE,	UAM
Duyos Mateo, Inmaculada	Exitus de un gemelo en la gestación monocorial. Predicción de daño cerebral y resultados perinatales en el gemelo superviviente	de la Calle Fernández-Miranda M, Antolín Alvarado E	UAM
Eguibar González, Aritz	Marcadores de desmineralización ósea asociados a riesgo cardiovascular en pacientes con cáncer de próstata. Efecto de 5β-dihidrotestosterona en la disfunción vascular asociada a privación androgénica	Ferrer Parra M, Gómez Rivas J	UAM
Elizagaray García, Juan Ignacio	Distinguiendo entre pacientes con migraña crónica y cefalea tensional crónica a través de la exploración somatosensorial y musculoesquelética cervical.	Gil Martínez A,	UAM ★
Eyasu Belete M	Práctica de automedicación con antibióticos en pacientes adultos, con sospecha de infección del tracto urinario (ITU), de Addis Abeba (Etiopía)	Romero Garrido JA, Martín-Aragón Álvarez S, Benedí González J	UCM ★
Felipe Mendía, Raquel	Regulación y modificación del transportador de glicina GlyT2	López Corcuera B, Camafeita Fernández E	UAM
Fuente Alonso, Andrea de la	Contribución de las rutas de señalización canónica y no canónica del NO a la enfermedad aórtica en el síndrome de Marfan	Campanero García MR, Juan Miguel Redondo Moya	UAM
Gámez Chiachio, Manuel	Implicación dual de GSDMB en la biología del cáncer: desde la resistencia a la terapia anti-HER2 hasta la inducción de la muerte celular	Moreno Bueno G, Sarrío López JD	UAM
García Ezquiaga J	Prevalencia e incidencia de alergia alimentaria en población española	García García ML	UAX
García Mato, Ángela	Mecanismos moleculares implicados en la regulación de la homeostasis coclear. Papel del IGF-1 y de la G6PD	Varela Nieto I, Rodríguez de la Rosa L	UAM
García Romero, María Del Mar	Estudio de una cohorte de pacientes con enfermedad de Lesch Nyhan: valoración clínica y manejo terapéutico de las complicaciones neurológicas.	Pascual Pascual SI,	UAM
Gasior Kabat, Mercedes	Trasplante de progenitores hematopoyéticos con purgado de células CD45RA+ e inmunoterapia adoptiva con Linfocitos T CD45RO+ y células Natural Killer en pacientes pediátricos con hemopatías malignas y no malignas	Pérez Martínez A, de Paz Arias R	UAM
Gil García, Ana Isabel	Análisis genético y funcional del antígeno de superficie del virus de la hepatitis B aislado de pacientes antígeno e negativo en la zona gris de tratamiento.	Madejón Seiz A, García-Samaniego Rey J	UAM
Gómez García, Lara María	Factores pronósticos con impacto en la supervivencia de pacientes pediátricos con leucemia aguda mieloblástica y síndrome mielodisplásico sometidos a trasplante de progenitores hematopoyéticos	Pérez Martínez A, Díaz Pérez MA	UAM
González Carnicero Z	Regulación por Nrf2 de la inflamación vascular y el estrés oxidativo inducidos por IL-1beta en células de músculo liso vascular. Relación con TLR	Martín Cortés A, Hernanz Martín R	URJC ★
Guerrero Camacho, Raisa de los Ángeles	Análisis de resultados de dos protocolos terapéuticos en pacientes con hemofilia adquirida A en un hospital terciario.	Jiménez Yuste VM, Álvarez Román MT	UAM

Doctoral Student	Title	Directors	University
Guillo Moreno, Verónica	Estudio de nuevos protocolos de Maniobras de Reclutamiento Pulmonar en un modelo experimental neonatal con Síndrome de Distrés Respiratorio Agudo.	García Fernández J, Gilsanz Rodríguez F	UAM
Haro Martínez, Ana María	Terapia de Entonación Melódica en el tratamiento de la afasia postictus. Adaptación al idioma español y análisis de eficacia	Díez Tejedor E, Fuentes Gimeno B	UAM
Hernández Alonso, Judith	Evaluación del impacto de la pandemia de COVID-19 en la mujer gestante. Análisis de la salud mental perinatal y ajuste psicológico	Armijo Suarez OM, de la Calle Fernández-Miranda M	UAM
Herrero Fernández, Beatriz	La lamina A/C como modulador de la respuesta inmune mieloide en el contexto de infecciones virales y enfermedad inflamatoria intestinal	González Granado JM, Arribas Rodríguez SM	UAM
Juárez Vela, Raúl	Gestión de la Sangre del Paciente Crítico en las Unidades de Medicina Intensiva de España	Quintana Díaz M, Quintana Díaz M	UAM
Laso García, Fernando	Vesículas extracelulares y su contenido proteico como efectores de recuperación en un modelo preclínico de hemorragia intracerebral	Alonso De Leciñana Cases M, Gutiérrez Fernández M	UAM
Lastra Martínez, Diego	Análisis de la función del factor de transcripción NRF2 en la progresión tumoral.	Escoll Guerrero MI, Cuadrado Pastor AC	UAM
Leblic Ramírez, Israel	Diseño, implantación y resultados de un equipo multidisciplinar de accesos vasculares para hemodiálisis	Selgas Gutiérrez R, Riera del Moral LF	UAM
López Ruiz, María Elena	Ultraestadificación molecular del ganglio centinela en carcinoma de endometrio mediante método OSNA (One-Step Nucleic Acid Amplification)	Hardisson Hernaez D,	UAM
Mariscal Aguilar, Pablo Marcial	Relación entre los niveles de contaminación atmosférica con la historia natural y mortalidad de la fibrosis pulmonar idiopática	Gomez Carrera L, Álvarez-Sala Walther R	UAM
Marques Mejias, María Andreina	Broncoespasmo y urticaria aguda en el departamento de urgencias pediátricas: características, manejo e impacto de los factores ambientales.	Quirce Gancedo SE,	UAM
Martín Montes, Ángel	Implicación del metabolismo del colesterol en la patogenia de la enfermedad de Alzheimer	Frank García A, Bullido Gomez-Heras MJ	UAM
Martín Palumbo, Giovanna	Relación entre factores angiogénicos y evaluación de la entrada vascular placentaria en el embarazo normal y patológico	Antolin Alvarado ME, Bartha Rasero JL	UAM
Martín Prieto, Libertad	Utilidad de un programa de tratamiento de Biofeedback electromiográfico y Electroestimulación endoanal para pacientes con Incontinencia Fecal	Pascual Miguelañez I, Fernández Cebrián JM	UAM
Meijón Ortigueira, María del Mar	Profilaxis primaria personalizada en hemofilia a grave	Jiménez Yuste VM, Álvarez Román MT	UAM
Migdan , Carmen Mihaela	Resultados perinatales en pacientes con cribado combinado de primer trimestre para aneuploidias patológico y cariotipo normal.	Bartha Rasero JL, Lerma Puertas D	UAM
Miranda Poma, Jesús	Validación de un modelo predictivo basado en la expresión de micrnas (BIO-MIR), para determinar el riesgo de recurrencia en pacientes con carcinoma renal de células claras en estadio temprano tratados con nefrectomía radical o parcial	Pinto Marín A, Gamez Pozo A	UAM
Montero Ruiz, Santiago	Aplicabilidad, seguridad y eficacia de una intervención basada en mindfulness, en pacientes portadores de desfibrilador automático implantable: estudio piloto aleatorizado	Rodríguez Vega B, Peinado Peinado R	UAM
Moral Cuesta, Debora	Prevención secundaria de fracturas de cadera por fragilidad: descripción del tipo de pacientes y del funcionamiento de una fracture liaison service desde el ingreso en una unidad de ortogeriatría.	Gutiérrez Misis A, Martínez Velilla N	UAM

## 2. Executive summary

### 2.3. Training Report and Teaching

Doctoral Student	Title	Directors	University
Nocete Navarro, Luis	La experiencia de los profesionales de salud mental en el uso de la sujeción mecánica en la Comunidad de Madrid: una investigación cualitativa con personal en formación.	Bravo Ortiz MF, Fernández Liria A	UAM
Orosa Duarte, Álvaro	Eficacia de una intervención digital basada en mindfulness en el desarrollo de empatía y autocompasión en estudiantes de ciencias de la salud	Rodríguez Vega B, Bayon Pérez C	UAM
Palpán Flores, Alexis Junnior	Evaluación de la supervivencia del Glioblastoma IDH no mutado con métodos de estadística multivariante y algoritmos de inteligencia artificial, basados en su presentación clínica, histológica, imagen de resonancia magnética, volumetría tumoral y espectroscopía ex vivo.	Roda Frade JM, Cerdan García-Ballester S	UAM
Pascual Antón, Lucía	La transición mesotelio-mesénquima como diana terapéutica común para el tratamiento de las adhesiones peritoneales postquirúrgicas y la metástasis peritoneal.	Sandoval Correa P, López Cabrera M	UAM
Puente Santamaría, Laura	Un abordaje computacional a la regulación transcripcional en respuesta a hipoxia	Peso Ovalle L,	UAM
Ramón Ortiz, Carmen Julia de	Papel de los biomarcadores plasmáticos en el síndrome de obstrucción sinusoidal tras el trasplante de células madre hematopoyéticas	Jiménez Yuste VM,	UAM
Roca Cabau, Mireia Ariadna	Evolución del tratamiento del retinoblastoma en las últimas décadas en un hospital terciario español.	Peralta Calvo J,	UAM
Rocamora González, Cristina	Eficacia de una intervención basada en mindfulness a través de una aplicación móvil en calma en el quirófano para personas en espera de cirugía colorrectal: ensayo clínico aleatorizado.	Rodríguez Vega B, Palao Tarrero AI	UAM
Rodríguez Cobo, Ana	Tromboembolismo pulmonar subsegmentario. Prevalencia, características, evolución y pronóstico	Fernández Capitan MC,	UAM
Romero López, María del Mar	Metabolismo pulmonar en el modelo de nitrofen de la hernia diafragmática congénita	Martínez Martínez L, Peiró Ibáñez JL	UAM
Rosillo Rodríguez, Sandra Ofelia	Neumonía de inicio precoz y tardío en pacientes con parada cardíaca tratados con control de la temperatura corporal: Factores relacionados con el riesgo y el pronóstico	López-Sendon Hentschel JL, López De Sa Areses E	UAM
Segovia Falquina, Cristina	Generación de una plataforma de análisis funcional de variantes en PMM2 con fines diagnósticos y terapéuticos	Pérez González MB, Gamez Abascal MA	UAM
Sendra Ortola, Miquel	La secuencia espacio-temporal de la especificación del miocardio y del endocardio en el tubo cardíaco primitivo de mamíferos.	Torres Sánchez M,	UAM
Serrano Díaz Del Campo, Lucía	Mediadores proresolutivos como posible estrategia terapéutica frente al daño cardiovascular en hipertensión	Briones Alonso AM, Salaices Sánchez M	UAM ★
Tejera Muñoz, Antonio	El factor 2 de la red de comunicación celular (CCN2) ejerce un papel esencial en el mantenimiento de la estructura y las respuestas vasculares de la aorta en ratones.	Ruiz Ortega M, Rodrigues Díez R	UAM
Triana Junco, Paloma Elena	Sirolimus en el Tratamiento de las Anomalías Vasculares.	López Gutiérrez JC,	UAM
Triana Pascual, María Ángeles Elia	Calidad de la voz cantada en sopranos, influencia del texto y el acompañamiento musical.	Gavilan Bouzas J, García López I	UAM
Udaondo Gascón, Clara Isabel	Infecciones en niños con artritis idiopática juvenil y comparación con niños sanos.	Calvo Rey C, Núñez Cuadros E	UAM
Valcárcel Hernández, Víctor	Desentrañando los mecanismos de la enfermedad, desarrollando modelos preclínicos y estrategias terapéuticas dirigidas a la deficiencia de MCT8	Guadaño Ferraz AC, Bárez López S	UAM
Vilas Lagoa, Alicia	Desarrollo de modelos con fines diagnósticos y terapéuticos para la deficiencia de fosfomanomutasa 2.	Pérez González MB,	UAM ★
Wang, Ting	Distribución de los transportadores de hormonas tiroideas MCT8 y OATP1C1 en los ganglios basales de humano y macaco.	Guadaño Ferraz AC, Rausell Tamayo E	UAM

### 2.3.2 Master Theses

In 2023, 31 Master Theses have been read and/or supervised by IdiPAZ researchers

Student	Title	Director	University
Martín Martínez I	Design and implementation of a system for the automation of the Fugl Meyer Assessment scale in stroke patients	Larraga García B, Alonso de Leciñana M	UPM
Yagüe Novoa N	Design and implementation of a virtual reality platform for upper limb rehabilitation using a haptic robot	Larraga García B, Alonso de Leciñana M	UPM
Debasa Mouce M	6-MSITC (wasabi-isocyanate) as a modulator of NRF2 and protector against taupathy	García Yagüe AJ, Cuadrado Pastor A	UAM
Pérez Cuervo A	Role of the innate immune system in the progression of human and experimental cardiovascular disease	Fernández Velasco M	UAM
Saez de Buruaga Corrales E	Estudio de localización y desplazamiento esofágico mediante contraste en ablación de venas pulmonares	Peinado Peinado R	Universidad San Pablo CEU
Ayala More HD	Utilidad del mapa de activación con integración de vectores e información de velocidad para guiar la ablación de taquicardias macroreentrantes auriculares	Peinado Peinado R	Universidad San Pablo CEU
González Ferrero T	Strain auricular izquierdo como predictor de áreas de bajo voltaje en pacientes sometidos a ablación de fibrilación auricular	Peinado Peinado R	Universidad San Pablo CEU
González Estriégana S	Parámetros ecocardiográficos predictores de éxito en la terapia de resincronización cardíaca	Peinado Peinado R	Universidad Católica de Murcia
Jiménez Moreno E	Desarrollo de nuevos ingredientes alimentarios más saludables y sostenibles	Miguel Castro M	UAM
Cuadrado A	Canagliflozin induce anti-inflammatory and anti-senescent effects in human vascular smooth muscle cells and improves endothelial dysfunction in mesenteric microvessels from diabetic mice	Peiro Vallejo C, Sánchez Ferrer CF	UAM
Menéndez Calderón MJ	El cambio de las enfermedades infecciosas: revisión leptospirosis 2016-2021 en un Hospital de segundo nivel	Díaz Menéndez M	Universitat de Barcelona
López Peláez MV	Brote familiar de fiebre Q en ambiente urbano	Díaz Menéndez M	Universitat de Barcelona
Manrique Pérez JM	Miocardiopatía en la enfermedad de Chagas arritmias y su manejo.	Díaz Menéndez M	Universitat de Barcelona
Díaz Menéndez M	Despistaje de Fiebre Hemorrágica de Crimea-Congo. Implementación del diagnóstico de infección protésica compleja. Manejo de PREP e ITS.	Díaz Menéndez M	Universidad de Sevilla
Noblejas Mozo A	Nocardiosis pulmonar en paciente inmunodeprimido tras inducción con rituximab por vasculitis	Díaz Pollán B	Universitat de Barcelona
Carrasco Molina S	Efectividad del tratamiento con Fidaxomicina vs Vancomicina en la Infección por	Díaz Pollán B	Universidad de Alcalá de Henares
Martín Portugués S	Desarrollo de un protocolo de tipificación rápida por MLST, para aislados clínicos de Escherichia coli y Staphylococcus aureus, utilizando la secuenciación masiva por MinION	Dahdouh E	UAM
Tello Durán B	Interacción entre miRNAs, microbiota intestinal y marcadores de inflamación: Caracterización y desarrollo de un pipeline para su aplicación en muestras humanas	González Soltero R	UE
Bravo Robles L	Inmunoterapia oncológica a través de mucosas basada en la memoria inmune innata	del Fresno Sánchez C	UCM
Ochaita Aguado A	Impacto de la quimioterapia en el paisaje inmunológico del cáncer	López-Collazo E; Cueto Rodríguez FJ	UCM
Cueto Rodríguez FJ	Búsqueda de marcadores inmunitarios predictivos en pacientes con sepsis	López Collazo E	Universidad de Granada

Student	Title	Director	University
García Sánchez MR	Impact of FH desialylation on the regulation of the Alternative Pathway and contribution to pathology	Sánchez-Corral Gómez MP, Corvillo Rodríguez F	UCM
González Baños E	Impacto de las partículas volcánicas en patologías respiratorias. Una revisión sistemática.	Behzadi Koochani N	Universidad Camilo José Cela
Lezcano Fernández E	Impacto socioeconómico de la guerra de Ucrania en la población vulnerable por discapacidad. Estudio observacional	Behzadi Koochani N	Universidad Camilo José Cela
López Molina VM	Estudio de la relación entre el microbioma intestinal, los alimentos ultraprocesados y la calidad de la dieta mediante métodos bioinformáticos.	Carrillo de Santa Pau E, Marcos LJ	UAM
Méndez Grande I	Establecimiento de técnicas para la generación de esféroides a partir de células de schwannoma vestibular	Miguel Cosgaya J	Universidad CEU San Pablo
Pardinas del Águila L	Hacia el desarrollo de un estroma corneal biomimético por impresión 3D: comparativa de biomateriales de colágeno I con aplicabilidad clínica	de Miguel González MP	Universidad CEU San Pablo
Caballero Rodríguez S	Estudios de biocompatibilidad in vitro de prótesis estromales corneales biofabricadas por impresión 3D	de Miguel González MP	Universidad CEU San Pablo
Ibáñez Herrera B	Caracterización del papel del gen DUSP1 en la progresión de cáncer escamoso de glándula salival	Sastre Perona A	UCM
Crespo Gómez-Escalonilla A	El ritmo y la percusión como herramienta de cohesión social	del Olmo Barros MJ	UAM
Arjona García A	La Música como herramienta terapéutica con alumnos con problemas de conducta	del Olmo Barros MJ	UAM

### 2.3.3 Final Degree Theses

In 2023, 38 Final Degree Theses have been read and/or supervised by IdiPAZ researchers

Student	Title	Director	University
Maroto Cid Fuentes C	Papel de las vesículas extracelulares derivadas del sistema nervioso en un modelo preclínico de hemorragia intracerebral	Gutiérrez Fernández M	UAM
Schümmer Bengoa P	Desarrollo y análisis de un sistema de movimiento basado en redes neuronales artificiales para la evaluación de la prueba Ledged Beam Walking Test en modelos experimentales murinos de ictus	Gutiérrez Fernández M	UAM
Botella Cruces L	Análisis de las vesículas extracelulares circulantes como biomarcador en pacientes de Esclerosis Múltiple	Otero Ortega L	UAM
Ruiz González A	Diseño e implementación de un sistema de análisis de correlación de datos de imagen, clínicos y cinemáticos en pacientes de ictus agudo	Alonso de Leciana M, Gutiérrez A	UPM
Múgica Estévez M	Desarrollo de un sistema de captura de vídeo basado en técnicas de aprendizaje profundo para el estudio de la cinemática de las manos de pacientes con ictus	Larraga García B, Alonso de Leciana M	UPM
Moldes Castillo R	Diseño e implementación de un sistema para el almacenamiento masivo de datos cinemáticos de la mano en pacientes con ictus	Larraga García B, Alonso de Leciana M	UPM
de Spusa Da Silva A	Diseño e implementación de aplicaciones web para la divulgación y visualización de herramientas de evaluación de pacientes con déficit motor	Gutiérrez A, Alonso de Leciana M	UPM
García Pastor S	Manifestaciones de enfermedad cardíaca en el dúplex carotídeo en pacientes con ictus isquémico	Alonso de Leciana M, Rodríguez Pardo J	UPM
Vázquez Medel A	Caracterización de mutantes de GLYT2 asociados a hiperplexia humana	López Corcuera B	UAM

## 2. Executive summary

### 2.3. Training Report and Teaching

Student	Title	Director	University
Berrojo Armisen A	Análisis del posible efecto neuroprotector del tratamiento con dimetil fumarato en un modelo de demencia frontotemporal TDP-43 dependiente.	Lastres-Becker I	UAM
Sáenz Molina M	Incidencia y factores predictores de fibrilación auricular en el seguimiento de pacientes con cardiopatías congénitas del adulto sometidos a ablación de flutter auricular.	Peinado Peinado R	UAM
Cuevas Carmona E	Tetralogía de Fallot en el adulto: complicaciones arrítmicas en el postoperatorio precoz. Análisis de incidencia, factores de riesgo e implicaciones a corto y medio plazo.	Peinado Peinado R	Universidad Autónoma de Madrid
Albasanz García P	Validación de nuevas técnicas microfluídicas en cámara de flujo para el análisis de trastornos de la hemostasia.	García Arias-Salgado E, Jiménez Yuste VJ	Universidad Politécnica de Madrid
Loeches Rivero JC	Valoración anatomopatológica de los efectos de un hidrolizado de quinua con actividad antioxidante y antihipertensiva en ratas espontáneamente hipertensas	José Uranga AJ, Miguel Castro M	UAH-URJC-CIAL
Vidal Liscano AC	Importancia de la nutrición en el deportista con diagnóstico de diabetes tipo 1	Briones Alonso AM, González Blázquez R	UAM
Díez Benítez I	Efectos de la alimentación vegetariana en el rendimiento deportivo	García Redondo A, Blanco Rivero J	UAM
García Monedero S	Efecto de la diabetes tipo 1 en el rendimiento deportivo de un futbolista. Mejora del rendimiento a través de la alimentación.	García Redondo A, Blanco Rivero J	UAM
Merino González S	Selección por antibióticos de mutantes de porinas en enterobacterias	Mingorance Cruz J	UAM
Muñoz García M	El papel de la dieta en el Síndrome del Intestino Irritable	Menéndez Gómez C	UAM
Redondo Lois L	Implicaciones del SIBO en la absorción de nutrientes	Menéndez Gómez C	UAM
Zapata G	Caracterización inmunológica de la respuesta a crioblación en pacientes con cáncer de mama	del Fresno Sánchez C	UAH
Guitierrez M	Estudio de células híbridas humanas resultado de la fusión entre monocitos y células madre tumorales derivadas de adenocarcinoma de colon	López Collazo E	Universidad Politécnica de Madrid
Linares Reyes SC	Regulación de la expresión de IL15 e IL15RA en fibroblastos de piel: Relevancia para el tratamiento de pacientes con Síndrome de Stevens-Johnson /necrolisis epidérmica tóxica.	Bellón Heredia T	Universidad de la Laguna
Villadangos Reyes L	Regulation of B cell activation by microRNAs	González Martín A	UAM
Abanades Salmeron M	Rol del eje HIF/BHLHE40 en la diferenciación de adipocitos marrones	del Peso Ovalle L	UAM
Barrau Arnedillo J	Prevalencia de caídas y factores asociado en mayores de 64 años	Castell Alcalá MV	UAM
Caballero Lombaña J	Caracterización de la respuesta de células de schwannoma vestibular a agentes senogénicos y senolíticos	Jiménez Lara AM	UAM
Pérez Ruiz I	modelo de daño acústico por ruido blanco de banda ancha en rata	Cediel R, Murillo Cuesta S	UCM
Merlano Castellanos S	Factores predictivos de la función del nervio facial tras la cirugía del schwannoma vestibular	Lassaletta Atienza L, Morales Puebla JM	UAM
González Garnacho I	Estudio de la fisiopatología de la acidemia propiónica en modelos celulares neurales humanos derivados de iPSCs	Richard Rodríguez EM	UAM
Alvera Alonso B	Generación de modelos celulares y evaluación de terapia antisentido para defectos de splicing en enfermedades neurológicas	Ruiz Desviat ML	UAM
García Mesa J	Estudio del carácter oligogénico de la hipercolesterolemia mediante secuenciación masiva de panel customizado y exoma completo	Rodríguez Jiménez C, Rodríguez Novoa S	Universidad Francisco de Vitoria
San Lorenzo A	Regulación de la transición epitelio mesénquima parcial en cáncer oral: el papel de TGFβ y los fibroblastos asociados al cáncer.	Sastre Perona A	UAM
López García I	Identificación de mecanismos de resistencia a quimioterapias en tumores de cabeza y cuello.	Sastre Perona A	UAM
Cubillo Heras P	Bocios grandes ¿factor de riesgo para hipoparatiroidismo postquirúrgico?	Gómez Ramírez J	UAH
Andrés Blanco L	Violencia sexual en adolescentes, ¿cuestión de género?	Echevarría AM, Sainz Costa T	UAM
del Rey G	Virus y sus reservorios: murciélagos	Casas Flechas I, Iglesias-Caballero M	Universidad Complutense Madrid
González B	Diseño y desarrollo de una plataforma para la monitorización y acompañamiento de personas con endometriosis.	Hernández Gutiérrez MA	Universidad Politécnica de Madrid

## 2.3.4 Scientific Training Plan

The Training Committee established a Training Plan, which specifies the training strategy for the institute's human resources and covers the research training needs of their members. Annually it's developed the training offer with several proposals to make up the plan. Also, it's developed a residents training program have been started for residents doctors of the University Hospital La PAZ.

The own training offer is mainly based on a series of transversal courses in research methodology and courses related of the different lines of research.

The plan is complemented by several activities such as conferences, scientific seminars and other activities linked to these areas.

In addition, The Training Committee established a Residents training program for residents of the University Hospital La Paz

**Members:**

**President**  
 Bárbara Martínez de Miguel

**Secretary**  
 Mercedes Ruiz Balibrea

**HULP representative**  
 Alberto Borobia Pérez  
 Ana Martínez Virto  
 Julián Nevado Blanco  
 Talía Sainz Costa

**FIBHULP representative:**  
 Paloma Gómez Campelo  
 María Fernández Velasco  
 Irene Montero Morales  
 Rocío Rosas Alonso  
 Ana Sastre Perona  
 Aitana López Redondo

**UAM representative:**  
 Ana García Redondo

**Employee's representative:**  
 Pilar Sánchez-Corral Gómez

#### 2.3.4.1 Training Program

Title	Coordinator	Dates	Participants
Investigación clínica, REDCap.	Alberto Borobia Pérez	20 <sup>th</sup> - 23 <sup>rd</sup> November	15
Fundamentos de ciencias de datos aplicada a la investigación: Adquisición, manejo y visualización de datos en Microsoft excel	Rocío Rosas y Ana García	16 <sup>th</sup> -17 <sup>th</sup> October	40
Igualdad de oportunidades en la sociedad actual	Paloma Gómez Campelo	3 <sup>rd</sup> -5 <sup>th</sup> October	40
Gestión de grupos de investigación, liderazgo	Mercedes Balibrea	16 <sup>th</sup> ~ 22 <sup>th</sup> May	30
Bioestadística: Programa con 'R'	Alberto Borobia Pérez	2 <sup>nd</sup> - 5 <sup>th</sup> October	30
Divulga tu ciencia	Aitana López e Irene Montero	12 <sup>th</sup> -13 <sup>th</sup> July	30
Objetivos de Desarrollo Sostenible y Agenda 20230 en el ámbito de la investigación	Aitana López Redondo	10 <sup>th</sup> ~ 11 <sup>th</sup> May	29

#### 2.3.4.2 Scientific Seminars

IdiPAZ Scientific Seminars program welcomes renowned researchers and clinical investigators to our Institute to share, discuss and debate latest insights, discovery and next directions in oncology with our students, postdocs and senior faculty from our research groups.

##### Scientific Moderators:

- Eduardo López Collazo
- Ana Sastre Perona
- Carlos del Fresno

## 2. Executive summary

### 2.3. Training Report and Teaching

Research Area	Date	Speaker	Seminar title
 <b>MATERNAL INFANT CHILD AND YOUTH RESEARCH</b>	13 jan	<b>Dr. Luiz Stark Aroeira</b> Postdoctoral Researcher of the "Molecular Hepatology" research group at IdiPAZ.	 <b>"Identification of biological processes with diagnostic potential for liver diseases in childhood."</b>
 <b>SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES</b>	21 jan	<b>José Carlos González Sánchez y Enrique Álvarez Robles</b> Cofundadores y data scientists en Spaik Technologies, S.L.	 <b>"Cómo puedo sacarle partido a la IA en Medicina y en mis proyectos de investigación "</b>
 <b>MATERNAL INFANT CHILD AND YOUTH RESEARCH</b>	27 Jan.	<b>Dra. Adelina Pellicer</b> Jefa de Servicio de Neonatología del Hospital Universitario La Paz y directora del grupo Neonatología de IdiPAZ	 <b>"SafeBoosC: Safeguarding the brains of our smallest infants"</b>
 <b>SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES</b>	03 Feb.	<b>Dra Ana Sastre Perona</b> Investigadora senior y codirectora del grupo de investigación Traslacional en cirugía Maxilofacial y Cáncer de cabeza y cuello de IdiPAZ	 <b>"Identificación de mecanismos de progresión y resistencia a terapias en cáncer de cabeza y cuello"</b>
 <b>SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES</b>	10 Feb.	<b>Marta Cadenas Martín</b> Investigadora Predoctoral , colaboradora del grupo "Ingeniería Celular" de IdiPAZ.	 <b>"Generación de córnea biomimética con células madre mesenquimales de tejido adiposo"</b>

Research Area	Date	Speaker	Seminar title
 <b>SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES</b>	17 Feb.	<b>Dr. Miguel Ángel Bañares</b> investigador del CSIC, <b>Dra. Ana Iglesias</b> investigadora del Instituto de Catálisis y Petroquímica y <b>Dr. Antonio Alcamí</b> investigador del Centro de Biología Molecular Severo Ochoa. <div style="display: flex; flex-direction: column; align-items: center;">    </div>	<b>"Tecnología altamente eficiente para un aire limpio y seguro: desarrollo de purificadores de aire avanzados para inactivar patógenos en aerosoles"</b>
 <b>INFECTIOUS DISEASES AND IMMUNITY</b>	24 Feb.	<b>Dra. Aránzazu Cruz Dalia</b> Universidad Complutense de Madrid Facultad de Medicina Departamento de Inmunología, Oftalmología y ORL	<b>"Mecanismos moleculares que regulan las células linfoides innatas tipo 3 (ILC3s) frente a una infección intestinal"</b>
 <b>CANCER AND HUMAN MOLECULAR GENETICS</b>	10 Mar	<b>Dra. M. Esther Gallardo</b> Investigadora responsable del grupo "Investigación traslacional con células iPS" del Instituto de Investigación Sanitaria Hospital 12 de Octubre, i+12	<b>"Utilización de iPSCs como modelo de enfermedad, aproximación a terapia y mejora diagnóstica "</b>
 <b>CARDIOVASCULAR</b>	17 Mar.	<b>Dra. María Fernández Velasco</b> Investigación En Cardiología Clínica YTraslacional - Iccit-Paz	<b>"Lipoxinas, unas nuevas herramientas terapéuticas en la enfermedad cardiovascular "</b>
 <b>NEUROSCIENCES</b>	24 Mar	<b>Dra. Eva de Lago Femia</b> Directora del Instituto Investigación en Neuroquímica, Profesora titular del dpto. de Bioquímica y Biología Molecular de la Universidad Complutense de Madrid	<b>"Neuroprotective strategies based on ECS modulation in ALS and FTD"</b>

Research Area	Date	Speaker	Seminar title
 <b>MATERNAL INFANT CHILD AND YOUTH RESEARCH</b>	14 Apr.	<b>Dr. Antonio Pérez Martínez</b> Director del grupo de Investigación Traslacional en Cáncer Infantil, Trasplante Hematopoyético y Terapia Celular de IdiPAZ.	 <b>"Terapia celular para enfermedades causadas por virus: Resultado del ensayo clínico fase 2 randomizado para evaluar la eficiencia de la infusión de linfocitos T memoria como terapia adoptiva para enfermos de COVID-19 (RELEASE)"</b>
 <b>MATERNAL INFANT CHILD AND YOUTH RESEARCH</b>	28 April	<b>Dr. Francisco Hernández Oliveros</b> Director del grupo de Investigación 'Malformaciones congénitas y trasplante' de IdiPAZ.	 <b>'Trasplante combinado de órgano sólido y hematopoyético para inducir tolerancia'</b>
 <b>NEUROSCIENCES</b>	2 Jun.	<b>Dra. Isabel Lastres-Becker</b> Profesora titular de la Universidad Autónoma de Madrid.	 <b>"CX3CR1-deficient microglia shows impaired signalling of the transcription factor NRF2: Implications in tauopathies"</b>
 <b>CARDIOVASCULAR</b>	9 Jun.	<b>Dra. Esther Pérez David</b> Jefa de sección de Imagen cardíaca del Hospital Universitario La Paz e investigadora del grupo de investigación en cardiología clínica y Traslacional de IdiPAZ.	 <b>'Utilidad de biomarcadores de fibrosis miocárdica en el diagnóstico y evaluación del riesgo de cardiopatías'</b>
 <b>SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES AREA</b>	23 Jun.	<b>Dra. Bricia López Plaza</b> Coordinadora de la Plataforma de Alimentación, Nutrición y Salud de IdiPAZ.	 <b>'La miraculina y la percepción del sabor en el estado nutricional de pacientes oncológicos en tratamiento activo que presentan desnutrición'</b>
 <b>INFECTIOUS DISEASES AND IMMUNITY</b>	1 Dec.	<b>Dr. Carlos del Fresno</b> Investigador postdoctoral del grupo de investigación "Respuesta Inmune Innata" de IdiPAZ	 <b>Inmunidad entrenada, ampliando fronteras en vacunación.</b>
 <b>CARDIOVASCULAR</b>	15 Dec.	<b>Dr. David Sancho</b> Jefe de grupo en el Centro Nacional de Investigaciones Cardiovasculares (CNIC).	 <b>"Historias de metabolismo, inmunoterapia y microbiota"</b>

#### 2.3.4.3. Scientific Clinical Sessions-Hospital Universitario La Paz

FECHA	TEMA	PONENTES	MODERADORES
11/01/2023	Varón de 75 años con adenocarcinoma renal multitratado y neumonía fúngica	Ana Pertejo Fernández (S. Oncología médica), Gabriela Barrios Millán (S. A. patológica)	Jaime Feliu (S. Oncología médica), M <sup>a</sup> Carmen Glez García (S. Anatomía patológica)
18/01/2023	Sangre: ¿necesaria, imprescindible y suficiente?	Irene Iniesta (B. Sangre), Ana Kerguelen (S. Hematología), Manuel Quintana (S. M.intensiva)	Aurora Viejo (S. Hematología), Manuel Quintana (S. Medicina intensiva)
25/01/2023	La artritis reumatoide: desde el inicio al fin	Laura Nuño (S. Reumatología), M <sup>a</sup> Eugenia Miranda (S. Reumatología), Chamaida Plasencia (S. Reumatología), Marta Novella (S. Reumatología), Isabel Castillo (S. Farmacia)	Alejandro Balsa (S. Reumatología)
01/02/2023	La Paz: 25 años liderando el Point-of-Care Testing. Expectativas de futuro	Paloma Oliver (S. Análisis clínicos), Ruth Gaspar (S. Endocrinología), Rosario Torres (S. Urgencias), Dolores Elorza (S. Neonatología)	Antonio Buño (S. Análisis Clínicos), Pilar Fernández Calle (S. Análisis Clínicos)
08/02/2023	Abordaje multidisciplinar de la malformación anorrectal y su transición a adultos	Alejandra Vilanova (S. Cirugía pediátrica), Mar Muñoz (S. Ginecología), Virginia Amesty (S. Urología ped), Isabel Pascual (S. Cirugía general).	Juan Carlos López (S. Cir. pediátrica)
15/02/2023	Toma de decisiones en paciente geriátrico con demencia avanzada	Araceli Menéndez (S. Med. interna), Francisca G <sup>a</sup> Iglesias (S. Med.interna), Aranzazu Castellanos (U.Paliativos), Angélica Rivera (S. Urgencias)	Alberto Alonso Babarro (U.Cuidados paliativos, C. Ética asistencial), Rosario Torres Santos- Olmos (S. Urgencias, C. Ética asistencial)
22/02/2023	Comité de Microangiopatía Trombótica. Un modelo de multidisciplinariedad	Begoña Rivas (Nefrología), Rubén Gómez (Análisis clínicos), Pilar Nozal (Inmunología), Marta Morado (Hematología), Elena Martín Boado (Ginecología), David Bueno (Oncología infantil), Alejandro Zarauza (Nefrología infantil), Luis González del Valle (Farmacia hospitalaria)	Paloma Dorao (C. intensivos pediátricos)
01/03/2023	Nódulo pulmonar en paciente de 41 años con antecedentes neoplásicos	M <sup>a</sup> Elena Corpa (S. Cirugía torácica), Víctor Macarrón Aguilera (S. Anatomía patológica)	Prudencio Díaz-Agero (S. Cirugía torácica), Carmen Glez García (S. Anat. patológica)
08/03/2023	Estudio de la experiencia del paciente en procesos asistenciales	Ángel Aroca (S. Cirugía cardíaca infantil), Ana Castaño (S. Oncol radioterápica), Lubna Dani (U. HADO)	Gabriela Guzmán (S. Cardiología)
15/03/2023	Historia clínica digital SNS (HCDSNS) y proyecto Eur- e	Noemí Glez Pérez de Villar (Subd. Médica), Susana Noval (Subd. Médica), Adrián Torres (Gerencia de Hospitales)	
22/03/2023	Manejo multidisciplinar de la patología aórtica compleja	Lucía Fernández Gasso (S. Cardiología), Ali Ayaon Albarran (S. Cirugía cardíaca), Luis Riera del Moral (S. Cirugía vascular).	Álvaro Fdez Heredero (S. C. vascular)
29/03/2023	Varón de 68 años con lesión cavitada pulmonar	Alberto Mangas (S. Neumología), María Mercedes Petrino (S. Anatomía patológica)	Rodolfo Álvarez-Sala (S. Neumología), Carmen Glez García (S. A. patológica)
12/04/2023	Tromboembolismo pulmonar en pacientes con COVID19 grave	Pablo Lapunzina (S. Genética), Carlos Carpio Segura (S. Neumología)	Rodolfo Álvarez-Sala Walther (S. Neumología)
19/04/2023	Experiencias de cooperación sanitaria	Ángel Abad (Oficina Agenda 2030), María Serrano (S. Ginecología), Sonia Lobo (S. Ginecología), Sergio Zurita (S. Anestesia), Belén Fernández (S. Análisis Clínicos)	Alicia Hernández (S. Ginecología), Mar Muñoz (S. Ginecología).
26/04/2023	Varón de 71 años con demencia avanzada y apnea obstructiva del sueño grave	Teresa Glez Alegre (S. Medicina interna), Ángel Martín (S. Neurología), Paula Voinescu (S. Anat. patológica)	
03/05/2023	Paciente politraumatizado. Un paciente de todos	Bárbara Martínez (U. Calidad), Rosario Torres (S. Urgencias), Angélica Rivera (S. Urgencias), Luis Riera (S. Cirugía vascular), Mónica Glez Nuño (S. Rehabilitación)	Manuel Sánchez (S. Medicina intensiva), Carmen Fernández Capitán (S. Medicina interna), José Mostaza (S. Medicina interna), Carmen Glez García (S. Anatomía patológica)
10/05/2023	Implementación de la farmacoterapia personalizada: caso-modelo en el H.U. La Paz	Alberto Borobia (S. Farmacología clínica), Irene García García (S. Farmacología clínica), Rocío Rosas Alonso (S. Genética), Yasmina Mozo (S. Hemato-Oncología pediátrica)	Antonio Carcas (S. Farmacología clínica)
17/05/2023	¿Qué hay de nuevo con el Lupus Eritematoso Sistémico?	Eugenia Miranda Carús (S. Reumatología), Ángel Robles (S. Medicina interna), Gema Fernández Juárez (S. Nefrología)	Gema Fernández Juárez (S. Nefrología), Alejandro Balsa (S. Reumatología)

## 2. Executive summary

### 2.3. Training Report and Teaching

FECHA	TEMA	PONENTES	MODERADORES
24/05/2023	Varón de edad muy avanzada con fibrilación auricular de reciente diagnóstico e insuficiencia cardíaca	Rocío Menéndez (S. Geriátría), Marta de Uribe Vioria (S. Anatomía patológica), Esther Pérez David (S. Cardiología)	Juan Ignacio González Montalvo (S. Geriátría), Alberto Berjón García (S. Anatomía patológica), Raúl Moreno (S. Cardiología)
31/05/2023	Alergia y desensibilización a fármacos y su dimensión transversal	Leticia de las Vecillas (S. Alergología), Rosario Cabañas (S. Alergología), Teresa de Soto (S. Hematología), Ana Pertejo (S. Oncología médica)	Ana Fianдор (S. Alergología)
07/06/2023	Superando limitaciones CAR-T19 en LLA-B: CART dual 19/22	Berta González (S. Hemato-oncología pediátrica), Pilar Guerra (S. Hemato-oncología pediátrica, UCICEC), Isabel Mirones (up-MTA), Gema Casado (S. Farmacia hospitalaria)	Antonio Pérez Martínez (S. Hemato-oncología pediátrica)
14/06/2023	Varón de 83 años con infartos cerebrales múltiples	Laura Lacruz (S. Neurología), Blanca Fuentes (S. Neurología), Pablo Pérez Montero (S. Anatomía patológica)	Ana Frank (S. Neurología), María del Carmen González García (S. Anatomía patológica)
21/06/2023	De la radiación a la protección: aprendiendo a minimizar los riesgos	María Fernández-Velilla Peña (S. Radiodiagnóstico), José Manuel Cordero García (S. Medicina nuclear), Raúl Sánchez López (S. Radiofísica), Paula Hidalgo Gutiérrez (S. Radiodiagnóstico)	Rosario Torres Santos-Olmos (S. Urgencias)
28/06/2023	Adaptación del Proceso Asistencial Integrado del paciente con insuficiencia cardíaca crónica	Ana Cristina García Álvarez (D. Continuidad asistencial), Florentina Martín Rodríguez (C.S. Soto del Real), Inés Ponz de Antonio (S. Cardiología), Antonio Martín Alonso (S. Farmacia), Rosario Luis-Yagüe (S. Trabajo Social)	Raúl Moreno (S. Cardiología), Mª Dolores Cano Pérez (Dirección Asistencial Norte Atención Primaria)
20/09/2023	Inteligencia artificial: retos, oportunidades y riesgos para la asistencia hospitalaria	Julián Isla Gómez (Microsoft)	Fernando Martín Sánchez (Subgerencia)
27/09/2023	Inteligencia artificial: retos, oportunidades y riesgos para la asistencia hospitalaria	Julián Isla Gómez (Microsoft)	Fernando Martín Sánchez (Subgerencia)
04/10/2023	Mujer de 80 años con infarto cerebral, tromboectomía e implantación de stent	Jorge Rguez-Pardo de Donlebún (S. Neurología), Paula Isabela Voinescu (S. A.patológica)	Ana Frank García (S. Neurología), M. Carmen González García (S. Anatomía patológica)
11/10/2023	Programa de Psico-Oncología : Conectando con la vulnerabilidad	Pilar Zamora Auñón (S. Oncología médica), Ángela Palao Tarrero (S. Psiquiatría), Melisa Cuesta Pastor (U. Cuidados paliativos)	Mª Fe Bravo Ortiz (S. Psiquiatría)
18/10/2023	Obesidad y gestación: manejo multidisciplinar	Mercedes Calvo (S. Obstetricia), Beatriz Barquiel (S. Endocrinología), Miriam Zapatero (S. Endocrinología), María Delgado (U. Diabetes), Francisco López (S. Obstetricia)	José Luis Bartha (S. Obstetricia), María de la Calle Fernández-Miranda (S. Obstetricia)
25/10/2023	Varón de 76 años con epigastralgia, adelgazamiento y embolismo pulmonar	Ramon Puchades (S. Medicina Interna), Gabriela Barrios Millán (S. Anatomía patológica)	Carmen Fdez Capitán (S. Medicina Interna), Alberto Berjón (S. Anatomía Patológica)
08/11/2023	PAIZEN. La Oficina Kaizen del HULP: motor de la mejora continua en la asistencia hospitalaria	Ramon Cantero (S. Cir. general), Bárbara Martínez (U. Calidad), Lucía Deirós (S. Cardiología infantil), Mercedes Hermsilla (U. Trasplante)	Javier Cobas Gamallo (Subgerencia)
15/11/2023	Varón de 86 años con antecedentes de cancer escamoso de pulmón, y bronconeumonía grave	Laura Gutiérrez Sainz (S. Oncología médica), Sara Quiñones (S. Anatomía patológica)	Jaime Feliu Batlle (S. Oncología méd), M. Carmen Glez García (S. Anatomía patológica)
16/11/2023	Actividades del Nodo de Transformación Digital	Federico Gutiérrez Larraya (S. Cardiología infantil), Ana Gómez Galindo (Subdirección de gestión), Fernando Martín Sánchez (Subgerencia)	Javier Cobas (Subgerencia)
22/11/2023	Errores congénitos del metabolismo: un reto diagnóstico en niños y adultos	Ana Bergua (S. Nutrición infantil), Giorgina Salgueiro (S. Medicina Interna), Amanda Herranz (S. Genética), Olaia Rodríguez Fraga (S. Análisis Clínicos)	Mª Gemma Serrano (S. Análisis Clínicos), Carmen Fdez Capitán (S. Medicina interna)
27/11/2023	Liderazgo para la obtención de Valor en salud	Vicenc Martínez Ibañez. Instituto de Investigación en Ciencias de la Salud de Castilla la Mancha	
29/11/2023	Consulta postCOVID. Resultados obtenidos y perspectivas actuales	Jorge Álvarez Troncoso (S. Medicina interna), Carlos Carpio Segura (S. Neumología), Óscar Lorenzo (Departamento de Medicina. IIS-FJD, UAM).	Carmen Fernández Capitán (S. Medicina interna), Rodolfo Álvarez-Sala Walther (S. Neumología)
13/12/2023	Diagnóstico y tratamiento de lesiones premalignas rectales y cáncer de recto precoz	Aurora Burgos (S. Digestivo), Ramón Cantero (S. Cirugía General), Mª Dolores Martín Arranz (S. Digestivo)	Mª Dolores Martín Arranz (S. Digestivo)
20/12/2023	Sesión de humanidades: Vermeer, tempus fugit	Santiago Quirce Gancedo (S. Alergología)	

#### 2.3.4.4. Another Scientific activities

14th December 2023: 5th PhDay IdiPAZ

#### Early stage translational category

**Ana Belén Griso Acevedo.** Defining CAF-induced tumor cell plasticity as a positive switch for tumor progression and therapy resistance.

#### Clinical work in initial phase

**José Luis Rueda García.** Study of hypercoagulability by global techniques of hemostasis and platelet function in patients with Inflammatory Bowel Disease.

#### Late stage translational work

**Lucia Acero Riaguas.** Development of predictive and therapeutic tools to combat resistance to chemotherapies in head and neck squamous cell carcinomas.

#### Advance stage clinical work

**Mireya Fernández-Fournier,** Value of the presence of antibodies against EBNA-1 and Epstein Barr virus VCA in extracellular vesicles as diagnostic and evolutionary biomarkers in patients with Multiple Sclerosis.

20th November 2023: Presentation Scientific Report 2022

## Acto de Presentación de la Memoria Científica

20 de noviembre a las 12:30 horas, aula Profesor Ortiz Vázquez del Hospital General

#### PROGRAMA:

12:30 h. **Bienvenida** a cargo del **Dr. Rafael Pérez-Santamarina**, Director Gerente del Hospital Universitario La Paz.

12:40 h. **Ponencia** a cargo del **Dr. Juan Tamargo Menéndez**, doctor en Medicina y Cirugía, especialista en Farmacología Clínica y catedrático de Farmacología en la Facultad de Medicina de la Universidad Complutense de Madrid, titulada "2014-2023, una década prodigiosa de la farmacología cardiovascular"

13:00 h. **Presentación de la Memoria Científica 2022** a cargo del director científico, **Dr. López-Sendón**.

13:20 h. Entrega de los **Premios IdiPAZ**.

13:30 h. Clausura.

## 2.3.5. Science and Society-Scientific Outreach Initiatives

The Unit of Scientific Culture and Innovation of IdiPAZ (UCC+i) has the aim of dissemination of science and innovation performed in our institution and as a key service to increase the scientific education and culture, to promote scientific vocations and innovative talent, to communicate researchers' findings, and to foster research among new generations, knowledge the population and patients.

### Unit of Scientific Culture and Innovation of IdiPAZ

#### Members:

- Paloma Gómez Campelo
- María Gutiérrez Fernández
- Aitana López Redondo
- Daniel Quijada Alcón
- Santiago Rello Varona
- Andrea Martínez Feijóo
- Estela Sánchez Simón
- Ana Sastre Perona
- Gema Vallés Pérez

IdiPAZ participated in the International Day of Women and Girls in Science, to promote full and equal access and participation in science for women and girls. Gender equality is a global priority for UNESCO, and the support of young girls, their education, and their full ability to make their ideas heard are levers for development and peace. This year was focus on the role of Women and Girls and Science as relates to the Sustainable Development Goals namely Sustainable Development Goals 5 (Achieve gender equality and empower all women and girls) and Sustainable Development Goals 10 (Reduce inequality within and among countries).

Also, IdiPAZ participated in the 23rd edition of the Madrid Science and Innovation Week and in the European Researchers' Night.

## Semana de la Ciencia y la Innovación en IdiPAZ

In 2023, IdiPAZ development **Ciencia por la Calle** an initiative through which scientific dissemination activities were organized for society in general. All these activities are free of charge and allow attendees to learn first-hand about R&D&I and the institution's researchers through talks in schools, workshops, fast meetings, guided tours, etc.

#### ACTIVITY

#### DATE

**International Day of Women and Girls in Science:** Workshops and activities held in schools.

**Management: a fundamental pillar in research:** With the idea of making visible the importance of management in research as well as the role of women in IdiPAZ, professionals from the technical unit of FIBHULP and the Biobank, visited the Claudio Galeno Vocational Training Center to tell their students step by step, the management of a research project, the innovations that have been implemented in the institute and how this allows, for example, to carry out the activity in Biobank.

11<sup>th</sup> February

De izquierda a derecha: Lucía del Pino Molina, Rebeca Rodríguez Pena, Andrea González Torbay, Elena Sánchez Zapardiel, Kerem Reche Yebra, Laura Miguel Berenguel y Elisabeth Matas Pérez.

**'From here to science' and 'Cancer detectives':** Predoctoral researcher, Laura Clares, gave two talks at the Gustavo Adolfo Bécquer school, each followed by a DNA extraction workshop for 6th grade students. In addition, she spoke about her scientific career and current cancer research to 4th ESO students.

ACTIVITY	DATE
<p><b>Hospital Immunology: health and science in the hands of women:</b> The professionals of the group of Lymphocyte Physiology in Immunodeficiencies have given a talk to students of 2nd year of High School of IES El Pinillo where they have told the operation of the department and their experiences in the field of research.</p> <p><b>Research experience in the field of immunology and rare diseases:</b> From the group of Lymphocyte Physiology in Immunodeficiencies they have also carried out a series of recreational activities for students from 1st-6th grade of primary school in the YMCA of Carabanchel to understand the functioning of the immune system</p> <p><b>"Magic flowers", 'Lava lamp' and 'Red cabbage as pH indicator':</b> Researcher Jara Hurtado Gallego, from the group of Respiratory, Systemic and Neurological Infectious Pathology in childhood, and host immune response, visited a school and a nursery school to bring 'her science' to the little ones through activities and workshops that have delighted them.</p> <p><b>Visit us at IdiPAZ for the International Day of Women and Girls in Science":</b> Biobank professionals and researchers from the Coagulopathies and Alterations of Hemostasis laboratory, open the doors of their laboratories to students of a high school to explain the importance of their work in science and show them curiosities that did not leave them indifferent.</p>	 <p><i>De izquierda a derecha Lucía Del Pino Molina, Rebeca Rodríguez Pena, Elena Sánchez Zapardiel, Pilar Nozal Aranda, Andrea González Torbay, Yadira Bravo Gallego y Elisabet Matas. Del grupo de Fisiología Linfocitaria en Inmunodeficiencias.</i></p>
<p><b>Science and Innovation Week: The future needs the best ...biobanqueros!</b>                      Paloma Gómez, Marina Arranz, Laura Córdoba, Sandra Nieto, Yaiza Pedroche y Celia García.</p>	<p>6<sup>th</sup> November</p>
<p><b>Science and Innovation Week: How do we defend ourselves? Journey inside our Immune System.</b>                      Luna Cordeiro y Carlos del Fresno.</p>	<p>6<sup>th</sup> November</p>
<p><b>Science and Innovation Week: Separating the wheat from the chaff: How to find an oasis in the information desert.</b>                      Raúl Román</p>	<p>7<sup>th</sup> November</p>
<p><b>Science and Innovation Week: IdiPAZ: Research in the service of health and medicine.</b>                      Gema Vallés, Kilian Gutiérrez y Eva Jaraba</p>	<p>7<sup>th</sup> and 14<sup>th</sup> November</p>
<p><b>Science and Innovation Light and color to follow the molecular footprints of diseases in our cells. Visit-Workshop at the Molecular Imaging and Immunohistochemistry Unit.</b>                      Mayte Vallejo y Onys Camps.</p>	<p>8<sup>th</sup> and 15<sup>th</sup> November</p>
<p><b>Searching for defects in genes and proteins: it goes a long way.</b>                      Pilar Sánchez-Corral, Alberto López y Laura González</p>	<p>10<sup>th</sup> and 17<sup>th</sup> November</p>
<p><b>How to be a scientific Sherlock Holmes?</b>                      Daniel Quijada</p>	<p>13<sup>th</sup> November</p>
<p><b>From transplant research to the operating room: how scientific breakthroughs reach the patient</b>                      Francisco Hernández, Ane Miren Andrés y Javier Serradilla.</p>	<p>13<sup>th</sup> November</p>
<p><b>An approach to a childhood cancer research laboratory.</b>                      Alfonso Navarro, Andrés París, Karima Al-Akioui, Lara Clares, Lidia Pertiñez, Natalia Riestra y Patricia Rodríguez.</p>	<p>13<sup>th</sup>, 15<sup>th</sup> and 17<sup>th</sup> November</p>
<p><b>The Pediatric Radiologist: who we are and what we do</b>                      Montserrat Bret</p>	<p>14<sup>th</sup> November</p>
<p><b>Debunking myths about ADHD</b>                      Eduardo Fernández-Jiménez</p>	<p>16<sup>th</sup> November</p>

## 2.4 Innovation and Transfer Activities

### 2.4.1. Innovation and Transfer Activities

The Innovation Support Unit (or Innovation Unit), UAI, of FIBHULP was created in June 2010 within the framework of the ITEMAS Network –currently called ITEMAS Platform- of the Carlos III Institute of Health. Since its creation, the Innovation Support Unit has contributed to promoting and protecting innovative/ground breaking research conducted by IdiPAZ. The Innovation Unit also intends to harness our institute's considerable innovative potential generated, as a step prior to its subsequent transfer to society.

Therefore, one of the main commitments of the Innovation Unit is that researchers and health personnel perceive it as a resource at their service, to provide support and advice in all that relates to the identification, management, protection, transfer, marketing and dissemination of their research results.

#### ACTIVITIES

The main aim of the Innovation Support Unit is to identify the potential transferable research results generated within our institute and to accompany and support the researcher throughout the whole innovation process: from the birth of the idea to its placement on the market.

Since the Innovation Unit has been in operation, several projects sponsored by the institute itself have been managed and different collaboration agreements have been signed with important private institutions and organisations to promote innovation.

Our main objectives are:

- Promoting a culture of innovation and entrepreneurship within the institute by fostering the generation of innovative ideas and solutions that meet the needs of patients and society, in general, and supporting their development through various initiatives.
- Actively searching and identifying knowledge and research results emerged within the institute and transferable to the market.
- Fostering and managing the protection and transfer of knowledge and research results to society and promoting the current technology portfolio of the institute while getting an economic return which allows its reinvestment in research and development.
- Promoting the participation of industry in the innovation process acting as a stakeholder actively involved in it.

- Formalising business alliances, including technology companies as well as industrial and financial partners, to develop collaborative projects and to transfer the results to the market.
- Generating resources that achieve the greatest impact on society, enabling a better quality health care and at the same time contributing to the sustainability of the National Health System.
- Boosting a fruitful collaboration among all entities that make up the ITEMAS Platform.

In the last years the UAI has definitely consolidated its presence and visibility in the whole environment Hospital-Institute. Among the greatest achievements of the Innovation Support Unit are the following:

1. The UAI has become one of IdiPAZ's most in-demand and requested platforms as it is responsible for promoting, supporting and managing all innovation projects.

At December 31 2023 the UAI had 262 innovation projects or ideas in active state, 25 of which were in the capture phase, 72 in the evaluation phase, 46 in development, 80 in transfer and 39 in the market. Ac-

UAI portfolio breakdown by project development phase (2023)

Priority of IdiPAZ's patent families in force during 2023

Total tally of ip legal figures in force during 2023

UAI portfolio breakdown by project type (2023)

The analysis of IdiPAZ's technology portfolio according to the type of project show how Health ICT, Bio and Medical Device, and Materials and Devices types stand out above the others, with practically the same number of projects for all three types.

2. The UAI has built a wide and diverse technology portfolio. Each year the number of innovation projects managed by the UAI increases with respect to the previous year, also increasing the number of Hospital services, research groups and professionals in general who join IdiPAZ's innovation community.

During 2023 the UAI filed 1 priority patents (European patent kind), 3 PCT which 1 national or regional phase entry applications (3 at EPO). UAI's portfolio of patent families is active state during the period 2023 reached the figure of 17 patent families (10 of them with Spanish priority, 3 of them of European priority and 1 of them having US priority).

As for the software, during the period 2023 IdiPAZ had 10 computer software registered. The period of 2023 has been remarkable in this aspect, protecting 10 new computer softwares.

Special mention should also be made to the UAI trademark portfolio. During the period 2023, 2 Spanish and 5 European trademark applications were filed and 5 European trademark was granted. The total number of trademark families active and in force during 2023 was 29.

As well, in this year the UAI has made the applications to a new legal figure, the industrial design. Into this category, 1 Spanish was counted.

The total tally of Intellectual Property figures in force during 2023 is the following 14 patent families, 27 SW, 29 trademark families, 11 IP Works and 4 know-how, and 1 industrial model.

According to these data, it follows that 15% of the projects have been successfully exploited and positioned in the market, a very positive percentage (although far lower than the aspired figure) given the precariousness of the times we go through and the resources (both human and financial) with which the UAI counts.

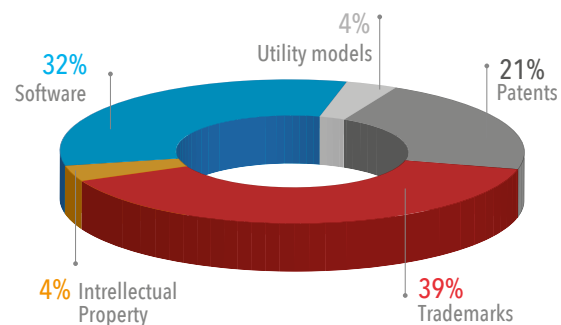

It is important to note that these trademarks, besides allowing IdiPAZ to distinguish its products or services from competitors' products or services, are associated with the know-how of the institution, know-how that has been transferred along with the distinctive sign in the case of the license agreements signed by the institution in respect of trademarks.

3. The UAI has prepared a catalogue of technology offers -based on specification sheets-, which includes the complete portfolio of exploitable IdiPAZ results. This catalogue aims to promote the transfer of IdiPAZ's technology portfolio to the industrial sector, generate collaborative projects for technological development and foster the exploitation of research results. Those validated specification sheets are published on IdiPAZ's website. The catalogue is updated as the Institute's technology portfolio grows.

4. The UAI has been, is, and will continue to be the principal architect for the transfer and exploitation of IdiPAZ's technology portfolio. During 2023, the UAI succeeded in signing 17 license agreements -16 of which related to intellectual property works and 1 to know-how- and the portfolio of licensed or commercially exploited inventions reached the figure of 23 technologies, 14 patents, 1 utility model, 2 SW, 2 trademarks, 3 IP Works and 1 know-how.

5. At the ending of 31 December 2023 4 spin-off projects existed and were being managed by the UAI, 2 of which were expected to be set up in the short-medium term. Attending to that, a new spin-off has been released during this year, called LUCADIA EPIGENETICS (From now just LUCADIA). This brand was approved by FIBHU-

Technologies licensed or in commercial exploitation (2023)

LP's Board as a sign of the institutional support authorising its release to the market. The birth of this brand new company serves as proof of an effective process of technological transfer under the wing of IdiPAZ, with the important collaboration of UAI. LUCADIA was awarded a DTS grant from ISCIII (Desarrollo Tecnológico en Salud), where this project took off. The main goal was to develop a novel diagnostic test that will impact the use of liquid biopsy by confirming the efficacy of miRNA biomarkers. These products also enable the detection of lung cancer patients at early stages and improve the clinical outcomes of patients diagnosed at advanced stages. Additionally, the development of this project was worthy of a Caixa Impulse Innovation grant, recognizing the importance of these kits and pushing the scale up of this project. Last but not least, this project has attracted interest from many stakeholders and investors (such as ITEMAS,

Caixa, and other investors within the health sector) who have contributed to its growth. This product would come to fill a market gap in early-stage detection attending to early stages patients improving the clinical outcomes of patients diagnosed at advanced stages.

6. Through the promotion of a culture of innovation, the UAI has managed to create a large community of innovative professionals. Over the last year, its promotional activity has consisted in the celebration of several working days, workshops, seminars, etc. Among all the promotional activities organised, the following stand out:

- **1st Quality Commission Training Day:** "Política de protección de datos". 12/12/2023 13:30-14:45.
- **2nd Quality Commission:** "Presentación Convenio OPEM-ITEMAS-ISCIII: la Propiedad Industrial al servicio de los Hospitales". 21/04/2023 10:00-12:00
- **3rd Quality Commission Training Day:** "Política de protección de datos" 25/04/2023 11:00-13:00

In addition, the UAI has collaborated with important institutions and private entities to promote innovation, in particular, it has participated in various forums and round tables organized by various stakeholders of the biomedical sector. Such as, Bioenterprise, Shipventure, Assabys, Biopartner and others business angels and family office. Actors from the health sector with the ability of pushing new ideas and scale them up. Linking private entities and making ideas grow is one of the main functions of UAI but funding is one of our main stoppers, for that reason, investors, private entities and funding companies are one of the

most important driving forces which take in the process of scaling ideas up.

7. The UAI has succeeded in creating a wide-ranging network of contacts. By virtue of its membership in the ITEMAS Platform, the Unit has continued to strengthen ties and creating synergies with the members of this Platform in order to achieve its established objectives.

Apart from the above results, it is important to highlight the increasing amount of innovation projects managed by the Innovation Unit that has been awarded with prestigious awards and aids. The following are some of the projects that won grants or awards during 2023:

- a. **Polifyl.** This project aims to identify predictive response biomarkers for this cancer immunotherapy, to identify new immune checkpoints with potential immunotherapeutic application, to improve current ICI-based immunotherapies by modulating innate immune responses. Establishing a Poly Functional Immune Liquid (PolyFIL) biopsy platform that will interrogate the peripheral blood immune compartment from an observational, functional and modulating perspective. The result will be a massive amount of immunological data obtained from a single blood sample analyzed by multivariate analysis and machine learning techniques. PolyFIL analysis in a cohort of lung cancer patients receiving anti PD-1/PD-L1 will allow to identify predictive biomarkers for the efficacy of such treatments, addressing aim 1. Furthermore, this effect have been in parallel studied in in vivo models of primary, metastatic and spontaneous tumors. PolyFIL was awarded by the ISCIII, into the FIS grant.

- b. **Novocornea.** This project aims to construct a human corneal organoid, replacing full cornea in today's penetrating corneal grafts. This means 1) unlimited tissue for any type of corneal graft/ocular surface, creating a new model of corneal banks; 2) drastic reduction of the need for corneal donors, meaning the removal of ethical limitations and biological considerations; 3) wider treatment availability for more numerous and varied ocular surface disorders - insufficiently treated today. NovoCornea eye tissues offer further treatment options: corneal endothelium will substitute the deep endothelial lamellar transplants; and ocular surface will increase the possibility of success of borderline cases with stem cell corneal deficiency; and all the diseases of the ocular surface that will be treatable with elements of NovoCornea.

This project has been highlighted for its use of disruptive technology to create organoids used for corneal replacement or transplant. This technology has not only stood out from a scientific point of view, but also from an industrial point of view. The level of disruption has attracted the attention of one of the major players in the pharmaceutical industry, ZEISS, resulting in a profitable agreement.

- c. **ASSIST.** European project is based on the brand new technology of IA. Anticipating and getting prepared is the main goal of this project. Throughout electrocardiograms are used to prevent future heart attacks. ASSIST is a collaborative project of some of the European leading institutions in Acute Heart Attack together with the Inter-American Society

of Cardiology (SIAC), looking for funding from EIT Health. The ASSIST Consortium (Artificial intelligence at Scale Solution for ST elevation myocardial infarction) is creating the first of its kind, end-to-end solution for the triage and diagnosis of acute coronary syndromes. This digital platform is being designed to speed and improve patient access to cardiovascular treatment and support doctors in achieving greater diagnostic accuracy to increase the effectiveness and efficiency of treatments during acute myocardial infarction. This consortium group in which IdiPAZ is taking part was awarded by the European Institution, EIT-Health, identifying as a disruptive project and pushing this new technology as a useful tool into the health care.

- d. **Enfarma.** This project aim to solve medication errors (MEs). These incidents are preventable and can cause harm to the patient, in some cases as severe as death making this events a global problem, above all in the practice of paediatric medicine with special effect in emergencies. Although there are tools that prevent these MEs, such as smart infusion pumps or the electronic prescription system, they have not been defined as effective solutions to this problem. In response to this casuistry and digitalisation in the field of health, more specifically as mHealth, ENFARMA was developed, an application based on scientific evidence in order to promote the safe use of intravenous medication in paediatrics. This project was awarded by the Dr. Luis Álvarez grant, promoted by FIBHULP and created in order to support the research in the core of the institution.

**e. Agora E-salud.** This project is trying to fill one of the most damaging gaps in our health system, loneliness is a common feeling among patients. This platform is trying to answer and help patients, carers and professionals to avoid communication barriers in the continuum of non-face-to-face social and healthcare care and to enhance their social interaction, empowerment and self-care through a multi-platform digital solution in order to resolve doubts, improve the experience, alleviate loneliness and access experiential, truthful and contrasted information. It is financed through invoicing per service to the health administration, hospital groups and health insurers so that they can reduce frequentation, admissions, the pressure of face-to-face care and control morbidity, and to patient associations and socio-health scientific societies to respond to the training and information needs of their associates. Peer support groups and close relationships with social and health care professionals emerge as effective solutions to assimilate the new situations linked to the disease in daily life and to enhance people's autonomy. Digital tools make it possible to connect patients and health professionals in a simple, synchronous and asynchronous and remote way. This project was chosen to take part into the competition of HealthStart making possible the creation of this interactive platform. As well, It's important to mention the co-creation labs as citizen participation action in order enhance the care system adapting the health system to the patients, making this solution suitable to help other patients. In summary this technological

solution is to create a tool from patients to patients.

8. On the other hand, it is important to mention a sudden event that had happened in the last year, 2023. It was based on the fact that FIB-HULP has introduced ciBIS, the cluster of researching platforms creating a central Unit of clinical-health research and Clinical trials (UCIC-EC by its Spanish acronym), biobank and innovation platform, recognised by ISCIII. These three platforms by La Paz-IdiPAZ works in coordination with three other matrix platforms by Institute of Health Carlos III (ISCIII) such as Supporting Unit to support of researching clinical Investigation, biobanks platforms, Biomodels and the ITEMAS platform to endure the innovation and boost the industrial abilities of the National Spanish Health System. The Key effort of this unit is the creation of an innovative culture and the dissemination and diffusion of the main ideas building a brand-new strategy to entrepreneurs in the health field. All of this had happened thanks to the work of UAI. As a consequence of it, there was a development of a new portfolio of intellectual property with more than 40 patent families, brands, trademarks, licences, and corporate agreements including spin-off. Currently the main targets have been set in order to promote the transfer of the value in all the scenarios around the health field, General Practitioners, health research Institutes, universities and independent entrepreneurs exclusively within the Community of Madrid.
9. The UAI helps projects based on different disruptive technologies to go ahead and leading

health innovation. These technologies such as IA or machine learning, this technologies probes the great labour taking in action by this unit, the UAI. As well, as part of the action taking inside of IdiPAZ there are some projects have been succeed in 2023. First of all, during this past year the project Kids and Pets was launched as an action leading by the IP Ana Mendez Echevarria, this project was awarded by Mapfre Foundation, Ignacio Larramendi grant. This project was awarded for the one health perspective, this worldwide trend promote by the ISCIII and for the ministry of health of Spain, the outcomes of this project, an app to help immunosuppressed kids with pets, has been recognised by the one health prize, indicating how worth it of the efforts to demonstrate this perspective.

10. The UAI helps projects based on virtual reality to materialize into clinical practice: The University Hospital of La Paz in Madrid leads a pioneering project to improve our understanding of the IA. This project is an end-to-end solution for the triage and diagnosis of acute coronary syndromes. This digital platform is being designed to speed and improve patient access to cardiovascular treatment and support doctors in achieving greater diagnostic accuracy to increase the effectiveness and efficiency of treatments during acute myocardial infarction. This project is a new evidence of our leadership into the development of new technologies into the health system.
11. Increased collaborations with industry: Kairós DS and the *Instituto de Investigación Sanitaria del*

Hospital Universitario La Paz (IdiPAZ) have joined forces to help patients suffering from post-stroke aphasia through the VerbalizApp platform. In Spain, 25,000 new cases of aphasia are diagnosed each year, a language disorder characterized by the inability or difficulty in communicating through speech, writing or mimicry. It is caused by a wide variety of events, from strokes, head injuries or brain tumors, to even the most serious cases of COVID-19. To combat it, Kairós DS and IdiPAZ have joined forces to help patients suffering from post-stroke aphasia through the VerbalizApp platform. Due to the presence in the health ecosystem we count on collaborations with companies from the health-care sector such as AINIA, Bluezone, Tecknicker. On the other hand, IdiPAZ as a research institution collaborates with other public entities, universities, UPM, or UAM, another research institution such as CNIC, were really helpful attending to design, development of a new app deliver to the market for 2023. Part of this apps were launching in 2023 are codimapp, kids and pets, endopaz app joining to the market place making clear this new tendency, scilicet, development of app within health system. The new app promotes communication and the recovery of patients with language disorders from the acute phase of the stroke. The use of artificial intelligence and machine learning can help recovering the communication skills of these patients. "With projects like this we can really change things, helping people and their families".

### ORGANISATION

Since its implementation, the Innovation Support Unit has been integrated into the organisational structure of FIBHULP, as one of the Support Platforms for IdiPAZ research.

The Innovation Unit is directed by Dr. **Javier de Castro Carpeño**, M.D. and Ph.D. in Medicine and he's a member of the Medical Oncology Department of the La Paz University Hospital, Autonomous University of Madrid and of the Translational Oncology Unit of IdiPAZ.

The Innovation Unit also consists of a team of experts in fostering innovation and protecting research results and technology transfer:

- **Estela Sánchez Simón**, Law Graduate;
- **Ignacio Zaldivar Pozo**, Biology Degree.

## 2.4.2. Patents and trademarks

### NEUROSCIENCES AREA

#### Psychiatry and Mental Health Group

**Rodríguez Vega B**, author; FIBHULP, assignee. Trademark name: En calma; ESM 3.695.071; 2017 December 12.

**Rodríguez Vega B, Mediavilla Torres R, Bravo Ortiz MF, Muñoz San José A, Bayón Pérez C, Lahera Forteza G, Palao Tarrero A**, authors; FIBHULP, assignee. Trademark name: SocialMind; ESM 3.748.550; 2018 December 17.

#### Neurology and Cerebrovascular Diseases Group

**Valdivieso Amate F, Bullido Gómez-Heras MJ, Martínez García A**, inventors; UAM, assignee. Method of identifying compounds that induce or inhibit endoplasmic reticulum stress or oxidative stress. P200702997, PCT/ES2008/000705, EP2221379, US20100304384; 2007 November 13.

**Vergés Milano J, García García A, Ruhí Roura R, Montell Bonaventura E, García López M, Aláez Versón CR, Escaich Ferrer J, Egea Máiquez J, Lorio González S, Negrodo Madrigal P**, inventors; BIOIBÉRICA S.A., UAM, assignees. Sulphated disaccharides for the treatment of neurodegenerative and/or neurovascular diseases. P200902399, PCT/EP2010/070613, US20120309707, CA20102785237; 2010 December 22.

**Valdivieso Ámate F, Burgos Muñoz JS, Ramírez Moreno C, Sastre Merlín I**, inventors; UAM, CSIC, assignees. Method of identifying therapeutic compounds which can be used for the treatment and/or prevention of infections and diseases caused by human herpes viruses. P200400965, PCT/ES2005/000209, EP1769677, US20070218004, AT447321, AU2005235319, CA2562787, JP2007533315; 2004 April 21.

**Valdivieso Ámate F, Montoliú JL, Pozueta Larios J**, inventors; UAM, CSIC, assignees. Alzheimer's disease animal model, method for obtaining same and uses thereof. P200503002, PCT/ES2006/000673, EP1956091, EP20060841725, US20090222932, CA2638983, JP2009517066; 2005 December 02.

**Ballesteros García P, López Larrubia P, Domínguez Mateo L, Marco Contelles JL, Cerdán García-Esteller S**, inventors; Universidad Nacional de Educación a Distancia, CSIC, assignees. Set of magnetic resonance imaging and spectroscopy cell acidity extrin-

sic indicators comprise polyol derivatives based on alditols. P200300936; 2003 April 23.

**Gil Martínez A**, author; FIBHULP, assignee. Trademark name: Specular Face; ESM 4.022.981; 2019 June 10.

**Egea Máiquez FJ, Farré Alins V, Palomino Antolín A, Narros Fernández P, Martíns Rosa J, Parada Pérez E, Hernández García BJ, Roda Frade JM, Yus Teruel S, Lagares Gómez-Abascal A, Sánchez Carabias C, Gandía Juan L**, inventors; Fundación Hospital La Princesa, FIBHULP, Fundación Hospital 12 de Octubre, UAM, assignees. Method for determining the progression of acute brain damage and pharmaceutical composition for its treatment. P202031194, PCT/ES2021/070856; 2020 November 30.

**Gil Martínez A, Gil Castillo J**, inventors; FIBHULP, Centro Superior de Estudio Universitarios La Salle, Javier Gil Castillo, assignees. Dispositivo de medición y/o entrenamiento de la fuerza o presión de los músculos de la cavidad oral y su uso para rehabilitación. MU 1201U MU202230128. 2022 July, 26.

**Alonso de Leciñana M, Díez Tejedor E, Fuentes Gimeno B, Rodríguez-Pardo de Donlebun J, López Martín D, Gutiérrez Martín A and Fernández Martín F**, authors; FIBHULP and Universidad Politécnica de Ma-

drid, assignee. Trademark name: Neuro Data Tracker; ESM 018860324; 2023 April 11

### Neuroprotective Strategies in Neurodegenerative Diseases Group

**Cuadrado Pastor A, Innamorato NG**, inventors; CSIC, UAM. Use of sulforaphane as supplementary therapy for early-stage neurodegenerative disease. P201231693; 2012 November 06.

**León Martínez R, Egea Maíquez J, Buendía Abaitua I, Parada Pérez E, Navarro González de Mesa E**, inventors; Fundación para la Investigación Biomédica del Hospital Universitario de La Princesa, UAM, CSIC, DNS NEUROSCIENCE S.A., assignees. Use of 3-(2-isothiocyanatoethyl)-5-methoxy-1H-indole for the treatment of neurodegenerative diseases. P201300667; 2013 July 17.

**León Martínez R, Buendía Abaitua I, Navarro González de Mesa E, Michalska P, Gameiro Ros I, López Vivo A, Egea Maíquez J, García López M, García García A**, inventors; Fundación para la Investigación Biomédica del Hospital Universitario de La Princesa, UAM, DNS NEUROSCIENCE S.A., assignees. Compounds derived from 3-alkylamine-1H-indolyl acrylate and its use for the treatment of neurodegenerative diseases. P201400810, PCT/ES2015/000139, CA2964309; 2014 October 15.

**Cuadrado Pastor A, Fernández-Ginés R, León Martínez R, Encinar JA, Rodríguez Franco MI, García López MG, Rojo Sanchís AI**, inventors. UAM, CSIC, UMH y Fundación de Investigación Biomédica del Hospital Universitario de la Princesa, assignees. Treatment of NRF2-Related diseases. PCT/2022/382025.1.

### Mechanisms and Biomarkers in Neurodegenerative Diseases Group

**López-Rodríguez ML, Viso A, Ortega S, Las-tres-Becker I, González S, Fernández-Ruiz JJ, Ramos JA**, inventors; Universidad Complutense de Madrid, assignees; Nuevos derivados de ácido araquidónico con afinidad por el transportador de anandamide. P200001920. 2020 nov 5

### CARDIOVASCULAR

### Research on Invasive Clinical Cardiology- ICCI-PAZ Group

**Riera del Moral LF**, inventor; FIBHULP, assignee. Aortic endoprosthesis for the treatment of aneurysm. P201231638, PCT/ES2013/070712; 2012 October 24.

**Filgueiras Rama D, López de Sá y Areses E, Millet Roig J, Calvo Saiz CJ**, inventors; Centro Nacional de Investigaciones Cardiovasculares Carlos III (CNIC), FIBHULP, Universidad Politécnica de Valencia, assignees. Method of predicting or prognosticating neurological performance in patients who have suffered a cardiac arrest and optionally comatose status due to ventricular fibrillation. PCT/EP2015/076893, EP3020333; 2014 November 17.

**Castro Conde A**, author; FIBHULP, assignee. Trademark name: RECAR Programa de Rehabilitación Cardiaca; CM 18457042; 2021 April 20.

### Coagulopathies and Alterations of Hemostasis Group

**Nora Butta JY**. Trademark name: WELCOME von willebrand active e-learnig course. CM M4190835; 2022 November 8.

**Arias-Salgado, MT Álvarez Román, V Jiménez Yuste, N Butta Coll, García Rivera Francisco Julián, García Rivera Mª Carmen, Carballo García Mª Ángeles**, inventors. FIBHULP, García Rivera Mª Carmen, Carballo García Mª Ángeles, assignees. Dispositivo de recogida de muestras biológicas. P202230651. 2022 July 22.

### Vascular Physiology and Pharmacology Group

**Pérez Girón JV, Ruiz-Castellanos MJ, de Luis Jiménez O, Pérez Boto V, Sanz González R, Hernández Vélez MC, Mas Gutiérrez JA, Alonso Gordo MJ, Salaices Sánchez M, Ros Pérez M, Coloma Jerez A, Asenjo Barahona A, Sanz Montaña JL, Puente Prieto J, Jensen J**, inventors; NANOATE, S.L., assignee. Method for producing biosensors. P201031224, PCT/ES2011/070536; 2010 August 05.

**Miguel Castro M, López-Alonso Fandiño R, Recio Sánchez MI, Ramos González MM, Aleixandre de Artiñano A**, inventors; CSIC, assignee. Bioactive peptides derived from the proteins of egg white by means of enzymatic hydrolysis. P200301829, PCT/ES2004/070059, EP1661913, US8227207, AT388166, DE602004012289, DK1661913, JP2007523045; 2003 July 31.

**Miguel Castro M, López-Alonso Fandiño R, Ramos González MM, Aleixandre de Artiñano A**, inventors; CSIC, assignee. Production of and antihypertensive properties of peptides derived from egg white proteins. P200501246 PCT/ES2006/070067; 2005 May 23.

**Recio Sánchez MI; Quirós del Bosque A, Hernández Ledesma B, Gómez Ruiz JA, Miguel Castro M, Amigo Garrido L, López Expósito I, Ramos González MM, Aleixandre de Artiñano A, (Contreras Gómez M)**, inventors; CSIC, assignee. Bioactive peptides identified in enzymatic hydrolyzates of milk caseins and method of obtaining same. P200501373, PCT/ES2006/070079, EP1905779, EP2495250, US8354502, AU2006256720, BRPI0611729, CA2611416, CN101305017, CN103254278, JP2008545774, KR20080045108, MX2007015528, NO20080103; 2005 June 08.

**Garcés Rimón M, Miguel Castro M, López-Alonso Fandiño R, López-Miranda González V, Urraga Ocio J**, inventors; CSIC, Universidad Rey Juan Carlos, assignees; Use of multifunctional bioactive products derived from the enzymatic hydrolysis of egg white proteins for treating metabolic syndrome. P201331767, PCT/ES2014/070880; 2013 December 04.

**Miguel Castro M, Garcés Rimón M, López-Alonso Fandiño R, Sandoval Huertas M**, inventors; CSIC, Mario Sandoval Huertas, assignees. Healthy food compositions having gel or foam textures and comprising hydrolyzed egg products. P201331886, PCT/ES2014/070902, EP3106042, US9648897, AR098685, JP2015130856, MX2014015135; 2013 December 20.

**González-Muñiz R, Pérez de Vega MJ, Miguel M, Balsera-Paredes B, Moreno S**, inventors;

CSIC, assignee. Triazolyl polyphenols with antioxidant activity and uses thereof; P201531450; 2015 November 08.

**González-Muñiz R, Miguel Castro M, Pérez de Vega MJ, Balsera-Paredes B, S Moreno**, inventors; CSIC, assignee. Compounds with antioxidant activity and uses thereof. P201630362; 2016 March 29.

**León Martínez R, Abril Comesaña S, Duarte Flórez P, Crisman Vigil E, Michalska P, Salices Sánchez M, Menéndez Ramos JC**, inventors; Fundación para la Investigación Biomédica del Hospital Universitario de la Princesa, UAM, UCM, assignees. Compuestos agonistas nicotínicos y antioxidantes para el tratamiento de enfermedades neurodegenerativas. P201930908. 2019 October 14.

**León Martínez R, Abril Comesaña S, Michalska P, Buendía Abaitua I, Salices Sánchez M, Menéndez Ramos JC, García López M**; inventors; Fundación para la Investigación Biomédica del Hospital Universitario de la Princesa, UAM, UCM, assignees. Compuestos derivados de 2-iodo-7-(((2-(5-metoxi-1H-indol-3-il)etil)amino)metil)-1-alkil/aril-6,7,7a,8-tetrahidro-3H-pirrololo[2,1-j]quinolina-3,9(5H)-diona como agentes antioxidantes, inductores de NRF2 y moduladores nicotínicos para el tratamiento de enfermedades neurodegenerativas. P201930190. 2019 March 01.

**Miguel Castro M, Garcés Rimón M, authors; Miguel Castro M, Garcés Rimón M**, assignee. Trademark name: leggie. ESM4044711; 2019 November 22.

**Miguel M, Bruna E, Redondo BI, Gómez J, Gómez Sánchez J**. inventors: : Cárnicas Josélito S.L: assignee. Extracto procedente de la grasa de cerdo, método de obtención, composición alimenticia que lo comprende y usos del mismo. P2021130236. 2021 March 17

**Miguel M, Bruna E, Redondo BI, Gómez J, Gómez Sánchez J, Sabater-Muñoz B**. inventors: **Cárnicas Josélito S.L**. assignee. Composición farmacéutica que comprende un extracto procedente de la grasa de jamón de cerdo como principio activo y su uso en medicina para la prevención cardiovascular e inflamación intestinal. P202131111. 2021 november 30

## INFECTIOUS DISEASES AND IMMUNITY

### AIDS and Infectious Diseases Group

**Romero Gómez M, Solá Lamoglia R, González García JJ**, inventors; Servicio Andaluz de Salud, Universidad de Sevilla, Fundació Institut Mar D'Investigacions Mèdiques, FIBHULP, assignees. Kit for decision making in patients with Hepatitis C genotypes 1 and 4. P201330731; 2013 May 21.

### Molecular Microbiology Group

**Vicente Muñoz M, Mingorance Cruz J, Rueda González MS**, inventors; CSIC, assignee. Method for determining state of growth and viability of bacterial FTsZ population, whether natural or cultivated, is based on determining existence of FTsZ rings in

actively growing individual cells. P200200370; 2002 February 15.

**Mingorance Cruz J, Castán García P, Franco de Sarabia Rosado PM**, inventors; BIOTOOLS BIOTECHNOLOGICAL & MEDICAL LABORATORIES S.A., assignee. Composition, method and kit for detecting bacteria by means of sequencing. PCT/ES2009/000507, EP2492352, US2013157265, CA2775273, MX2012004627; 2009 October 22.

**Mingorance Cruz J, Castán García P, Franco de Sarabia Rosado PM**, inventors; 2B BLACKBIO S.L., assignee. Composition, method and kit for detecting fungi and yeasts by means of sequencing. PCT/ES2010/000248; 2010 June 02.

#### Immuno-Rheumatology Group

**Pascual-Salcedo Pascual MD, Balsa Criado A**, Plasencia Rodríguez C, authors; FIBHULP, assignee. Trademark name: BioDrug Analysis BIDA. CM 13.808.531, 2015 March 10.

**Fernández Luna JL, Martínez Taboada VM, López Hoyos M, Torices del Val S, Muñoz Cacho P, Varela Egocheaga I, Juliá Cano A, Marsal Barril S, Balsa Criado A**, inventors; FIBHULP, Fundación Instituto de Investigación Marqués de Valdecilla, Servicio Cántabro de Salud, Universidad de Cantabria, FUNDACIÓ HOSPITAL UNIVERSITARI VALL D'HEBRON - INSTITUT DE RECERCA (VHIR), assignees. Method for predicting the clinical response to anti-inflammatory agent therapies. P201600636, PCT/ES2017/000089; 2016 July 26.

**Plasencia C**. Trademark name: MAM Modelo Asistencial Mixto; CM 18637540; 2022 January 13.

#### Innate Immune Response Group

**Llamas Matías MA, López-Collazo E**, inventors; FIBHULP, Llamas Matías MA, Empireo S.L., assignees. Method for determine the risk of developing an infectious disease. P201330768, PCT/ES2014/070434, EP3006570; 2013 May 27.

**Vela Cuenca M, González Navarro P, Valentín Quiroga J, Escudero López A, Pérez Martínez A, Fernández Casanova L**, inventors; FIBHULP, CNIO, assignees. Anti-CXCR4 antibody combined with activated and expanded natural killer cells for cancer immunotherapy. 62/642,313 US Provisional Application; 2018 March 13.

#### Diagnosis and Treatment of Diseases Associated with Abnormalities of the Complement System Group

**López Trascasa M**, authors; FIBHULP, assignee. Trademark name: COMPLEMENTest; CM 009.658.791; 2011, January 14.

#### Lymphocyte Pathophysiology in Immunodeficiencies Group

**Van Dongen JJM, Orfao de Matos Correia E Vale JA, Van Der Burg M, Pérez Andrés M, Van Zelm MC, Kalina T, Vlkova M, López Granados E, Blanco**

**Álvarez E, Kienzler AK**, inventors; Erasmus University Medical Center Rotterdam, assignee. Reagents, methods, and kits for diagnosing primary immunodeficiencies. PCT/NL2015/050762, US62/072,498; 2014 Oct 30.

#### Drug Hypersensitivity and Innate Immune Response Group

**Selgas Gutiérrez R, Bellón Heredia T, Rodríguez Sanz AI, Álvarez Builla J, Vaquero López JJ, Sánchez Alonso P, Alajarín Fernández R**, inventors; FIBHULP, Universidad de Alcalá, assignees. Use of compounds derived from salts of pyridazine[1',6':1,2]pyrido[3,4-b]indolinium as anti-inflammatory agents. P201331143, PCT/ES2014/070603; 2013 July 25.

**Selgas Gutiérrez R, Bellón Heredia T, Rodríguez Sanz AI, Álvarez Builla J, Vaquero López JJ, Sánchez Alonso P, Alajarín Fernández R**, inventors; FIBHULP, Universidad de Alcalá, assignees. Use of compounds derived from salts of pyridazine[3,2-b]benzimidazolium as anti-inflammatory agents. P201430411, PCT/ES2014/070603; 2013 July 25.

#### MicroRNA Regulation of Immune Tolerance, Autoimmunity and Cancer Group

**Voss J, Huang D, González-Martín A, Andrabi R, Burton D**, inventors; The Scripps Research Institute, assignees. B Cell receptor modification in B cells. PCT/US/45255. 2018 August 3

## LARGE SYSTEM PATHOLOGIES AREA

### Organic Dysfunction and Failure in the Agression Group

**Herrero Ambrosio A, Ramírez García E, Ojeda Feo JJ, Pérez Rodríguez J, Asensio Martín MJ, González Sánchez ML, Moro Agud M, Lorente Romeo M, López Nieto**

**M, Gómez Rioja R**, authors; FIBHULP, assignee. Trade-mark name: SINOIRES; CM 13.080.056; 2014 July 14.

### Respiratory Diseases Group

**Díaz García E, Laxman Nanwani K, Quintana Díaz M, García Río F, Cubillos-Zapata C**, inventors; FIBHULP, CIBER, assignees. Biomarcadores para el pronóstico de pacientes que han sufrido una hemorragia subaracnoidea aneurismática (SAH). P202130180; 2021 March 3

### Nephrology Group

**Selgas Gutiérrez R, Bellón Heredia T, Rodríguez Sanz AI, Álvarez Builla J, Vaquero López JJ, Sánchez Alonso P, Alajarín Fernández R**, inventors; FIBHULP, Universidad de Alcalá, assignees. Use of compounds derived from salts of pyridazine[1',6':1,2]pyrido[3,4-b]indolinium as anti-inflammatory agents. P201331143, PCT/ES2014/070603; 2013 July 25.

**Selgas Gutiérrez R, Bellón Heredia T, Rodríguez Sanz AI, Álvarez Builla J, Vaquero López JJ, Sánchez Alonso P, Alajarín Fernández R**, inventors;

FIBHULP, Universidad de Alcalá, assignees. Use of compounds derived from salts of piridazine[3,2-b]benzimidazolium as anti-inflammatory agents. P201430411, PCT/ES2014/070603; 2013 July 25.

**Aguilera Peralta AI, López-Cabrera M, Selgas Gutiérrez R, Steppan S, Passlickdeetjen J**, inventors; Fresenius Medical Care Deutschland GMBH, assignee. Pharmaceutical compositions containing steviosides. EP14191301.2, PCT/EP2015/074955, CN107073022, US10213452; 2014 October 31.

**López-Cabrera M, Aguilera Peralta AI, Selgas Gutiérrez R, Passlickdeetjen J. Buechel J, Steppan S, inventors; Fresenius Medical Care AG & Co. KGaA**, assignee. Method and kit for diagnosing epithelial to mesenchymal transition of the peritoneum (EMT-Chip). DE102015115158.8, PCT/EP2016/071149, CN108449998B, EP3347715B1, ES2833553T3, JP6869963B2, US2018246098A1; 2015 September 09.

### Diagnosis and Treatment of Allergic Diseases Group

**Valenta R, Constantin C, Quirce Gancedo, SE, inventors; Phadia AB**, assignee. Novel wheat allergens. PCT/SE2008/051377, EP2225266, US2010305049, AU2008330230, CA2707190, CN101932597, JP2011505134, RU2010126590; 2007 November 30.

**HAE-QoL** **Caballero Molina MT, Prior Gómez N, Remor Bitencourt EA**, authors, FIBHULP, assignee. Trademark name: HAE-QoL HEREDITARY ANGIOEDEMA QUALITY OF LIFE. CM 13.083.068; 2014 July 15.

**Sánchez Herreros R, Martínez Fernández J, Castro Morera A, Gasset Vega M, Rodríguez Pérez RM, Pedrosa Delgado M, Quirce Gancedo S**, inventors; FIBHULP, CSIC, assignees. Food allergen extracts and methods of producing and using the same. EP16382413.9 (EP3290438); 2016 September 06.

**del Pozo Abejón V, Sastre Dominguez J, Rodrigo-Muñoz JM, Sastre Turrión B, Quirce Gancedo S, Cañas Mañas JA**, inventors; FIISFJD, Centro de Investigación Biomédica en Red (CIBER), FIBHULP, Fundación Conchita Rábago de Jiménez Díaz, assignees. In vitro method for identifying severity levels in bronchial asthma patients. P201730739, PCT/ES2018/070390, EP3633050; 2017 May 29.

### Patient Blood Management Group

**Díaz García E, Laxman Nanwani K, Quintana Díaz M, García Río F, Cubillos-Zapata C**, inventors; FIBHULP, CIBER, assignees. Biomarcadores para el pronóstico de pacientes que han sufrido una hemorragia subaracnoidea aneurismática (SAH). P202130180; 2021 March 3

### Hospital Pharmacy Group

**Herrero Ambrosio A, Ramírez García E, Ojeda Feo JJ, Pérez Rodríguez J, Asensio Martín MJ, González Sánchez ML, Moro Agud M, Lorente Romeo M, López Nieto M, Gómez Rioja R**, authors; FIBHULP, assignee. Trademark name: SINOIRES; CM 13.080.056; 2014 July 14.

## 2. Executive summary

### 2.4 Innovation and Transfer Activities

#### Translational Hepatology Group

**Castán P, Gil-García AI, Madejón A, Sainz-Martínez E, Montoya JJ**, OUAHID YOUNESS, inventors; MORNAX BIOSENS S.L., assignee. Bivalent reverse primers Application number (EPO): 20382336.4-1118. 2020 April 24.

**Madejón A**; inventor; Agile Life Sciences LTD, assignee. Kit and methods Application number: GB202010372.A. 2020 July 6.

#### Associated Clinician

**De la Oliva Senovilla P**, inventor; FIBHULP, Instituto de Salud Carlos III, assignees. Shut-off valve for the interruption technique used in the analysis of respiratory mechanics. PCT/ES2005/000271, EP1897578; 2005 May 16.

**Carballo Cardona C**; author; FIBHULP, assignee. Trademark name: Diagether. CM15869911, 2016 September 29.

#### CANCER AND HUMAN MOLECULAR GENETICS

#### INGEMM- Institute of Medical and Molecular Genetics Group

**Friedman S, Li D, Narla G, Martignetti J, Heath K**, inventors; Mount Sinai School of Medicine, assignee; Kruppel-like factor 6 (klf6), a tumor suppressor protein, and diagnostics, therapeutics, and screening based on this protein. PCT/US2001/025046,

EP1332362, CA2419064, AU8479001, US2005181374, US2011059899; 2000 August 09.

**INGEMM**, author; FIBHULP, assignee. Trademark name: INGEMM

INSTITUTO DE GENÉTICA MÉDICA Y MOLECULAR DEL HOSPITAL UNIVERSITARIO LA PAZ; ESM 2.884.849, USM 77.891.143, CM 8.746.869; 2009 July 16, 2009 December 11, 2009 December 10.

**INGEMM**, author; FIBHULP, assignee. Trademark name: KaryoArray; USM 79.078.751, CM8.512.907; 2010 January 07, 2009 August 27.

**INGEMM**, author; FIBHULP, assignee. Trademark name: OverGrowthArray; ESM 2.958.709-3, USM 85.334.932, CM10.009.256; 2010 December 02, 2011 June 01, 2011 May 31.

**INGEMM**, author; FIBHULP, assignee. Trademark name: MetabolArray; ESM 2.958.711-5, USM 85.334.903, CM10.009.348; 2010 December 02, 2011 June 01, 2011 May 31.

**Palomares M, Lapunzina P, Nevado J, Vallespin E, Vallcorba I, Melero J**, authors; FIBHULP, Hospital Infanta Cristina (Badajoz) Fundesalud, assignees. Trademark name: OncoHematoArray; ESM

2.958.703-4, USM 85.334.842, CM10.009.181; 2010 December 02, 2011 June 01, 2011 May 31.

**Lapunzina P, Nevado J, Solera J, Vallespin E, Martínez P, Martínez-González V**, authors; FIBHULP, assignee. Trademark name: ONCOSeq; USM 85.457.843, CM9.969.064; 2011 October 27,

2011 May 16.

**INGEMM**, author; FIBHULP, assignee. Trademark name: OncoArray; ESM 2.962.910, USM 85.363.107, CM10.091.882; 2011 January 05, 2011 July 05, 2011 July 01.

**Moreno JC, Moya CM, Vallespin E, Lapunzina P, Nevado J**, authors; FIBHULP, assignee. Trademark name: ThyroArray; USM 85.686.688, CM10.904.951; 2012 July 25, 2012 May 23.

**Lapunzina Badía P, Borobia Pérez AM, Carcas Sanjuán AJ, Tenorio Castaño JA, Arias Lajara P, Lubomirov Jristov R**, authors; FIBHULP, UAM, assignees. Trademark name: PharmArray; USM 86.004.412, CM11.608.403; 2013 July 08, 2013 February 27.

**Palomares Bralo M, Vallespin García E, del Pozo Mate A, Santos Simarro F**, authors; FIBHULP, assignee. Trademark name:

RD-Seq Sequencing Rare Diseases; CM 17.911.029; 2018 May 31.

#### Translational Oncology Group

**Cejas Guerrero P, Belda Iniesta C, Feliú Batlle J, González Barón M, de Castro Carpeño J, Casado Sáenz E, Sánchez Hernández JJ**, inventors; FIBHULP, UAM, assignees. Genomic fingerprint for the prognosis of the evolution of colorectal adenocarcinoma. P200703229, PCT/ES2008/000756, EP2236626; 2007 December 04.

**Cejas Guerrero P, González Barón M, Casado Sáenz E, Sánchez Hernández JJ, Perona Abellón R**, inventors; FIBHULP, UAM, CSIC, assignees. Use of trefoil factor family 3 (TFF3) in the prognosis of patients diagnosed with colorectal cancer. P200703230, PCT/ES2008/000757, EP2236625; 2007 December 04.

**Espinosa Arranz E, Fresno Vara JA, Gámez Pozo A, Sánchez Navarro I**, inventors; FIBHULP, assignee. Method for tumor subclassification. P200803509, PCT/ES2009/070533; 2008 December 11.

**Redondo Sánchez A, Hardisson Hernaéz D, Barriuso Feijoo J, Mendiola Sabio M**, inventors; FIBHULP, assignee. Method to obtain useful data for the prediction of a patient's clinical response to an anticancer treatment. P200930400; 2009 July 01.

**Cejas Guerrero P, Belda Iniesta C, Feliú Batlle J, de Castro Carpeño J, Moreno García V, Burgos Lizalde E, Casado Sáenz E, Sánchez Hernández JJ**, inventors; FIBHULP, UAM, Empresa Pública Hospital del Norte, assignees. Genomic fingerprint

for predicting the clinical response to an antitumor therapy in colorectal cancer. P201130863, PCT/ES2012/070379; 2011 May 26.

**Moreno Rubio J, Cejas Guerrero P, Feliú Batlle J, Ramírez de Molina AI, Reglero Rada G, Vargas Alonso T, Molina Arranz S, González-Vallinas Garrachón M**, inventors; FIBHULP, Fundación Imdea Alimentación, assignees. Methods and kits for the prognosis of colorectal cancer. P201231918, PCT/ES2013/070864; 2012 December 10.

**Espinosa Arranz E, Fresno Vara JA, Gámez Pozo A, López Vacas R, Berges Soria J**, inventors; FIBHULP, assignee. Method for tumor subclassification. P201430887, 2014 June 09.

**Miranda Utrera N, Castellano D, Villacampa Aubá F, Fresno Vara JA, Gámez Pozo A**, inventors; FIBH12O, FIBHULP, assignees. Prognostic method for determining the risk of relapse in renal cancer patients with a clear cell type of renal carcinoma, stages I and II, and kit for the same. P201531360, PCT/EP2016/072723, EP3353322B1, US20180346990, CN108174608, DE3353322, FR3353322, GB3353322; 2015 September 23.

**Feliú Battle, J, Fernández Martos C, Fresno Vara JA, Ghanem Cañete I, Gámez Pozo A, Trilla Fuertes L**, inventors; Biomedica Molecular Medicine SL (BMM), Grupo Español Multidisciplinar en Cáncer Digestivo (GEMCAD), assignees. In vitro method for the prognosis of anal squamous cell carcinoma. EP19382982.7; 2019 November 11.

**Redondo Sánchez A, Hardisson Hernaéz D, Barriuso Feijoo J, Mendiola Sabio M**, inventors; FIBHULP,

assignee. Method to obtain useful data for the prediction of a patient's pathological response to an anticancer treatment. P200930438; 2009 July 10.

**Fernández Martos C, Trilla Fuertes L, Fresno Vara JA, Gámez Pozo A, Ghanem Cañete I, Feliú Battle J**, inventors; Biomedica Molecular Medicine SL, Grupo Español Multidisciplinar en Cáncer Digestivo (GEMCAD), assignee. In vitro method for the prognosis of anal squamous cell carcinoma. EP19382982.7; 2019; 2019 November 11.

#### Experimental Therapies and Biomarkers in Cancer Group

**Perona Abellón R, Sánchez Pérez I, Machado Pinilla R, Sastre Garzón L, Murguía Ibáñez JR**, inventors; CSIC, UAM, Universidad Politécnica de Valencia, assignees. Sequence of nucleotides and peptides GSE 24.2 of dyskerin, which can induce telomerase activity, method for obtaining the same, therapeutic compositions and applications thereof. P200502511, PCT/ES2006/070152, EP1947175, US20090202503, US2015337022, AT469212, CA2625981, DK1947175, JP2009511036, JP5560398, PT1947175; 2005 October 14.

**Perona Abellón R, Sastre Garzón L, Machado Pinilla R, Sánchez Pérez I**, inventors; CSIC, UAM, assignees. Use of inductor agents GSE24.2 for producing pharmaceutical compositions for treating illnesses relating to cellular senescence. P200703106, PCT/ES2008/070212, EP2216043, US2011300115, JP2011504483, CA2706467; 2007 November 23.

**Cejas Guerrero P, Belda Iniesta C, Feliú Batlle J, González Barón M, de Castro Carpeño J, Casado**

**Sáenz E, Sánchez Hernández JJ**, inventors; FIBHULP, UAM, assignees. Genomic fingerprint for the prognosis of the evolution of colorectal adenocarcinoma. P200703229, PCT/ES2008/000756, EP2236626; 2007 December 04.

**Cejas Guerrero P, González Barón M, Casado Sáenz E, Sánchez Hernández JJ, Perona Abellón R**, inventors; FIBHULP, UAM, CSIC, assignees. Use of trefoil factor family 3 (TFF3) in the prognosis of patients diagnosed with colorectal cancer. P200703230, PCT/ES2008/000757, EP2236625; 2007 December 04.

**Cejas Guerrero P, Belda Iniesta C, Feliú Batlle J, de Castro Carpeño J, Moreno García V, Burgos Lizalde E, Casado Sáenz E, Sánchez Hernández JJ**, inventors; FIBHULP, UAM, Empresa Pública Hospital del Norte, assignees. Genomic fingerprint for predicting the clinical response to an antitumor therapy in colorectal cancer. P201130863, PCT/ES2012/070379; 2011 May 26.

**Martínez Máñez R, Murguía Ibáñez JR, Perona Abellón R, Agostini A, Mondragón Martínez L, Moreno Torres M, Manguán García C, Marcos Martínez MD, Soto Camino J, Sancenón Galarza F**, inventors; Universidad Politécnica de Valencia, CSIC, Centro de Investigación Biomédica en Red en Bioingeniería, Biomateriales y Nanomedicina (CIBER-BBN), Centro de Investigación Biomédica en Red de Enfermedades Raras (CIBERER), assignees. Release of substances into senescent cells. P201231370, PCT/ES2013/070581, EP2893923, JP2015529216, US2015306037; 2012 September 04.

**Ibáñez de Cáceres I, Belda Iniesta C, Pernía Arias O, Perona Abellón R, Cortés Sempere M**; inventors. FIBHULP, CSIC, UAM, Fundación Hospital de Madrid, assignees. Method for predicting the response to a treatment consisting of radiotherapy combined with cisplatin-based chemotherapy. P201330783, PCT/ES2014/070433, EP3006572, US20160122828, IT1660.13, ES1660.13, FR1660.13, DE1660.13, GB1660.13; 2013 May 29.

**Perona Abellón R, Sastre Garzón L, Pintado Berniches L, Carrillo García J, Molina Pachón A, Iradiccio Silva L, Manguán García C**, inventors; CSIC, UAM, Advanced Medical Projects, Centro de Investigación Biomédica en Red (CIBER), assignees. Peptides derived from GSE 24.2 for treating diseases caused by oxidative stress and damage to DNA. P201331573, AU2014338820, CA2931429, EP3061815 PCT/ES2014/070803; 2013 October 25.

**Ibáñez de Cáceres I, Pernía Arias O, de Castro Carpeño J, Vera Puente O, Jiménez Hernández J, Perona Abellón R, Rojo Todo F**, inventors; FIBHULP, CSIC, UAM, Instituto de Investigación Sanitaria FJD, assignees. Determination of methylation and miRNA levels in response to a platinum-based antitumor compound. P201530997, PCT/ES2016/070516; 2015 July 09.

**Ibáñez de Cáceres I, de Castro Carpeño J, Vera Puente O, Pernía Arias O, Rodríguez Antolín C, González Muñoz VM, Martín Palma ME, Salgado Figueroa AM**, inventors; FIBHULP, FIBIOHRC, assignees. MAFG as a potential therapeutic target to restore chemosensitivity in platinum-resistant cancer cells. EP17382610.8 (EP3681515), PCT/EP2018/068156, US16/647,368; 2017 September 15.

**Ibáñez de Cáceres I, de Castro Carpeño J, Jiménez Hernández J, Rodríguez Antolín C, Rodríguez Jiménez C, Rosas Alonso R, Cruz Castellanos P, Burdiel Herencia M, Pernía Arias O, Diestro Tejada MD, Esteban Rodríguez MI**, inventors; FIBHULP, assignee. miR-151A-3p as an universal endogenous control for exosome cargo normalization. EP19382252.5 (EP3719144), PCT/EP2020/059774 PCT Direct, EP20719957.1 (EP3947733), US17/601,657; 2019 April 05.

**Ibáñez de Cáceres I, de Castro Carpeño J, Rosas Alonso R, Pernía Arias O, Martínez Marín V, Esteban Rodríguez MI**, inventors; FIBHULP, assignee. Method for determining the percentage of methylation of the promoter of the gene O6-methylguanine-DNA methyltransferase (MGMT) in circulating exosomes. EP19382299.6 (EP3725899), PCT/EP2020/060753 PCT Direct, EP20723998.9 (EP3956475), US17/604,172; 2019 April 16.

**Ibáñez de Cáceres I, de Castro Carpeño J, Jiménez Hernández J, Rodríguez Antolín C, Vera Puente O, Rosas Alonso R, Pernía Arias O, Losantos García I**, inventors; FIBHULP, assignee. Method for determining the response to treatment of a patient affected by non-small cell lung carcinoma (NSCLC). EP19382614.6 (EP3999664), PCT/EP2020/069659; 2019 July 19.

### Oto-Neurosurgery Research Group

**Polak M, Roca-Ribas Serdá F, Gavilán Bouzas J, Lassaletta Atienza L, Miró Castillo N, Rodrigo Dacosta J**, inventors;

**MED-EL Elektromedizinische Geraete GmbH**, assignee. Hearing treatment in patients with questionable cochlear nerve functionality. US2011275953, PCT/US2011/035312; 2010 May 05.

**Cobo Parra P, Varela Nieto I, Murillo-Cuesta S, Navares Zaera R, Martínez Vega R, Cediell Algovia R**, inventors; CSIC, UCM, assignees. Anechoic acoustic chamber for evaluating the auditory function in laboratory animals. P201031720; 2010 November 23.

**Cobo Parra P, Varela Nieto I, Murillo-Cuesta S, Cediell Algovia R**, inventors; CSIC, UCM, assignees. Method for designing a reverberating acoustic chamber for hearing test with animals. Procedimiento para diseñar una cámara acústica reverberante para ensayos auditivos con animales. P200802895, PCT/ES2009/070433; 2008 October 14.

**Marco Contelles JL, Varela Nieto I, Murillo Cuesta S, Rodríguez de la Rosa L, Alcázar González A**, inventors; CSIC, CIBERER, FIBIOHRC, assignees. Quinolylnitron derivatives for use in the prevention and/or treatment of hearing loss. EP22382706.4; 2023 July 22

### Cancer Molecular Pathology and Therapeutics Targets Group

**Redondo Sánchez A, Hardisson Hernaéz D, Barrioso Feijoo J, Mendiola Sabio M**, inventors; FIBHULP, assignee. Method to obtain useful data for the prediction of a patient's clinical response to an anticancer treatment. P200930400; 2009 July 01.

**Redondo Sánchez A, Hardisson Hernaéz D, Barrioso Feijoo J, Mendiola Sabio M**, inventors; FIBHULP, assignee. Method to obtain useful data for the prediction of a patient's pathological response to an anticancer treatment. P200930438; 2009 July 10.

**Zapardiel Gutiérrez I, de Santiago García J**, inventors; FIBHULP, assignee. Laparoscopic surgical instrument. P201230950, PCT/ES2013/000139; 2012 June 18.

**Zapardiel Gutiérrez I, de Santiago García J**, inventors; FIBHULP, assignee. Surgical device. P201330532, PCT/ES2014/070277; 2013 April 15.

### Mechanisms of Tumour Progression Group

**Olmeda Casadomé D, Peinado Selgas H, Portillo Pérez F, Nieto Toledano MA, Cano García A**, inventors; UAM, assignee. Materials and methods for the derepression of the E-cadherin promoter. US20060003956; 2004 March 03.

**Olmeda Casadomé D, Moreno Bueno G, Portillo Pérez F, Cano García A**, inventors; UAM, CSIC, assignees. Method for the diagnosis and/or prognosis of breast cancer. P200702342, PCT/ES2008/000563; 2007 August 28.

### Research and Diagnosis of Inherited Metabolic Diseases Group

**Pérez González B, Ruiz Desviat L, Jorge Finnigan A, Ugarte Pérez M, Martínez Ruiz A, Underhaug J, Barnejee R**, inventors; UAM, Universidad de Ber-

gen, Universidad de Michigan, assignees; Compounds useful for the treatment of methylmalonic aciduria. P201330171; 2013 February 11.

**Pérez González B, Gámez Abascal MA, Yuste Checa P, Arduim Brasil S, Ugarte Pérez M, Martínez Ruiz A, Underhaug J**, inventors; UAM, University of Bergen, assignees; Compounds for treating congenital disorders of glycosylation. EP16382373.5, PCT/EP2017/069147; 2016 July 29.

**Ruiz-Desviat L, Martínez-Pizarro A, Picó S, Lucas JJ, Andrésen BS**, inventors; UAM, CSIC, University of Southern Denmark, assignees; Splice shifting oligonucleotides for use in the treatment of diseases characterized by altered inclusion of microexons. PCT/EP2022/077882, EP4163373A1 2023 April 12

### Dyslipidemias of Genetic Origin and Metabolic Diseases Group

**Rodríguez Novoa SM, del Monte Vergara A, Rosas Alonso R, Queiruga**

**Parada J, Yuste González F**, authors; FIBHULP, assignee. Trademark name: Pharma Genfinder; CM18332183; 2020 November 05.

**Ibáñez de Cáceres I, de Castro Carpeño J, Jiménez Hernández J, Rodríguez Antolín C, Rodríguez Jiménez C, Rosas Alonso R, Cruz Castellanos P, Burdiel Herencia M, Pernía Arias O, Diestro Tejada MD, Esteban Rodríguez MI**, inventors; FIBHULP, assignee. miR-151A-3p as an universal endogenous control for exosome cargo normalization.

EP19382252.5 (EP3719144), PCT/EP2020/059774  
 PCT Direct, EP20719957.1 (EP3947733),  
 US17/601,657; 2019 April 05.

#### Associated Clinician

**Glaría Enríquez A, Mañas Rueda A, Velázquez Soto R**, inventors; FIBHULP, assignee. Isolation and immobilization device for test animals. P201031519, PCT/ES2011/070709; 2010 October 14.

#### SURGERY, TRANSPLANT AND HEALTH TECHNOLOGIES AREA

#### Bone Pathophysiology and Biomaterials Group

**González Carrasco JL, Benavente Castro R, Cifuentes Cuellar SC, Lieblich Rodríguez M, Olalde Graells B, Atorrasagasti Goyalde G, Argarate Madariaga N, Pacha Olivenza MA, Fernández Calderón MC, Saldaña Quero L, González Martín ML, Pérez Giraldo C, Gallardo Moreno AM**, inventors; CSIC, Fundación Tecnalia Research & Innovation, FIBHULP, Universidad de Extremadura, Centro de Investigación Biomédica en Red (CIBER). Mouldable, biodegradable, biocompatible and bioresorbable implant material, method for its preparation and uses thereof. P201530683; 2015 May 18.

**Martín Saavedra FM, Vilaboa Díaz NE, Cebrián Hernando V, Arruebo Gordo M, Santamaría Ramiro J, Gómez Navascués L**, inventors; FIBHULP, CIBER-BBN, Universidad de Zaragoza, assign-

ees. Fibrin hydrogel with plasmonic nanoparticles; P201330894, PCT/ES2014/070484; 2013 June 14.

**Vilaboa Díaz NE, Calzado Martín A, Crespo García L, Saldaña Quero L, Moreo Calvo P, Alastrué Vera V**, inventors; FIBHULP, CIBER-BBN, assignees. Chamber device for dynamic cell culture on biomaterials; P201330040, PCT/ES2013/070819; 2013 January 16.

**Vilaboa Díaz NE, González Carrasco JL, Saldaña Quero L, Frutos Torres E**, inventors; FIBHULP, CSIC, CIBER-BBN, assignees. Method to obtain a metallic-coated biomaterial; P201030949, PCT/ES2011/070400; 2010 June 21.

**Vilaboa Díaz NE, González Carrasco JL, Multigner Domínguez M, Lieblich Rodríguez M, Muñoz Hernández M, Frutos Torres E, Saldaña Quero L**, inventors; FIBHULP, CSIC, CIBER-BBN, Universidad Alfonso X El Sabio, assignees. Magnesium/polymer composite biomaterial for biomedical applications; P201030950, PCT/ES2011/070440; 2010 June 21.

**Voellmy R, Vilaboa Díaz NE**, inventors; HSF Pharmaceuticals S.A., assignee. Inhibitors of heat shock factor I and uses thereof. US 16501272, 2023 March 7.

#### Cellular Engineering Group

**de Miguel González MP, Arnalich Montiel F, Royuela MM**, inventors; FIBHULP, Fundación para la Investigación Biomédica del Hospital Universitario Ramón y Cajal, Universidad de Alcalá, assignees. Corneal endothelium injector; P201131222, PCT/ES2012/070543; 2011 July 18.

**De Miguel González MP, Arnalich-Montiel F, Cadenas Martín M, Moratilla Riofrío A**, inventors; FIBHULP, FIBHRYC, assignees. Constructos artificiales para su uso en oftalmología, su procedimiento de obtención y utilización del mismo. Patente Europea EP22382119.0 2022 February 14 . PCT/EP2023/053668 2023 February 14.

#### Clinical Pharmacology Group

**Carcas Sansuán AJ, author; Carcas Sansuán AJ**, assignee. Trademark name: IBJ IberoAmerican Journals; ESM 3.063.048; 2013 February 12.

**Carcas Sansuán AJ, author; Carcas Sansuán AJ**, assignee. Trademark name: IberoAmerican Journals Plus; ESM 3.063.052; 2013 February 12.

**Carcas Sansuán AJ, author; Carcas Sansuán AJ**, assignee. Trademark name: IberoAmerican Journals Clinical Pharmacology; ESM 3.063.053; 2013 February 12.

**Carcas Sansuán AJ, author; Carcas Sansuán AJ**, assignee. Trademark name: IberoAmerican Journals Medicine; ESM 3.063.049; 2013 February 12.

**Lapunzina Badía P, Borobia Pérez AM, Carcas Sansuán AJ, Tenorio Castaño JA, Arias Lajara P, Lubomirov Jristov R**, authors; FIBHULP, UAM, assignees. Trademark name: PharmArray; USM 86.004.412, CM11.608.403; 2013 July 08, 2013 February 27.

**Carcas Sansuán AJ, Borobia Pérez AM**, authors; FIBHULP, assignee. Trademark name: CRDataX; CM13.681.614; 2015 May 28.

**Lapunzina Badía PD, Borobia Pérez AM, Carcas Sansuán AJ, Tenorio Castaño JA, Arias Lajara P, Frías Iniesta J, Dapia García I, Muñoz M**, authors; FIBHULP, UAM, assignees. Trademark name: ClinPharmarray. USM87054978, CM15489511; 2016 May 31, 2016 September 07.

### Osteoarticular Surgery Research-GICOA Group

**Arenas Vara MA, Conde del Campo A, De Damborenea González JJ, Matykina E, Esteban Moreno J, Gómez Barrera E, Pérez-Jorge Peremarch C, Pérez Tanoira R**, inventors; CSIC, Instituto de Investigación Sanitaria Fundación Jiménez Díaz, assignees. Titanium materials anodised with fluorine. P201030720, PCT/ES2011/070342; 2010 May 14.

**Gómez Barrera E, Cordero García-Galán E, Rico Nieto A, Pozo JJ, Esteban Moreno J, Sarnago H, Lucía Gil O, Acero Acero J, Burdío JM**. Portable

desinfection system based on induction heating; September 2022.

### Patients Safety and Quality Research Group

**Herrero Ambrosio A, Ramírez García E, Ojeda Feo JJ, Pérez Rodríguez J, Asensio Martín MJ, González Sánchez ML, Moro Agud M, Lorente Romeo M, López Nieto M, Gómez Rioja R**, authors; FIBHULP, assignee. Brand name: SINOIRES. CM 13.080.056; 2014 July 14.

### Associated Clinician

**Castell Gómez JT**, inventor; FIBHULP, assignee. System of "partial" or "total" openings and button-holes for patient pyjama or nightgown. P200401758; 2004 July 16.

**García Fernández J**, inventor; FIBHULP, assignee. Anaesthesia machine simulator. P200702128, PCT/ES2008/070109, US20090044803; 2007 July 30.

**de Miguel del Campo E, Posadas Mañanes SJ, Reglero Rada GJ, Largo Aramburu C, García Grande A, Merino Martín JJ, Caz Bonillo V, Fornari Reale T, Rodríguez García-Risco M, Señorans Rodríguez FJ**, inventors; FIBHULP, UAM, assignees. Composition for the protection of tissues from the digestive tract and the nervous system of radiotherapy patients; P200931189; 2009 December 17.

**Goldman Tarlovky L**, inventor; FIBHULP, assignee. System and method to obtain data on a patient's breathing cycle. P201030927, PCT/ES2011/070242; 2010 June 16.

**de Miguel del Campo E, Reglero Rada GJ, Largo Aramburu C, Fornari Reale T, Rodríguez García-Risco M, Jaime de Pablo L, Santoyo Díez S, Señorans Rodríguez FJ, García Grande A, Merino Martín J, Caz Bonillo JV, Posadas Mañanes SJ**, inventors; FIBHULP, UAM, assignees. Composition for the reduction of symptoms associated with menopause; P201031225, PCT/ES2011/070586; 2010 August 05.

**Castell Gómez JT**, inventor; FIBHULP, assignee. Surgical device for interrupted suture. P201031491, PCT/ES2011/002352, EP2626014, US13/878035; 2010 October 07.

**Álvarez Gallego M**, inventor; FIBHULP, assignee. Device for the extraction of surgical specimens by insufflation and suction. P201031490, PCT/ES2011/002357; 2010 October 07.

**de Miguel del Campo E, Largo Aramburu C, Tabernero Urbietta M, Reglero Rada GJ, Marín Martín F, Fornari Reale T, Prodanov Prodanov M, Ruiz Rodríguez A, Ibáñez Ezequiel E, Jaime de Pablo L, Soler Rivas C, Rodríguez García-Risco M, Santoyo Díez S, González Lorente M, Arranz Gutiérrez E, Gil Ramírez A**, inventors; FIBHULP, UAM, CSIC, assignees. Functional heart-healthy beverage containing wine and extracts of hops; P201131014, PCT/ES2012/070443; 2011 June 16.

**Reglero Rada GJ, de Miguel del Campo E, Marín Martín F, Fornari Reale T, Prodanov Prodanov**

## 2. Executive summary

### 2.4 Innovation and Transfer Activities

**M, Ruiz Rodríguez A, Largo Aramburu C, Tabernero Urbieto M, Ibáñez Ezequiel E, Jaime de Pablo L, Soler Rivas C, Rodríguez García-Risco M, Santoyo Díez S, González Lorente M, Arranz Gutiérrez E, Gil Ramírez A**, inventors; FIBHULP, UAM, CSIC, assignees. Method to obtain extract of hop and the extract obtained. P201230584, PCT/ES2012/070443; 2011 June 16.

**Brian Gahan P, Stroun M, García del Olmo D, García Arranz M, Vega Clemente ML**, inventors; Peter Brian Gahan, Maurice Stroun, FIBHULP, assignees. Method for blocking tumour growth. EP2808027; 2013 May 29.

**Castell Gómez JT, Carrascal Morillo T**, inventors; FIBHULP, UNED, assignees. Synthetic surgical mesh. P201331453, PCT/ES2014/000161; 2013 October 03.

**Álvarez Gallego M, Castejón Sisamón C, García Prada JC, Meneses Alonso J**, inventors; FIBHULP, UC3M, assignees. Rectoscope. P201630551, PCT/ES2017/070249, EP17788865.8, US20190200853; 2016 April 29.

**Froilán Torres C, de María Pallarés P, Díaz Lantada A, Ortego García P**, inventors; FIBHULP, UPM, assignees. Endoscopic accessory. P201730569; 2017 March 31.

**Azabal Agudo A, Ruiz-Valdepeñas Martín de Almagro S; Julián García Rivera F, de la Quintana Jiménez P**, inventors; UP DEVICES AND TECHNOLOGIES, S.L., FIBHULP, assignees. Dispositivo de corte automático de discos de ostomía. P201830718, PCT/ES2019/070492. 2018 July 16.

**Ramírez de Molina A, Tabernero Urbieto M, Reglero Rada G, Torres Olivares CF, Largo Aramburu C, Santamaría Ramiro M, Polo Paredes G, Ruiz Pérez D, de Miguel del Campo E, Álvarez Gómez de Segura I**, inventors; Fundación IMDEA Alimentación, UAM, FIBHULP, IGENFARMA, assignees. Composición para la reducción del declive metabólico asociado al envejecimiento y/o el tratamiento de trastornos relacionados al metabolismo lipídico. P201830740; 2018 July 20.

**Martín Mateos P, Acedo Gallardo P, Jorcano Noval JL, Díaz Ojeda L, Bonastre Juliá J, Martínez Méndez JR, Largo Aramburu C**, inventors; UC3M and FIBHULP, assignees. Device for monitoring the perfusion status of skin flaps. P202130486; 2021 May 31.

**Salinas Gómez J, García Sanz M**; inventors; FIBHULP and DISTRIBUCIONES CLINICAS S.A. (DICLISA), assignees. Two-way probe for flushing and/or draining. U202100070; 2021 February 19.

**Muñoz Caro JM; Azabal Agudo A, Ruiz-Valdepeñas Martín de Almagro S**, inventors; FIBHULP and Up Devices and Technologies S.L. assignees. Light diffusing device for photodynamic therapy treatment of anogenital region. U202131773; 2021 September 03.

**Gómez Candela C, López Plaza B, Bermejo López L**, authors; FIBHULP, assignee. Trademark name: NUTRinvest Grupo de investigación en Nutrición y Alimentos Funcionales; ESM3.649.812-2; 2017 February 02.

### Neonatology Group

**Segovia Iñigo C, Montes Bueno MT**, inventors; **Segovia Iñigo C**, assignee. Positioning device for neonates (Utility model). U201330102; 2013 January 31.

### Pediatric Systemic Infections; HIV, Tuberculosis, Imported and Emergent Diseases Group

**Mellado MJ, Piñeiro R**, authors; Asociación Española de Pediatría (AEPED), assignee. Trademark name: PEDIAMÉCUM; ESM 3079824; 2013 June 13.

### Translational Research in Pediatric Oncology, Hematopoietic Transplantation and Cell Therapy Group

**Vela Cuenca M, González Navarro P, Valentín Quiroga J, Escudero López A, Pérez Martínez A, Fernández Casanova L**, inventors; FIBHULP, CNIO, assignees. Anti-CXCR4 antibody combined with activated and expanded natural killer cells for cancer immunotherapy. 62/642,313 US Provisional Application, IB2019/052042; 2018 March 13.

**Pérez Martínez A, Ferreras Puente C,B**, inventors; UAM, FIBHULP, Universidad Miguel Hernández de Elche (UMH), Fundación de la Comunitat Valenciana para la gestión del Instituto de Investigación Sanitaria y Biomédica de Alicante (ISABIAL), assignees. Memory T cells as adoptive cell therapy for viral infections. EP20382850.4 (EP3974029), PCT/EP2021/076516; 2020 September 25.

**Mayán Santos M, Acea Nebril B, Varela Eirín M, Rodríguez-Candela Mateos M, Díaz Carballa CC, Fonseca Capdevila E, Barrio LC, Escudero López A**, inventors; Fundación Profesor Novoa Santos-Instituto de Investigación Biomédica de A Coruña (INIBIC), assignees. Composición para el tratamiento de los efectos secundarios de la radioterapia y/o quimioterapia. PCT/ES2020/070269; 2020 April 27

### Research in Endometriosis Group

**Hernández A, López A, Spagnolo E**, authors; FIBHULP, assignees; Brand name: EndoPaz: 018876162. 2023 May 17, 2023 September 27

### Congenital Malformations and Transplantation Group

**Hernández Oliveros F, Nana Gómez Mayoral N, Raya González L, Guijarro Fernández E**, authors; FIBHULP, HePA, U-TAD, Guijarro Fernández E, assignees. Trademark name:VTR Virtual Transplant Reality; CM18.000.131;2018 December 14.

### OTHER TRADEMARKS OF IdiPAZ

**FIBHULP**, author; FIBHULP, assignee. Trademark name: IdiPAZ Instituto de Investigación Hospital Universitario La Paz; USM 85.078.878, CM8.871.873; 2010 July 06, 2010 February 10.

**FIBHULP**, author; FIBHULP, assignee. Trademark name: CEASEC Centro Avanzado de Simulación y Entrenamiento Clínico; ESM 3.567.901-8; 2015 June 22.

**FIBHULP**, author; FIBHULP, assignee. Trademark name: InnoPAZ Plataforma de Innovación Hospital Universitario La Paz; ESM 3.572.575-3; 2015 July 27.

**FIBHULP**, author; FIBHULP, assignee. Trademark name: CEASEC Centro Avanzado de Simulación y Entrenamiento Clínico; ESM 3.567.901-8; 2015 June 22.

## 2.5. IdiPAZ Quality Committee

The search for quality and excellence in research management has been one of the main goals of IdiPAZ since its origin in 2009. This is shown in the fact that external monitoring audits of its Integrated Management System that jointly respond to the ISO 9001 and UNE 166002 standards were satisfactorily completed once again. After this last cycle, the System covers a total of 5 management units, 6 support platforms and 3 collegiate bodies of IdiPAZ, highlighting on this occasion as a novelty the incorporation in the quality certificate of the scientific support process in project applications that is provided to researchers as well as the corporate process of scientific dissemination. Likewise, a significant effort has been made to proceed in this latest audit to adapt the R&D&I management system (research, development and innovation) to the requirements of the new UNE 166002:2021 Standard, which brings healthcare and research personnel closer to the culture of innovation and promotes alliances with other agents in the field of innovation, both national and international.

Although the first certification of the Quality Management System was given in 2013 and its development has been a strategic objective all these years, its growth and consolidation has been especially notable in the last 4 years, currently being included in the scope for both standards the processes of the following units platforms and organ:

- Quality Commission
- Project request support.
- Innovation Support Unit.
- UICEC.
- SANGER sequencing.
- Biobank.
- Management of scientific production and communication.
- Training Commission.
- Common laboratories.
- Project management.
- Accounting.
- Legal and Contracting.
- Human resources.
- Collegiate Government Bodies.

Quality certificates to all units, platforms and bodies involved were delivered during the presentation of the Scientific Report of IdiPAZ 2022 which took place November 20<sup>th</sup> 2023.

Moreover, for a third year in a row specific training webinars were developed by the Committee in order to strengthen the competence of IdiPAZ members in quality management, thus ensuring the sharing of best practices among them. These webinars are accessible at IdiPAZ website: <https://idipaz.es/PaginaDinamica.aspx?IdPag=20&Lang=ES>

Finally, considering that IdiPAZ is a continuously evolving organisation, the Quality activities of our institution have been enriched by the different achievements made by its member organizations.

The attached table shows the clinical pathways reviewed in 2023, as well as the protocols developed or updated in the same period. In addition, the staff continuously collaborates in the improvement of the institution by participating in clinical committees and setting up improvement groups, as well as by implementing patient and professional satisfaction surveys. Also during 2023, the quality management of the hospital's departments has been consolidated into a comprehensive management system in accordance with the various national and international ISO standards. The hospital has also been recognised by the National Accreditation System for Reference Units and the European Reference Networks of the European Commission

## 2.6 Platforms

### 2.6.1 Biobank

The Hospital La Paz Institute for Health Research Biobank (IdiPAZ Biobank) is a platform of support service to the Institute's research, product of the integration of different pre-existing nodes with a long and fruitful research trajectory within the University Hospital La Paz. The IdiPAZ Biobank works to obtain, store, manage and distribute large collections of human biological samples of diseases of interest for researchers.

In 2020, the Biobank increased its capacity with the incorporation of new scientific-technical services, and as result the platform has been renamed as Biobanks and Biomodels platform.

This service is created with the collaboration of the University Hospital La Paz, the Foundation for Biomedical Research of the University Hospital La Paz (FIBHULP) and the Carlos III Health Institute, being integrated into the Network of Hospital Biobanks (RetBioH). The Biobank of the University Hospital La Paz - Institute of Health Research of the University Hospital La Paz - IdiPAZ is registered in the National Biobank Network of the Carlos III Health Institute with the code B.0000684.

The **Platform for Biobanks and Biomodels of IdiPAZ** (PT23/00028) belongs to the *ISCIII Biobanks and Biomodels platform* (<https://www.isciii-biobanksbiomodels.es/>) to support research in Biomedicine and Health Sciences from Strategic Health Action 2017-2023 of the Carlos III Health Institute.

The ISCIII Biobanks and Biomodels Platform has joined the European Biobanking Infrastructure (BBMRI-ERIC) as an observ-

ing member, acting as the national node in BBMRI-ERIC, one of the most relevant research platforms in the European Union.

Since 2018, the Biobank of IdiPAZ was certified according to the ISO 9001:2015 quality management system standard within the scope of IQNet Certificate IdiPAZ Number ES-0512/2018.

### Objectives

The main objective of the IdiPAZ Biobank is to promote biomedical research, which will increase and improve the quality of scientific production in Spain. This is a specialized work in the management of human biological samples and their associated data for biomedical research in accordance with the legislation in force in Spain, Law 14/2007 on Biomedical Research and the RD of Biobanks 1716/2011. This guarantees the confidentiality of the samples and associated data.

The IdiPAZ Biobank provides researchers with an agile channel to access samples, their products and data associated with quality assurances and ethical-legal adaptation.

The obtaining, and if necessary the revocation, of the patient's informed consent is controlled. Special attention is given to guarantee the protection of privacy and the confidential treatment

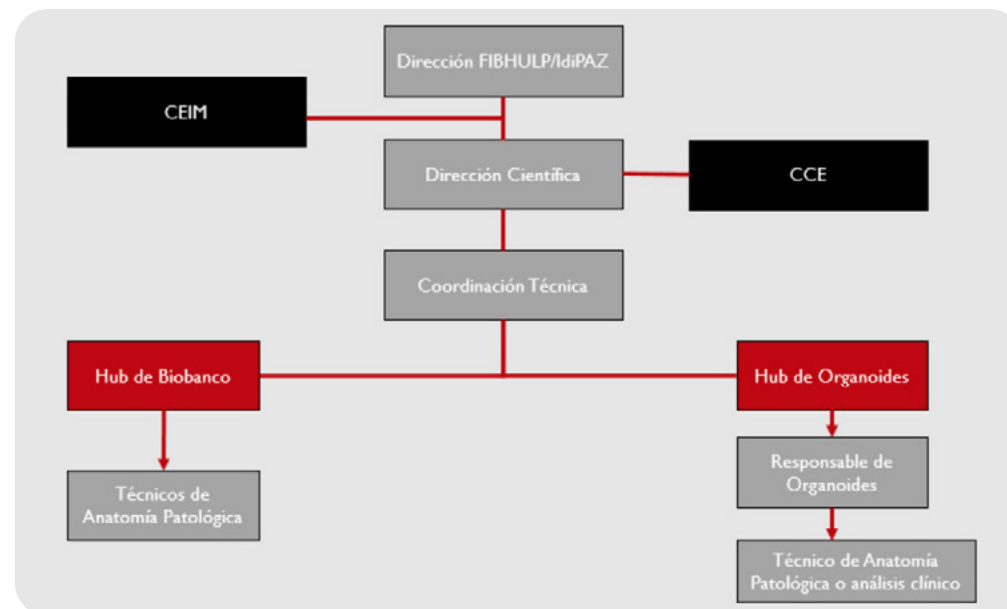

### Biobanco y biomodelos (BB)

of personal data contained in the IdiPAZ Biobank, clinical data and research results.

Thanks to this, the development of a continuous dynamic of analysis and evaluation of the needs of the users of the Biobank is favored. In addition, the activity of the IdiPAZ Biobank is made known and valued to society and, especially, in the field of patient and affected associations.

The IdiPAZ Biobank will provide benefits at different levels, starting with donors, patients, society in general and the clinicians and researchers involved. It also aims to facilitate communication and co-operation of different groups with common interests both nationally and internationally.

All of this will result in a higher quality of research and an increase in scientific production, without forgetting the strict compliance with the regulations on Data Protection and the Rights to Privacy and Confidentiality of all patients (Organic Law 3/2018 and Regulation General Data Protection 2016/679).

Alicia Hernández Gutiérrez (MD, PhD)

Eduardo López Granados (MD, PhD)

### Equipment

- Eight -80°C deep freezers equipped with remote alarm temperature control and a CO<sub>2</sub> backup system. Seven of these are equipped with an open door control software
- One tank of liquid nitrogen at its gas phase with an alarm temperature control and a lack of CO<sub>2</sub> detector
- W-2D tube system with a data matrix codification for liquids, with a scanner to read col boxes and reader for the identification and the traceability of the tubes
- Combined refrigerator of 4° C y -20° C
- Cryostat to cut frozen samples
- Microtome y bath/coating to cut paraffin samples
- Laser Microdissector
- Biological safety cabins IIA
- Centrifuge with capacity to process samples in tubes and Eppendorfs
- Automatic platform to manipulate and trace liquids
- One mini coolers to freeze inclined biological samples below 1°C
- Two containers to freeze and transport Isopentane
- One container for the transport of isopentame samples
- Vortex Mixer /agitator
- Spectrophotometer (Nanodrop®)
- Fungibility: basically kits and the necessary products to process and preserve tissues, blood, and cells.
- Printer/photocopier/scanner
- 3 computers and a management computer system
- Label printing system and a bar code reader connected to the management software

### Portfolio of services

#### HUB Biobank

##### Technical and scientific assessment:

- Collection and management of new collection
- Work Methodology/ Methods
- Quality control of DNA/ARN sample treatment
- Expert training to use Biobank management system
- Training and advice on the use of Biobank management software.
- Information to the investigator on the custody, deposit, availability and transfer of samples associated with the biobank.
- Training of trainees (FCTs) of training cycles.

##### Sample/collection management:

- Coordinating a collection of samples in multiple study/research centers
- Storage of pre-existing collections under LIB 14/2007.
- Storage of preexisting samples in accordance with Spain's Biobank laws LIB 14/2007 and 1716/2011 Royal Decree
- Management and control of Informed Consent (CI) and/or clinic's regarding samples
- Aliquot of blood/serum/plasma/other liquids
- Sample reception and codification

##### Histology techniques:

- Making paraffin block
- Making frozen tissue blocks
- Paraffin/frozen cuts
- Hematoxylin and eosin stain (H&E)

- Other kinds of stains
- Laser microdissection

##### Cell techniques:

- Purifying and freezing of mononuclear cells of peripheral blood (PMBCs)
- Molecular Techniques:
- DNA and RNA quantification via spectrophotometer (NANODROP)

Researchers who wish to deposit their collections in IdiPAZ' Biobank will have to sign an agreement of sample deposit (in which the terms and conditions under which the Biobank will deposit the samples) and in agreement with the existing legislation on the subject. Also, researchers who wish to use our samples will have to sign a Transfer Agreement (Material Transfer Agreement) in which the terms and conditions under which the Biobank will grant the samples.

#### HUB Organoids

IdiPAZ's Biobank is working on the establishment of a living biobank of organoid 3D models directly generated from patient biopsies. Patient derived organoids (PDOs) are novel in vitro 3D cell models that preserve the molecular, structural and functional characteristics of their tissues of origin, representing a clinically-relevant alternative to traditional 2D cell lines and an effective tool to study the biology of human tissues in health and disease. Currently we have a comprehensive collection of over 70 highly

characterized human intestinal organoids, including rectum and colon, derived from both healthy and colorectal cancer biopsy tissue. This organoid patient-derived collection includes a detailed description of associated patient clinical and pathological data of great value for translational research purposes, as well as histological and molecular characterization of both the tissue of origin and the resulting organoid cultures.

### Areas of application

- Studies of tissue morphogenesis and organ development
- Modelling of infectious, genetic and inflammatory diseases
- Oncology and immuno-oncology
- Identification of diagnostic and prognostic biomarkers
- Drug screening for toxicity and efficacy
- Personalized and precision medicine

### Portfolio of services

- Culture of human healthy intestine organoids derived from donor biopsies
- Culture of human tumoral intestine organoids derived from donor biopsies
- Paraffin/OCT embedding and sectioning
- Hematoxylin and eosin characterization
- Characterization by immunofluorescence and confocal microscopy of organoid sections and 3D organoids
- Cryopreservation and biobanking

### Biobank's scientific indicators

#### Stored samples

118,642

#### INPUT 2009-2023

#### OUTPUT 2009-2023

### 2.6.2. Biostatistic Platform

The Platform for Biostatistics is a pioneer in the field of research support in hospitals and carries out work that is recognised by the vast majority of professionals who, for several decades, have requested statistical advice for their research work or for other studies with immediate application to healthcare practice.

#### Portfolio of services

- Advice on the methodological design of research projects and clinical trials, drafting of protocols and statistical analysis plans.
- Determination of sample size for clinical trials and research projects.
- Data analysis of research projects and clinical trials, writing of interim and final reports, and futility analysis.
- Data management of research projects and clinical trials, eCRD designs in Macro and RED-Cap, data management plan writing and data validation.
- Development of software dedicated to the extraction and pre-processing of existing information in information systems.
- Support for the interpretation of scientific publications and their applicability in clinical practice.
- Evaluation and validation of diagnostic tests.
- Design of clinical scales and scores.

### 2.6.3. Experimental Surgery

The Experimental Surgery Section includes a microsurgery room, an operating room, an animal facility, and service areas (changing rooms, office, and staff room). The microsurgery room is used for performing microsurgical procedures on small species, mainly rodents. It is equipped with surgical microscopes, inhalation anesthesia systems, and cardiovascular monitoring. It also has mobile tables and fixed benches that allow for flexible arrangements, making it versatile for both microsurgery courses and laparoscopic simulation.

The operating room is fully equipped with complete surgical stations: surgical tables, anesthesia stations, and cardiovascular monitoring systems. It also has laparoscopic, ultrasound, and X-ray equipment. This room is used for all procedures involving large animals (rabbits, pigs, or sheep), as well as training courses in various specialties such as laparoscopic surgery, anesthesia, trauma care, and the development of surgical techniques.

The animal facility has 7 conventional housing rooms plus 2 SPF rooms, handling rooms for large species and rodents. It also has specific equipment for washing and disinfecting housing materials.

#### Animal facility

Research and teaching at IdiPAZ involving the use of laboratory animals are managed through the experimental surgery platform of IdiPAZ, supervised by Dr. Carlota Largo Aramburu. This department develops biomedical research projects, specialized training courses in various areas, as well as proce-

cedures to implement new diagnostic techniques or therapies involving the use of experimental animals. Additionally, it collaborates with the Ethics Committee for Animal Welfare, whose authorization is necessary for all procedures.

The animal facility is located in basement 2 of the IdiPAZ building within the hospital complex. It has a total of 9 rooms for housing animals, both in breeding and experimental phases, plus 2 rooms for handling animals and experimental procedures, and 2 rooms for washing materials, which include a cage washer, an autoclave, and a pressure washing system. To ensure its proper functioning, it is connected with the rest of the Experimental Surgery departments, which include a double operating room, a microsurgery room, and various additional rooms (changing rooms, offices, and storerooms).

The species typically used include rodents (rats, mice, and gerbils), rabbits, pigs, sheep, and goats, and occasionally dogs, cats, or guinea pigs. There is also a housing unit for fish (zebrafish). To avoid contamination and ensure an efficient workflow, the rooms for housing large animals are physically separated from those for rodents and the rest of the facilities (washing area, storerooms, or han-

dling room). Additionally, all rooms are equipped with an external video camera system to monitor the interior and avoid unauthorized personnel entry.

The cages provide the minimum dimensions required for housing pigs and/or small ruminants. The structure of each cage includes stainless steel anchored to the wall, with sliding separators that allow the expansion of space by joining two cages. The rooms have the necessary slope to encourage the elimination of solid residue through a drain located at the rear of the cage, equipped with protection systems to prevent the entry of rodents or insects. For cleaning the room and the animals, there are hot and cold water connections via hoses.

The rabbit room includes modular mobile racks of 3, 6, or 9 cages, in which the rabbits are housed in individual stainless steel cages with plastic grids, complemented by an internal box structure that allows the animals to hide or climb to a higher position. The stainless steel feeders and water drinkers are located in the cage door, with a removable stainless steel tray to collect feces and urine. This room has a central drain similar to the facilities for large animals.

The rodent area is separated from the rest of the facility by a system of doors without locks, where staff can dress appropriately before entering (boots, gown, gloves, cap, and mask). This area contains 3 rooms for housing rats and mice. There is also a storeroom for food and shavings, as well as a room for handling and performing procedures.

In addition to the two large animal areas, the facilities include: a washroom equipped with a cage washer (Matachana), a stainless steel pool, and an autoclave. It also has a pressure washing system for cleaning the cages and/or visitors who require it.

A recently incorporated SPF area for immunodeficient mice with capacity for 4 ventilated racks, a housing area for them, and an SPF laboratory. This room is located in an isolated area within the biocontainment facility, with restricted access and airlock systems to prevent the entry of pathogens. The door has controlled access and features a HEPA filtration and ventilation system for both incoming and outgoing air, ensuring the air circulates without introducing pathogens.

The animal facility complies with all current legislation and is registered under number ES-280790001941.

### Composition

#### Section Head Veterinarian:

Carlota Largo Aramburu  
*carlota.largo@salud.madrid.org*  
 Phone: (+34) 91 207 15 81

#### Secretary:

Irene Cuevas Gordo  
*irene.cuevas@salud.madrid.org*  
 Phone: (+34) 91 727 71 54

#### Technicians and assistants:

Maria del Mar Varona García  
 Fernando Gil Villaverde  
 Rubén Ruiz Garzón  
 Paloma Guijarro Bachiller  
 Verónica Claudia Véliz Ticona  
 Carmen Rius Copoví  
 Lourdes Hernanz del Álamo  
 Elena Martín de Castro

#### Portfolio of service

- Animals for experimentation (own breeding)
- Housing and maintenance of animals
- Leasing of spaces for conducting courses (microsurgery laboratories and operating room)
- Performance of surgical procedures on large animals (leasing space and anaesthesia, does not include surgery)

#### Animal experimentation projects approved by the competent authority in 2024

- Strategic activation of regulatory T cells to treat immune-mediated diseases causing fibrosis. Dr. Luis Stark Aroeira.
- Nanotechnology applied to the treatment of inflammatory diseases. Use of the nanoparticle NIL10 as a candidate for the treatment of psoriasis and atherosclerosis. Dr. Carlos Zaragoza Sánchez.
- Micro-structured patterned PLA films to promote wound healing. Dra. Nuria Vilaboa Díaz.
- New therapeutic solutions for the treatment of irradiated skin. Dra. Nuria Vilaboa Díaz.
- Reproduction of homeostasis and metabolic stimuli during prolonged normothermic per-

fusion of isolated liver. Dra. Carolina Cubillos Zapata.

- Thyroid disruption biomarkers and fetal brain damage in Dehal1 knockout mouse model of gestational thyroid dysfunction. Dra. Paz de Miguel.
- Development and therapeutic application of a normothermic extracorporeal perfusion system in intestinal transplantation: the end of the ice age. Dr. Javier Serradilla Rodríguez.
- Translational potential of HSF1 transcription factor inhibitors as anticancer drugs. Dra. Nuria Vilaboa Díaz.
- Is it possible to prevent post-traumatic/post-surgical arthrofibrosis? Validation of a new experimental rat model of arthrofibrosis and efficacy of celecoxib and ketotifen in its prevention. Dr. Enrique Gómez Barrena.
- Prognostic impact of glycemic variability in acute cerebral infarction and influence of corrective hyperglycemia treatment in a rat animal model. Dra. Blanca Fuentes Jimeno.
- High-resolution multimodal ultrasound imaging in cerebrovascular diseases. A preclinical approach to new translational applications. Dra. María Gutiérrez Fernández.

#### Training activity

The experimental surgery platform has hosted 30 training activities in addition to the fine-tuning of new surgical techniques or medical device and the training of multidisciplinary teams and residents.

### 2.6.4. Documentalist

The documentalist platform is responsible for the analysis, maintenance and dissemination of the scientific production generated by the Institute. This production is collected both in the bibliometric reports that are published on the IdiPAZ website as well as in the Institute's Research Report which is published annually and in which all the research activity of our research groups is collected. Also key is the support of the unit to the scientific management when carrying out internal evaluations of researchers or research groups.

The platform provides support to all IdiPAZ researchers when performing bibliographic searches, managing ORCID, CVN or different researcher profiles, advising on scientific evaluation, advising on quality criteria for scientific publications and any training related to this service.

This platform has also played a key role in publicizing and promoting open access policies, as well as participating in the initiatives carried out by public institutions for the creation of institutional repositories.

Through the documentalist, IdiPAZ members can print the posters that will be used to disseminate the results of their research at the congresses of their specialties.

Since 2018, the Documentalist Platform of IdiPAZ was certified according to the ISO 9001:2015 quality management system standard ES-0512/2018.

#### Objetives

The main objectives of the platform are:

- To show society the relevance of scientific research conducted at IdiPAZ.
- Facilitate transparency and maximize the impact of the scientific production of the institute.
- Collaborate in the transmission of knowledge generated in the IdiPAZ environment.

#### Composition

##### Head:

Raúl Román Cañizares  
*documentalista@idipaz.es*  
 Phone: (+34) 91 727 75 76

#### Portfolio of services

- Elaboration of Research Report: Design of forms to collect information, bibliographic searches and calculation of bibliometric indicators.
- Collaboration with researchers: Collaboration with research personnel in the search and location of documents useful for their research.
- Elaboration of bibliometric reports: Creation of control tools to keep a record of the Institute's publications.

- Evaluation of researchers: Calculation of bibliometric indicators for decision making in calls where there is a quota of researchers.
- Bibliometric evaluation of research groups: Calculation of bibliometric indicators to determine the scientific production of both established IdiPAZ groups and new groups for their subsequent inclusion in the Institute.
- Advice on bibliographic search tools: Help in the knowledge of the different valid tools for conducting bibliographic searches in specialized databases.
- Advice on the use of bibliometric techniques: Assistance in the knowledge and application of bibliometric indicators to scientific production.
- Poster printing for congresses

### 2.6.5. UICEC

La Paz Research and Clinical Trials Unit (Unidad de Investigación Clínica y Ensayos Clínicos del Hospital La Paz, HULP-UICEC), is one of the IdiPAZ supported research platforms. Its purpose is to promote and support clinical research at La Paz University Hospital and to establish collaboration links with other investigation centres. Presently HULP-UICEC is the coordinator of the Spanish Clinical Research Network (SCReN), research platform of Instituto de Salud Carlos III.

Its wide portfolio of services provides support to researchers in design, set-up (including IRBs and Competent Authority approvals), management, data analysis and report writing of clinical trials and research projects. As Trials Managers, assists the Principal Investigators in the preparation of feasibility and financial reports, administrative tasks (i.e., investigators coordination, schedule of visits), as well as projects development and research, particularly in the recruitment and follow-up of patients and data collection, assistance in audit, inspections and adverse drug reactions management according to regulatory procedures, among other tasks. We also perform nursing activities and laboratory management, obtaining, processing and shipping the samples to central laboratories. All operations are GCP compliant as needed.

HULP-UICEC also runs a Phase I-II Trial Unit; the facilities and equipment allows harbour early phase clinical trials both in healthy volunteers and patients (children and adults).

### Facilities

- 6 Work offices (28 work stations)
- 1 Meeting room (with audiovisual and teleconference systems)
- 1 Archive room
- Phase I/II Clinical Trial Unit:
  - » A hospital ward with eight beds and four chairs (children and adults)
  - » 2 Doctor's office
  - » 1 Central point for sample collection
  - » 1 Sitting room
- Carlos III Satellite Unit
  - » 1 Work office and doctor's office
  - » 1 Laboratory

### Equipment

- 2 ECG
- 1 Centrifuge (Carlos III Satellite Unit)
- 2 Refrigerated centrifuge
- 1 Refrigerator
- 1 Room temperature chamber (Carlos III Satellite Unit)
- 3 -20°C freezers (1 in Carlos III Satellite Unit)
- 2 -80°C deep freezer
- 4 Vital signs monitors
- Defibrillator
- Temperature recording system
- Digital clocks synchronised by GPS
- 2 medical scales (1 in Carlos III Satellite Unit)
- Digital blood pressure monitors and pulse oximeters
- Digital timers
- Crash trolley
- 2 Cure trolleys
- Video surveillance system
- 11 patient calling devices
- 4 patient surveillance cameras

### Portfolio of services

The portfolio of services includes more than 80 tasks grouped into:

- Methodologic support
- Clinical trial pre-study activities
- Study development
- Finalization and closure tasks
- Pharmacovigilance
- Statistics and data management
- Medical and nursing tasks

### 2.6.6. Internationalisation

The Internationalisation Platform of IdiPAZ is the office in charge of mobilising, promoting and managing the international projection of the research groups. Our continuous objective is to promote the different research groups that make up the institute at an international level, identifying possible synergies between groups and centres, new partners and sources of funding, as well as the formation of strategic alliances. To this end, we try to maintain open dialogues, not only with our researchers but also with the policy centres involved in the designing and planning the future of research in the European Union.

Throughout 2023, the Platform has relied on the efforts of:

**José Luis Narro Villanueva, MBA**

**Santi Rello Varona, PhD**

During 2023, the Internationalisation officers have navigated the increasing effort required to apply with success to the new Horizon Europe (HE), while managing the 26 internationally funded projects active during the year. We have attended 44 events, workshops and information days concerning the deployment of new rules, tips for proposal prepara-

tion, brokerage events and the deployment of new standards of international research and innovation. In addition, we have organised and performed five training courses, workshops or research stages.

In 2023, we participated in 39 proposals for competitive international research public funding (HE, EU4HEALTH, and Partnerships). In 2023, the Innovation Support Unit took over the labour of dynamisation of IdiPAZ's participation in EIT-Health. This represents a steady increase from the previous year, consolidating our presence in the European Research Area. IdiPAZ participates in six funded projects submitted during 2023, attracting more than three million euros.

Besides, the Platform's staff participates directly in the IdiPAZ involvement in the Experts' Group assessing the Spanish National Representative for EU Health Research, the European Open Science Cloud Association (EOSC-A), the Coalition on Advancement of Research Assessment (CoARA) and the international projects coordinated by the institute: RISEinFAMILY and the ERN TransplantChild.

Finally, throughout 2023 we have managed the following financed and active international projects:

## 2. Executive summary

2.6 Platforms

Project	Programme	Logo
AIMed	Antimicrobial Integrated Methodologies for orthopaedic applications	H2020-MSCA 
CARE	Corona Accelerated R&D in Europe	IMI 
CareInTrials	Care in Clinical Trials involving Youth. Exploring Vulnerability through Empirical Philosophy in a Clinical Trials Unit	H2020-MSCA 
CORDIAL	Clinical validation of a continuous flow peritoneal dialysis system, with dialysate regeneration	H2020 
EHRA-PATHS	Addressing multimorbidity in elderly atrial fibrillation patients through interdisciplinary, tailored, patient-centred care pathways	H2020 
EJP -RD	European Joint Programme on Rare Diseases	H2020 
ERA4HEALTH	Fostering a European Research Area for Health Research	HE 
ERA4TB	European Tuberculosis Regimen Accelerator	IMI 
ERICA	European Rare Disease Research Coordination and Support Action	H2020 
ERN BOND	European Reference Network on Rare BONE Diseases 2023-2027	EU4HEALTH 
ERN TransplantChild (Coordinated by IdiPAZ)	ERN TransplantChild Bridging Grant 2022-23 TransplantChild 2023-2027 PaEdiatric Transplantation European Registry - PETER	EU4HEALTH 3rd EU Health Programme 
EU-RESPONSE	European Research and Preparedness Network for Pandemics and Emerging Infectious Diseases	H2020 
HosmartAI	Hospital Smart development based on AI	H2020 
iroNKiller	Joining the forces of Natural Killer Cells and Ferroptosis to treat Refractory Neuroblastoma	HE-MSCA 

Project	Programme	Logo
ISIDORE	Integrated Services for Infectious Diseases Outbreak Research	HE 
LIVERATION	Unravelling the impact of Radiofrequency in liver surgery: the key to decrease local recurrence?	HE-MISSION CANCER 
MPX-RESPONSE	A clinical research network to improve the management of Monkeypox virus disease.	HE 
ORTHO-ALLO-UNION	ORTHOpaedic treatment with ALLOgenic combined ATMP in long bone fracture delayed UNION and non-union.	HE 
RELECOV 2.0	Consolidation of WGS and RT-PCR activities for SARS-CoV-2 in Spain towards sustainable use and integration of enhanced infrastructure and processes in the RELECOV network	EU4HEALTH 
RESPIN-VAR	REstoring balance: Specialized Proresolvin mediators for resolution of INflammation and VAScular Repair in humans at high cardiovascular risk	PARTNERSHIP-ERA 4HEALTH
RESPOND	Improving the Preparedness of Health Systems to Reduce Mental Health and Psychosocial Concerns resulting from the COVID-19 Pandemic	H2020 
RISEinFAMILY (Coordinated by IdiPAZ)	Alliance for Family Integrated Care (FiCare) Implementation in Neonatal Intensive Care Units	H2020-MSCA 
SPIDeRR	Stratification of Patients using advanced Integrative modeling of Data Routinely acquired for diagnosing Rheumatic complaints	HE 
UNDINE	The human genetic and immunological determinants of the clinical manifestations of SARS-CoV-2 infection: Towards personalized medicine.	HE 
VACCELERATE	European Corona Vaccine Trial Accelerator Platform	H2020 
VERDI	SARS-cov2 variants Evaluation in pRegnancy and paeDiatrics cohorts	HE 

### 2.6.7. Flow Cytometry Laboratory

The Flow Cytometry Core is an integrated facility into the Hospital La Paz Institute for Health Research (IdiPAZ), that provides all its members and external groups access to affordable and high-quality flow cytometry services, along with decisively scientific expertise using this technology in research.

We highlight a wide variety of flow cytometry applications: phenotypic analysis of cellular subpopulations using extracellular and intracellular staining, preliminary studies for subsequent clinical application, complex multicolor flow cytometry analysis, etc. This technology is an indispensable biomedicine tool, promoting symbiosis between clinical and basic researchers, as well as cooperation with external institutions.

The services provided include:

- Theoretical seminars and hands-on workshops training.
- Scientific and technical support.
- Experimental design, data analysis and interpretation assistance.
- Development of novel multicolor flow cytometry techniques assistance.

#### Equipment

Currently, the unit has three analyzers:

- Two Becton Dickinson FACSCalibur™ cytometer analysers:  
A system that supports a wide variety of research and clinical applications and is complemented by a broad suite of intuitive software solutions to streamline analysis for a wide range of applications including enumeration of lymphocyte subsets, stem cells, residual white blood cells, and reticulocytes.  
Each analyser has two lasers: Blue argon laser (3 detectors), and Red solid state Diode (1 detector), with which FACSCalibur™ can analyse four colors simultaneously.
- One Becton Dickinson FACSCelesta™ cytometer analyser:  
It is designed to make multicolored flow cytometry more accessible and allow researchers to benefit from new equipment and reagent technological innovations. These optical and reagent technology parallel advances allow multi-laser equipment to complement with new bright fluorochromes, providing a deeper and more powerful insight into cell analysis.  
This analyser has three lasers: Blue solid state Diode (4 detectors), Violet solid state Diode (6 detectors), and Ultra Violet solid state Diode (2 detectors), with which FACSCelesta™ can analyse twelve colors simultaneously.

These support a wide range of flow cytometry applications, and the possibility of developing new ones responding to facility needs and/or upon users demand. Also, during the current year, the Flow Cytometry Core endured quality levels required according to ISO 9001:2015 standard.

### 2.6.8. Cell Culture Unit

The Cell Culture Unit has been established as a core support division integrated and supported by Hospital La Paz Institute for Health Research (IdiPAZ) and La Paz University Hospital (HULP). This unit facilitates the establishment and management of in vitro model systems and the performance of experimental-related techniques for different applications and purposes. These include the elucidation of molecular and cellular mechanisms involved in different biological processes, the prediction of cellular and tissue responses to specific microenvironments and/or the identification and development of potential therapeutic drugs, compounds and/or cellular targets. Therefore, this platform provides a fundamental basis for the development of research initiatives in the field of Health Sciences and Biomedical and Pharmacological Research.

#### Objetives

The Cell Culture Unit accomplishes its mission by providing users with assistance and support at scientific, technical and instrumental level through access to knowledge, equipment, material and human resources. According to IdiPAZ strategic plan and other institutional guidelines, this division contributes to the translation of biomedical research by fostering the synergies and cooperation between traslational- oriented research groups belonging to IdiPAZ as well as to other external institutions. It also provides a dynamic and shared operational environment with a convenient basis for the exchange and dissemination of the scientific knowledge, innovation and creativity as well as the creation of collaborations and alliances between researchers of various areas, categories and disciplines. Moreover,

the association and proximity with other IdiPAZ core facilities such as the Molecular Imaging and Immunohistochemistry Unit, the Flow Cytometry Unit or the BSL2-Virology laboratory, enable users to develop complementary techniques, to explore and upgrade research hypotheses and to extend and/or improve their objectives.

#### Composition

 Phone: (+34) 91 207 15 12  
*investigacion.hulp@salud.madrid.org*

#### Equipment and facilities

The Cell Culture Unit consists of an experimentation laboratory, a cryopreservation room and a warehouse. All facilities are located in the IdiPAZ building.

The experimentation laboratory was fitted in 2023 with the following equipment:

##### Cabinets:

- 4 Telstar Bio-II-A biological safety cabinets
- 2Telstar Bio-II Advanced 3 biological safety cabinets

- 2 Nuaire NU-437-400E biological safety cabinets
- 1 Heraeus HS-12 biological safety cabinet
- 1 Faster BH-EN 2004 biological safety cabinet
- 1 Gelaire BSB 4A biological safety cabinet
- 1 Esco Class II BSC biological safety cabinet
- 1 Labogene Mars Pro 1200 biological safety cabinet
- 1 Faster BIO 48 vertical laminar flow cabinet
- 1 Faster TWO 30 vertical laminar flow cabinet

##### Incubators:

- 3 Thermo Forma 311 incubators
- 2 HERAcell incubators
- 1 Biotech Galaxy S incubator
- 3 Nuaire Autoflow incubators
- 1 Sanyo O2/CO2 incubator
- 1 POL-EKO incubator
- 1 Binder CB-S 260 incubator

This equipment is complemented with a centralized and alarmed gas system, which guarantees a constant and controlled supply of CO<sub>2</sub> and N<sub>2</sub>.

##### Microscopes:

- 1 Nikon DIAPHOT TMD inverted light microscope connected to a Nikon D80 digital camera.
- 1 Leica DMIL inverted light microscope connected to a Canon Powershot S70 digital camera.
- 1 Optika inverted light microscope
- 1 Motic AE2000 inverted light microscope connected to an automatic counter Celeromics
- 1 Lan Optics inverted light microscope

### Centrifuges:

- 2 Eppendorf 5810R refrigerated centrifuges
- 2 Eppendorf 5804 centrifuges
- 1 Hettich Universal 32R refrigerated centrifuge
- 1 Kubota 2010 centrifuge
- 1 Eppendorf 5415D centrifuge
- 1 Heraeus Megafuge 1.0 R centrifuge

### Freezing and refrigerating systems:

- 5 Liebherr refrigerators (4 ° C and -20 ° C)

### Other equipment:

- 1 Presoclave 75 P-Selecta autoclave
- 1 Heidolph Reax 2000 vortex
- 1 Raypa BAE-4 thermostatic waterbath
- 1 Memmert WNB thermostatic waterbath
- 2 P-Selecta Precistern thermostatic waterbaths
- 1 Grant JB Aqua 12 Plus thermostatic waterbath

Vacuum pumps, pipettes, counters, automatic pipetors, freezing containers, cell counting cameras, etc ....

### The cryopreservation room is equipped with:

- 2 Statebourne Biorack 3000 liquid nitrogen tank
- 1 Thermo Locator 6 Plus liquid nitrogen tank
- 1 10 K Taylor Wharton liquid nitrogen tank
- 1 MVE Cryosystem 4000 liquid nitrogen tank
- 1 Cryo Diffusion B2016 liquid nitrogen tank
- 1 Cryo diffusion B2048 liquid nitrogen tank
- 1 Cryo Diffusion B2011 liquid nitrogen tank
- 1 SEO GT40 liquid nitrogen tank
- 1 MVE XLC 511 liquid nitrogen tank
- 1 Cryo Plus 7405 liquid nitrogen tank
- 1 Worthington LS SERIES liquid nitrogen tank
- 1 VWR 1478-0274 liquid nitrogen tank
- 1 Arpege 110 liquid nitrogen tank
- 1 Arpege 70 liquid nitrogen tank
- 1 Arpege 140 liquid nitrogen tank

The infrastructure for cryopreservation is completed with a liquid nitrogen transfer device and an alarmed

Oxygen O2 detector coupled to a mechanical ventilation system.

### Portfolio of services

In general, this Division offers support for experimental approaches on an extensive range of matters including cell experimentation, consumables and reagents, equipment and laboratory area, technical assistance, training and research.

The main aspects of this support includes:

- Scientific and technical advice, personalized support and consultation: guidance in experimental setup and design, study planning, optimization of techniques and protocols, reagents and material acquisition, cells supply, troubleshooting, analysis and interpretation of results...
- Basic training and hands-on experiments (encouraging the self-service mode) according to biosafety, waste disposal and good laboratory practice guidelines.
- Access to facilities including instrumentation, equipment, materials and reagents.
- Preparation and supply of certain materials, reagents and sterile solutions.
- Management and general supervision including good laboratory practices and work habits, occupational health and safety, cleaning and waste disposal and operation and maintenance of the equipment.
- Performance of experimental procedures: establishment, maintenance, and propagation of cell lines and primary cultures, cryopreservation and resuscitation, viability and proliferation, etc...
- Control and maintenance of cryopreserved stock cells.

- Elaboration and management of protocols and guidelines, operating procedures, reports and other required mandatory documentation.
- Detection, identification and treatment of contaminations in cell cultures.

The Cell Culture Unit was certified according to the ISO 9001:2015 quality management system standard within the scope of IQNet Certificate INSTITUTO DE INVESTIGACIÓN SANITARIA DEL HOSPITAL UNIVERSITARIO LA PAZ Number ES-0512/2018.

The personnel associated to the Unit are indebted to the users and other joint staff who directly and indirectly has contributed to this highlight.

## 2.6.9. Molecular Image and Immunohistochemistry Unit

The mission of the Molecular Image and Immunohistochemistry Unit (UII) is to provide a centralized service equipped with the highest quality histology, immunohistochemistry and imaging equipment, as well as scientific and technical support to researchers. This core belongs to the network of core facilities supported by the Research Institute of Hospital La Paz (IdiPAZ) and La Paz University Hospital. The UII staff supports to the researchers' requirements through training sessions, development of protocols and technical processes of the projects. This activity is carried out thanks to its commitment to quality, innovation and specialized continuing training. As a part of the network of IdiPAZ core facilities, UII plays an essential role in enabling scientists and clinicians to realise their projects creating a link between basic and clinical research. The Unit activities are encompassed in the improvement of the quality management, education and innovation criteria ruled by IdiPaz strategic plan.

The Molecular Image and Immunohistochemistry Unit is open to all investigators, including; IdiPaz and their affiliates, commercial and not-for-profit biotechnology companies, and other academic institutions. The Unit, located in the IdiPaz building at the La Paz University Hospital, consists of two sections, the Immunohistochemistry and the Microscopy laboratories. Immunohistochemistry laboratory, housed in the first floor of IdiPaz building, offers protocols and automated high-throughput equipment allowing citospynes, fixation techniques (paraffined or frozen), sectioning of tissues (microtomes and

**IMAGE UNIT**  
**Microscopy and Immunohistochemistry labs.**  
**IdiPAZ.**

cryostats), and a wide variety of techniques ranging from routine histological techniques to immunohistochemical and immunofluorescent techniques in cells, whole frozen or fresh organs, or embedded in paraffin tissues

Microscopy Lab is in the -1 floor of IdiPaz building and offers facilities to perform a range of real time and end-point assays, including cell number, proliferation, apoptosis, cell size, and shape and viability measures. The equipment of Microscopy's lab allows doing con-

ventional, fluorescence, confocal and high-content microscopy, includes a Stellaris 8 and Leica TCS SPE inverted confocals, Leica DM6000 inverted fluorescence microscope, a microscope inverted Nikon Eclipse Ti with in vivo incubation system and a microscope Nanosight with a system of tracking nanoparticles.

### Resources, equipment and management of the laboratory

The services of the UII are available to all scientists in different models; collaboration, Do-It-Yourself (DiY) or in a fee (in this case, it must be consulted the head of the laboratory, the lab will support the service depending on staff availability). DiY users are allowed to access the facilities ONLY after training by the lab staff, training sessions can be scheduled at any time of the year. In addition, the lab provides fee-for-service model of use to external institutions and private companies. The general rule of the platform is that trained and authorized IdiPaz users have free access to the platform in a Do-It-yourself manner.

The laboratory staff will give the basic rules to new users for good practices and safety work in the laboratory. Users should not use the equipment until the laboratory personnel have checked their correct training. Users must schedule the time of work in any equipment and booking reserve it is mandatory in all the facility. Access requires previously authorized use of the magnetic individual identification card.

### Equipment of Molecular Image and Immunohistochemistry Unit

#### Immunohistochemistry Laboratory:

- Tissue processor providing efficient, reliable and timely processing of paraffin wax (Leica TP1020)
- Embedding unit for high quality paraffin blocking (Leica Arcadia HC)
- Selecta Wax dispenser, paraffin wax dispenser with adjustable temperature from ambient to 100 °C
- 2 microtomes for specimen sectioning Leica RM2255
- Leica EG 1150C Cold plate
- 2 thermostatic water Leica HI 1210 baths
- 1 thermostatic water Selecta Thermofn bath
- 2 Cryostat for frozen sectioning (Leica CM 3050S and Leica CM1950)
- PTLINK DAKO
- Crison pH meter
- Liebher combi (-20°C and 4°C)
- Liebher economy freezer (-20°C)
- Shandon Cytospin 2
- Memmert BE 500 and UN30, Termaks and Selecta ovens.
- Selecta Agimatic-E magnetic stirrer with heating

- Olympus CH microscope, for practical laboratory applications
- Gilson pipette sets
- Selecta Agimatic-E magnetic stirrer with heating
- Staining area with manual options for Do-It-Yourself staining and cover slipping.
- Olympus BX41 (Bright field) upright microscope with an attached Digital camera
- Zeiss Axio Lab.AI microscope five objectives from 5x to 100x. ERC5S Axocan camera.
- Nanosight LM10 viewing unit measures nanoparticles, exosomes, vesicles's size based on the scattering of light, includes
  - » a microscope, a LM10 viewing unit with an objective x20
  - » a Marlin camera, and is connected to a image analysis software.
  - » Laser camera
  - » injector

The laboratory is equipped with shared facilities from Translational Oncology and Anatomopathology Breast and Gynecological Cancer groups that use them for diagnostic and clinical research purpose (ESCO fume hood and Crison Microtome). Permission to use must be asked to the head of these laboratories.

#### The Microscopy laboratory equipment includes:

- Stellaris 8 Leica confocal. Leica DMI8 inverted microscope;
  - » Illumination source, White and diode 405 Lasers
  - » equipped with incubation chamber Oko Lab
  - » Oko Lab incubation system
  - » Oko-Lab Gas Controller Bold line
  - » Microscope culture plates adapter

- NIKON microscope ECIPSE IT to conventional and fluorescence microscopy, in vivo imaging and High Content (equipped with incubation chamber)
    - » Camera IMAGING SOURCE
    - » Lauda Ecoline Star incubator edition 003

  - Large images acquisitions (scanning the entire slide) for bright field and fluorescence.
  - Collaboration for sample processing protocols for microscopy (fastening, staining, marking, etc.) and advice for planning projects that could require the use of microscopy.

### Research highlights

In 2023, Image unit maintained their quality standards in order to support and collaborate with the groups belonging to the research areas of IdiPAZ; Neurosciences, Infectious disease and immunity, Cancer and human molecular genetics, Cardiovascular, Organ system pathologies and Surgery, transplant and health technologies. The specialized staff is committing to researchers by assisting with histological, molecular and microscopy techniques which produce not only high quality data to support grant applications, scientific disseminations (Thesis) and national and international scientific publications but also time and cost savings when using shared resources. Specifically, the collaboration with Cirugía de Trasplantes y malformaciones congénitas' group has produced one publication and one congress communication.

Equipment usage ratio

the case in periods before COVID, the activity remains similar or even higher than that estimated in 2022, as can be seen in the annual equipment use graph.

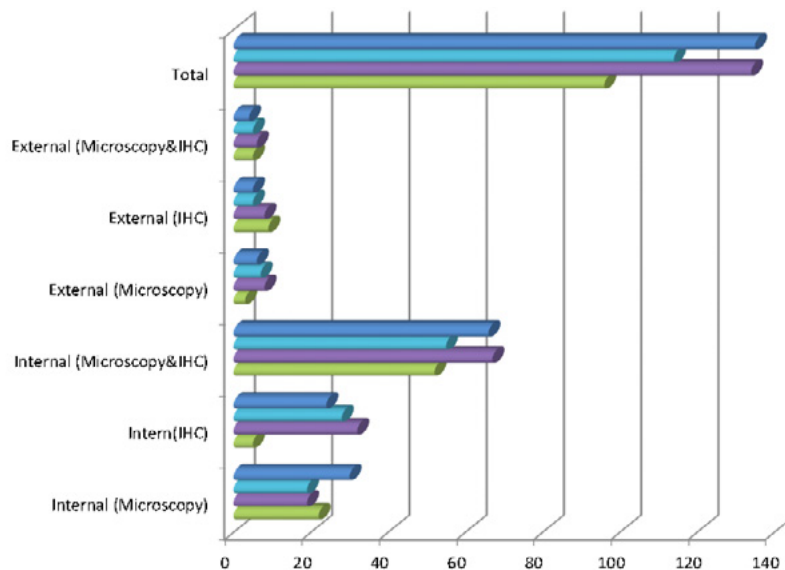

In this last year, 2023, we have increased the number of users until it equals what we had in 2021. As in the last two years, the most of inner users are interested in both facilities, Microscopy and Immunohistochemistry labs. The External users are interested mainly in the Microscopy lab.

The greater number of users has also resulted in an increase in the hours of use of the equipment. This increase is mostly due to FIBHULP users, both basic and clinical (FIBHULP I+D and HULP) and to a lesser extent to external research groups (UCM, CSIC, etc.) remains practically the same.

The Image and Immunohistochemistry Unit has the certified scope of quality by AENOR referring to its processes according to the guidelines of the UNE-EN ISO 9001: 2015 Standard, and it was renewed in 2023.

As in previous years, and continuing with its work in the dissemination of science, the unit has participated in the workshop "Light and colour to know our cells. Visit-workshop to the Imaging Unit" during the XXIII Science Week organized by the CAM. And finally, the platform participates in training activities as a laboratory tutor for Anatomic Pathology students who need this training to obtain their Higher Certificate of Studies in Anatomic Pathology laboratory. In this sense, collaboration agreements have been renewed with vocational training centers in Madrid, in the field of anatomic pathology laboratory work.

During the year 2023, it has been proven that the extraordinary period of low activity suffered by the consequences of the pandemic has ended. In 2023, as was

Time of use. Equipment metric (hours)

## 2.6.10. Radioisotope Unit

The radioisotope unit of IdiPAZ is a second category radioactive facility authorized by the Nuclear Safety Council for the use of non-encapsulated radioactive sources. The radioisotopes authorized at the facility are: 3H, 33P, 32P, 125I, 14C, 51Cr.

The laboratory, in addition to the beta counter, has equipment and working space for the performance of molecular biology and biochemical procedures and experiments with cell cultures. Currently the most common procedures are cell proliferation tests with tritiated thymidine.

The use of the facility both by staff of the institution and by external users requires prior authorization by those responsible for the facility that approves both the technical suitability of the users to work with radioactivity, and the procedures to be employed. The HULP Radiation Protection Service is responsible for control of the facility and of the radioactive wastes generated.

## 2.6.11. BSL2-Virology Laboratory

The BSL2-Virology laboratory is an IdiPAZ platform created in September 2019 to support the Institute's research. Many are the research groups that have benefited from the platform to conduct their research safely, since working with samples infected with a certain type of pathogen requires facilities with an adequate level of biosafety. The BSL2-Virology laboratory was certified according to ISO 9001 quality management standard within the scope of IQNet.

### Objectives

The BSL2-virology laboratory has been adapted to work with human samples infected with the HIV, HBV and HCV viruses; as well as GMOs of risk group 1 and 2. It also allows developing certain experimental processes with other viral pathogens that require a biosafety level 2. The laboratory provides researchers with the necessary equipment to perform their own experimental processing and analysis, as well as training and assistance.

### Composition

#### Coordinator

Berta Rodés Soldevila

### New facility

Since July 2023, the IdiPAZ building has a new BSL2-Virology laboratory. The new facility of 44.5 m2 represents an increase of more than half of the previously available space.

The new Laboratory consists of an anteroom equipped with SAS, autoclave and hand wash sink with hand free operations, followed by a changing room located

before entering the experimental laboratory. The laboratory airflow has negative pressure system and passes through HEPA filters.

### Permitted laboratory processes

- Processing of different types of blood cells from people living with HIV (PLWH)
- Preparation of samples from PLWH for cytometry. Studies of cellular polyfunctionality in the immune response against HIV.
- Handling and experimental processes of cell cultures.
- Measurement of the impact of antiretroviral drugs on mitochondrial function in PBMCs.
- Construction of viral protein expression vectors in eukaryotic expression vectors.
- Constructs of gene expression with viral vectors (lentiviruses and retroviruses)
- ELISA techniques of infectious samples.
- In May 2020 the laboratory was authorized for use of blood samples from patients with covid-19 and certain related processes.

### Resources

The new BSL2-Virology Laboratory consists of an anteroom equipped with SAS, autoclave and hand wash sink with hand free operations, followed by a changing room located before entering the experimental laboratory. The laboratory airflow has negative pressure system and passes through HEPA filters. All facilities are located in the IdiPAZ building.

The experimental laboratory is equipped with the following equipment:

#### Type II Biological Safety Cabinets (BSC):

- 2 BSC Telstar BIO-II-A/P
- 1 BSC Neuroaire CSB120

#### CO2 incubators:

- 2 HERAEUS BB-6220 incubators

#### Centrifuges:

- 1 HERAEUS Biofuge primor refrigerated centrifuge
- 1 Hettich Universal 320 non-refrigerated centrifuge
- 1 Hettich Universal 320 R
- 1 Hettich Mikro 220 R

#### Microscope:

- 1 NIKON Eclipse TS100 Inverted Optical Microscope
- 1 OPTIKA Microscopio XDS3

#### Refrigeration systems:

- 1 Liebherr upright freezer (-20°C)
- 1 Liebherr profi line fridge (4°C)

#### Other equipment:

- 1 P-Selecta Precistern thermostatic bath
- 1 Inteliwasher 3D-IW8 BIOSAN
- 1 Automatic cell counter LUNA II

## 2.6.12. Sequencing Platform

Biomedical research is the main core of IdiPAZ institute and automatic sequencing facility is proud to participate in this working area of the hospital. Our facility is a support for translational research in the hospital in terms of genomic analysis and supporting diagnosis units. The facility has helped to incorporate research results in the routine of the hospital.

Automatic sequencing facility has the necessary equipment and infrastructure to perform tasks such as conventional sequencing (Sanger method), marker DNA genotyping and other molecular biology techniques based on capillary electrophoresis. The equipment can use up to five simultaneous colours on the same sample when it migrates to the genetic analyzers. Therefore, we are able to detect more than 30 polymorphic markers per sample. The expertise of the staff allows us to offer design, protocol development, and data analysis support and task training in genomic techniques.

On the other hand, the Genomic Analysis core offers assistance services in Next Generation Sequencing to the institute's research lines, providing support in the analysis of WES and WGS data.

During the last year, collaborations with different research groups has resulted in the co-authorship of seven articles in international journals.

The Genomic Analysis core has managed to develop two lines of research thanks to the granting of two research projects.

Both Sanger Sequencing and Genomic analysis cores are committed to quality work by maintaining ISO 9001:2015 certification. In addition, lab participates in international external quality controls annual evaluations (EMQN) and quality control evaluations with other laboratories.

### 2.6.13. Bioinformatics Service

#### Objective

Research bioinformatic support platform whose main objective is to promote the development of any DNA / RNA study on a massive scale, either in humans or in other organisms. The activity of the platform is aimed at advising scientists and researchers on the possibilities and benefits obtained from the application of computational biology techniques in their research. In addition, researchers will be supported in the analysis and interpretation of data obtained using high-throughput experimental techniques.

#### Composition

##### Coordinator

Alejandro Pascual Iglesias  
*alejandro.pascual.iglesias@idipaz.es*  
 Phone: (+34) 91 207 15 12

#### Services

- Experimental design. Advice to decide the sample size, the design of the study and the planning of the methodology.
- Data analysis. The bioinformatic processing of the data obtained is carried out in various high-performance technological platforms used in the field of genomics. These analyzes include normalization, statistical analysis, and representation of the results. The most common analyzes are:
  - » Differential expression of genes, miRNAs or lncRNAs. The technology of origin of

the experiments can be microarrays (Affymetrix, Agilent) or RNA-seq (Illumina, Ion Torrent).

- » Protein-DNA interactions from immunoprecipitation and microarray (ChIP-chip) or sequencing (ChIP-seq) experiments.
- » Helps to interpret results. Once the genes of interest have been selected, biological-functional assignment studies are carried out, such as the study of functional enrichment of gene / protein lists.
- » Design, implementation and administration of databases (eg of patients, samples, etc.).
- » Individualized training activities: Training for users (scientific / technical) in the main theoretical and practical foundations for handling results and their interpretation.

#### Functioning

The procedure to follow is as follows:

- Fill in the "Job Application" form and send it to carolina.rubio.Martín@idipaz.es. Fill in what you want to do by means of a short memory in which the primary objective of the study and the secondary objectives, if any, are clearly specified.
- Meeting with the Bioinformatics Platform to share questions such as the sample size with which it is going to work, the statistical power to be obtained and the variables to be analyzed.

- Preparation and delivery of the data to be analyzed in the format previously agreed between both parties.
- Carrying out the analysis.
- Delivery of results in the pertinent formats.

#### Equipment

- High technical computer
- Intel Core i9 9900K
- Gigabyte Z390 D ATX 1151 1
- MEMORY HYPERX FURY 16GB

#### Activity in 2023

All the projects based on the work of bioinformatic platform are actually resulting in several research projects:

- "Estudio de la funcionalidad inmunológica circulante y la correlación con la infección por sars-cov-2 y adenovirus en hepatitis aguda pediátrica"
- Extending the Poly Functional Immune Liquid Biopsy (PolyFIL) to colon adenomas monitoring, rectal cancer diagnosis and new immunotherapies
- Long COVID-19 study in patients
- SEPSIS project
- THCs en sangre periférica en pacientes sometidos a resección quirúrgica pulmonar.

In the first study, known as "Pediatric acute hepatitis

of unknown origin”, bioinformatic platform has developed a predictive model for this disease, working with pediatric department of Hospital La Paz (M<sup>a</sup> Loreto Hierro Llanillo) and pediatric UCI.

In sepsis project, this platform constructed a database taking all data from septic patients from Hospital La Paz and created a classification method for them. In addition, volcano analysis was performed

with all the data, leading to biomarkers identification.

Counselling services in different researching projects like organoids development for Laura Cordoba (Organoids HUB).

In THC (tumor hybrid cells) project in patients with lung cancer, bioinformatic platform developed

several analyses for thoracic surgery department, in collaboration with Sandra Pardo. This work was presented in SEOM meeting and will be further developed in more patients.

In terms of bioinformatics analysis, the platform created and developed an screening test for colon cancer for Carlos del Fresno and performed statistical analysis for new cohort of patients.

### 2.6.14. PAIN Platform

The Early-Stage Researcher Support Platform (Plataforma de Apoyo al Investigador Novel) from IdiPAZ is a platform that aims to promote the design and development of research projects in health areas. Focused in our early-stage professional researchers, training and research development will be encouraged to achieve our clinicians a better performance in competitive calls.

#### Composition

##### Head

Paloma Gómez Campelo

##### Technical manager of mentor program

Daniel Quijada Alcón

*mentor@idipaz.es*

*Phone: (+34) 91 207 17 40*

#### Portfolio of services

- Methodological and epidemiological support to the study design of the professionals in early-stage research.
- Technical and methodological support in developing a research protocol for a study. Analysis of the grounds for refusal of rejected projects.

- Methodological support to write grant proposals to access all available funding programs.
- Technical support in writing other scientific documents.
- Management of the Mentor Program

#### Mentor Program

IdiPAZ, with the support of La Paz University Hospital, has implemented since 2021 an Institutional Project, the Mentor Program, with the purpose of supporting our clinical early career researchers in the achievement of competitive projects, mainly from the main national call for health research projects: "Acción Estratégica en Salud (AES)", granted by Instituto de Salud Carlos III.

The objectives of the program are:

- Increasing the number of clinical research in IdiPAZ.
- Avoiding a generational leap of clinical researchers.
- Strengthening the research profile of our clinical staff.
- Becoming IdiPAZ a clinical research model, as the same level that IdiPAZ is in the clinical trials.

- Performing an internal cultural change in clinical research

The Mentor Program provides scientific and technical support in the preparation of a research project proposal. This support is structured as follows:

- Training, through seminars, in the different sections of the report of a research project.
- Advice, support and review in the drafting and configuration of the report and budget.
- Support in the creation of the curriculum.
- Methodological support through the institution's platforms.
- Support in the creation of solid research teams.
- Promotion of citizen engagement in research projects.

Furthermore, it take into account the experience and scientific knowledge from our senior researchers to help our early-stage researchers from the beginning of their research career.

In 2023, IdiPAZ has implemented the 3rd Mentor Program, in which 95 participants have participated:

In order to ensure that the research project proposals submitted by our early-stage researchers have a high degree of excellence, the Mentor Programme has a training plan structured in webinars for each section of the application report.

In 2023, the following webinars were held as part of the Mentor Programme training plan:

TOPIC	DATE	SPEAKER
FIS PROJECT PREPARATION KEYS. PROJECT EVALUATION.	04/10/2023	Daniel Quijada
METHODOLOGY: STRUCTURE, BIASES AND CONTINGENCY PLAN	10/10/2023	Daniel Quijada
DORA CRITERIA	17/10/2023	Daniel Quijada
METHODOLOGICAL PLANNING FOR CLINICAL TRIALS	31/10/2023	Alberto Borobia
CVN	07/11/2023	Raúl Román
HOW TO PREPARE A GOOD BUDGET	14/11/2023	Silvia Arce, Raquel Carmona
STRATEGIC INTEREST OF THE PROJECT, DISSEMINATION AND CITIZEN ENGAGEMENT PLAN	21/11/2023	Daniel Quijada
GENDER PERSPECTIVE AND DIMENSION IN RESEARCH	28/11/2023	Daniel Quijada
DATA MANAGEMENT PLAN. DATA PROTECTION	12/12/2023	Daniel Quijada, Estela Sánchez
ORCID IDENTIFIER	19/12/2023	Raúl Román
AES CALL INTERNAL INFODAY	22/02/2024	Daniel Quijada

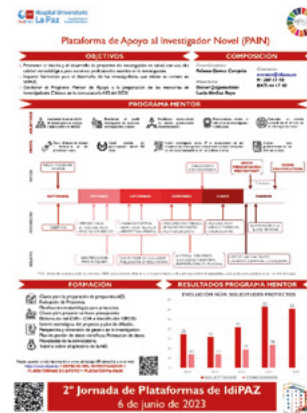

In its third year, all the actions developed in the Mentor Programme have led to an increase in the number of proposals applied to Acción Estratégica en Salud (AES) call for health research projects by IdiPAZ researchers:

**OTHERS ACTIVITIES CARRIED IN 2023**

Throughout 2023, the PAIN platform has participated in the 2nd Platform Infoday in IdiPAZ and in the Science and Innovation Week. In this dissemination activity, a conference entitled: ‘How to be a scientific Sherlock Holmes’ was given to secondary school students.

Informative Breakfast, organised by POP  
 18th October 2023

## 2.6.15. Food, Nutrition and Health

The IdiPAZ Food, Nutrition and Health Platform (NUTRinvest) is a structure created to provide scientific-technical service and support in Human Research and Specialized Advice in Nutrition and Food issues.

The Platform provide service of Specialized Advice in Nutrition and Food at 3 levels:

1. Industries (agro-food or pharmaceutical sector) interesting in the new products development with an improved nutritional profile.
2. Companies interested in creating new technological tools to facilitate the acquisition of guidelines and healthy habits (web, app, etc.) and healthy habits.
3. Individual interested in knowing their nutritional status through a precision and individualized nutritional assessment.

### Composition

#### Principal Researcher:

Bricia López Plaza, PhD, MSc  
*bricia.plaza@idipaz.es*

#### Project manager

Samara Palma Milla, PhD, MD  
*samara.palma@salud.madrid.org*

#### Clinical Research Associate

Laura Mola Reyes (Endocrinologist)  
*lmola@salud.madrid.org*  
 Rosa María García Moreno (Endocrinologist)  
*jMartinh2@salud.madrid.org*  
 Lucía Arcos Castellanos (Nutricionist)

*lucia.arcos.castellanos@idipaz.es*  
 Natalia García Vázquez (Pharmacist)  
*nGarcia.hulp@salud.madrid.org*  
 Marlhyn Valero Pérez (Nutricionist)  
*marlhyn.valero@salud.madrid.org*

### Main sectors

- Agri-food/pharmaceutical industries interested in designing or validating the effectiveness of new products.
- Institutions/government agencies with an interest in expanding knowledge in the area of nutrition for the generation/implementation of political measures in Public Health.
- Public or private institutions that want to develop computer applications, or information or communication programs in the field of Nutrition of interest to health professionals, consumers or patients.
- Researchers with interest in the inclusion of nutritional variables in their research projects.
- Individuals interested in obtain information about their nutritional health and who wish to receive precision and individualized nutrition through detailed analysis.

### Portfolio service

- Scientific advice to improve nutritional profiles of foods or nutritional formulas.
- Scientific-technical support in the area of Human Nutrition research:
  - » Create well designed Project Plan for Clinical Trials and other human studies.

- » Management and Submission of applications to the Ethics Committee: The platform prepares and management all the documents required by obtain the approval of the Ethics Committee (Informed consent form, Letters from ethics committees. Study questionnaire (copies of any questionnaires or draft questionnaires), Case Record Forms (CRFs), Budget details, etc.)
- » Field work execution (all activities are carried out by members of the platform team with consolidated qualifications in the area):
  - Individualized dietary studies: through the use of validated tools (Food records (24h, 3-7 days), Food Frequency Questionnaires, Weighted food records, DIAL software, calorimetry ...)
  - Diagnostic and screening nutritional studies: using validated methodology (Subjective Global Assessment (SGA), Nutritional Status Assessment (NSA), Malnutrition Universal Screening Tool (MUST), Mini Nutrition Assessment (MNA).
  - Anthropometric studies: Weight, Height, Circumferences, Folds, Bioelectrical Impedance, DXA...
  - Biochemical studies (blood, urine, feces): measurements of health markers related to the area of nutrition (glucose metabolism parameters, curves for calculating the glycemic index, lipid metabolism, inflammation, oxidation and hormonal biomarkers...)

- Physical activity studies: through the use of validated questionnaires (IPAQ, MINNESOTA...).
  - Evaluate the use of sensors, control devices and monitoring support (blood glucose, weight, eating disorders, food photographs, physical activity, etc.).
  - Evaluate the use of specific nutrient modules, oral nutritional supplements and highly specialized artificial nutrition (enteral and parenteral).
  - Functional capacity studies: through dynamometry and validated questionnaires.
  - Sensory perception studies: through the use of validated questionnaires
  - Satiety control studies: using biochemical markers and handling of validated questionnaires
  - Quality of life studies: through the use of validated questionnaires.
  - Tolerance Studies: through the use of validated questionnaires.
  - Nutrigenetics and Metabolic Studies with our collaborating centers.
    - » Production of scientific and technical report
  - Development of computer applications for websites or mobile apps in the nutrition / food area.
  - Individual nutritional status evaluations and proposals for individualized nutrition intervention programs.
  - To contribute and design components for nutrition education strategies and programs
  - To implement clinical trials or epidemiological studies well designed in the area of human nutrition, in order to validate the activity and efficacy of bioactive compounds, nutrients, foods, dietary patterns or artificial nutrition, on different parameters related to the health promotion, the disease prevention or its therapeutic activity.
- Equipment**
- Dual-energy x-ray absorptiometry (DXA)
  - Bioelectric Impedance System (BIA) for body composition measurement through Inbody device.
  - Ultrasound machine for advanced high-resolution diagnosis.
  - Holtain Skinfold Calipers
  - Tanita digital healthcare scales
  - Executive Diameter Tape
  - Indirect calorimetry
  - Accelerometers
- External users**
- Food industry**
- Medicinal Gardens S.L.
- Pharmaceutical laboratories**
- Abbott Laboratories S.A
  - Adventia Pharma, S.L.
  - Baxter S.L.
  - B. Braun Medical S.A.
  - Nestlé España S.A.
  - Cantabria Lab Nutrición Médica S.L.
  - Nutricia S.R.L.
  - Lima Pharma S.R.L.

## 2.6.16. Simulation Platform (CEASEC)

### Objectives

The CEASEC\_HULP, Advanced Center for Clinical Simulation and Training at La Paz University Hospital, plays a fundamental role in the training and improvement of healthcare professionals' skills, as well as in patient care safety and quality. Clinical simulation emerges as a powerful tool for this purpose, enabling professionals to practice and refine their skills in a controlled and safe environment.

The center is designed to cater to a wide range of healthcare professionals, including physicians, nurses, and medical and nursing students. It is particularly beneficial for those working in critical or emergency environments, where teamwork and quick, accurate decision-making are crucial. Areas such as ICU, anesthesia and resuscitation, surgery, and emergency medicine are especially emphasized, but it also includes professionals who use complex or invasive technology in their practice.

At CEASEC\_HULP, emphasis is placed not only on mastering technical skills but also on developing professional competencies such as effective communication, teamwork, and the ability to analyze and make decisions. This ensures that professionals are well-prepared to face critical situations and provide the highest level of patient care.

Furthermore, as part of the Institute of Health Research of La Paz University Hospital (IdiPAZ), the CEASEC is firmly committed to a clear research vocation. This dedication not only promotes the generation

and advancement of knowledge across various disciplines but also addresses complex problems to find effective solutions. From technological and scientific development to improving healthcare, fostering business innovation, and promoting sustainable development, research conducted at the CEASEC has a significant impact on society and the well-being of people.

### Composition

#### Governing Council

### Innovation projects in new technologies

The CEASEC collaborates with the Polytechnic University of Madrid in the development of new clinical training devices. During 2023, technological projects were carried out to train the technical skills of different medical specialties to address pathologies of various kinds: stroke, pulmonary ultrasound, hemorrhagic trauma, tracheotomies, intubation and lumbar punctures, and monitoring for the traceability of a transplant system organs, among others.

During this period, 5 biomedical engineering students have carried out their curricular internships and TFG work tutored by the Center's staff. All of them were clinically validated or are currently undergoing validation with great acceptance and projection for patents and publications to be developed in 2023. Some of them:

### Pilot Test of a Pediatric Stroke Training System with Immersive Virtual Reality

The pilot test of a pediatric stroke training system using immersive virtual reality, developed by the Bioengineering and Telemedicine Group at the Technical University of Madrid in collaboration with La Paz University Hospital, has proven to be highly effective. The system allows doctors to learn and practice the protocol for managing pediatric stroke in a realistic virtual environment. The validation conducted with 50 physicians from the Neurology, Pediatric ICU, and Emergency services at La Paz Universi-

ty Hospital showed very positive results: 94% of participants highlighted the realism of the simulation, 98% would use virtual reality for training, and 100% would use the program for training in the pediatric stroke code. The system's usability received a score of 86 out of 100, rating it as excellent. This study confirms that immersive virtual reality is an effective tool for training in critical and infrequent medical procedures.

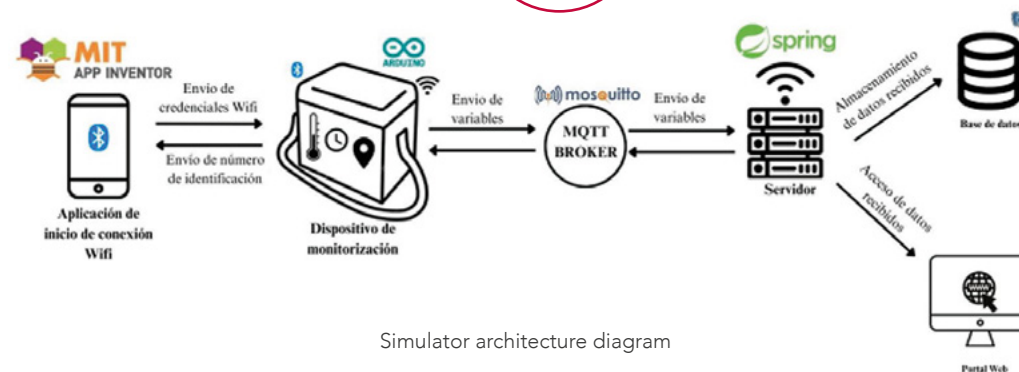

### Optimization of a System for Tracking and Monitoring Transplanted Organs During the Transportation Phase

The system architecture consists of four elements: a mobile application, a monitoring device, an MQTT protocol broker server, and a dedicated server with a database and a restricted-access web portal.

The monitoring device, based on an Arduino MKR Wifi 1010 microcontroller, measures the internal temperature of the organ, its geographical position, and the preservation time. It includes temperature sensors, a GPS module, a pressure sensor, and a buzzer. Additionally, a perfusion system for organ preservation is incorporated, controlled by a relay connected to the Arduino.

The web server stores the metrics obtained by the sensors of each cooler. The MQTT protocol is used to send data to the server. The Wifi connection configuration of the Arduino is done via a mobile application using Bluetooth technology.

The web server allows for the storage and visualization of the data, managing the transplant routes and restricting access to registered clinical personnel. The platform allows the identification and configuration of the coolers, donor hospitals, recipient hospitals, and transplant dates. There are two user roles: administrative, which manages users and associated hospitals, and clinical, which configures transplants and available coolers.

Simulator architecture diagram

Two technical validation tests were designed to evaluate static and dynamic preservation in hypothermic conditions and the communication between the server and the cooler during a transplant simulation. The clinical validation included ten clinical professionals who assessed the system's usability using the System Usability Scale (SUS), considering aspects such as expected frequency of use, ease of use, autonomy, consistency, and system security.

### Activity of CEASEC

During 2023, we have introduced two new strategic training lines in ultrasound and polytrauma, repre-

senting a significant advancement in our educational offerings, addressing critical areas of current medical practice. In the field of ultrasound, our courses cover from fundamental concepts to advanced techniques, including image interpretation and clinical application across various medical specialties. On the other hand, the SEPA course in Acute Traumatic Pathology equips professionals to provide advanced and optimal care to patients with severe trauma. Through simulation and clinical training, participants gain a deep understanding and solid practice in managing this pathology, leading to tangible improvements in the quality and efficiency of medical care in critical situations.

## 2.6.17. Tissue Engineering and 3D Printing Platform

### Objectives

The tissue engineering and 3D printing platform focuses on promoting the development of Biomedical Research and providing solutions based on Tissue Engineering and Bioprinting.

Main areas of activity:

- Tissue and Organ Bioprinting.
- Lab on a Chip (LOC) and Organ on a Chip (OOC) devices.
- Tissue and Organ Models through Tissue Engineering.
- Development of Medical Devices (Biomodels, Surgical Guides, Prostheses and Implants) by I3D.

### Composition

#### Director:

Ramón Cantero Cid

#### Subdirector:

María P. de Miguel

*PITI3D@idipaz.es*

*Phone: (+34) 91 207 15 12 (ext 2484)*

### Equipment and facilities

- Bioprinting Unit (V1 REGEMAT 3D). Use of thermoplastics, microextrusion, UV polymerisation, injection of biomaterials and cells.
- Fusion deposition modelling (FDM). 3D printer for prototyping.
- Bioreactor for tissue maturation.

### Portfolio service

- TAC and MRI computerised imaging and tissue segmentation.
- 3D virtual planning.- Computer-aided design (CAD).
- 3D printing of biomodels, surgical guides, prostheses and implants in polymers and metals.- Processing and fabrication of biomaterials.
- Bioprinting of meshed structures with or without cells.
- 3D cell cultures.
- Development of biofabrication processes.
- Development of Lab on a Chip (LOC) and Organ on a Chip (OOC) devices p- Education and training in the areas of activities.

### Projects and collaborations

During 2023/2024 we have been working on the characterisation of colon cancer organoids, both genetically and immunologically.

This has allowed us to perform several proofs of concept with the organoids as a basis for clinical experimentation, in our attempt to validate and replace animal experimentation.

Currently, the PITI3D Platform has established a collaboration with the University of Nebrija for the bioprinting of colon tumour organoids derived from biopsies of patients diagnosed with colon cancer.

As a result of this collaboration, it has been possible to validate the compatibility of various bioinks for use in organoid bioprinting. The multilayer construction bioprinting protocol has also been designed to reconstruct a 3D model that reproduces with high accuracy the epithelial and stromal compartments of the tumour, including fibroblasts and native immune cell infiltrates.

These models will be used for modelling different diseases, especially colon cancer, to test the anti-tumour potential of new drugs and immunotherapies and as a platform for future application in regenerative medicine.

## 2.7. Mentor and prementor program

### 2.7.1. Mentor Program

In 2023, IdiPAZ, with the support of La Paz University Hospital, has implemented the **3<sup>rd</sup> Mentor Program** with the purpose of supporting our clinical early career researchers in the achievement of competitive projects, mainly from the main national call for health research projects: "Acción Estratégica en Salud (AES)", granted by Instituto de Salud Carlos III.

The **Mentor Program** plans a scientific and technical support in the preparation and tracking of research proposals. Furthermore, it take into account the experience and scientific knowledge from our senior researchers to help our early-stage researchers from the beginning of their research career.

The objectives of the program are:

- Increasing the number of clinical research in IdiPAZ.
- Avoiding a generational leap of clinical researchers.
- Strengthening the research profile of our clinical staff.
- Becoming IdiPAZ a clinical research model, as the same level that IdiPAZ is in the clinical trials.
- Performing an internal cultural change in clinical research

**Mentor Program** included different action plans have been implemented: to update the standardized curriculum for researchers, enable synergies to create research groups, support from the different platforms of IdiPAZ, services of medical writing and stand out the impact and the strategic priorities of the projects for the National Health System.

In the 3<sup>rd</sup> Mentor Program 95 participants were included:

RESEARCHER	SERVICE/RESEARCH GROUP (RG)
LETICIA DE LA VECILLAS SÁNCHEZ	ALLERGOLOGY
BLANCA TAPIA SALINAS	ANESTHESIOLOGY
ISABEL VALBUENA GÓMEZ	ANESTHESIOLOGY
ALFONSO JURADO ROMÁN	CARDIOLOGY
LUCÍA FERNÁNDEZ GASSÓ	CARDIOLOGY
SERGIO CASTREJÓN CASTREJÓN	CARDIOLOGY
SANDRA OFELIA ROSILLO RODRÍGUEZ	CARDIOLOGY
JOAQUIN J. ALONSO MARTÍN	CARDIOLOGY
ENRIQUE VILLAGRAN MEDINILLA	CARDIOTHORACIC SURGERY
RAÚL SÁNCHEZ PÉREZ	CARDIOTHORACIC SURGERY
MARTA MOLERO LUIS	CLINICAL CHEMISTRY AND LABORATORY MEDICINE
PILAR NOZAL ARANDA	CLINICAL IMMUNOLOGY
IRENE GARCÍA GARCÍA	CLINICAL PHARMACOLOGY
CRISTINA MURANO	CLINICAL PHARMACOLOGY
ELENA VILLAMAÑÁN BUENO	CLINICAL PHARMACY
ALEJANDRO MARTÍN QUIRÓS	EMERGENCY MEDICINE
PAOLA ANDREA PARRA RAMÍREZ	ENDOCRINOLOGY
BEATRIZ BARQUIEL ALCALÁ	ENDOCRINOLOGY
PATRICIA MARTÍN ROJAS-MARCOS	ENDOCRINOLOGY
CARLOS RODRÍGUEZ ANTOLÍN	EXPERIMENTAL THERAPIES AND BIOMARKERS IN CANCER (RG)
OLGA VERA PUENTE	EXPERIMENTAL THERAPIES AND BIOMARKERS IN CANCER (RG)
ALICIA GUTIÉRREZ MISIS	FAMILY MEDICINE
CRISTINA JULIA SUÁREZ FERRER	GASTROENTEROLOGY
MARILÓ MARTÍN ARRANZ	GASTROENTEROLOGY
ROCÍO MENÉNDEZ COLINO	GERIATRICS
MARTA MORADO ARIAS	HEMATOLOGY
MERCEDES GASIOR KABAT	HEMATOLOGY
CARMEN RODRÍGUEZ JIMÉNEZ	HUMAN GENETICS
ADELA ESCUDERO LÓPEZ	HUMAN GENETICS
ANA FERNÁNDEZ SANTANDER	HUMAN GENETICS
FRANCISCO JAVIER CUETO RODRÍGUEZ	INNATE IMMUNE RESPONSE (RG)
LAURA CÓRDOBA GARCÍA	INNATE IMMUNE RESPONSE (RG)
LUNA RIDAN CORDEIRO MINUTE	INNATE IMMUNE RESPONSE (RG)
JOSÉ MANUEL AÑÓN ELIZALDE	INTENSIVE MEDICINE
MANUEL QUINTANA DÍAZ	INTENSIVE MEDICINE
ÓSCAR PEÑUELAS RODRÍGUEZ	INTENSIVE MEDICINE
ANGUS (M <sup>a</sup> ANGUSTIAS QUESADA SIMÓN)	INTERNAL MEDICINE
RAMÓN PUCHADES RINCÓN DE ARELLANO	INTERNAL MEDICINE

RESEARCHER	SERVICE/RESEARCH GROUP (RG)
YALE TUNG CHEN	INTERNAL MEDICINE
MARTA DÍAZ MENÉNDEZ	INTERNAL MEDICINE
ROCÍO MONTEJANO SÁNCHEZ	INTERNAL MEDICINE
BEATRIZ DÍAZ POLLÁN	INTERNAL MEDICINE

Since the launch of the Mentor Programme at IdiPAZ, the number of researchers who have participated in the programme has been increasing year by year, as can be seen in the following chart:

Number of mentorees per year

The program is supported by a network of senior mentors from different fields and professional expertise. The mentors provide mentees a constructive feedback, putting at their disposal all their experience, dedication and motivation, supporting the process of preparing their research projects.

## 2. Executive summary

### 2.7 Mentor and prementor program

In the 3<sup>rd</sup> Mentor Program 42 senior mentor have collaborated:

ALBERTO BOROBIA PÉREZ
AMELIA HESSHEIMER
ANA SASTRE PERONA
ANTONIO CARCAS SANSUÁN
ANTONIO PÉREZ MARTÍNEZ
BERTA RODÉS SOLDEVILA
BLANCA FUENTES GIMENO
CARLOS DEL FRESNO SÁNCHEZ
CRISTINA CALVO REY
DAVID VICENT LÓPEZ
EDUARDO LÓPEZ COLLAZO

EDUARDO LÓPEZ GRANADOS
ESTHER PÉREZ DAVID
EUGENIA ANTOÁN ALVARADO
EXUPERIO DÍEZ TEJEDOR
INMACULADA IBÁÑEZ DE CÁCERES
ISABEL LASTRES BECKER
JESÚS MINGORANCE CRUZ
JOSÉ LUIS CEBRIÁN CARRETERO
JOSÉ LUIS LÓPEZ-SENDÓN HENTSCHEL
JOSÉ LUIS MERINO LLORENS
JOSÉ RAMÓN ARRIBAS LÓPEZ

JUAN CARLOS LÓPEZ GUTIÉRREZ
KAREN HEATH
LAURA OTERO ORTEGA
LAURA SALDAÑA QUERO
MARGARITA LÓPEZ TRASCASA
MARÍA FERNÁNDEZ VELASCO
MARÍA GUTIÉRREZ FERNÁNDEZ
MIGUEL ÁNGEL SALINERO
MIGUEL SÁENZ DE PIPAÓN MARCOS
NORA BUTTA COLL
NURIA VILABOA DÍAZ

PILAR SÁNCHEZ-CORRAL
REBECA PÉREZ DE DIEGO
ROCÍO ROSAS ALONSO
RODOLFO ÁLVAREZ-SALA WALTHER
ROSA TORRES JIMÉNEZ
SANTIAGO QUIRCE GANCEDO
TALÍA SAINZ COSTA
TERESA BELLÓN HEREDIA

In order to ensure that the research project proposals submitted by our early-stage researchers have a high degree of excellence, the Mentor Programme has a training plan structured in webinars for each section of the application report.

In 2023, the following webinars were held as part of the Mentor Programme training plan:

TOPIC	DATE	SPEAKER
FIS PROJECT PREPARATION KEYS. PROJECT EVALUATION.	04/10/2023	Daniel Quijada
METHODOLOGY: STRUCTURE, BIASES AND CONTINGENCY PLAN	10/10/2023	Daniel Quijada
DORA CRITERIA	17/10/2023	Daniel Quijada
METHODOLOGICAL PLANNING FOR CLINICAL TRIALS	31/10/2023	Alberto Borobia
CVN	07/11/2023	Raúl Román
HOW TO PREPARE A GOOD BUDGET	14/11/2023	Silvia Arce, Raquel Carmona
STRATEGIC INTEREST OF THE PROJECT, DISSEMINATION AND CITIZEN ENGAGEMENT PLAN	21/11/2023	Daniel Quijada
GENDER PERSPECTIVE AND DIMENSION IN RESEARCH	28/11/2023	Daniel Quijada
DATA MANAGEMENT PLAN. DATA PROTECTION	12/12/2023	Daniel Quijada, Estela Sánchez
ORCID IDENTIFIER	19/12/2023	Raúl Román
AES CALL INTERNAL INFODAY	22/02/2024	Daniel Quijada

In its third year, all the actions developed in the Mentor Programme have led to an increase in the number of proposals applied to Acción Estratégica en Salud (AES) call for health research projects by IdiPAZ researchers:

Every year, once the proposal deadline has expired, the Mentor Program organizes an event where all support offered by our mentors is recognized. The Mentor Program wants to thank all the time and selfless support and time that mentors provide to the Program and to the mentees. In this event, an experience conference of mentors and mentees were held, so the audience could know deeply how to prepare a AES proposal and how the Mentor Program works from different points of views.

## 2.7.2. Prementor Program

IdiPAZ, with the support of La Paz University Hospital, will implement the 1<sup>st</sup> Prementor Program with the purpose of supporting our predoctoral researchers in the achievement of their Doctorate.

The objectives of the program are:

- Increasing the number of researchers with a PhD in IdiPAZ.
- Promote high quality training of researchers.
- Performing an internal cultural change in translational research in biomedicine.

The Prementor Program plans a formative and technical support during the second and third tutorial courses of our predoctoral researchers' doctoral studies. The following webinars will be held as part of the Prementor Programme training plan:

DATE	TOPIC	SPEAKER
20/09/2024	1_ HOW TO ESTABLISH A RESEARCH QUESTION/HYPOTHESIS	DANIEL QUIJADA
18/10/2024	2_ ETHICS AND SCIENTIFIC FRAUD	NORA BUTTA
15/11/2024	3_ PREPARING AND CLEANING DATABASES	MARÍA TERESA GARÍA MORALES
20/12/2024	4_ FIGURES, VISUALIZATION AND DATA ANALYSIS	MARÍA JIMÉNEZ GONZÁLEZ
17/01/2025	5_ IdiPAZ SUPPORT PLATFORMS FOR EXPERIMENTAL WORK	GEMA VALLÉS
21/02/2025	6_ ORAL COMMUNICATIONS AND POSTER DESIGN	EMANUELA SPAGNOLO
21/03/2025	7_ TIPS FOR PUBLICATION AND SCIENTIFIC DISSEMINATION	EDUARDO LÓPEZ COLLAZO
25/04/2025	8_ PROTECTION OF RESULTS	ESTELA SÁNCHEZ SIMÓN

## 2.10. Communication and public engagement

The Scientific Communications have as main tasks the publication of the research carried out by IdiPAZ's scientists and the strengthening of bonds with other institutions and the general public too.

We have increased the media coverage of our research and activities, with a significant increase in appearances in press, and also in social networks. This increase is thanks to the involvement of many of IdiPAZ's researchers.

Thanks to the many collaboration of the centre's scientists, IdiPAZ has participated in activities within the European Researcher's Night, the Science and Innovation Week or the celebration of the International Day of Women and Girls in Science. We have also organized guided visits for high school students, some virtual and some face-to-face visits, talks and workshops for kids and schools.

We would like to acknowledge the collaboration of **La Paz University Hospital** communication office.

### 2.10.1. Selected media appearances

In 2023, we have issued 32 press releases highlighting the scientific achievements by IdiPAZ. Below is a summary of the top headlines of the year:

	<b>02/02/2023</b> El Hospital La Paz atendió 1.200 casos de enfermedades importadas en adultos y 120 en niños durante 2022.
	<b>07/02/2023</b> El Hospital La Paz incorpora el Consejo Experiencia del Paciente para mejorar el abordaje de las cardiopatías congénitas.
	<b>03/03/2023</b> La Paz, 12 de Octubre y Gregorio Marañón, renuevan en el 'top 100' de los mejores hospitales del mundo.
	<b>21/03/2023</b> En el corazón (enorme) del mejor hospital de España, La Paz

	<b>23/03/2023</b> El Hospital La Paz acoge la reunión anual de la Red Europea de Referencia en Anomalías Hereditarias y Congénitas Raras Intestinales.
	<b>27/03/2023</b> La Paz inaugura 'La Aceleradora', primera unidad de tratamiento no farmacológico de cáncer infantil.
	<b>28/03/2023</b> El Hospital La Paz de Madrid inaugura la primera unidad de terapia no farmacológica para pacientes de oncología pediátrica.
	<b>29/03/2023</b> El Hospital La Paz de la Comunidad de Madrid, el que más trasplantes pediátricos practicó de toda España en 2022.

## 2. Executive summary

### 2.10 Communication & public engagement

	<b>19/04/2023</b> El Hospital La Paz usa inteligencia artificial para diagnosticar a los astronautas
	<b>18/05/2023</b> El Hospital La Paz participa en un estudio internacional que revela variantes genéticas asociadas a COVID-19 grave y posibles dianas terapéuticas.
	<b>22/05/2023</b> La Paz organiza en el metaverso un curso de simulación clínica en el manejo de la vía aérea.
	<b>22/05/2023</b> El Hospital La Paz abre sus puertas en el metaverso para formar a sus anestesiistas.
	<b>26/05/2023</b> El Hospital La Paz y su Instituto de Investigación, IdiPAZ, participan en el diseño de un robot para la ablación de arritmias cardiacas.
	<b>24/06/2023</b> El hospital La Paz trata las secuelas del covid con una unidad especial.
	<b>27/06/2023</b> Jornada de sensibilización sobre el cáncer de próstata en el Hospital La Paz.
	<b>28/06/2023</b> La Paz, centro pionero en integrar la plataforma de formación MedStream360 en España y Europa.
	<b>26/07/2023</b> El Hospital La Paz acoge la reunión del consorcio europeo ERICA, que coordina la investigación en enfermedades raras

	<b>03/07/2023</b> El Hospital La Paz, único centro español integrado en la plataforma de formación 'MedStream360'.
	<b>28/07/2023</b> El Hospital Universitario La Paz es el mejor en cardiología de España
	<b>07/09/2023</b> La Comunidad de Madrid, galardonada por la labor de la Unidad de Cardiopatías Congénitas del Hospital público La Paz
	<b>27/09/2023</b> El Hospital La Paz promueve la participación de la familia en el cuidado del recién nacido que requiere atención especializada.
	<b>10/10/2023</b> El Hospital La Paz celebra el Día Mundial de la Salud Mental
	<b>19/10/2023</b> El Hospital La Paz, elegido centro de referencia internacional para la formación en radioterapia adaptativa guiada por resonancia magnética.
	<b>27/10/2023</b> El Hospital La Paz da un importante paso en el diagnóstico de tumores del sistema nervioso central.
	<b>27/10/2023</b> El Hospital Universitario La Paz-IdiPAZ avanza en el diagnóstico de tumores del SNC.
	<b>07/11/2023</b> El Hospital de la Paz realizará sin cita previa diagnósticos precoces de cáncer de próstata por el 'Movember'

## 2. Executive summary

### 2.10 Communication & public engagement

**14/11/2023**

Inteligencia Artificial en sanidad: La Paz como polo español

**21/11/2023**

La Paz humaniza su área de Oncología transformando su arquitectura.

**11/12/2023**

La calidad en la información al paciente con cáncer, un "modelo de éxito" que aplica el Hospital La Paz.

**13/12/2023**

Los hospitales públicos La Paz y Fundación Alcorcón de la Comunidad de Madrid, certificados por su compromiso con la disfgaia

**14/12/2023**

Seis de los Diez mejores hospitales de España están en Madrid: La Paz, a la cabeza del ranking.

**19/12/2023**

Una nueva unidad de cáncer pediátrico en el CNIO investiga para llevar terapias personalizadas también a pacientes infantiles.

## 2.10.2. Scientific Newsletter: IdiPAZ+i News

Throughout 2023, the scientific culture unit has published four newsletters on different issues of interest to researchers.

### 2.10.3. Social networks

On the other hand, news that includes the work of our researchers, data about courses, grants and other news of interest to the public, are published in the main social networks. Our Twitter account, @IdiPAZscience, has the largest number of followers among the institutes of the Community of Madrid. IdiPAZ has its own profiles:

### 2.10.4. Formative Pills about Sustainable Development Goals and Responsible Research and Innovation

We work to promote the Sustainable Development Goals (SDG) good practices through the small training pills. We sent 73 training pills over the 2030 Agenda, SDG and Responsible Research and Innovation:

- 03 Ene. Nº 01/2023: "Gestión de Residuos y Contribución a los ODS"
- 04 Ene. Nº 02/2023: Cursos sobre ciencia abierta
- 09 Ene. Nº 03/2023: Plan de Prevención
- 10 Ene. Nº 04/2023: Día Día Mundial de la Lucha contra la Depresión
- 11 Ene. Nº 05/2023: Nueva versión de la norma CVN en abierto
- 25 Ene. Nº 06/2023: Acción contra el tabaquismo
- 30 Ene. Nº 07/2023: Día Mundial de las Enfermedades Tropicales Desatendidas
- 01 Feb. Nº 08/2023: El uso de la Copia Oculta y la Protección de Datos
- 03 Feb. Nº 09/2023: Día Mundial contra el Cáncer
- 06 Feb. Nº 10/2023: Gestión de datos en REDCap
- 10 Feb. Nº 11/2023: Programa de Ciencia por la Calle
- 13 Feb. Nº 12/2023: Ayuda humanitaria para Turquía y Siria

- 01 Mar. Nº 14/2023: Día de la cero discriminación
- 12 Mar. Nº 15/2023: Enfermedades Raras
- 18 Mar. Nº 16/2023: IdiPAZ se tiñe de morado
- 09 Mar. Nº 17/2023: Plataforma de Transformación Sostenible y Agenda 2030
- 13 Mar. Nº 18/2023: Encuesta sobre la implementación del sello HRS4R en el IdiPAZ
- 14 Mar. Nº 19/2023: Encuesta sobre los Objetivos de Desarrollo Sostenible del IdiPAZ
- 15 Mar. Nº 20/2023: Cuídate (programas formativos FREMAP)
- 21 Mar. Nº 21/2023: ¿Qué es la estrategia HRS4R?
- 11 Abr. Nº 22/2023: Día Mundial de la Salud
- 18 Abr. Nº 23/2023: XVI Maratón de donación de sangre
- 19 Abr. Nº 24/2023: Jornada sobre el Sistema Integral de Calidad

## 2. Executive summary

### 2.10 Communication & public engagement

- 25 Abr. Nº 25/2023: Día de la Propiedad Intelectual
- 04 May. Nº 26/2023: ¡Cuidate! Programas formativos de FREMAP
- 08 May. Nº 27/2023: Política RSC y compromiso con los ODS
- 12 May. Nº 28/2023: Día Internacional de la Enfermería
- 16 May. Nº 29/2023: Mes de la Diversidad
- 17 May. Nº 30/2023: Día del Reciclaje
- 25 May. Nº 31/2023: Fase de Implementación HRS4R
- 29 May. Nº 32/2023: Memoria de Sostenibilidad
- 30 May. Nº 33/2023: Día de la investigación hospitalaria
- 31 May. Nº 34/2023: Día Mundial Sin Tabaco
- 02 Jun. Nº 35/2023: Encuesta sobre la diversidad generacional
- 07 Jun. Nº 36/2023: Día nacional del donante de órganos

**Formación en Investigación e Innovación Responsable y ODS**  
 Píldora formativa nº 29/2023

#### Día Internacional de la Enfermería

Hoy 12 de mayo se celebra el Día Internacional de la Enfermería, con el objetivo de rendir un homenaje homenajeado a todos los profesionales de enfermería, que realizan una labor imprescindible a nivel mundial, en un sector vital para la sociedad como es el sanitario. Desde el hospital queremos felicitar a todos los profesionales de Enfermería del centro por su labor diaria incansable e indispensable.

Como tributo a Florence Nightingale, nacida en esta fecha, se conmemora la fundadora de la enfermería moderna. Las cuidadosas con una calidad humana. Una aviaja, patacentrópica española, que "en la naturaleza sólo se da muerte o plantar" no fue enfermera sino otra cosa: una mujer que muere por un desahogado y porque no puede sufrir. Hace más de 800.000 años en Georgia y en el momento de haber estado antes de hombres que enfermaron por los que tuvieron que ser cuidados. El cuidado forma parte del proceso de humanización. Igual cualquier profesión sanitaria se que cuida, pues todos tienen aspecto de

- 08 Jun. Nº 37/2023: Mes del Orgullo LGTBIQ+
- 12 Jun. Nº 38/2023: Cáncer de próstata
- 13 Jun. Nº 39/2023: Participación Semana de la Ciencia 2023
- 14 Jun. Nº 40/2023: Día Mundial del Donante de sangre
- 16 Jun. Nº 41/2023: Formación FREMAP
- 21 Jun. Nº 42/2023: Sosliticio de verano
- 28 Jun. Nº 43/2023: Día Internacional del Orgullo LGBTBI
- 07 Jul. Nº 44/2023: Teléfono contra la LGTBfobia
- 13 Jul. Nº 45/2023: Encuesta ODS
- 19 Jul. Nº 46/2023: Picaduras de garrapatas
- 07 Sep. Nº 47/2023: Programas formativos de FREMAP
- 08 Sep. Nº 48/2023: Día Mundial de la Prevención del Suicidio

#### Semana de la ciencia y la Innovación 2023

Como parte de la iniciativa Ciencia por la Salud, se animamos a participar en la nueva edición de la Semana de la Ciencia y la Innovación 2023, organizada por la Comunidad de Madrid, a través de la Fundación para el Conocimiento Científico y el Cuidado del 8 al 19 de noviembre.

IdiPAZ ha colaborado activamente en jornadas anteriores y este año no puede faltar a su cita. Por ello, animamos la colaboración a los investigadores e investigadoras, plataformas y grupos de investigación, que no seamos a participar en esta edición. Para saber más, simplemente, déjate inspirar por nuestro correo electrónico: [idi@idiipaz.com](mailto:idi@idiipaz.com) antes del 24 de junio y te lo indicará como prioridad.

- 11 Sep. Nº 49/2023: Huella de carbono
- 12 Sep. Nº 50/2023: Noche europea de los investigadores
- 13 Sep. Nº 51/2023: Renovación del compromiso con la Carta de la Diversidad
- 14 Sep. Nº 52/2023: Día Internacional del Donante de Médula Ósea
- 18 Sep. Nº 53/2023: RRI en los proyectos de investigación
- 19 Sep. Nº 54/2023: Día de la Seguridad del Paciente
- 20 Sep. Nº 55/2023: Curso Plataforma de Transformación Sostenible
- 21 Sep. Nº 56/2023: Noche de los investigadores
- 27 Sep. Nº 57/2023: Curso de Igualdad en el entorno laboral

- 29 Sep. Nº 59/2023: Jornada por el Día Mundial de la Salud Mental

#### Día Internacional del Donante de Médula Ósea

El Hospital Universitario La Paz proyecta con su actividad organizada en España que participe de las celebraciones por el Día Internacional del Donante de Médula Ósea y centro de Coordinación de la Red de ODS, la actividad organizada de la Unidad de Hematología, de coordinación con el Hospital Universitario de La Paz y el Hospital Universitario de La Princesa.

El objetivo de esta actividad es sensibilizar al público en general sobre la importancia de donar médula ósea y promover la participación activa de la sociedad en el cuidado de la salud.

Este curso está dirigido a todos los empleados del Hospital Universitario de La Paz y tiene como objetivo sensibilizar a los empleados sobre la importancia de la igualdad en el entorno laboral y promover la participación activa de la sociedad en el cuidado de la salud.

- 26 Oct. Nº 65/2023: Política OTM-R
- 27 Oct. Nº 66/2023: Actividades de la Semana de la Ciencia
- 08 Nov. Nº 67/2023: Movember
- 16 Nov. Nº 68/2023: Píldora formativa REGIC sobre Ciencia Abierta
- 24 Nov. Nº 69/2023: Día contra la violencia de género
- 01 Dic. Nº 70/2023: Día Mundial contra el SIDA
- 05 Dic. Nº 71/2023: IdiPAZ finalista en los Premios Diversidad
- 15 Dic. Nº 72/2023: Actividades por el Día de la Mujer y la Niña en la Ciencia
- 27 Dic. Nº 73/2023: Canales de denuncia

#### Día Mundial de la Salud Mental

El Hospital Universitario de La Paz proyecta con su actividad organizada en España que participe de las celebraciones por el Día Mundial de la Salud Mental, a través de la Fundación para el Conocimiento Científico y el Cuidado del 8 al 19 de noviembre.

Este curso está dirigido a todos los empleados del Hospital Universitario de La Paz y tiene como objetivo sensibilizar a los empleados sobre la importancia de la salud mental y promover la participación activa de la sociedad en el cuidado de la salud.

#### Jornada por el Día Mundial de la Salud Mental

Este curso está dirigido a todos los empleados del Hospital Universitario de La Paz y tiene como objetivo sensibilizar a los empleados sobre la importancia de la salud mental y promover la participación activa de la sociedad en el cuidado de la salud.

# 2.11. Responsible Research and Innovation

Responsible Research and Innovation (RRI) is the Science with and for Society framework that encompasses all key actions aimed to anticipate and assess potential implications and societal expectations with regard to research and innovation, with the aim to Foster the design of inclusive and sustainable research and innovation. Based on RRI principles, IdiPAZ is growing to imply societal actors to work together for the research process in order to align both the process and its outcomes with the values, needs and expectations of society.

IdiPAZ has continued and development new several RRI actions:

### Ethics and Research Integrity

HR EXCELLENCE IN RESEARCH

- **Human Resources Strategy for Researchers- HRS4R:** comprises the Charter and Code principles, gap analysis, OTM-R and action Plan design. In 2020, the European Commission awarded the 'HR Excellence in Research Award' to the institution. In 2022, we worked on the implementation of the second phase of the HRS4R strategy which is based on the development of the Action Plan and its revised version after the mid-term evaluation, reaching the intermediate

phase of this strategy.

Today, we remain committed to achieving the key advantages offered by this strategy:

- Foster a favorable working environment for research staff.
- Fostering a change in the work culture.
- To be part of the European network of research centers.
- Strengthen human resources policies.
- To facilitate the international visibility of the institute.
- Own Ethic Committee: *Research Ethics Committee with Medical Products and Animal Welfare Organ*
- *International Organisation for Standardisation (ISO) 9001 Certification for Committees and Platforms of IdiPAZ.*
- Good Practice Recommendations Guidelines

### Open Access

- Review and update of our own *Open access Guideline of IdiPAZ (15/12/2022).*
  - Information notes about our Open Science Policy have been sent through our communication channel.
- Promotion and encouragement of researchers to upload in the institutional Open-Access Repositories their papers and research data:
  - *Repisalud* of the "Carlos III" Institute of Health,
  - *Institutional Repository of the Regional Health*

*System of the Madrid Autonomous Region (AR),*

- *Biblos-e Archivo*, of the Autonomous University of Madrid. Repositories allow researchers to collect, preserve and make available to any interested person the scientific production generated by the professionals as result of their assistance, research and teaching activity, thus guaranteeing their conservation and open access and promoting their visibility and dissemination.
- Creation and promotion of the *Scientific Seminars web archive*, with online video recording to connect to the scientific community and the society.
- Since 2020, IdiPAZ participates as a member of the *European Open Science Cloud (EOSC) Association* (<https://eosc.eu>) to:
  - accelerate the creation of open knowledge,
  - increase the re-use of research databases by the larger community,
  - inspire ways for ways to share medical data that ensures respect to privacy of personal information,
  - promote education in Open Science practices,
  - spur innovation and foster new jobs aimed to sustain openness and curation of research.
- Implementation of Act 19/2013, of December 9, 2013, on transparency, access to public information and good governance. FIBHULP is registered in the *Transparency Register of the*

Madrid AR since March 4, 2021 with registration number 202100170.

- **European Union Transparency Register.** FIBHULP is currently listed in the **European Union Register** as of May 10, 2021 under registration number 86699642652-90.
- The Institute informs all its members of IdiPAZ's commitments to current European policies regarding Open Sciences and RRI through its *website*.
- The following training and conferences related to Open Science and RRI have been held:
  - 25/04/2022 to 28/04/2022- *Responsible Research and Innovation (RRI) In Biomedicine*
  - 29/04/2022 - Equal opportunities in today's society course
  - 05/05/2022 - Participation in the Infoday CVN conference organised by FECYT
  - 23/06/2022- *RRI in IdiPAZ*
  - 27/09/2022 to 04/11/2022 - Participation in the course Formando para Formar given by the Instituto de Salud Carlos III in which participants were trained in Open Science.
  - 28/10/2022 - 11th Inflammatory Bowel Disease Patient Training Day
  - 07/11/2022 to 20/11/2022 - Science and Innovation Week
  - 22/11/2022 - Waste Management and Contribution to the SDGs Course
  - 24/11/2022 - *Seminars CVN and ORCID Identifier within the Mentor Programme*
  - 28/11/2022 to 02/12/2022 *Smart time management course*
  - 15/12/2022 - *Seminars Gender Perspective and Dimension in Research within the Mentor Programme*

### Science Education

- **Scientific divulgation activities:** At IdiPAZ we have a communication plan focused on planning the Institute's communication actions, both internal and external. In this way, the *Commission for Humanization and Social and Scientific Responsibility* of IdiPAZ carries out activities and workshops with educational centres, associations and the public, bringing science closer to society in a more humane way.
  - Activities for International Day of Women and Girls in Science
  - Activities for international women's day
  - Activities for Science and Innovation Week
  - Activities for European Researchers' Night
  - Science on the street
- Scientific Culture and Innovation Unit of IdiPAZ

### Public engagement

- Current information about *Clinical Trials* research studies in different phases for Patients
- The society has the opportunity to collaborate with IdiPAZ via sponsorship and our Patronage Strategy - *Pazito: colabora*
- *IdiPAZ+i News* is an information bulletin focus to translated the society that the hospital is not only a place to treat the patients, otherwise the researchers try to improve the health and well-being of our population with the research and innovation projects.

### Governance

- IdiPAZ is a participating member of the *Coalition for Advancing Research Assessment* The Coalition will help all kinds of research performing organisations to abandon or reposition uninformative metrics (Journal Impact Factor, *h*-index, Shanghai rankings etc.) towards a more comprehensive system of scientific quality evaluation, aligned with *DORA* and *HRS4R*.
 
- Participative Governance: European Reference Network on paediatric transplantation (*ERN TransplantChild*), coordinated by our institution, TransplantChild Patients Committee.
- Research Ethics Committee with Medical Products
- *Commission for Humanisation and Social & Scientific Responsibility* of IdiPAZ: This commission aims to ensure compliance with the principles of Responsible Research and Innovation (RRI) and Open Science, following the recommendations of the European Commission. It is also committed to promoting the social and scientific responsibility of our researchers, aimed at promoting research and innovation for society. Through this committee, we have launched a process of integration of the Sustainable Development Goals and the 2030 Agenda, receiving certification in June 2022 in sustainable strategy by AENOR and certifying us again in 2023 in maintaining our commitment. The members of the commission include representatives of patients' associations, representatives of the district council, the hospital and FIBHULP/IdiPAZ.
- Complaint Channels: As part of the IdiPAZ so-

cial responsibility management system and attention to our stakeholders, we have enabled the following reporting channels

- Conduct Code
- Code of Ethics and Good Scientific Practices
- Protocol Against Harassment
- Action Against Fraud, Corruption and Conflict of Interest
- Claim or Suggestions of Job Offers
- Complaint Channels: At IdiPAZ we have created a channel through which our stakeholders can communicate suggestions and complaints with the aim of improving the performance of the company.

### Gender Equality

- Design of the **II Equality and Diversity Plan**, registered with REGCON (*Registro y Depósito de Convenios Colectivos, acuerdos colectivos de trabajo y Planes de Igualdad*)- Code 28109182112021
- Creation of the *Equality and Diversity Committee*
- IdiPAZ's Commission for Equality and Diversity developed the *Protocol for the prevention of and action against discriminatory harassment, moral and sexual harassment and harassment based on gender* to recognize, prevent, and if necessary, eradicate all those behaviours and organizational factors that reveal violent behaviour in the workplace and promote a healthy work environment and climate, both physically and psychologically.
- *Preventing and dealing with situations of inter-*

*nal conflict, violence and harassment in Biomedical Research Foundations*

- *Human Resources Strategy for Researchers-HRS4R*: endorsed the Charter and Code principles, gap analysis, OTM-R and action Plan design.
- Participation in the International Day of Women and Girls in Science

### Social Responsibility

In 2020, IdiPAZ/FIBHULP obtained the IQNet SR10 international certification, as a mark of confidence to shareholders and other stakeholders that reliable, recognised and value-focused management practices are in place, and returning to obtain this certification in 2022 and 2023..

In addition, we have continued with our a commitment to the sustainable *development goals and the 2030 agenda* , as well as with our *corporate social responsibility policy*, which includes the the activities and guidelines that are carried out to fulfil this commitment.

### Goals to Transform Our World

In line with the Social Responsibility Strategy, IdiPAZ began in 2021 to on the Sustainable Development Goals proposed by the 2030 Agenda for Sustainable Development, adopted by all Member States of the United Nations. This is a shared plan for peace and prosperity for people and planet, now and in the fu-

ture, and 17 Sustainable Development Goals (SDGs) were proposed. After months of work, in June 2022, IdiPAZ achieved AENOR certification in sustainable strategy.

A materiality study was conducted through a process of sending questionnaires to the institute's stakeholders, identifying and mapping all the institute's lines of research and projects. As a result of the analysis, IdiPAZ prioritised four Sustainable Development Goals that were included in its Strategic Plan for research and innovation as follows:

### Strategic ODS:

- 3. Good Health
- 5. Gender Equality
- 8. Decent work and Economic Growth
- 9. Innovation and Infrastructure
- 10. Reduced inequalities
- 12. Responsible consumption and production
- 17. Partnerships for the goals

### Relevant ODS:

- 4. Quality education
- 7. Affordable and clean energy
- 13. Climate action
- 16. Peace, justice and strong institutions

The prioritized SDGs have been aligned and integrated with the objectives and axes of the Strategic Plan for Research and Innovation 2020-2024. In addition, a first Sustainability Report was drawn up, which has been updated year after year and includes the entire process of implementing the SDGs in the institute and the actions to be developed since their implementation. The intention is that IdiPAZ contributes to the implementation of the SDGs through its work on the seven strategic goals and targets. The objectives we are going to work on in the short and long term are the following:

**3.3** By 2030, end the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases.

**3.4** By 2030, reduce by one third premature mortality from non-communicable diseases through prevention and treatment and promote mental health and well-being.

**3.5** Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol.

**3.A** Strengthen the implementation of the World Health Organisation Framework Convention on Tobacco Control in all countries, as appropriate.

**3.B** Support the research and development of vaccines and medicines for the communicable and non-communicable diseases that primarily affect developing countries, provide access to affordable essential medicines and vaccines, in accordance with the Doha Declaration on the TRIPS

Agreement and Public Health, which affirms the right of developing countries to use to the full the provisions in the Agreement on Trade Related Aspects of Intellectual Property Rights regarding flexibilities to protect public health, and, in particular, provide access to medicines for all.

**3.C** Substantially increase health financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing States.

**5.1** End all forms of discrimination against all women and girls everywhere

**5.2** Eliminate all forms of violence against all women and girls in the public and private spheres, including trafficking, sexual, and other types of exploitation

**5.4** Recognize and value unpaid care and domestic work through the provision of public services, infrastructure and social protection policies and the promotion of shared responsibility within the household and the family as nationally appropriate

**5.5** Ensure women's full and effective participation and equal opportunities for leadership at all levels of decision making in political, economic and public life

**5.B** Enhance the use of enabling technology, in particular information and communications technology, to promote the empowerment of women  
**5.C** Adopt and strengthen sound policies and enforceable legislation for the promotion of gender equality and the empowerment of all women and girls at all levels

**8.3** Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity and innovation, and encourage the formalisation and growth of micro-, small- and medium-sized enterprises, including through access to financial services

**8.5** By 2030, achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value

**8.6** By 2020, substantially reduce the proportion of youth not in employment, education or training

**8.7** Take immediate and effective measures to eradicate forced labour, end modern slavery and human trafficking and secure the prohibition and elimination of the worst forms of child labour, including recruitment and use of child soldiers, and by 2025 end child labour in all its forms

**8.8** Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants, and those in precarious employment

**9.1** Develop quality, reliable, sustainable and resilient infrastructure, including regional and trans-border infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all

**9.2** Promote inclusive and sustainable industrialization and, by 2030, significantly increase the contribution of industry to employment and gross domestic product, in accordance with na-

tional circumstances, and double that contribution in the least developed countries.

**9.3** Increase access of small industries and other enterprises, particularly in developing countries, to financial services, including affordable credit, and their integration into value chains and markets.

**9.5** Enhance scientific research, upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including, by 2030, encouraging innovation and substantially increasing the number of research and development workers per 1 million people and public and private research and development spending

**10** REDUÇÃO DAS DESIGUALDADES

**10.2** By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status

**10.3** Ensure equal opportunity and reduce inequalities of outcome, including by eliminating discriminatory laws, policies and practices and promoting appropriate legislation, policies and action in this regard

**10.4** Adopt policies, especially fiscal, wage and social protection policies, and progressively achieve greater equality

**12.2** By 2030, achieve the sustainable management and efficient use of natural resources

**12.4** By 2020, achieve the environmentally

**12** CONSUMO E PRODUÇÃO RESPONSÁVEIS

sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimise their adverse impacts on human health and the environment

**12.5** By 2030, substantially reduce waste generation through prevention, reduction, recycling and reuse

**12.8** By 2030, ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature

**17** PARCERIAS E MEIOS DE IMPLEMENTAÇÃO

**17.6** Enhance North-South, South-South and triangular regional and international co-operation on and access to science, technology and innovation and enhance knowledge sharing on mutually agreed terms, including through improved coordination among existing mechanisms, in particular at the United Nations level, and through a global technology facilitation mechanism

**17.17** Encourage and promote effective public, public-private and civil society partnerships, building on the experience and resourcing strategies of partnerships.

In our sustainability report you can find our sustainability management and the implementation of the Sustainable Development Goals in our institute, as

well as all the action plans that will be carried out in the coming years.

In relation to our commitment to the SDGs, throughout this 2023 we have developed a series of campaigns that favor their achievement and support the environmental and social improvement of our surroundings. Some of the campaigns we have carried out or in which we have collaborated have been:

# 3 Information groups by area

## 3.1 Neurosciences Area

Documents: 140 | Originals: 107 | D1: 24 | Q1: 76

**Area coordinator: Exuperio Díez Tejedor**

*coordinadorneurociencias@idipaz.es*

### RESEARCH GROUPS

**3.1.1** Psychiatry and Mental Health - María Fe Bravo Ortíz

**3.1.2** Neurology and Cerebrovascular Diseases - Exuperio Díez Tejedor/María Gutiérrez Fernández

**3.1.3** Neuroprotective Strategies in Neurodegenerative Diseases - Ana Isabel Rojo Sanchís

**3.1.4** Involvement of Glycerinic and Glutamatergic Systems in Central Nervous System Pathologies  
Francisco Zafra Gómez

**3.1.5** Mechanisms and Biomarkers in Neurodegenerative Diseases - Isabel Lastres Becker

**3.1.6** Multiple Sclerosis Research - Yolanda Aladró Benito

#### 3.1 Neurosciences Area

Strategic Objectives	Development forecast for the coming years:	Actions
Neuroscience Area is composed of 5 research groups and has as general objectives the promotion of teaching, research and dissemination of knowledge in the field of neurosciences and neurological diseases, particularly in relation to clinical neurosciences.	Cohesion between different disciplines (biomedical research, engineering).	Performing annual workshops and seminars science
	Encourage and promote research among the healthcare staff who sometimes perceive research as something negative.	Training in research methodology in specialized health personnel and in training
	Innovation and technology transfer	Innovation promotion program that involves health organizations, research institutions and companies

#### STRATEGIC OBJECTIVES

- The group is devoted to assess the efficacy of psychotherapeutic techniques as adjunctive to other therapeutic measures in mental disorders and other medical diseases.
- Their main areas of investigation are: research in severe mental disorder, psychosis and bipolar disorder, suicide prevention and other medical disorders such as cancer and chronic pain. We participate in clinical trials on new treatments and specific therapies in order to improve the prognosis of these disorders.
- It also focuses on the investigation of the interaction of genetic and environmental factors in the etiology and evolution of mental disorders, especially psychosis.
- Moreover, the group is involved in the evaluation of new treatments or new indications in mental disorders through the participation in clinical trials.
- We are specially focused in the assessment of the efficacy and effectiveness of third generation psychotherapies, including mindfulness, and other low intensity psychological intervention.

#### RESEARCH LINES

- Psychotherapeutic interventions in mental disorders
- Suicide prevention
- Psychological and social impact of the COVID-19 pandemic
- e-Health interventions
- Mindfulness-based interventions
- Environment/gene interaction in First Episode Psychosis

## STRATEGIC OBJETIVES

### CEREBROVASCULAR

- Development of translational research studies (both animal and clinical studies) in cerebrovascular diseases, with the objectives of increasing the understanding of the pathogenesis of both cerebral infarction (with cortical and subcortical affectation) and cerebral hemorrhage. To analyze the influence of hyperglycemia, diabetes and glycemic variability in the evolution of stroke. To identify prognostic biomarkers and therapeutic targets mainly aimed at the promotion of brain protection and repair, with a special interest on the development of cell therapy as well as in trophic factors, extracellular vesicles and remyelinating drugs. To analyze the contribution of comorbidities in the mechanisms that occur after stroke, and the effect of therapies (protective, reparative ...) in animal models of stroke associated with hypertension, hyperglycemia and diabetes.
- Clinical trials of cell therapy in acute cerebral infarction (clinical trial AMASCIS and European Consortium RESSTORE-H2020).
- Development of innovative strategies in the diagnosis and treatment of ischemic stroke, through the development of an independent operator-ultrasound device for brain visualization and for enhancement by ultrasound of drug therapies (BDNF, extracellular vesicles) in the ischemic area.
- Evaluation of the benefit of the implementation of prehospital clinical scales able to identify of patients of cerebral artery occlusion susceptible to mechanical thrombectomy in order to shorten treatment delay and improve the prognosis of patients.
- Study of the clinical (neurological and neuropsychological) and anthropological factors influencing functional recovery and reintegration of stroke patients as well as the compliance with the recommendations for secondary stroke prevention.
- To analyze the recovery of post-stroke aphasia through a dubbing tool for television series and the development of a communication app. To evaluate the use of virtual reality in the recovery of motor and cognitive sequelae post-stroke, as well as the computational analysis of movement.
- To evaluate the effectiveness of keeping oral or parenteral anticoagulation in the acute phase of cardioembolic ischemic stroke
- To discover factors anticipating the development of atrial fibrillation through EKG and echocardiographic abnormalities in cryptogenic stroke.
- Impact of COVID-19 pandemic in stroke care and in stroke outcomes
- Analysis of Patient Reported Outcome Measures (PROM) and Patient Reported Experience Measures (PREM) in stroke
- To analyze the differences between general anesthesia and sedation with high flow nasal canula in the endovascular treatment of ischemic stroke.

### HEADACHES AND NEUROPATHIC PAIN

- Analysis of the expression of the phenomenon central painful awareness in different primary and secondary headaches.
- Central Sensitization and pain perception in patients with cluster headache.
- Features and outcome of migraine in patients with fibromyalgia.
- Response to OnabotulinumtoxinA in High Frequency Episodic Migraine.

- **Marta Naranjo Castresana.** Facultativo Médico Especialista de Área en Neurofisiología Clínica. Hospital Universitario La Paz
- **Pedro Navía Álvarez.** Facultativo Especialista de Área en Radiología. Hospital Universitario La Paz
- **Pilar Negro Madrigal.** Profesor Interino. Departamento de Anatomía, Histología y Neurociencia. Universidad Autónoma de Madrid
- **Jesús Oliván Palacios.** Facultativo Especialista de Área en Neurofisiología Clínica. Hospital Universitario La Paz
- **Laura Otero Ortega.** Investigadora. Miguel Servet Tipo I. Laboratorio de Ciencias Neurológicas y Cerebrovascular. FIBHULP
- **María del Valle Palomo Ruiz.** Coordinador del Laboratorio de Biosensores en Neurociencia. Fundación IMDEA Nanociencia
- **Joaquín Pardo Montero.** Profesor Titular. Centro Superior de Estudios Universitarios La Salle
- **José Francisco Paz Solís.** Facultativo Especialista de Área en Neurocirugía. Hospital Universitario La Paz
- **Irene Peirotn Pascual.** Enfermera. FIBHULP
- **Javier Pozo Novoa.** Investigador Predoctoral. Laboratorio de Ciencias Neurológicas y Cerebrovascular. FIBHULP

- **Ivón Yamileth Rivera Derás.** Facultativo Especialista de Área en Geriatria. Hospital Universitario La Paz
- **Irene Rodríguez Andonaegui.** Profesor Ayudante. Escuela Universitaria de Fisioterapia de la ONCE
- **Jorge Rodríguez de Pardo de Donlebún.** Facultativa Especialista de Área en Neurología. Hospital Universitario La Paz
- **Francisco Javier Rodríguez de Rivera Garrido.** Facultativo Especialista de Área en Neurología. Hospital Universitario La Paz
- **Ana Rodríguez Sanz.** Facultativo Especialista de Área en Neurología. Hospital Universitario La Paz
- **Aranzazu Royo Orejas.** Jefe de Sección de Radiología. Hospital Universitario La Paz
- **Gerardo Ruiz Ares.** Facultativo Especialista de Área en Neurología. Hospital Universitario La Paz
- **María Teresa Salas Campos.** Técnico Superior Psicología. Servicio de Neurología. Hospital Universitario La Paz
- **Susana Santiago Pérez.** Facultativo Especialista de Área en Neurofisiología. Hospital Universitario La Paz
- **Soledad Serrano López.** Facultativa Especialista de Área en Neurología. Hospital Universitario La Paz
- **Gabriel Torres Iglesias.** Contrato Río Hortega. FIBHULP
- **Gema Torrijos Barbero.** Especialista en Neuropsicología. Unidad de Memoria y Demencias. Hospital de Cantoblanco-Hospital Universitario La Paz
- **Arturo Ugalde Canitrot.** Facultativo Especialista de Área en Neurofisiología Clínica. Hospital Universitario La Paz

- Refractory migraine database.
- Short Term Prophylaxis of Cluster Headache: A Comparative Study.
- Study of neuropathic and chronic craniofacial pain
- Photophobia management using greater occipital nerve blocks in migraine patients
- CGRP-pathway drugs in patients with refractory migraine and medication overuse headache
- CGRP-pathway drugs in patients with refractory migraine and autoimmune diseases
- CGRP-pathway drugs in elderly patients with refractory migraine
- Multicentric collaboration in post-COVID related headache investigation
- Features and outcome of chronic refractory cluster headache treated with greater occipital nerve stimulation
- Chronic cluster headache registry

#### Alzheimer's disease

- Study of the lysosomal pathway involvement in a model of neurodegeneration and cholesterol dysregulation in Alzheimer's disease.
- Study of genetic polymorphism related with PSP in the context of a multicentre Genome Wide Association study (GWAS)

#### Parkinson's disease

- Tremor as a negative predictive factor in developing dementia associated with Parkinson's disease.
- Evaluation of the benefits and risks of continuous infusion of intraduodenal levodopa in idiopathic Parkinson's disease.

#### Hereditary ataxias

- Assessment of therapeutic response to Frenkel training exercises enhanced by Wii game console in patients with cerebellar ataxia.
- Participation in the Registry of the European Consortium EFACTS (European Friedreich's Ataxia Consortium for Translational Studies) aimed at improve the knowledge of the epigenetic mechanisms related to silencing the expression of frataxin and the pathogenesis of the disease, identification of biomarkers and genes modifying the clinical expression of the disease, development of new therapies as well as cellular and animal models for the study of Friedreich's Ataxia.

#### NEUROIMMUNOLOGY/NEUROINFLAMMATION

##### Multiple sclerosis

- Analysis of extracellular vesicles as biomarkers in multiple sclerosis patients.
- Analysis of molecular and neuroimaging biomarkers of brain damage and repair in Multiple Sclerosis.
- Search for diagnostic biomarkers, disease monitoring and response to treatment in Multiple Sclerosis
- Development of parametric test in multiple sclerosis by photometric strategies.

##### Autoimmune encephalitis and other autoimmune neurological diseases

- Neurological syndromes associated to antiGAD antibodies
- Paraneoplastic syndromes and other neurological diseases associated to antibodies.

##### Infectious diseases

- Study of neurological symptoms after COVID19 recovery in patients refer to specific consultation
- Analysis of brain volumetry in patients with cognitive symptoms after COVID19
- COVID-19 associated encephalopathy. Risk factors and outcomes

#### AUTONOMIC NERVOUS SYSTEM

- Evaluation of the Autonomic Nervous System in movement disorders.
- Evaluation of the Autonomic Nervous System in focal autonomic neuropathies and in Fabry disease.

#### NEUROMUSCULAR DISEASES

- Develop a hand thermography tool for the diagnosis of fine fiber neuropathy.
- Amyotrophic Lateral Sclerosis (ALS)
- Analysis of the different profiles of cognitive impairment in ALS patients. Adaptation and validation of cognitive ALS specific scales for Spanish patients. Study of cognitive potentials for identification of possible specific EEG endophenotypes in ALS patients.
- Study of biomarkers in ALS and other motor neuron diseases. Genetic, metabolomic and proteomic profiling combined with clinical parameters.

- Participation In Project MinE: International program analyzing the genoma of 15000 patients and controls by the same genotyping platform.
- Participación en ensayos clínicos en Miastenia Gravis
- Participación en el Registro nacional de Enfermedad de Pompe
- Desarrollo de técnicas de ultrasonografía en las enfermedades neuromusculares

#### SLEEP

- Development and evaluation of intervention protocols in childhood insomnia treatment.
- Analysis of sleep microstructure in newborns with Prader Willi Syndrome.
- Study on the efficacy of child insomnia treatment with oral iron supplements against placebo.

#### EPILEPSY

- Analysis of factors influencing the recurrence of seizures, tolerance and adherences to drugs, during the first monotherapy in patients with epilepsy.
- Analysis of neuropsychological disorders in the primary generalized epilepsy.
- Obstructive sleep apnea in Epilepsy.
- Impact of perampanel in patients with epileptic encephalopathies. A multicentric study.
- Approach to refractory status epilepticus. Analysis of the different anesthetic agents commonly used in an intensive care unit
- Epilepsy in the elderly patient: peculiarities and treatment alternatives, with a special focus in refractory cases.

#### DIGITAL TECHNOLOGIES APPLIED TO NEUROLOGICAL DISEASES.

- Objective assessment of motor or other functional deficits (stroke, movement disorders, multiple sclerosis)
- Environmental enrichment to promote early stroke recovery
- Virtual reality in promoting cognitive and motor recovery
- New applications of ultrasound for diagnosis and research in neurological diseases
- Artificial Intelligence applied to diagnosis and clinical management

#### NEUROSTIMULATION

- Neurostimulation in brain and spinal cord injuries

#### BRAIN DEVELOPMENT DISORDERS

- Study and functional classification of the gait of pediatric patients with cerebral palsy.
- Study and functional classification of the gait of patients with familial spastic paraparesis.
- Gait analysis as a tool for the differential diagnosis between child cerebral palsy and PEF in paediatric patients.

#### BRAIN PLASTICITY AND REPAIR AFTER CERE-BRAL DAMAGE. TRASLATIONAL RESEARCH

- Therapies with trophic factors, stem cells and extracellular vesicles
- Biomarkers of damage and repair in neurological diseases
- Ultrasound monitoring and visualization of the brain and peripheral organs in animal models

#### RESEARCH LINES

- Cerebrovascular diseases.
- Headache and neuropathic pain.
- Neurodegenerative diseases: cognitive disorders, movement disorders and spinocerebellar ataxias.
- Neuroimmunology. Multiple sclerosis.
- Neuromuscular diseases. Motor neuron diseases Amyotrophic lateral sclerosis.
- Digital Technologies applied to neurological diseases
- Neurostimulation in brain and spinal cord injuries
- Developmental disorders and neurological maturation (TRADEs-MA).
- Brain plasticity and repair after cerebral damage. Traslational research

#### RESEARCH ACTIVITY

##### Doctoral Theses

- **Haro Martínez AM.** Terapia de Entonación Melódica en el tratamiento de la afasia postictus. Adaptación al idioma español y análisis de eficacia[dissertation]. *Madrid: UAM: 2023(20/09/2023). Director: Fuentes Gimeno B, Díez Tejedor E.*
- **de Celis Ruiz E.** Terapia reparadora cerebral con células troncales alogénicas derivadas de tejido adiposo en el ictus isquémico[dissertation]. *Madrid: UAM: 2023(16/10/2023). Director: Fuentes Gimeno B, Díez Tejedor E. EC2010/171*
- **Elizagaray García I.** Distinguiendo entre pacientes con migraña crónica y cefalea tensional crónica a través de la exploración somatosensorial y musculoesquelética cervical[dissertation]. *Madrid: UAM: 2023(17/01/2023). Director: Gil Martínez A. International Mention*
- **Martín Montes A.** Implicación del metabolismo del colesterol en la patogenia de la enfermedad de Alzheimer[dissertation]. *Madrid: UAM: 2023(01/06/2023). Director: Frank García A, Bullido Gómez-Heras MJ.*
- **García Romero MM.** Estudio de una cohorte de pacientes con enfermedad de Lesch Nyhan: valoración clínica y manejo terapéutico de las complicaciones neurológicas.[dissertation]. *Madrid: UAM: 2023(12/05/2023). Director: Pascual Pascual SI.*
- **Palpán Flores AJ.** Evaluación de la supervivencia del Glioblastoma IDH no mutado con métodos de estadística multivariante y algoritmos de inteligencia artificial, basados en su presentación clínica, histológica, imagen de resonancia magnética, volumetría tumoral y espectroscopia ex vivo.[dissertation]. *Madrid: UAM: 2023(23/03/2023). Director: Roda Frade, José María.*
- **Laso García F.** Vesículas extracelulares y su contenido proteico como efectores de recuperación en un modelo preclínico de hemorragia intracerebral[dissertation]. *Madrid: UAM: 2023(45/126). Director: Alonso De Leciñana Cases M.*
- **Wang Y.** Distribución de los transportadores de hormonas tiroideas MCT8 y OATP1C1 en la corteza motora de macaco y humano[dissertation]. *Madrid: UAM: 2023(06/06/2023). Director: Guadaño Ferraz AC.*
- **Barcía Aguilar C.** Factores asociados a las secuelas a largo plazo en el estatus epiléptico refractario pediátrico.[dissertation]. *Madrid: UAM: 2023(06/05/2023). Director: Pascual Pascual SI.*
- **Valcarcel Hernández V.** Desentrañando los mecanismos de la enfermedad, desarrollando modelos preclínicos y estrategias terapéuticas dirigidas a la deficiencia de MCT8[dissertation]. *Madrid: UAM: 2023(30/06/2023). Director: Guadaño Ferraz AC.*

##### Master Theses

- **Martín Martínez I.** Design and implementation of a system for the automation of the Fugl Meyer Assessment scale in stroke patients[dissertation]. *Madrid: UAM: 2023(17/07/2023). Director: Larraga García B, Alonso de Leciñana M*

- **Yagüe Novoa N.** Design and implementation of a virtual reality platform for upper limb rehabilitation using a haptic robot[dissertation]. *Madrid: UPM: 2023(17/07/2023). Director: Larraga García B, Alonso de Leciñana M*

##### Final Degree Theses

- **Maroto Cidfuentes C.** Papel de las vesículas extracelulares derivadas del sistema nervioso en un modelo preclínico de hemorragia intracerebral[dissertation]. *Madrid: UAM: 2023(30/06/2023). Director: Gutiérrez Fernández M.*
- **Schümmer Bengoa P.** Desarrollo y análisis de un sistema de movimiento basado en redes neuronales artificiales para la evaluación de la prueba Ledge Beam Walking Test en modelos experimentales murinos de ictus[dissertation]. *Madrid: UAM: 2023(15/07/2023). Director: Gutiérrez Fernández M.*
- **Botella Cruces L.** Análisis de las vesículas extracelulares circulantes como biomarcador en pacientes de Esclerosis Múltiple[dissertation]. *Madrid: UAM: 2023(15/07/2023). Director: Otero Ortega L.*
- **Ruiz González A.** Diseño e implementación de un sistema de análisis de correlación de datos de imagen, clínicos y cinemáticos en pacientes de ictus agudo[dissertation]. *Madrid: UPM: 2023(30/01/2023). Director: Alonso de Leciñana M, Gutiérrez A.*
- **Música Estévez M.** Desarrollo de un sistema de captura de vídeo basado en técnicas de aprendizaje profundo para el estudio de la cinemática de las manos de pacientes con ictus[dissertation]. *Madrid: UPM: 2023(18/07/2023). Director: Larraga García B, Alonso de Leciñana M.*
- **Moldes Castillo R.** Diseño e implementación de un sistema para el almacenamiento masivo de datos cinemáticos de la mano en pacientes con ictus[dissertation]. *Madrid: UPM: 2023(18/07/2023). Director: Larraga García B, Alonso de Leciñana M.*
- **de Spusa Da Silva A.** Diseño e implementación de aplicaciones web para la divulgación y visualización de herramientas de evaluación de pacientes con déficit motor[dissertation]. *Madrid: UPM: 2023(18/07/2023). Director: Gutiérrez A, Alonso de Leciñana M.*
- **García Pastor S.** Manifestaciones de enfermedad cardíaca en el dúplex carotídeo en pacientes con ictus isquémico[dissertation]. *Madrid: UPM: 2023(01/06/2023). Director: Alonso de Leciñana M, Rodríguez Pardo J.*

#### Publications

- **Arribas-Pascual M, Hernández-Hernández S, Jiménez- Arranz C, Grande-Alonso M, Angulo-Díaz-Parreño S, La Touche R, Paris-Aleman A.** Effects of physiotherapy on pain and mouth opening in temporomandibular disorders: an umbrella and mapping systematic review with meta-meta-analysis. *J Clin Med.* 2023; 12(3): 788. Review. IF: 3.0; Q1
- **Arribas-Romano A, Fernández-Carnero J, González- Zamorano Y, Rodríguez-Lagos L, Alguacil-Diego IM, Molina-Álvarez M, Tejera DM, Mercado-Romero F.** Manual therapy effects on non-specific neck pain are not mediated by mechanisms related to conditioned pain modulation: a randomized clinical trial. *J Clin Med.* 2023; 12(12): 3894. Article. IF: 3.0; Q1
- **Badía JM, del Toro MD, Gracia JFN, Balibrea JM, Herruzo R, Sánchez CG, García JL, Pérez IR, Guirao X, Soria-Aledo V, Ortí-Lucas R.** Surgical infection reduction program of the observatory of surgical infection (PRIO-O): Delphi prioritization and consensus document on recommendations for the prevention of surgical site infection. *Cir Espan.* 2023; 101(4): 238-51. Article. IF: 1.3; Q3
- **Bendszus M, Fiehler J, Subtil F, Bonekamp S, Aamodt AH, Fuentes B, Gizewski ER, Hill MD, Krajina A, Pierot L, Simonsen CZ, Zelenák K, Blauenfeldt RA, Cheng B, Denis A, Deutschmann H, Dorn F, Flottmann F, Gellissen S, Gerber JC, Goyal M, Haring J, Herweh C, Hopf-Jensen S, Hua VT, Jensen M, Kastrup A, Keil CF, Klepanec A, Kurca E, Mikkelsen R, Moehlenbruch M, Müller-Huelsbeck S, Münnich N, Pagano P, Papanagiotou P, Petzold GC, Pham M, Puetz V, Raupach J, Reimann G, Ringleb PA, Schell M, Schlemm E, Schönenberger S, Tennoe B, Ulfert C, Valis K, Vitková E, Vollherbst DF, Wick W, Thomalla G.** Endovascular thrombectomy for acute ischaemic stroke with established large infarct: multicentre, open-label, randomised trial. *Lancet.* 2023; 402(10414): 1753-63. Article. IF: 98.4; D1

### 3.1.3 Neuroprotective Strategies in Neurodegenerative Diseases

#### STRATEGIC OBJETIVES

- Oxidative stress is a key element in the aetiopathogenesis of neurodegenerative diseases and their comorbidities. Our laboratory studies the antioxidant protection mechanisms activated by extracellular signals and how this response could be regulated pharmacologically to provide a therapeutic benefit in these diseases.
- To meet these two objectives, we are studying signalling pathways that regulate antioxidant metabolism and provide a general protective response. An important finding of this group was the observation that the PI3K/AKT/GSK-3 survival pathway regulates the transcription factor NRF2, guardian of cellular redox homeostasis, that provides protection against oxidative, inflammatory and proteotoxic stress. For the past year we have been working on the validation this transcription factor as a new therapeutic target to modify progression of Parkinson's and Alzheimer's disease as well co-morbid retinopathy and type II diabetes.

#### RESEARCH LINES

- Role of oxidative stress in neuronal death and neuroinflammation in neurodegenerative diseases.
- Validation of NRF2 as a new therapeutic target in neurodegenerative diseases.
- Use of NRF2 transcriptional signature as a biomarker of prognosis, progression and therapeutic efficacy.
- Identification of NRF2 activating compounds by inhibiting their interaction with  $\beta$ -TrCP.
- Relevance of NRF2 transcriptional signature in altered molecular processes in ALS models.
- Molecular basis of the role of Nrf2 in type 2 diabetes and its complications (diabetic retinopathy and nephropathy).

### 3.1.4 Involvement of Glycinergic and Glutamatergic Systems in Central Nervous System Pathologies Group

Publications: 4 | Q1:3

#### COMPOSITION

##### Francisco Zafra Gómez

Catedrático. Facultad de Ciencias. Universidad Autónoma de Madrid

- **María del Carmen Aragón Rueda.** Catedrática. Facultad de Ciencias. Universidad Autónoma de Madrid
- **Beatriz Fuensanta López Corcuera.** Profesora Titular. Facultad de Ciencias. Universidad Autónoma de Madrid
- **Enrique Núñez Balbuena.** Investigador Postdoctoral. Universidad Autónoma de Madrid
- **Eva María Porlan Alonso.** Profesora Contratada Doctora. Universidad Autónoma de Madrid

#### STRATEGIC OBJETIVES

- Role of glutamate and glycine transporters in physiological and pathological aspects of glutamatergic and glycinergic neurotransmission.
- Involvement of glutamate transporters in excitotoxicity, ischemia and traumatic brain injury
- Pathologies of glycinergic neurotransmission such as hyperekplexia and pain
- Role of the adult neurogenesis in neurorepair.

#### RESEARCH LINES

1. Physiological and pathological aspects of glutamate fluxes in brain as potential targets to prevent excitotoxicity, associated with brain disfunctions like ischemia, or traumatic brain injury, with special interest in intracellular traffic and characterization of interactomes of transporters and receptors of glutamatergic synapses.
2. Glycinergic neurotransmission. Identification and characterization of new GlyT2 mutations (SLC6A5 gene) associated to human hyperekplexia. Effects of the mutations on transporter structure, function, proteostasis and glycinergic neurotransmission. Role in presynaptic hyperekplexia of different genes related to GlyT2 trafficking, interactoma, posttranslational modifications. Rescue interventions.
3. Study of plastic adaptations affecting glycine transporters in physiological and pathological nociception. Regulation of GlyTs by receptors modulating nociceptive signaling (P2XR, P2YR, mACh, nACh,  $\alpha 2$  adrenergic, 5-HT). Signaling pathways.
4. Physiological and pathological aspects of Neuronal reparation by adult neurogenesis:
  - a. Identification of novel regulatory mechanisms of adult neurogenesis by kinases.
  - b. Identification of novel regulatory mechanisms of adult neurogenesis by microRNAs and other non-coding RNAs.
5. GABAergic neurotransmission. Identification and characterization of new mutations in SLC6A1 gene (GABA transporter GAT-1) associated to epilepsy. Effects of the mutations on transporter structure, function in GABAergic neurotransmission. Pharmacological treatments with pharmacochaperones.

#### STRATEGIC OBJETIVES

- **The aging of the population poses a growing burden in society.** This is associated with the increase in disability and diseases that have a high impact on health care, on patients and their families. Likewise, aging is associated with the appearance of different neurodegenerative diseases, among which include Alzheimer's disease (AD), Parkinson's disease (PD) and amyotrophic lateral sclerosis (ALS). Therefore, the development of advanced biological markers, new drugs and appropriate technology is the key to establishing a treatment for these diseases, which is currently an important social challenge. In our laboratory we study the molecular basis of neurodegeneration. The research projects we develop have a multidisciplinary approach that combines basic and translational research, using cell culture techniques, murine models and postmortem samples from patients with AD, PD and ALS.
- **Amyotrophic lateral sclerosis (ALS): Design and development of innovative drugs for the treatment of ALS**
- **Amyotrophic lateral sclerosis (ALS) is a fatal neurodegenerative disease that affects motor neurons in the spinal cord and cerebral cortex.** Patients have a loss of muscle strength and coordination that progressively progresses, preventing the performance of daily activities. Until now there is no treatment that cures ALS, and for this reason in our laboratory we are developing several lines of research that aim to address this challenge by designing and developing new therapies for the treatment of ALS. In collaboration with several laboratories in a project funded by the Community of Madrid (ELA\_Madrid S2017/BMD-3813) we have generated and functionally and biochemically characterized cell models (lymphoblasts) based on human samples. In addition, we are developing new compounds that modulate the TDP-43 and NRF2 signaling pathways, respectively, validating them in cellular and mouse models of ALS. In this context, in a project funded by the Ministry of Science, Innovation and Universities (PID2019-105600RB-I00) we are also investigating the modulation of aging and neurodegeneration by small molecule protein kinase inhibitors, in collaboration with Dr. Ana Martínez. On the other hand, one of the main characteristics of ALS is that there are alterations in mRNA metabolism and deregulated axonal transport. For this reason, in a project financed by FUNDELA, we are determining if the TDP-43 aggregates kidnap the RNA-binding

proteins, and do not let them carry out their function, in such a way that the mRNAs do not reach the synaptic connections and cannot be translated, causing there to be no connection between the neuron and the muscle, which ultimately leads to loss of muscle function. So we are looking at RNA granule transport and protein translation in situ in ALS, determining the involvement of STAU1 and TDP-43 proteins.

- **Tauopathies: new biomarkers and targets against neurodegeneration.**
- **The TAU protein is the main component of the intracellular filamentous deposits that define a series of neurodegenerative diseases called tauopathies.** In general, tauopathies are characterized by alterations in synaptic plasticity, cell death, proteinopathy, and neuroinflammation. Despite enormous efforts to find a cure for these diseases, there is still no effective treatment. That is why in my laboratory we face this challenge with two different approaches. In our laboratory we have shown in vitro and in vivo that neurons with accumulation of TAU induce the expression of the cannabinoid receptor CB2, which enhances neurodegeneration. Therefore, in a first approach we focus on the study of the pharmacological modulation of the CB2 receptor and its effects on TAU-induced neurodegeneration, with a project funded by the Fundación Tatiana Pérez de Guzmán el Bueno (2021-2024). There are currently no specific biomarkers for tauopathies that allow a prognosis/diagnosis of these diseases.
- **Implication of alterations at the mitochondrial level in Parkinson's disease.**
- **We are interested in elucidating the molecular aspects that underlie Parkinson's Disease (PD).** PD is the second most common multisystem neurodegenerative disorder associated with aging. Most cases of PD are sporadic and of unknown aetiology, but mutations in genes such as PARKIN and PINK1 have been associated with familial forms of the disease. Mitochondrial impairment is a well-established pathological hallmark of PD, but whether mitophagy is impaired in this disease remains a subject of intense debate. Therefore, in this research project we are determining the role of mitochondria and the differential alterations in mitochondria between neurons and astrocytes in a-synuclein associated-PD.

#### RESEARCH LINES

1. Research on targeted therapies to modulate neurodegeneration-associated TDP-43 and TAU proteins
2. Analysis of RNA transport and protein translation in situ: implication of STAUEN 1/2?
3. Modulation of cannabinoid CB2 receptor as a new therapeutic strategy to protect against TAU-induced neurodegeneration
4. Differential function of mitochondria in neuron-astrocyte-dependent  $\alpha$ -synuclein protein in Parkinson's disease.

## 3.1.6 Multiple Sclerosis Research Group

Publications: 2 | Q1:1

### COMPOSITION

#### Yolanda Aladró Benito

Médico Adjunto Neurología. Hospital Universitario de Getafe. Profesor Asociado. Universidad Europea de Madrid

- **Laura Lillo Triguero.** Facultativo Especialista de Área en Neurología. Hospital Universitario de Getafe
- **Guillermo Martín Ávila.** Facultativo Especialista de Área en Neurología. Hospital Universitario de Getafe
- **Alejandro Méndez Burgos.** Facultativo Especialista Adjunto Neurología. Hospital Universitario de Getafe
- **Belén Pilo de la Fuente.** Facultativo Especialista de Área en Neurología. Hospital Universitario de Getafe

### STRATEGIC OBJECTIVES

- To assess the progression of multiple sclerosis using gait analysis with inertial sensors to find more objective, sensitive and reliable measures to detect and monitor the clinical progression of progressive Multiple Sclerosis. To validate selected measures provided by inertial sensors to monitor gait in a prospective cohort of patients with Multiple Sclerosis in early (primary and secondary) stages.
- We are specially focused in the assessment of the efficacy and effectiveness of techniques such as Mindfulness and we evaluate hypothetical mediators of response, such as neurotrophic factors or factors related to inflammatory response.
- Moreover, the group is involved in the evaluation of new treatments or new indications in mental disorders through the participation in clinical trials.

### RESEARCH LINES

- Gait study with biosensors in multiple sclerosis patients.
- Covid-19 in multiple sclerosis
- Late-onset multiple sclerosis
- Use of motion sensors in essential tremor

### RESEARCH ACTIVITY

#### Publications

- **Casanova I, Domínguez-Mozo MI, de Torres L, Aladró-Benito Y, García-Martínez A, Gómez P, Abellán S, de Antonio E, Álvarez-Lafuente R.** MicroRNAs associated with disability progression and clinical activity in multiple sclerosis patients treated with glatiramer acetate. *Biomedicines*. 2023; 11(10): 2760. Article. IF: 3.9; Q2
- **Oreja-Guevara C, Rabanal A, Rodríguez CH, Benito YA, Bilbao MM, González-Suarez I, Gómez-Palmares JL.** Assisted reproductive techniques in multiple sclerosis: Recommendations from an expert panel. *Neurol. Ther.* 2023; 12(2): 427-39. Review. IF: 3.9; Q1

#### Research projects

## 3.2 Cardiovascular Area

Documents: 218 | Originals: 157 | D1: 55 | Q1: 123

**Area coordinator: José Raúl Moreno Gómez; María Fernández Velasco**

*coordinadorcardiovascular@idipaz.es*

### RESEARCH GROUPS

**3.2.1** Research on Invasive Clinical and Translational Cardiology - ICCIT-PAZ -  
José Raúl Moreno Gómez/María Fernández Velasco

**3.2.2** Coagulopathies and Alterations of Haemostasis - Víctor Jiménez Yuste

**3.2.3** Vascular Physiology and Pharmacology - Ana María Briones Alonso

**3.2.4** Vascular Pharmacology and Metabolism (FARMAVSM) -  
Carlos F. Sánchez Ferrer/Concepción Peiró Vallejo

**3.2.5** Paediatric Cardiology Research - Federico Gutiérrez-Larraya Aguado

Strategic Objectives	Development forecast for the coming years:	Actions
<p>Cardiovascular Area is composed of 6 groups that carry out basic, experimental and clinical research in the fields of cardiology and cardiovascular risk factors. The area has an important activity in the performance of international clinical trials of wide impact and applicability. The scientific production of the cardiovascular area is supported by a high impact factor. The groups also have extensive experience in training researchers.</p>	<p>To merge the groups by research lines in order to avoid the duplicities that make the group lose strength and competitiveness and to bet on being more competitive and to take better advantage of the resources.</p>	<p>Foster and support translational research lines.</p>
	<p>The area should be focused on consolidated and multidisciplinary research lines rather than structured by pathologies. The collaboration with research groups from other organizations should be the norm.</p>	<p>Establish relationships/ collaboration/alliances with other IdiPAZ research groups and with groups from other institutions and maintain those already started.</p>
	<p>Resources should be focused on priorities established by the researchers themselves, or directly by IdiPAZ after analyzing the scientific production of each group.</p>	<p>Analyze the scientific production of each group</p>
	<p>Clinical research through the resources it provides (clinical trials) should guide basic research projects in order to offer the ideal field for translational medicine. This type of research also provides a stronger link between international research groups.</p>	<p>Encourage participation in clinical trials of researchers.</p>

#### 3.2 Cardiovascular Area

#### STRATEGIC OBJECTIVES

- The group consists of various healthcare units of the Department of Cardiology at Hospital La Paz: Clinic/Coronary Unit, interventional cardiology, cardiac imaging, electrophysiology, rehabilitation and adult congenital heart disease.
- The main research lines focus on providing clinical responses, with local research protocols and direct participation in clinical trials and international multicentre registries. Moreover, clinical translational potential is reinforced through an institutional relationship with the CNIC.

#### RESEARCH LINES

- Myocardial ischaemia. Acute and chronic. Diagnosis, prognosis and treatment.
- Cardiac arrhythmias. Catheter navigation systems.
- Diagnosis and treatment. Post cardiac arrest hypothermia.
- Heart Failure. Diagnosis and treatment. Cardiotoxicity of antineoplastic agents.
- Cardiac diagnostic imaging.
- Aortic stenosis. Diagnosis and treatment.
- Adult congenital heart diseases.
- Endovascular therapy and new cellular therapies in peripheral vascular disease

#### RESEARCH ACTIVITY

##### Doctoral Theses

## 3.2.2 Coagulopathies and Alterations of Haemostasis Group

Publications: 30 | Q1:12

### COMPOSITION

**Víctor Manuel Jiménez Yuste.**

Jefe de Servicio de Hematología. Hospital Universitario La Paz. Profesor Asociado. Universidad Autónoma de Madrid

- **María Teresa Álvarez Román.** Jefa de Sección de Coagulopatías. Hospital Universitario La Paz
- **Nora Viviana Butta Coll.** Investigadora Senior (Contrato Miguel Servet - Tipo 2). Jefe de Laboratorio. Hospital Universitario La Paz-IdiPAZ
- **Hortensia de la Corte Rodríguez.** Facultativo Especialista de Área en Hematología y Hemoterapia. Hospital Universitario La Paz
- **Raquel Fernández Morata.** Técnico de Laboratorio. Hospital Universitario La Paz-IdiPAZ
- **Elena García Arias-Salgado.** Investigadora. Hospital Universitario La Paz-IdiPAZ
- **Sara García Barcenilla.** Coordinadora de Estudios. Hospital Universitario La Paz-IdiPAZ
- **Mercedes Gassior Kabat.** Facultativo Especialista de Área en Hematología y Hemoterapia. Hospital Universitario La Paz
- **Mónica Martín Salces.** Facultativo Especialista de Área en Hematología y Hemoterapia. Hospital Universitario La Paz
- **Elena Monzón Manzano.** Investigadora Postdoctoral. Hospital Universitario La Paz-IdiPAZ
- **Isabel Rivas Pollmar.** Médico Adjunto en Hematología. Hospital Universitario La Paz terno Residente en Cardiología. Hospital Universitario La Paz

### STRATEGIC OBJETIVES

- This group's research activities address various relevant questions in the area of haematology and focus on the characterisation of the genetic and molecular basis of coagulation and haemostatic function. Our group investigates physiological processes such as coagulation, haemostasis, innate immunity, inflammation, cell adhesion and migration, and cell signalling, with special emphasis on their relevance to pathological processes.
- In addition, we perform epidemiological studies to facilitate patient data analysis and therapeutic treatment.

### RESEARCH LINES

- Haemophilia A and B: Individualisation of treatment according to the characteristics of the patient
- New haemostatic treatments for bleeding disorders
- Haemostasis in patients with thrombocytopenias

### RESEARCH ACTIVITY

#### Doctoral Theses

- **Ramón Ortiz C.** Papel de los biomarcadores séricos en el síndrome de obstrucción sinusoidal tras el trasplante de células madre hematopoyéticas[dissertation]. *Madrid: UAM: 2023(25/09/2023). Director: Jiménez Yuste VM, Butta Coll N*
- **Meijón Ortigueira M.** Profilaxis primaria personalizada en hemofilia a grave[dissertation]. *Madrid: UAM: 2023(20/06/2023). Director: Jiménez Yuste VN, Álvarez Román MT*
- **Guerrero Camacho R.** Análisis de resultados de dos protocolos terapéuticos en pacientes con Hemofilia adquirida a en un Hospital Terciario[dissertation]. *Madrid: UAM: 2023(29/03/2023). Director: Jiménez Yuste VN, Álvarez Román M*

- **Gasior Kabat M.** Transplantation with CD45RA+ Cell Purging and Adoptive Immunotherapy with CD45RO+ T Lymphocytes in Paediatric Patients with Malignant and Non-Malignant Haematological pathologies[dissertation]. *Madrid: UAM: 2023(17/10/2023). Director: Pérez Martínez A.*

#### Final Degree Theses

- **Albasanz García P.** Validación de nuevas técnicas microfluídicas en cámara de flujo para el análisis de trastornos de la hemostasia.[dissertation]. *Madrid: Universidad Politécnica de Madrid: 2023(24/07/2023). Director: García Arias-Salgado E, Jiménez Yuste VJ*

3.2 Cardiovascular Area

### Clinical trials

- **Jiménez Yuste VM.** Case-control pilot study of the immune modulating effect of feiba on patients with haemophilia a and inhibitors.  
**Type/Phase:**  
**Sponsored by:** Baxter Healthcare Corporation  
**Signed date:** 02/12/2023
- **Jiménez Yuste VM.** estudio abierto en participantes pediátricos (<18 años de edad) con hemofilia a severa (actividad del factor de coagulación <1 %) con o sin inhibidores, o con hemofilia b de moderadamente severa a severa (actividad del factor de coagulación  $\leq 2$  %) con o sin inhibidores, que compara 12 meses de tratamiento estándar histórico con la profilaxis con marstacimab.  
**Type/Phase:** III  
**Sponsored by:** Pfizer, S.L.U.  
**Signed date:** 10/07/2023
- **Álvarez Román MT.** Estudio de fase III, aleatorizado y doble ciego de ianalumab (VAY736) frente a placebo en combinación con corticosteroides en primera línea en trombocitopenia inmune primaria (VAYHIT1).  
**Type/Phase:** III  
**Sponsored by:** Novartis Farmaceutica, S.A.  
**Signed date:** 11/01/2023
- **Álvarez Román MT.** Estudio de fase III, aleatorizado y doble ciego de ianalumab (VAY736) frente a placebo en combinación con eltrombopag en pacientes con trombocitopenia inmune primaria (PTI) que hayan tenido una respuesta insuficiente o una recaída después del tratamiento de primera línea con esteroides (VAYHIT2).
- Type/Phase:** III  
**Sponsored by:** Novartis Farmaceutica, S.A.  
**Signed date:** 23/03/2023
- **Jiménez Yuste VM.** Open-label, long-term safety and efficacy study of mim8 in participants with haemophilia a with or without inhibitor.  
**Type/Phase:** IIIb  
**Sponsored by:** Novo Nordisk A/S  
**Signed date:** 21/03/2023
- **Álvarez Román MT.** A phase 3b open-label, multicenter study evaluating physical activity and joint health in previously treated patients  $\geq 12$  years of age with severe haemophilia a treated with intravenous recombinant coagulation factor viii fc-von willebrand factor-xten fusion protein (rfviii-fc-vwf-xten efanesoctocog alfa) for 24 months.  
**Type/Phase:** IIIb  
**Sponsored by:** Swedish Orphan Biovitrum Ab Sobi  
**Signed date:** 17/11/2023
- **Álvarez Román MT.** Estudio no intervencionista sobre los cambios en el estado de salud de las articulaciones en pacientes adultos con hemofilia a tras el cambio a la profilaxis con el turoctocog alfa pegol (N8-GP).  
**Type/Phase:** EPA-SP  
**Sponsored by:** Novo Nordisk A/S  
**Signed date:** 24/01/2023
- **Álvarez Román MT.** An observational, multicenter study to evaluate the use and effectiveness of doptelet® (avatrombopag) in adult patients with immune thrombocytopenia (itp).  
**Type/Phase:** EPA-SP  
**Sponsored by:** Swedish Orphan Biovitrum Ab Sobi  
**Signed date:** 20/01/2023
- **Jiménez Yuste VM.** Open-label safety study in adults and adolescents with haemophilia a with and without fviii inhibitors switching directly from emicizumab prophylaxis to nnc0365-3769 (MIM8) prophylaxis.  
**Type/Phase:** IIIb  
**Sponsored by:** Novo Nordisk A/S  
**Signed date:** 28/04/2023
- **Álvarez Román MT.** Estudio observacional para describir el impacto clínico de los patrones de tratamiento en personas con hemofilia a leve-moderada en España (Estudio LEMON).  
**Type/Phase:** EPA-SP  
**Sponsored by:** Roche Farma, S.A.  
**Signed date:** 15/05/2023
- **Jiménez Yuste VM.** Estudio en fase 3, aleatorizado, de loncastuximab tesirina en combinación con rituximab frente a inmunoterapia en pacientes con linfoma difuso de células B grandes (LDCBG) recidivante o resistente.  
**Type/Phase:** III  
**Sponsored by:** Adc Therapeutics Sa  
**Signed date:** 14/02/2023
- **Álvarez Román MT.** Estudio de bajo nivel de intervención, prospectivo, multicéntrico, de 18 meses de duración para evaluar los resultados en salud articular de pacientes con hemofilia a o b en tratamiento profiláctico con efmoroctocog alfa o eftreonoctocog alfa.  
**Type/Phase:** IV  
**Sponsored by:** Swedish Orphan Biovitrum Ab  
**Signed date:** 21/09/2023
- **Jiménez Yuste VM.** Ensayo de fase I/II, multicéntrico, sin enmascaramiento para evaluar la seguridad y la farmacocinética de dosis crecientes de BTCT4465A en monoterapia y en combinación con atezolizumab en pacientes con linfoma no hodgkiniano de linfocitos b y leucemia linfocítica crónica recidivantes o resistentes.  
**Type/Phase:** I  
**Sponsored by:** Genentech Inc Roche Farma, S.A.  
**Signed date:** 15/02/2023
- **Álvarez Román MT.** The european paediatric network for haemophilia management and the pednet haemophilia registry/the european paediatric network for haemophilia management and the pednet haemophilia registry.  
**Type/Phase:** No EPA  
**Sponsored by:** Pednet Haemophilia Research Foundation UMC Utrecht  
**Signed date:** 15/03/2023
- **Jiménez Yuste VM.** Estudio en fase I/II para evaluar la seguridad, tolerabilidad, farmacocinética, farmacodinámica y eficacia de NXT007 en personas con hemofilia a grave o moderada.  
**Type/Phase:** I  
**Sponsored by:** F.Hoffmann-La Roche Ltd  
**Signed date:** 13/07/2023
- **Jiménez Yuste VM.** Estudio abierto de extensión para evaluar la seguridad a largo plazo, la tolerabilidad y la eficacia de marstacimab en profilaxis en pacientes con hemofilia a grave (actividad del factor de coagulación <1 %) con o sin inhibidores o en pacientes con hemofi.  
**Type/Phase:** III  
**Sponsored by:** Pfizer, S.L.U.  
**Signed date:** 04/05/2023

#### 3.2 Cardiovascular Area

- **Jiménez Yuste VM.** An open-label, single-arm treatment study to investigate the safety and tolerability of switching from emicizumab to fitusiran prophylaxis in male participants aged  $\geq 18$  years of age with severe hemophilia a, with, or without inhibitors.  
**Type/Phase:** I  
**Sponsored by:** Sanofi-Aventis Recherche & Developpement  
**Signed date:** 13/07/2023
- **Jiménez Yuste VM.** Estudio de fase I/II, modular, abierto y multicéntrico, para evaluar AZD4573 en combinaciones novedosas con agentes antitumorales en pacientes con neoplasias malignas hematológicas en estadio avanzado.  
**Type/Phase:** I  
**Sponsored by:** Astrazeneca AB  
**Signed date:** 14/04/2023
- **Jiménez Yuste VM.** Estudio de fase III, aleatorizado, abierto y multicéntrico, para comparar zanubrutinib (BGB-3111) más rituximab frente a bendamustina más rituximab en pacientes con linfoma de células del manto no tratados previamente que no son aptos para recibir un trasplante de células madre.  
**Type/Phase:** III  
**Sponsored by:** Beigene Ltd  
**Signed date:** 21/03/2023
- **Jiménez Yuste VM.** Estudio de fase 2 de un solo brazo en monoterapia con tosilato de valemestostat en sujetos con linfoma periférico de células t en recaída / refractario (valemestostat tosilato [ds-3201b]), un inhibidor dual del potenciador del homólogo zeste [ezh] 1/2 para el linfoma de linfocitos t periférico recidivante/resistente [ltp r/r].  
**Type/Phase:** II  
**Sponsored by:** Daiichi Sankyo Inc  
**Signed date:** 25/05/2023
- **Álvarez Román MT.** Estudio global, abierto y de diseño adaptativo para investigar la eficacia y la seguridad de serpinpc en pacientes con hemofilia a grave o con hemofilia b de moderadamente grave a grave.  
**Type/Phase:** IIb  
**Sponsored by:** Apcintex Ltd  
**Signed date:** 02/08/2023
- **Jiménez Yuste VM.** Estudio en fase II, abierto y de dos cohortes de brexuximab vedotina y CHP (A+CHP) en el tratamiento de primera línea de sujetos con linfoma de linfocitos t periféricos (ltp) con menos de un 10% de expresión.  
**Type/Phase:** II  
**Sponsored by:** Seagen, Inc  
**Signed date:** 13/04/2023
- **Jiménez Yuste VM.** Estudio en fase III multicéntrico, aleatorizado, doble ciego, controlado con placebo y con comparador activo, de brexuximab vedotina o placebo en combinación con lenalidomida y
- **rituximab en pacientes con linfoma difuso de células b grandes (LDCBG) recidivante o resistente.**  
**Type/Phase:** III  
**Sponsored by:** Seagen, Inc  
**Signed date:** 02/05/2023
- **Álvarez Román MT.** Estudio global, abierto para investigar la eficacia y la seguridad de serpinpc en sujetos con hemofilia b con inhibidores a global, open-label study to investigate the efficacy and safety of serpinpc in subjects with hemophilia b with inhibitors.  
**Type/Phase:** IIb  
**Sponsored by:** Apcintex Ltd  
**Signed date:** 04/08/2023
- **Jiménez Yuste VM.** Estudio controlado de fase IB/II, abierto, multicéntrico y aleatorizado para investigar la seguridad, tolerabilidad, farmacocinética y eficacia de mosunetuzumab (BTCT4465A) en combinación con chop o chp-polatuzumab vedotin en pacientes con linfoma no hodgkiniano de linfocitos b.  
**Type/Phase:** I  
**Sponsored by:** F.Hoffmann-La Roche Ltd

- **Abraham Merino López.** Ayudante de Investigación. Universidad Autónoma de Madrid
- **Marta Miguel Castro.** Científico Titular. Instituto de Investigación en Ciencias de la Alimentación Consejo Superior de Investigaciones Científicas
- **Roberto Palacios Ramírez.** Investigador Postdoctoral. Universidad de Valladolid
- **Raquel Rodríguez Díez.** Profesora Ayudante Doctor. Departamento de Fisiología. Facultad de Medicina. Universidad Complutense
- **Mercedes Salaices Sánchez.** Catedrática. Departamento de Farmacología. Facultad de Medicina. Universidad Autónoma de Madrid
- **Lucía Serrano Díaz del Campo.** Investigadora predoctoral. Universidad Autónoma de Madrid

#### STRATEGIC OBJETIVES

- Our group is a well-established research group with more than 30 years of experience in the study of the mechanisms involved in the functional, structural and mechanical alterations of the vasculature in various cardiovascular pathologies such as ageing, diabetes and, in particular, hypertension.
- The group is located at the Faculty of Medicine (UAM) and maintains research collaborations with investigators at various universities in Spain and in other countries. Our main objective is to gain further insight into the physiological and molecular mechanisms involved in alterations of resistance and conductance arteries in cardiovascular pathologies. To conduct our research, we generally use various experimental approaches including in vivo animal models, ex vivo experiments and in vitro cellbased studies combined with physiological, pharmacological and molecular biology techniques. In addition, we have begun to translate this knowledge into human studies. In terms of the mediators involved, we have a particular interest in proinflammatory prostanoids, reactive oxygen species (and their interaction among each other or with other mediators such as nitric oxide) and proresolvin lipid mediators. This research is important given the essential role these mediators play in the control of vascular smooth muscle tone and vascular structure.

#### RESEARCH LINES

- Inflammation and vascular function and remodelling. Changes with hypertension and other cardiovascular pathologies.
- Adipose tissue and vascular alterations in cardiovascular pathologies.
- Neural control of vascular tone.
- Cardiovascular effects of heavy metals.
- Antioxidant and antihypertensive properties of food bioactive compounds.
- Resolution of inflammation as a therapeutic approach for cardiovascular diseases
- Effect of gut microbiota modulation in different physiopathological situations

#### RESEARCH ACTIVITY

##### Doctoral Theses

- **González Carnicero Z.** Regulación por Nrf2 de la inflamación vascular y el estrés oxidativo inducidos por IL-1beta en células de músculo liso vascular. Relación con TLR[dissertation]. *Madrid: URJC: 2023(14/09/2023). Director: Martín Cortés A, Hernanz Martín R. International Mention*
- **Ballesteros Martínez C.** Microsomal prostaglandin E synthase-1 is involved in the metabolic, cardiovascular and renal alterations associated with obesity[dissertation]. *Madrid: UAM: 2023(18/05/2023). Director: Briones Alonso AM, Salaices Sánchez M. International Mention*
- **Serrano Díaz del Campo L.** Specialized proresolving mediators as a possible therapeutic strategy for cardiovascular damage in hypertension[dissertation]. *Madrid: UAM: 2023(19/05/2023). Director: Briones Alonso AM, Salaices Sánchez M. International Mention*

##### Master Theses

- **Jiménez Moreno E.** Desarrollo de nuevos ingredientes alimentarios más saludables y sostenibles[dissertation]. *MADRID: UAM: 2023(15/09/2023). Director: Miguel Castro M.*

##### Final Degree Theses

- **Loeches Rivero JC.** Valoración anatomopatológica de los efectos de un hidrolizado de quinua con actividad antioxidante y antihipertensiva en ratas espontáneamente hipertensas[dissertation]. *MADRID: UAH-URJC-CIAL: 2023(16/06/2023). Director: José Uranga AJ, Miguel Castro M.*
- **Vidal Liscano AC.** Importancia de la nutrición en el deportista con diagnóstico de diabetes tipo 1[dissertation]. *MADRID: UAM: 2023(16/06/2023). Director: Briones Alonso AM, González Blázquez R.*
- **Diez Benítez I.** Efectos de la alimentación vegetariana en el rendimiento deportivo[dissertation]. *MADRID: UAM: 2023(16/06/2023). Director: García Redondo A, Blanco Rivero J.*
- **García Monedero S.** Efecto de la diabetes tipo 1 en el rendimiento deportivo de un futbolista. Mejora del rendimiento a través de la alimentación.[dissertation]. *MADRID: UAM: 2023(16/06/2023). Director: García Redondo A, Blanco Rivero J.*

#### STRATEGIC OBJETIVES

- Understanding vascular ageing, both in healthy and pathological conditions, like obesity and diabetes mellitus

#### RESEARCH LINES

- Mechanisms of human vascular ageing
- Mechanisms for vascular damage in diabetes mellitus
- Obesity, adipokines, insulin resistance, and vascular dysfunction
- Role for the angiotensin-(1-7)/Mas receptor axis on vascular function and inflammation.
- Development of novel extracellular vesicle-based therapies for cardiovascular diseases

#### RESEARCH ACTIVITY

##### Master Theses

- **Cuadrado A.** Canagliflozin induce anti-inflammatory and anti-senescent effects in human vascular smooth muscle cells and improves endothelial dysfunction in mesenteric microvessels from diabetic mice [dissertation]. Madrid: UAM: 2023(19/09/2023). Director: Peiro Vallejo C, Sánchez Ferrer CF

##### Publications

Article. IF: 3.0; Q1
- **Barderas MG, de la Cuesta F.** A Molecular (not very becoming) picture of stressed arteries and heart, with some therapeutic hope. *Int J Mol Sci.* 2023; 24(4): 3870. Editorial Material. IF: 4.9; Q1

##### Research projects

- **de la Cuesta Marina F.** Developing novel nanotherapies for atherosclerosis by delivering senolytics to the plaque using mesenchymal stem cell-derived extracellular vesicles (2019-T1/IND-13794 y 2023-5A/IND-28938). CM. 2020-2025. Management centre: UAM
- **de la Cuesta Marina F.** Nueva terapia senolítica para enfermedad vascular asociada al envejecimiento mediante bioingeniería de vesículas extracelulares de células madre para administración dirigida (PID2021-126274OB-I00). AEI. 2022-2025. Management centre: UAM
- **de la Cuesta Marina F.** Terapias senolíticas avanzadas basadas en nanopartículas biológicas para tratar el envejecimiento vascular (CNS2022-135368). AEI. 2023-2025. Management centre: UAM
- **de la Cuesta Marina F.** Escalado y fabricación GMP de vesículas extracelulares de células madre mesenquimales para terapias avanzadas (IND2023/BMD-27323). CM. 2024-2027. Management centre: UAM
- **Peiro Vallejo C, Sánchez Ferrer CF.** Identifying pharmacological targets for the prevention of cardiometabolic vascular inflammation (PID2020-115590RB-I00). ISCIII. 2021-2024. Management centre: UAM

## 3.2.5 Paediatric Cardiology Research\*

### COMPOSITION

#### **Federico Gutiérrez-Larraya Aguado**

Jefe de Servicio de Cardiología Pediátrica. Hospital Universitario La Paz. Profesor Titular. Universidad Francisco de Vitoria. Hospital Universitario La Paz

- **César Abelleiro Pardeiro.** Facultativo Especialista de Área en Cardiología Pediátrica. Hospital Universitario La Paz
- **Viviana Arreo del Val.** Facultativo Especialista de Área en Cardiología Pediátrica. Hospital Universitario La Paz
- **Juan José Beunza Nuin.** Catedrático Facultad de Ciencias de la Salud. Universidad Europea de Madrid
- **Antonio Javier Cartón Sánchez.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Lucía Deiros Bronte.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Marta Gamba Arzoz.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Luis García-Guereta Silva.** Jefe de Sección de Cardiología Pediátrica. Hospital Universitario La Paz
- **Carlos Labradero de Lera.** Facultativo Especialista de Área en Cardiología Pediátrica. Hospital Universitario La Paz
- **Álvaro Lafuente Romero.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Diana Salas Mera.** Médico Adjunto Cardiología Pediátrica. Hospital Universitario La Paz

### STRATEGIC OBJETIVES

- Establishment of Cardiopathy Registers: Creation of comprehensive databases that comply with all legal regulations regarding security, confidentiality, and data protection.
- Advances in Imaging Diagnosis: Innovation and refinement of imaging techniques for precise characterization of pediatric heart diseases.
- Minimally Invasive Diagnostic and Therapeutic Techniques: Development and application of procedures that minimize impact and improve patient recovery.
- Research on Vascular Risk and Environmental Factors: Dedicated studies to understand how environmental factors and lifestyle influence pediatric heart diseases and their prevention.
- Role of Exercise in Pediatric Cardiology: Research on the importance of physical exercise in the detection and treatment of cardiac alterations in children.
- Telemedicine and Cardiac Monitoring: Implementation of telemedicine solutions and the use of IoT devices for efficient and real-time cardiac monitoring.
- Blockchain in Medical Record Management: Application of blockchain technology to ensure the integrity and privacy of medical records.
- Omics Research for Pediatric Cardiology: Search for biomarkers and therapeutic targets through genomic, proteomic, and metabolomic studies.

- Scientific Dissemination and Industrial Collaboration: Publication of research in high-impact journals and collaboration with the pharmaceutical sector for the development of new therapies.
- Creation of Specialized Care Units: Formation of multidisciplinary teams based on the latest research to provide the best care.
- Continuous Training and Public Awareness: Development of educational programs for professionals and families, and collaboration with media to increase the visibility of pediatric heart diseases.

### RESEARCH LINES

- Application of Artificial Intelligence and New Technologies: Exploration and adoption of technological advances to enhance the diagnosis, treatment, and monitoring of pediatric heart diseases.
- Innovation in Medical Devices and Pharmacology: Development and assessment of advanced medical devices and new pharmacological compounds tailored to the specific needs of the pediatric population.
- Management of Vascular Risk in Pediatrics: Study and management of vascular risk from the earliest stages of life, focusing on the prevention and early detection of cardiovascular diseases.

\*Group recently created, december 2023

## 3.3 Infectious Diseases and Immunity Area

Documents: 280 | Originals: 220 | D1: 56 | Q1: 141

**Area coordinator: Eduardo López-Collazo**

*coordinadorinfecciosas@idipaz.es*

### RESEARCH GROUPS

**3.3.1** AIDS and Infectious Diseases - José Ramón Arribas López

**3.3.2** Molecular Microbiology - Jesús Mingorance Cruz

**3.3.3** Immuno-Rheumatology - María Eugenia Miranda Carús

**3.3.4** Innate Immune Response - Eduardo López-Collazo/Carlos del Fresno Sánchez

**3.3.5** Complement Defects in Human Pathology - Margarita López Trascasa/Pilar Sánchez-Corral Gómez

**3.3.6** Lymphocyte Pathophysiology in Immunodeficiencies - Eduardo López Granados

**3.3.7** Drug Hypersensitivity and Innate Immune Response - Teresa Bellón Heredia

**3.3.8** Immunmediate Gastrointestinal Diseases and Other Digestive Pathologies -  
María Dolores Martín Arranz

**3.3.9** MicroRNA Regulation of Immune Tolerance, Autoimmunity and Cancer - Alicia González Martín

#### 3.3. Infectious Diseases and Immunity Area

Strategic Objectives	Development forecast for the coming years:	Actions
<p>Infectious Diseases and Immunity Area is composed of 9 groups focused on the study of diseases related to the immune system such as HIV, autoimmune diseases, cancer, etc., as well as the molecular mechanisms that explain the phenomena associated with these pathologies.</p>	To identify priority research topics in our area and if necessary expand some of them.	Promote the priority research line identified
	To generate and develop scientific research projects that allow the production of knowledge in the biomedical area.	Obtain national and international scientific research projects in biomedical area
	To generate a significant number of research products/results, such as publications in nationally and internationally indexed journals, journals that contribute to the social appropriation of knowledge.	Improve the annual number of publications in the first quartile and decile, and total impact factor of the area
	To socialize the research results by presenting papers at national and international events	Increase the presence of area researchers in national and international events
	To establish agreements and strategic alliances with other communities of knowledge that allow academic discussion and project development.	Search for synergies with other groups with similar and complement research lines.
	To promote the training of young researchers and undergraduate and graduate students.	Training in research methodology undergraduate, predoctoral and postdoctoral personal.
	To develop a good system of applied research so that everything studied in the laboratory has repercussions on both our patients and our entities.	Promote the synergies of translational researchers and clinical researchers, and their incorporation into groups

Publications: 41 | Q1:26

#### COMPOSITION

**José Ramón Arribas López.**

Jefe de Sección del Servicio de Medicina Interna (Unidad de Infecciosas). Hospital Universitario La Paz. Profesor Titular. Universidad Autónoma de Madrid

- **Marta Arsuaga Vicente.** Médico Adjunto en Medicina Interna. Hospital Carlos III - Hospital Universitario La Paz
- **José Ignacio Bernardino de la Serna.** Facultativo Especialista de Área en Medicina Interna. Unidad VIH. Hospital Universitario La Paz
- **Carmen Busca Arenzana.** Contrato Río Hortega. Hospital Universitario La Paz
- **Julen Cadiñanos Loidi.** Contrato Río Hortega. Hospital Universitario La Paz
- **Fernando de la Calle Prieto.** Médico adjunto en Medicina Interna. Unidad de Medicina Tropical. Hospital Carlos III - Hospital Universitario La Paz. Profesor Colaborador. Universidad Autónoma de Madrid

- **Rosa de Miguel Buckley.** Facultativo Especialista Adjunto en Medicina Interna. Hospital Universitario La Paz
- **Marta Díaz Menéndez.** Médico adjunto en Medicina Interna. Unidad de Medicina Tropical. Hospital Universitario La Paz
- **Beatriz Díaz Pollán.** Facultativo Especialista de Área en Medicina Interna. Unidad de Enfermedades Infecciosas y Microbiología Clínica. Hospital Universitario La Paz
- **Alejandro Díez Vidal.** Facultativo Especialista de Área en Medicina Interna. Hospital Universitario La Paz
- **Andrés Esteban Cantos.** Investigador postdoctoral (R2A). Hospital Universitario La Paz
- **Marta Gálvez Charro.** Enfermera. Unidad de VIH. Hospital Universitario La Paz
- **Nicolás García-Arenzana Les.** Facultativo Especialista de Área en Medicina Preventiva. Hospital Universitario La Paz
- **Francisco Gayá Moreno.** Investigador Predoctoral (Contrato de Estabilización de Técnicos de Apoyo). Hospital Universitario La Paz
- **Juan Julián González García.** Facultativo Especialista de Área en Medicina Interna. Unidad de VIH. Hospital Universitario La Paz
- **Lucía Gutiérrez García.** Investigadora Predoctoral. FIBHULP

- **Pedro Herranz Pinto.** Facultativo Especialista de Área en Dermatología. Jefe de Sección. Hospital Universitario La Paz
- **Víctor Hontañón Antoñana.** Investigador predoctoral. Hospital Universitario La Paz
- **María Jiménez González.** Bioestadística. FIBHULP
- **María del Mar Lago Núñez.** Facultativo Especialista de Área en Medicina Interna. Unidad de Medicina Tropical. Hospital Carlos III - Hospital Universitario La Paz
- **Cristina Marcelo Calvo.** Contrato Río Hortega. Hospital Universitario La Paz
- **Luz Martín Carbonero.** Facultativo Especialista de Área. Hospital Universitario La Paz
- **Patricia Martínez Martín.** Médico Adjunto en Medicina Interna. Hospital Universitario La Paz
- **Mario Mayoral Muñoz.** Enfermero. Hospital Universitario La Paz
- **Juan José Miguel Castro.** Enfermero. Hospital Universitario La Paz
- **Rocío Montejano Sánchez.** Investigadora Postdoctoral. Hospital Universitario La Paz
- **María Luisa Montes Ramírez.** Facultativo Especialista de Área de Medicina Interna. Unidad de VIH. Hospital Universitario La Paz
- **Marta Mora Rillo.** Facultativo Especialista de Área de Medicina Interna. Unidad de Enfermedades Infecciosas y Microbiología Clínica. Hospital Universitario La Paz
- **Francisco Moreno Ramos.** Farmacéutico. Hospital Universitario La Paz
- **Carlos Manuel Oñoro López.** Médico Interno Residente. FIBHULP
- **Juan Carlos Ramos Ramos.** Facultativo Especialista de Área en Medicina Interna. Hospital Universitario La Paz
- **Luis Ramos RuPérez.** Investigación Río Hortega. Hospital Universitario La Paz
- **Berta Rodés Soldevila.** Investigadora Miguel Servet. Responsable laboratorio BSL2-virología. FIBHULP
- **Javier Rodríguez Centeno.** Investigador postdoctoral. Hospital Universitario La Paz
- **Elena Sendagorta Cudós.** Facultativo Especialista de Área de Dermatología. Hospital Universitario La Paz
- **Lucía Serrano Morago.** Investigadora predoctoral. Hospital Universitario La Paz
- **Eulalia Valencia Ortega.** Facultativo Especialista de Área en Medicina Interna. Hospital Universitario La Paz

#### STRATEGIC OBJETIVES

- Although great progress has been made, HIV infection remains an incurable disease. Even under the best circumstances, HIV-infected patients who receive current antiretroviral therapy have a survival disadvantage compared with the general non-infected population, which is estimated to be a life expectancy of 15 years less than the general population.
- HIV infection is highly prevalent in Spain. Among western European countries, Spain has the second highest prevalence. An important local characteristic of the HIV-infected population in Spain is the high prevalence of hepatitis C coinfection.
- This research line covers four main topics of research in HIV infection: antiretroviral treatment, HIV-HCV coinfection, metabolic complications and HIV-resistance to antiretroviral drugs. In addition, we are planning to start another research project on infections other than HIV.
- The group has started a new research line regarding the aging and HIV Infection.
- Tropical diseases are increasing as a consequence of global travel. These diseases continue to be relatively rare however, and therefore, often sub-optimal treated if managed by non-specialists. Furthermore, every year an increasing amount of special travelers (pregnants, comorbidities, immunosuppressed) travel abroad, adding complexity in terms of a timely and effective diagnosis and management. The Tropical and Travel Medicine Unit provide both pre and posttravel assistance in imported infectious diseases. The aim of this Unit is to provide efficient and effective specialist care with proven or suspected tropical disease and a specific preventative travel advice, together with international vaccines recommended for the trip.

#### 3.3. Infectious Diseases and Immunity Area

#### RESEARCH LINES

- Antiretroviral therapy & resistance.
- Metabolic complications of antiretroviral therapy.
- Liver disease.
- Neurocognitive impairment.
- Paediatric HIV infection and MTCT.
- Epigenetic and cellular factors related to HIV progression
- Optimisation of antibiotic therapy (ID no HIV)
- Tropical diseases
- Emerging and re-emerging virus
- Molecular and cellular biomarkers of aging

#### RESEARCH ACTIVITY

##### Master Theses

- **Menéndez Calderón MJ.** El cambio de las enfermedades infecciosas: revisión leptospirosis 2016-2021 en un Hospital de segundo nivel [dissertation]. Barcelona: Universitat de Barcelona: 2023(01/06/2023). Director: Díaz Menéndez M
- **López Peláez MV.** Brote familiar de fiebre Q en ambiente urbano [dissertation]. Barcelona: Universitat de Barcelona: 2023(01/06/2023). Director: Díaz Menéndez M
- **Manrique Pérez JM.** Miocardiopatía en la enfermedad de Chagas arritmias y su manejo. [dissertation]. Barcelona: Universitat de Barcelona: 2023(01/06/2023). Director: Díaz Menéndez M.
- **Díaz Menéndez M.** Despistaje de Fiebre Hemorrágica de Crimea-Congo. Implementación del diagnóstico de infección protésica compleja. Manejo de PrEP e ITS. [dissertation]. Sevilla: Universidad de Sevilla: 2023(01/06/2023). Director: Díaz Menéndez M. no
- **Noblejas Mozo A.** Nocardiosis pulmonar en paciente inmunodeprimido tras inducción con rituximab por vasculitis [dissertation]. Barcelona: Universitat de Barcelona: 2023(28/06/2023). Director: Díaz Pollán B.
- **Carrasco Molina S.** Efectividad del tratamiento con Fidaxomicina vs Vancomicina en la Infección

por [dissertation]. Madrid: Universidad de Alcalá de Henares: 2023(11/05/2023). Director: Díaz Pollán B.

### 3.3. Infectious Diseases and Immunity Area

#### Cibers and Retics

- **Arribas López JR.** Centro de Investigación Biomédica en Red de Enfermedades Infecciosas (CIBERInfect). ISCIII. (31/12/2024). FIBHULP

#### Clinical trials

- **González García JJ.** Seguridad, tolerancia y actividad antirretroviral de dasatinib: estudio clínico piloto en pacientes con infección reciente por el vih-1.  
**Type/Phase:** II  
**Sponsored by:** Fundació De Recerca Clínic Barcelona-Institut D'Investigacions Biomèdiques August Pi I Sunyer (Fundació Clínic Per A La Recerca Biomedica)  
**Signed date:** 21/03/2023
- **de la Calle Prieto F.** Cohort study of human monkeypox virus disease.  
**Type/Phase:**  
**Sponsored by:** Agencia Nacional De Investigación Sobre El Sida Y Las Hepatitis Viricas (Inserm-Anrs)  
**Signed date:** 04/04/2023
- **Herranz Pinto P.** Estudio multicéntrico, aleatorizado, con doble enmascaramiento, controlado con placebo y con grupos paralelos para evaluar la eficacia y la seguridad de dupilumab en pacientes adultos con penfigoide ampuloso.  
**Type/Phase:** II  
**Sponsored by:** Regeneron Pharmaceuticals, Inc  
**Signed date:** 25/01/2023
- **Herranz Pinto P.** A phase 3, randomized, 24-week, placebo-controlled, double-blind study to assess the efficacy, safety and tolerability of rocatinlimab (amg 451) monotherapy in adult subjects with moderate-to-severe atopic dermatitis (ad) (rocket-horizon).  
**Type/Phase:** III  
**Sponsored by:** Amgen, Inc  
**Signed date:** 18/04/2023
- **Herranz Pinto P.** Estudio de fase III, aleatorizado, doble ciego, de 52 semanas de duración, controlado con placebo, multicéntrico para investigar la eficacia, seguridad y toler-

abilidad de ritlecitinib en participantes adultos y adolescentes con vitiligo no segmentario.

**Type/Phase:** III  
**Sponsored by:** Pfizer Inc  
**Signed date:** 07/07/2023

- **Arribas López JR.** A multicenter, adaptive, randomized, controlled trial platform to evaluate safety and efficacy of strategies and treatments for hospitalized patients with respiratory infections short title: strategies and treatments for respiratory infections & viral emergencies (strive).  
**Type/Phase:** Sponsored by: Regents Of The University Of Minnesota  
**Signed date:** 19/06/2023
- **González García JJ.** Estudio clínico de fase III, abierto, de doravirina/islatravir (dor/isl [100 mg/0,25 mg]) una vez al día para el tratamiento de la infección por el vih-1 en participantes que han recibido previamente dor/isl (100 mg/0,75 mg) una vez al día en un estudio clínico de fase iii.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 12/01/2023
- **Bernardino de la Serna JI.** Estudio clínico de fase 3, aleatorizado, doble ciego y controlado con producto activo para evaluar el cambio a doravirina/islatravir (dor/isl 100 mg/0,25 mg) una vez al día en participantes con vih-1 que presentan supresión virológica con bictegavir/emtricitabina/tenofovir alafenamida (bic/ftc/taf).  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 11/01/2023
- **Martín Carbonero L.** Estudio clínico de fase 3, abierto, aleatorizado y comparativo con tratamiento activo, para evaluar el cambio a doravirina/islatravir (dor/isl 100 mg/0,25 mg) una vez al día en participantes con vih-1 que presentan supresión virológica con el tratamiento antirretroviral.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 23/02/2023
- **Herranz Pinto P.** Estudio de fase 3b/4 aleatorizado, abierto, enmascarado para los evaluadores de la eficacia, para comparar la seguridad y la

eficacia enmascarada para los evaluadores de upadacitinib frente a dupilumab en pacientes con dermatitis atópica moderada o grave (level-up).

**Type/Phase:** IIIb  
**Sponsored by:** Abbvie Deutschland Gmbh & Co. Kg  
**Signed date:** 12/04/2023

- **Valencia Ortega E.** Estudio clínico de fase 3, aleatorizado, doble ciego y comparativo con tratamiento activo para evaluar la actividad antirretroviral, la seguridad y la tolerabilidad de doravirina/islatravir (dor/isl 100 mg/0,25 mg) una vez al día en participantes infectados por el vih-1 sin tratamiento previo.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 26/01/2023
- **de Miguel Buckley R.** Estudio neural. Desenlaces neurocognitivos en pacientes con malaria.  
**Type/Phase:** No EPA  
**Sponsored by:** International Society Of Travel Medicine (Istm)  
**Signed date:** 09/08/2023
- **De Miguel Buckley R.** presevere: predictores de infecciones graves y diagnóstico en viajeros e inmigrantes.  
**Type/Phase:** No EPA  
**Sponsored by:** International Society Of Travel Medicine (Istm)  
**Signed date:** 23/11/2023
- **Montes Ramírez ML.** Estudio piloto de fase IV, comparativo, aleatorizado y abierto para evaluar la eficacia y la seguridad de una pauta de tratamiento antirretroviral basada en rilpivirina en pacientes infectados por vih con enfermedad metabólica hepática que mantiene carga viral de vih indetectable.  
**Type/Phase:** IV  
**Sponsored by:** Fundacion Seimc-Gesida  
**Signed date:** 30/03/2023
- **González García JJ.** Estudio de fase IIB, aleatorizado, con doble enmascaramiento, de grupos paralelos para evaluar la eficacia, la seguridad, la tolerabilidad y el perfil de resistencia de gsk3640254 en combinación con dolutegravir en comparación con dolutegravir más lamivudina en adultos infectados por el vih-1 sin tratamiento previo.

**Type/Phase:** II  
**Sponsored by:** Glaxosmithkline Research And Development Limited  
**Signed date:** 04/01/2023

- **Herranz Pinto P.** A phase 2/3, multicenter, randomized, double-blind, placebo-controlled study evaluating the efficacy and safety of nipocalimab for the treatment of adult participants with moderate to severe bullous pemphigoid.  
**Type/Phase:** II  
**Sponsored by:** Janssen Cilag International Nv  
**Signed date:** 08/05/2023
- **Herranz Pinto P.** Estudio abierto, multinacional y multicéntrico para evaluar la seguridad, tolerabilidad y eficacia a largo plazo de amlitelimab por vía subcutánea en adultos con dermatitis atópica de moderada a grave.  
**Type/Phase:** II  
**Sponsored by:** Sanofi-Aventis Recherche & Development  
**Signed date:** 31/05/2023
- **Herranz Pinto P.** A phase 3, multicenter, double-blind maintenance study to assess long-term safety, tolerability, and efficacy of rocatinlimab in adult and adolescent subjects with moderate-to-severe atopic dermatitis (ad) (rocket-ascend).  
**Type/Phase:** III  
**Sponsored by:** Amgen, Inc  
**Signed date:** 11/07/2023
- **Herranz Pinto P.** Estudio de fase III, abierto, multicéntrico, a largo plazo, para investigar la seguridad y la eficacia de pf 06651600 en participantes adultos y adolescentes con alopecia areata.  
**Type/Phase:** III  
**Sponsored by:** Pfizer S.L.U.  
**Signed date:** 23/01/2023
- **Herranz Pinto P.** Estudio aleatorizado, doble ciego, controlado con placebo, de prueba de concepto que evalúa la eficacia y seguridad de una molécula anti-tnf-ox40l nanobody®, sar442970, en pacientes con hidradenitis supurativa de moderada a severa.  
**Type/Phase:** II  
**Sponsored by:** Sanofi-Aventis Recherche & Development  
**Signed date:** 14/03/2023

### 3.3. Infectious Diseases and Immunity Area

- Herranz Pinto P.** Estudio de extensión abierto, multicéntrico, para evaluar la eficacia y seguridad a largo plazo de ctp-543 en pacientes adultos con alopecia areata de moderada a grave.  
**Type/Phase:** III  
**Sponsored by:** Concert Pharmaceuticals, Inc  
**Signed date:** 09/02/2023
- González García JJ.** Estudio clínico de fase 3, aleatorizado, doble ciego y controlado con producto activo para evaluar el cambio a doravirina/islatravir (dor/isl) una vez al día en participantes con supresión virológica del vih-1 con bictegravir/emtricitabina/tenofovir alafenamida (bic/ftc/taf).  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dhome Corp.  
**Signed date:** 08/02/2023
- Arribas López JR.** Estudio de fase 3, aleatorizado, doble ciego, controlado con placebo, para evaluar la eficacia y la seguridad de ad26.cov2.s para la prevención de covid-19 mediada por sars-cov-2 en adultos mayores de 18 años.  
**Type/Phase:** III  
**Sponsored by:** Janssen Cilag International Nv  
**Signed date:** 17/03/2023
- Ramos Ramos JC.** ARISE - estudio multicéntrico, aleatorizado, doble ciego, controlado con placebo y con tratamiento activo para validar los instrumentos de medida de resultados notificados por el paciente, en pacientes adultos, con infección pulmonar por micobacterias no tuberculosas (mnt) de nuevo diagnóstico causada por el complejo mycobacterium avium (mac).  
**Type/Phase:** III  
**Sponsored by:** Insmad Incorporated  
**Signed date:** 09/03/2023
- Ramos Ramos JC.** ENCORE - estudio multicéntrico, aleatorizado, doble ciego, controlado con placebo y con tratamiento activo para evaluar la eficacia y seguridad de un régimen basado en la suspensión para inhalación de liposomas de amikacina (alis) en pacientes adultos con infección pulmonar por micobacterias no tuberculosas (mnt) de nuevo diagnóstico causada por el complejo mycobacterium avium (mac).  
**Type/Phase:** III  
**Sponsored by:** Insmad Incorporated  
**Signed date:** 09/03/2023
- Herranz Pinto P.** Estudio observacional para identificar las características clínicas, metodología diagnóstica, abordaje terapéutico y la comorbilidad vinculada al prurigo nodular en la práctica clínica.  
**Type/Phase:** No EPA  
**Sponsored by:** Laboratorios Galderma, S.A.  
**Signed date:** 05/06/2023
- Valencia Ortega E.** Estudio clínico de fase 3, aleatorizado, doble ciego y comparativo con tratamiento activo para evaluar la actividad antirretroviral, la seguridad y la tolerabilidad de doravirina/islatravir una vez al día en participantes infectados por el vih-1 sin tratamiento previo.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dhome Corp.  
**Signed date:** 23/03/2023
- Arribas López JR.** Epigenetic biomarkers of biological age as predictors of aids, non-aids events, and diseases characteristics of aging in persons with hiv.  
**Type/Phase:** OTROS  
**Sponsored by:** Fundacion Para La Investigacion Biomedica Hospital Universitario La Paz  
**Signed date:** 05/06/2023
- Herranz Pinto P.** Ensayo fase 2b, aleatorizado, doble ciego, controlado con placebo, multicéntrico, de grupos paralelos y de búsqueda de dosis para evaluar la eficacia y la seguridad de diferentes dosis de leo 138559 administrado por vía subcutánea en sujetos adultos con dermatitis atópica (da) de moderada a grave.  
**Type/Phase:** IIb  
**Sponsored by:** Leo Pharma A/S  
**Signed date:** 26/10/2023
- Arribas López JR.** A multicenter, adaptive, randomized, controlled trial platform to evaluate safety and efficacy of strategies and treatments for hospitalized patients with respiratory infections.  
**Type/Phase:**  
**Sponsored by:**  
**Signed date:** 04/12/2023
- Martín Carbonero L.** Estudio de fase 3 aleatorizado y doble ciego para evaluar la seguridad y la eficacia de una combinación de dosis fija de bictegravir/emtricitabina/tenofovir alafenamida frente a dolutegravir + emtricitabina/fumarato de disoproxilo de tenofovir en adultos no tratados anteriormente coinfectados por el vih-1 y el virus de la hepatitis b.  
**Type/Phase:** III  
**Sponsored by:** Gilead Sciences Inc  
**Signed date:** 25/05/2023
- Díaz Pollán B.** Estudio en fase III, aleatorizado, doble ciego, controlado con placebo y multicéntrico para evaluar la eficacia, la seguridad y la inmunogenicidad de la vacunación con espec9v en la prevención de la enfermedad por escherichia coli patógena extrainestinal invasiva en adultos de 60 años de edad en adelante con antecedentes de infección urinaria en los últimos 2 años.  
**Type/Phase:** III  
**Sponsored by:** Janssen Research & Development, Llc  
**Signed date:** 16/08/2023
- González García JJ.** Estudio fase 2a, aleatorizado, doble ciego (abierto para el promotor), controlado con placebo, para investigar el efecto antiviral, la seguridad, la tolerabilidad y la farmacocinética de la administración oral en monoterapia de un inhibidor de la cápsida en adultos con infección por vih-1 sin tratamiento previo.  
**Type/Phase:** II  
**Sponsored by:** Viiv Healthcare Uk Limited  
**Signed date:** 23/11/2023
- González García JJ.** Estudio de fase IIIB, abierto, multicéntrico, aleatorizado, de grupos paralelos y de no inferioridad para evaluar la eficacia, la seguridad y la tolerabilidad de la combinación de dolutegravir/lamivudina administrada por vía oral una vez al día como tratamiento de primera línea, en comparación con la combinación de bictegravir/emtricitabina/tenofovir alafenamida administrada por vía oral una vez al día, para la inhibición y el mantenimiento virológico en adultos con vih sin tratamiento antirretroviral previo.  
**Type/Phase:** IIIb  
**Sponsored by:** Viiv Healthcare Uk Limited  
**Signed date:** 14/11/2023
- Valencia Ortega E.** Estudio clínico de fase 3, aleatorizado, doble ciego y comparativo con tratamiento activo para evaluar la actividad antirretroviral, la seguridad y la tolerabilidad de doravirina/islatravir una vez al día en participantes infectados por el vih-1 sin tratamiento previo.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dhome Corp.  
**Signed date:** 09/08/2023
- Arribas López JR.** Momento estratégico para inicio de la terapia antirretroviral.  
**Type/Phase:** III  
**Sponsored by:** Regents Of The University Of Minnesota  
**Signed date:** 12/07/2023
- Bernardino de la Serna, José Ignacio.** estudio de fase 2/3, operativamente sin interrupciones, aleatorizado, abierto, multicéntrico y con control activo para evaluar la seguridad y la eficacia de bictegravir/lenacapavir en comparación con un régimen de referencia estable en personas con vih-1 en supresión virológica que reciben pautas de tratamiento complejas estables.  
**Type/Phase:** II  
**Sponsored by:** Gilead Sciences Inc  
**Signed date:** 21/11/2023
- González García JJ.** Estudio fase III, aleatorizado, multicéntrico, abierto, de grupos paralelos, para evaluar la eficacia, seguridad y tolerabilidad de una pauta de tratamiento intramuscular de acción prolongada con cabotegravir y rilpivirina en el mantenimiento de la supresión virológica, tras una inducción con un tratamiento de comprimido único con un inhibidor de la integrasa en pacientes adultos infectados por el vih-1 que no han recibido un tratamiento antirretroviral previo.  
**Type/Phase:** III  
**Sponsored by:** Laboratorios Viiv Healthcare, S.L.  
**Signed date:** 04/12/2023

### STRATEGIC OBJETIVES

- The Molecular Microbiology research group is integrated into the Department of Microbiology at Hospital La Paz, and a significant number of its members are physicians in the department devoted to microbiological diagnostic work. This integration determines the group's strategic approach and therefore, the different lines of research revolve around several aspects of clinical microbiology and infectious diseases.
- An important line of activity (Clinical Microbiology) is the result of the routine activities provided by the department, but goes further and deeper into the methodological, epidemiological and pathological challenges encountered in the daily routine.
- One research line derived from the former is the development of methods for the molecular characterization of pathogenic microorganisms, including microbiological diagnosis and epidemiological analysis, and more recently, microbial genomics.
- Another line focuses on the study of the evolution of pathogenic microorganisms. As a model of opportunistic pathogens, we study *Escherichia coli*, a microorganism that is well characterised at the genetic level and that is clinically relevant as the primary cause of urinary tract infections and one of the most frequently involved in bacteraemia.
- Another important focus, given the scarcity of new antibiotics, is the search for new molecules. In this line, we use molecular dynamics to search for new metallo-beta-lactamase inhibitors.
- Several group members belong to the Faculty of Medicine and they have a long research record in the Molecular Biology and Pathogenesis of *Mycobacterium tuberculosis* and other mycobacteria.

#### RESEARCH LINES

- Molecular epidemiology and evolution of pathogens
- Molecular methods for diagnostics of infectious diseases
- Genomics of hospital microbial pathogens
- Design of new inhibitors of metallo-beta-lactamases by molecular dynamics
- Molecular Biology and Pathogenesis of Mycobacterium tuberculosis

#### RESEARCH ACTIVITY

##### Master Theses

- **Martín Portugués S.** Desarrollo de un protocolo de tipificación rápida por MLST, para aislados clínicos de *Escherichia coli* y *Staphylococcus aureus*, utilizando la secuenciación masiva por MinION [dissertation]. *Madrid: UAM: 2023(14/09/2023). Director: Dahdouh E.*
- **Tello Durán B.** Interacción entre miRNAs, microbiota intestinal y marcadores de inflamación: Caracterización y desarrollo de un pipeline para su aplicación en muestras humanas [dissertation]. *Madrid: UE: 2023(01/11/2023). Director: González Soltero R.*

##### Final Degree Theses

- **Merino González S.** Selección por antibióticos de mutantes de porinas en enterobacterias [dissertation]. *Madrid: UAM: 2023(30/06/2023). Director: Mingorance Cruz J.*
- **Muñoz García M.** El papel de la dieta en el Síndrome del Intestino Irritable [dissertation]. *Madrid: UAM: 2023(28/05/2023). Director: Menéndez Gómez C.*
- **Redondo Lois L.** Implicaciones del SIBO en la absorción de nutrientes [dissertation]. *Madrid: UAM: 2023(28/05/2023). Director: Menéndez Gómez C.*

#### STRATEGIC OBJETIVES

- Our objective is to investigate the pathogenesis and evolution of rheumatic diseases, specifically focusing on imaging, genetics, metabolic pathways and immunopathogenesis.

#### RESEARCH LINES

- Immunopathogenesis, genetic, evolution, prognosis and biomarkers of inflammatory and autoimmune arthritis
- Imaging of inflammatory and autoimmune arthritis
- Immunopathogenesis and genetics of osteoporosis
- Immunogenicity of biological therapies with monoclonal antibodies
- Immunopathogenesis, evolution, prognosis and biomarkers of ocular inflammatory pathology
- Classification and Clinical outcomes of patients with inflammatory and autoimmune arthritis

#### RESEARCH ACTIVITY

*Type/Phase: II*  
*Sponsored by: Sanofi Aventis S.A*  
*Signed date: 30/10/2023*
- **Balsa Criado A.** Estudio de fase II, multicéntrico, aleatorizado, doble ciego, controlado con placebo y de búsqueda de dosis con gsk385827 en participantes adultos con dolor de moderado a grave debido a artrosis de rodilla (mars-17).  
*Type/Phase: II*  
*Sponsored by: Glaxosmithkline Research And Development Limited*  
*Signed date: 11/10/2023*
- **Balsa Criado A.** Estudio de fase III, aleatorizado, doble ciego, controlado con placebo para demostrar la eficacia y la seguridad de tildrakizumab en sujetos con artritis psoriásica activa i que habían recibido tratamiento previo con anti-tnf (inspire 1).  
*Type/Phase: III*  
*Sponsored by: Sun Pharmaceutical Industries, Ltd*  
*Signed date: 13/07/2023*
- **Balsa Criado A.** Estudio de fase III, aleatorizado, doble ciego, controlado con placebo para demostrar la eficacia y la seguridad de tildrakizumab en sujetos con artritis psoriásica activa ii que no habían recibido tratamiento previo con anti-tnf (inspire 2).  
*Type/Phase: III*  
*Sponsored by: Sun Pharmaceutical Industries, Ltd*  
*Signed date: 24/07/2023*
- **Balsa Criado A.** Estudio en fase III, de 1 grupo, multicéntrico y sin enmascaramiento, de extensión del estudio argx-113-2007 para investigar la seguridad, la tolerabilidad y la eficacia a largo plazo del efgartigimod ph20 s.c. en participantes de 18 años o más con miopatía inflamatoria idiopática activa.

### 3.3. Infectious Diseases and Immunity Area

**Type/Phase:** III

**Sponsored by:** Argenx Bv (Argenx Bvba)

**Signed date:** 23/06/2023

- **Balsa Criado A.** Estudio fase 3, aleatorizado, doble ciego y controlado con placebo para evaluar la eficacia y la seguridad del deucravacitinib en pacientes con artritis psoriásica activa naïve a medicamentos biológicos antirreumáticos modificadores de la enfermedad".

**Type/Phase:** III

**Sponsored by:** Bristol-Myers Squibb International Corporation (Bmsic)

**Signed date:** 30/10/2023

- **Balsa Criado A.** Hacia la telemonitorización en enfermedades inflamatorias inmunomediadas: implementación de un modelo asistencial mixto (mam) en una unidad de terapias complejas..

**Type/Phase:** No EPA

**Sponsored by:** Fundacion Para La Investigacion Biomedica Hospital Universitario La Paz

**Signed date:** 05/09/2023

- **Balsa Criado A.** Multicentre, randomized, open-label study to prove an additional benefit of the full-spectrum cannabis extract ver-01 over opioids in the treatment of patients with chronic non-specific low back pain.

**Type/Phase:** III

**Sponsored by:** Vertanical GmbH

**Signed date:** 28/07/2023

- **Balsa Criado A.** Programa en fase III aleatorizado, comparativo con placebo, doble ciego y con grupos paralelos para evaluar la eficacia y la seguridad de filgotinib en participantes adultos con espondiloartritis axial activa.

**Type/Phase:** III

**Sponsored by:** Galapagos Nv

**Signed date:** 28/02/2023

- **Balsa Criado A.** Uso de ixekizumab como tratamiento para la espondiloartritis axial en la práctica clínica en España.

**Type/Phase:** EPA-OD

**Sponsored by:** Lilly, S.A.

**Signed date:** 08/11/2023

- **Bonilla Hernán MG.** Criterios de cribado de enfermedad pulmonar intersticial difusa en pacientes con artritis reumatoide. estudio de validez.

**Type/Phase:** OTROS

**Sponsored by:** Fundacion Española De Reumatologia

**Signed date:** 07/12/2023

- **De Miguel Mendieta E.** Ensayo de fase 3, multicéntrico, aleatorizado, doble ciego, controlado con placebo y de grupos paralelos para investigar la eficacia y la seguridad de secukinumab 300 mg administrado por vía subcutánea frente a placebo, en combinación con una pauta con reducción gradual de la dosis de glucocorticoides, en pacientes con arteritis de células gigantes (acg).

**Type/Phase:** III

**Sponsored by:** Novartis Farmaceutica, S.A.

**Signed date:** 03/01/2023

- **De Miguel Mendieta E.** Ensayo de fase 3, multicéntrico, aleatorizado, doble ciego, controlado con placebo y de grupos paralelos para investigar la eficacia y la seguridad de secukinumab 300 mg administrado por vía subcutánea frente a placebo, en combinación con una pauta con reducción gradual de la dosis de glucocorticoides, en pacientes con arteritis de células gigantes (acg).

**Type/Phase:** III

**Sponsored by:** Novartis Farmaceutica, S.A.

**Signed date:** 10/08/2023

- **De Miguel Mendieta E.** Ensayo de fase III, multicéntrico, aleatorizado, doble ciego, controlado con placebo y de grupos paralelos en el que se evalúan la eficacia y la seguridad de secukinumab administrado por vía subcutánea frente a placebo, en combinación con una pauta con reducción gradual de la dosis de glucocorticoides, en pacientes con polimialgia reumática (pmr).

**Type/Phase:** III

**Sponsored by:** Novartis Farmaceutica, S.A.

**Signed date:** 22/02/2023

- **De Miguel Mendieta E.** Estudio en fase III, aleatorizado, multirregional, doble ciego, de doble simulación, de grupos paralelos y controlado con placebo y alopurinol para evaluar la eficacia y la seguridad de tigulixostat en pacientes que padecen gota e hiperuricemia.

**Type/Phase:** III

**Sponsored by:** Lg Chem Ltd

**Signed date:** 10/11/2023

- **Navarro Compán MV.** Cohorte de inicio para la clasificación de espondiloartritis axial.

**Type/Phase:** No EPA

**Sponsored by:** Fundacion Para La Investigacion Biomedica De Cordoba Fibico

**Signed date:** 02/03/2023

- **Plasencia Rodríguez C.** Registro español de acontecimientos adversos de terapias biológicas y biosimilares en enfermedades reumáticas (fase iii).

**Type/Phase:** EPA-AS

**Sponsored by:** Fundacion Española De Reumatologia

**Signed date:** 18/04/2023

### 3.3.4 Innate Immune Response Group

Publications: 28 | Q1:22

#### COMPOSITION

##### Eduardo López-Collazo

Investigador Senior (Contrato Miguel Servet - I2). Jefe de Laboratorio. FIBHULP. Subdirector Científico

##### Carlos del Fresno Sánchez

Investigador Postdoctoral (Contrato Miguel Servet - Tipo I). FIBHULP

- **Susana Alemany de la Peña.** Investigadora Senior. Jefe de Laboratorio. IIB "Alberto Sols"
- **Daniel Arvelo del Rosario.** Investigador Predoctoral. FIBHULP
- **Gülce Bicakcioglu.** Técnico Grado Superior. FIBHULP
- **Gloria Cristina Bonel Pérez.** Ayudante de investigación. FIBHULP
- **Lisardo Boscá Gomar.** Investigador Senior. Jefe de Laboratorio. IIB "Alberto Sols"
- **Antonio Castrillo Viguera.** Investigador Senior. Jefe de Laboratorio. IIB "Alberto Sols"
- **Luna Ridan Cordeiro Minute.** Investigadora Sara Borrel. FIBHULP
- **Laura Córdoba García.** Responsable HUB - Organoides. FIBHULP
- **Francisco Javier Cueto Rodríguez.** Investigador Senior. FIBHULP
- **Álvaro del Balzo Castillo.** Enfermero: HULP
- **Julia del Prado Montero.** Investigadora Predoctoral. FIBHULP
- **Jesús Fernández Felipe.** Investigador Postdoctoral. FIBHULP
- **Olivia Fernández Molina.** Ayudante de Investigación. FIBHULP
- **Jaime Fernández Pascual.** Técnico Anatomía Patológica. FIBHULP
- **Laura Gómez Lage.** Enfermera. Hospital Universitario La Paz

- **Santiago Gómez Ruiz.** Profesor Titular. Universidad Rey Juan Carlos
- **María Susana Guerra García.** Investigadora Postdoctoral. Universidad Autónoma de Madrid
- **Kilián Jesús Gutiérrez Viñas.** Responsable de laboratorio de Citometría de Flujo. FIBHULP
- **Laura Hurtado Navarro.** Investigadora Predoctoral. FIBHULP
- **Roberto Lozano Rodríguez.** Investigador Predoctoral. FIBHULP
- **Cristina de Manuel Gómez.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Charbel Antonio Maroun Eid.** Facultativo Especialista de Área en Urgencias. Hospital del Norte
- **Pablo Mata Martínez.** Investigador Predoctoral. FIBHULP
- **Elena Muñoz del Val.** Facultativo especialista de área en Medicina Familiar y Comunitaria. Hospital Universitario La Paz
- **Alejandro Pascual Iglesias.** Bioinformático. FIBHULP
- **Rebeca Pérez de Diego.** Investigadora Senior (Contrato Ramón y Cajal). FIBHULP
- **Sanjiv Prashar.** Profesor Titular. Universidad Rey Juan Carlos
- **Marta Roche Molina.** Investigadora Postdoctoral. FIBHULP
- **Gonzalo Saénz de Santamaría Díez.** Investigador Predoctoral. FIBHULP
- **Verónica Terrón Arcos.** Técnico de Laboratorio. FIBHULP
- **Jaime Valentín Quiroga.** Investigador Predoctoral. FIBHULP

#### STRATEGIC OBJETIVES

- This group focuses on the study of the reprogramming of the immune response in the context of inflammatory diseases (e.g., sepsis, cystic fibrosis, lung and colon cancer) using the description of the various molecular mechanisms that underlie the reprogramming of monocytes/macrophages.

#### RESEARCH LINES

- Molecular and cellular mechanisms of sepsis.
- Evolution markers an molecular/cellular basis of Long Covid19.
- Evolution and prognostic markers in infectious (sepsis and COVID-19) and tumour (lung, breast, colorectal) diseases.
- Molecular and cellular mechanisms of metastasis (lung, breast and colorectal).
- Immunomodulation in various clinical contexts (infectious diseases, tumours, cystic fibrosis, etc.).
- Immunophenotyping and immune response to vaccines (HIV, tumours, etc.).

#### RESEARCH ACTIVITY

##### Master Theses

- **Bravo Robles L.** Inmunoterapia oncológica a través de mucosas basada en la memoria inmune innata [dissertation]. *Madrid: UCM: 2023(26/06/2023). Director: del Fresno Sánchez C.*
- **Ochaita Aguado A.** Impacto de la quimioterapia en el paisaje inmunológico del cáncer [dissertation]. *Madrid: UCM: 2023(06/07/2023). Director: López-Collazo E; Cueto Rodríguez EJ.*
- **Cueto Rodríguez EJ.** Búsqueda de marcadores inmunitarios predictivos en pacientes con sepsis [dissertation]. *Granada: Universidad de Granada: 2023(17/07/2023). Director: López Collazo E.*

##### Final Degree Theses

- **Zapata G.** Caracterización inmunológica de la respuesta a crioblación en pacientes con cáncer de mama [dissertation]. *Madrid: UAH: 2023(01/06/2023). Director: del Fresno Sánchez C.*
- **Gutiérrez M.** Estudio de células híbridas humanas resultado de la fusión entre monocitos y células madre tumorales derivadas de adenocarcinoma de colon [dissertation]. *Madrid: Universidad Politécnica de Madrid: 2023(24/07/2023). Director: López Collazo E.*

### 3.3.5 Complement Defects in Human Pathology

Publications: 9 | Q1:7

#### COMPOSITION

##### Margarita López Trascasa

Investigadora "Ad honorem". IdiPAZ. Profesora de la Facultad de Medicina. Universidad Autónoma de Madrid

##### Pilar Sánchez Corral Gómez

Investigadora Senior (Contrato Miguel Servet-12). Jefe de Laboratorio. Hospital Universitario La Paz

- **Fernando Corvillo Rodríguez.** Investigador postdoctoral. Hospital Universitario La Paz
- **Laura Espinosa Román.** Jefa de Servicio Nefrología Pediátrica. Hospital Universitario La Paz
- **María del Rosario García Sánchez.** Investigadora predoctoral. FIBHULP
- **Laura González Sánchez.** Investigadora postdoctoral. Hospital Universitario La Paz
- **Alberto López Lera.** Investigador Postdoctoral. Contratado CIBERER. Hospital Universitario La Paz
- **Marta Melgosa Hijosa.** Facultativo Especialista de Área en Nefrología Infantil. Hospital Universitario La Paz
- **Pilar Nozal Aranda.** Facultativo Especialista de Área en Inmunología. Investigadora Postdoctoral. Hospital Universitario La Paz

#### STRATEGIC OBJETIVES

- This is a national reference group for the study of primary or acquired defects in the complement system.
- The main aim is to gain an understanding of the molecular mechanisms underlying in complement deficiency or dysregulation in several human diseases, the majority of which are classified as rare diseases.
- In this context, the group implements and applies various methodological strategies (immunological, biochemical, proteomic and genetic) to detect clinically relevant deficiencies or functional defects in complement components. By following a clearly translational approach, the group also develops new diagnostic tests which are implemented in the clinical practice, especially for treatment adjustment and patient follow-up.
- The research lines could be classified as: screening and characterization of genetic or acquired complement defects that cause renal pathology (I), functional and molecular diagnosis of deficiencies affecting individual components of the complement system (II), diagnosis and molecular studies in Hereditary Angioedema and screening for disease modifying genes (III), study of pathogenic mechanisms in acquired lipodystrophies (IV).

#### RESEARCH LINES

- Screening and characterization of genetic and acquired Complement defects in renal disease.
- Biochemical and molecular diagnosis of isolated Complement deficiencies.
- Biochemical and molecular diagnosis of Hereditary and Acquired forms of bradykinin-mediated Angioedema.
- Pathogenic mechanisms of acquired lipodystrophies: Barraquer-Simons syndrome, and Lawrence syndrome.
- Complement defects in Age Related Macular Degeneration

#### STRATEGIC OBJETIVES

- Our group attempts to unravel the molecular bases of primary immunodeficiencies (PIDs), a large group of rare conditions (more than 400 types described so far) that virtually affect any cell type of the immune system and increase the risk of infections, autoimmunity and cancer in patients. We take a multidisciplinary clinical, anatomic, genetic, epigenetic and functional approach. By correlating clinical and experimental data, we aim to achieve a better understanding of these rare diseases and lay the grounds for, repurposed or new, more effective treatments.
- Taking advantage of the knowledge and resources developed to dissect the immune system in PIDs, we are developing new schemes for immune monitoring of transplanted patients, to better estimate immunosuppression and tolerance, and early detection of severe complications as infections and rejection. Finally, we explore novel approaches for monitoring, and fine tuning of immunotherapies

#### RESEARCH LINES

- To define the anatomical, cellular, molecular and (epi)genetic bases of immunological dysfunction in patients diagnosed with primary immunodeficiency in our clinic.
- The maturation and functional specialization of human B lymphocytes, and its pathophysiology in primary and secondary antibody immunodeficiencies.
- The analysis of the immunological reconstitution after haemopoietic stem cell transplantation, and the discovery and clinical validation of immunological biomarkers for immunosuppression and tolerance in solid organ transplantation.
- The development and clinical implementation of patient-tailored monitoring schemes of immunotherapies in wide clinical use.

### 3.3.7 Drug Hypersensitivity and Innate Immune Response Group

Publications: 12 | Q1: 9

#### COMPOSITION

**Teresa Bellón Heredia.**

Investigadora Senior (Contrato Miguel Servet -I2). Jefe de laboratorio. FIBHULP

- **María del Rosario Cabañas Moreno.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **Sofía Caiqin Linares Reyes.** Investigadora Predoctoral. FIBHULP
- **Celia Martínez Prieto.** Técnico de Grado Superior. Hospital Universitario La Paz
- **Beatriz Sanz Minguela.** Técnico de Grado Superior. Hospital Universitario La Paz
- **Guillermo Servera Negre.** Facultativo Especialista en Dermatología Médico-Quirúrgica y Venereología. Hospital Universitario La Paz

#### STRATEGIC OBJETIVES

- Cutaneous adverse drug reactions are unpredictable and represent a plethora of skin diseases with various degrees of severity. The spectrum ranges from mild to potentially fatal multisystem maladies. Those of most concern are usually referred to as severe cutaneous adverse reactions (SCARs), and include acute generalized exanthematous pustulosis (AGEP), drug reaction with eosinophilia and systemic symptoms (DRESS), also known as drug induced hypersensitivity syndrome or hypersensitivity síndrome (DIHS/HSS), Stevens-Johnson's syndrome (SJS), and toxic epidermal necrolysis (TEN). Among them, SJS and TEN are the most severe clinical entities and are nowadays considered as variants of the same disease characterized by keratinocyte necrosis and epidermal detachment with the formation of subepidermal bullae. From the immunopathogenic point of view, SCARs are T-cell mediated type IV hypersensitivity reactions. However, T cells can orchestrate different types of immune responses and this functional heterogeneity has led to a further sub-classification into type IVa-IVd hypersensitivity that considers the distinct cytokine production pattern by T cell subpopulations, and emphasizes the participation of different effector cells causing inflammation and tissue damage. Current knowledge supports the active participation of cytotoxic lymphocytes in different clinical entities.
- Our project aims to a better understanding of the immune mechanisms underlying the etiopathogenesis of these diseases. The study is performed in the framework of the consortium PIELenRed (Plataforma interdisciplinar para el estudio de reacciones cutáneas graves en red) integrated by researchers belonging to different hospitals in Madrid.
- Reactivation of latent herpesvirus has been described during the development of some of the previously mentioned clinical entities. In order to improve our understanding of the behaviour of the immune system during viral replication, collaboration has been established with the Kidney Transplant Unit (Nephrology Service, HULP). Kidney transplant recipients are being followed immediately before and after transplant in order to identify patients with active CMV replication.
- General objectives for the next 5 years
- The main objectives are:
  - I. Biobanking of samples of severe cutaneous adverse reactions to medications (DRESS, AGEp and SJS/TEN) associated to the registry PIELenRed, and integrated in the international registry RegiSCAR.
  - II. To investigate in vitro test for drug causality assessment.
  - III. To explore the involvement of the innate immune response (in particular natural cytotoxic activity) during the development of SCARs.
  - IV. Identification of biomarkers of susceptibility.
  - V. To find biomarkers for disease and response to treatments.
  - VI. To explore the potential of microRNAs in SJS/TEN as biomarkers of disease and of response to treatments, as well as their relationship with pathogenic mechanisms.

#### RESEARCH LINES

- Biobanking of biological samples from patients with severe cutaneous adverse reactions to medications (DRESS, AGEP and SJS/TEN).
- Development and evaluation of in vitro tests for drug causality assessment.
- Identification of biomarkers of susceptibility.
- Involvement of NK receptors in the etiopathogenesis of Stevens-Johnson syndrome /Toxic epidermal necrolysis (SJS/TEN).
- Differential analysis of the cytokine pattern involved in different SCARs (AGEP, DRESS and SJS/TEN).
- Analysis of miRNAs as biomarkers of disease and response to treatments.

### 3.3.8 Immunomediante Gastrointestinal Diseases and other Digestive Pathologies Group

#### STRATEGIC OBJETIVES

- Our work focuses on diseases of the Digestive System with special dedication to Inflammatory Bowel Disease (IBD) and other immune-mediated diseases.
- The group is formed by gastroenterologists, biologists, pharmacists and nurses; all of them are part of a multidisciplinary working group.
- In addition to promoting our own research projects in our area, we participate in numerous clinical trials of molecules in development.
- Our objectives are to optimize existing treatments, promote measures to improve the quality of life and translational research in search of precision medicine, incorporating new technologies to the management of our patients.

#### RESEARCH LINES

- Correlation of drug levels with therapeutic response
- Intestinal ultrasound
- Dysplasia detection techniques in IBD
- Hypercoagulability studies in IBD
- Immunological basis of inflammatory bowel disease: changes in cellular and inflammatory mediator expression with different therapies.

#### RESEARCH ACTIVITY

### 3.3.9 MicroRNA Regulation of Immune Tolerance, Autoimmunity and Cancer Group

#### COMPOSITION

##### Alicia González Martín.

Investigadora Ramón y Cajal. Universidad Autónoma de Madrid

- **Rocío Bartolomé Cabrero.** Investigadora Predoctoral. Universidad Autónoma de Madrid
- **María del Pilar González Molina.** Investigadora Predoctoral. Universidad Autónoma de Madrid

- **Laura Gámez Reche.** Investigador Predoctoral. Universidad Autónoma de Madrid
- **Laura Mañas Cordero.** Técnico de Investigación. Universidad Autónoma de Madrid
- **Eleftheria Papaioannou.** Investigadora Juan de la Cierva. Universidad Autónoma de Madrid
- **Ana María Prieto Muñoz.** Técnico de Investigación. Universidad Autónoma de Madrid
- **Javier Sanz Gallardo.** Investigador Predoctoral. Universidad Autónoma de Madrid

#### STRATEGIC OBJETIVES

- Our laboratory is interested in understanding the cellular and molecular mechanisms of immune tolerance, autoimmunity and cancer. Specifically, we focus on studying how microRNAs (miRNAs) and their target genes regulate immune tolerance, autoimmune diseases and antitumor immunity. In addition, we are actively developing innovative genome engineering strategies for therapeutic purposes.
- MicroRNAs have recently emerged as important factors in the post-transcriptional control of protein concentrations in metazoan organisms. For the past few years, we studied the functions of miRNAs in the mammalian immune system. We identified the first miRNA that regulates B cell tolerance and established its causative role in the development of lethal autoimmunity (González-Martín et al, *Nature Immunology*, 2016 Apr; 17: 433-40). We also discovered critical roles for other microRNAs in different immune tolerance mechanisms and autoimmune diseases (González-Martín and Lai et al, *Nature Communications*, 2016 Aug 2; 7:12207, Ichiyama et al, *Immunity*, 2016 Jun 21; 44:1284-98 and Liu et al, *Journal of Experimental Medicine*, Aug 22; 213:1901-19). In addition, we developed the first B cell receptor reprogramming strategy using the latest genome editing technologies (*Elife*, 2019 Jan 17; 8). Previously, work on tumor immunology established an important role for the chemokine receptor CCR5 in T cell antitumor responses (González-Martín et al, *Cancer Research*, 2011 Aug 15; 71:5455-66). Overall, our studies have established miRNAs as critical regulators of immune tolerance and autoimmunity, and revealed new mechanisms controlling antitumor immunity.
- Current research in the laboratory continues to identify and study the roles of miRNAs and their target genes in immune tolerance, autoimmunity and tumor immunology by combining genetic, genomic, biochemical, and functional screen approaches to understand the functions and molecular mechanisms of miRNA control at molecular, cellular, and system levels. The mechanisms identified might provide valuable biomarkers or therapeutic targets for the treatment of autoimmune diseases and for cancer immunotherapy.

#### RESEARCH LINES

- Identification of miRNAs and target genes that regulate B lymphocyte tolerance and study of their potential role in the development and progression of autoimmune diseases, with the aim of identifying new therapeutic targets for the treatment of these diseases.
- Identification of new therapeutic targets to improve the efficacy of cancer immunotherapy.
- B-lymphocyte genome engineering for the development of cellular vaccines.

#### RESEARCH ACTIVITY

##### Final Degree Theses

- **Villadangos Reyes L.** Regulation of B cell activation by microRNAs[dissertation]. *Madrid: UAM: 2023(29/05/2023). Director: González Martín A.*

#### 3.4 Large System Pathologies Area

Strategic Objectives	Development forecast for the coming years:	Actions
<p>Large System Pathologies Area includes 16 research groups that focus their interest on the study of pathogenic mechanisms and therapeutic options in some of the most prevalent diseases in our environment: respiratory, allergological, renal, digestive, gynaecological, and ophthalmological and paediatric, both in stable phase and at different levels of severity. In addition, we maintain interest in their involvement in the different phases of development, analyzing both the neonatal phase and old age.</p>	<p>Redefinition of the area with a more transversal character. Although this proposal requires a greater elaboration and consensus of all the groups in the area, the reformulation of the area is proposed as a new one focused, for example, on inflammation and hypoxia.</p>	<p>Conduct seminars and coordination meetings among groups of different areas</p>
	<p>Incorporation of related groups from other areas (immunorheumatology, hepatology, among others) and consolidation of some emerging groups.</p>	<p>Promote work and synergies with other research groups of the institute with a deeper trajectory</p>
	<p>To ensure that 50% of the publications are in the first quartile of each thematic area.</p>	<p>Improve the annual number of publications in the first quartile</p>
	<p>To promote intramural collaborations between groups.</p>	<p>Promote work and synergies with other research groups of the institute with a deeper trajectory.</p>

### STRATEGIC OBJETIVES

- The current lines of research in the Group are multiple and are in constant change and evolution. Some of the most relevant are indicated below, regarding the lines of research

### RESEARCH LINES

- **SARS-COV-2 INFECTION: DIFFERENTIAL MANIFESTATIONS AND UPDATED TREATMENT**

Main objective

To study the clinical and microbiological evolution of COVID-19 in the different waves of the pandemic and compare the clinical characteristics between patients who require hospital admission due to their severity with those of those that can be treated on an outpatient basis. - To precise characterization of the behavior of COVID-19 currently, and provide clues about the most appropriate measures to take once social distancing measures can be relaxed without putting the population at risk. most vulnerable population

- **THROMBOEMBOLIC DISEASE. PREVENTION, DIAGNOSIS AND TREATMENT**

Main objectives:

Improve the diagnosis, treatment, prognosis and monitoring of patients with VTE.  
Improve VTE prevention (Thromboprophylaxis).  
Transmit our knowledge to Hospital and Primary Care professionals.  
Spread knowledge of VTE to patients themselves and to society in general.

- **SYSTEMIC AUTOIMMUNE DISEASES: MECHANISMS, DIAGNOSIS AND CURRENT TREATMENTS.**

The research of this group focuses on four main areas.

Systemic lupus erythematosus, antiphospholipid syndrome and systemic sclerosis  
Sjögren's syndrome, autoimmune manifestations of hepatitis C virus infection and biological therapies  
Systemic vasculitis  
Autoinflammatory diseases

- **HEART FAILURE. MECHANISMS, DIAGNOSIS, AND TREATMENT UPDATE:**

The The mechanisms of Coronary Microvascular Dysfunction (CMD) Leading to Preheart Failure with Preserved Ejection Fraction (HFpEF) aims to people with suspected cardiac ischemia but without obstructive coronary artery disease to understand better understand the associated risks of heart damage and early mortality, as well as potential targets for HFpEF treatment and prevention.

- **VASCULAR RISK AND INFLAMMATION: PREVENTION, DIAGNOSIS AND TREATMENT:**

In atherosclerosis, there is a hardening of the arteries and an accumulation of fat and cholesterol that prevents good blood flow. Despite these characteristics, during the first years of the disease, atherosclerosis may not show symptoms in the patient and, therefore, it is vitally important to identify new risk factors capable of predicting the evolution of the disease in people who do not yet manifest. clinical sequelae.

#### 3.4 Large System Pathologies Area

- CLINICAL ULTRASOUND IN INTERNAL MEDICINE:** clinical ultrasound as another complementary tool for the internist (which helps him solve the specific problem for which the patient consults, what they call second level ultrasound, more exhaustive and usually performed by radiologists).  
 Main objectives:  
 Improve the clinical history and physical examination from this global and comprehensive approach.  
 Promote the targeted use of clinical ultrasound in the consultation (point of care) to document the clinical diagnosis, making it more decisive and more effective
- DIGITAL MEDICINE**  
 Digital Health Research is to investigate, develop and innovate in the use of Information and Communications Technologies (ICT) in Health, with the aim of improving the health and well-being of people. To carry out this activity, the Unit is currently organized into 4 areas: Interoperability and Information Systems, Platforms and Devices, Clinical Validation and Evaluation  
 Lines of study framed in basic research projects:
  - Study of the pathophysiological role of nicotinic $\alpha$ 7 and dup- $\alpha$ 7 receptors expressed in human macrophages, neurons and lung carcinoma cells.
  - Identification of signalling pathways connecting nicotinic  $\alpha$ 7 receptors and negative regulators of TLR-mediated inflammation in human macrophages.

### STRATEGIC OBJETIVES

- The global objective of the investigation team on DYSFUNCTION AND ORGAN FAILURE IN AGGRESSION is the optimization of the patient management in the really critical ill patients who can develop Organ Dysfunction or Organ Failure. Multiorgan Dysfunction & Multiorgan Failure Syndrome (MOF-MOD Syndrome) are correlated with bad prognostic and high mortality rates
- D-FMO Syndrome is correlated both with the disease severity and the therapeutic efforts. The therapeutic management of the patient must be early and directed to specific objectives
- Otherwise, the support measures must be directed to the specific situations (like sepsis, trauma ...) and to the Organs or Systems in Dysfunction or Failure (coagulation, haemodynamic, respiratory or renal ...) Finally, the detection or D-FMO Syndrome employing not only single markers (clinic) but early and organ specific biomarkers (basic or advanced biochemical markers, molecular markers ...) can bring a higher efficacy and better results
- Finally, the detection or D-FMO Syndrome employing not only single markers (clinic) but early and organ specific biomarkers (basic or advanced biochemical markers, molecular markers ...) can bring a higher efficacy and better results

#### STRATEGIC OBJETIVES

- Our group studies the molecular mechanisms of cardiovascular morbidity associated with sleep breathing disorders, in particular, the sleep apnoeahypopnea syndrome(SAHS).
- We also provide evidence for making clinical decisions on patients with these disorders. We conduct studies to evaluate the mechanisms involved in the development of arterial hypertension, arrhythmias, heart failure, ischaemic heart disease, pulmonary hypertension, pulmonary embolism, and carbohydrate metabolism disorders.
- In terms of the pathogenesis of airflow limitations, several of our projects have focused on small airway function, bronchial hyperresponsiveness and exercise adaptation in a number of obstructive diseases, particularly COPD, asthma and cystic fibrosis. We also evaluate the objective measurement of daily physical activity in these patients and contribute to the best definition of its determinants and its clinical and prognostic usefulness. We collaborate with other research groups to study the contribution of the innate immune system to the evolution of these diseases and the relationship between the response to hypoxia and the clinical expression of COPD and SAHS.
- Finally, in the field of the systematisation of lung function testing, we create reference values for various population groups and define the methodological aspects of the measurement of exhaled breath condensate and nitric oxide.

### 3.4.4 Regulation of Gene Expression and by Hypoxia Group

#### COMPOSITION

**Luis del Peso Ovalle.**

Profesor Titular. Departamento de Bioquímica. Facultad de Medicina. Universidad Autónoma de Madrid

- **Benilde Jiménez Cuenca.** Profesor Titular. Departamento de Bioquímica Facultad de Medicina. Universidad Autónoma de Madrid

#### STRATEGIC OBJECTIVES

- La homeostasis del oxígeno, central en fisiología, se encuentra alterada en patologías de alta incidencia tales como las enfermedades cardiovasculares y el cáncer. Por ello, la elucidación de las respuestas adaptativas celulares y moleculares a la hipoxia constituye un importante tema de investigación biomédica. Los factores de transcripción inducibles por hipoxia (HIF) desempeñan un papel fundamental en esta respuesta al controlar la expresión de la mayoría de los genes implicados en la adaptación a la hipoxia. El objetivo de nuestro grupo es contribuir a la comprensión de la respuesta transcripcional a la hipoxia y los mecanismos celulares y moleculares que subyacen a las respuestas de adaptación tales como la inducción de angiogénesis. Nuestro objetivo a largo plazo es explotar este conocimiento para mejorar el manejo clínico de patologías en las que el desarrollo de hipoxia tisular es una característica común.

#### RESEARCH LINES

- Characterization of the molecular mechanisms responsible for the transcriptional response to hypoxia.
- Identification of polymorphisms affecting HIF binding sites and characterization of their functional effect.
- Cellular and molecular mechanism of angiogenesis regulation by hypoxia..
- Regulation of metabolism by hypoxia and role of HIF in metabolic diseases.

#### RESEARCH ACTIVITY

##### Doctoral theses

## 3.4.5 Nephrology Group

Publications:20 | Q1:13

### COMPOSITION

**María Gemma Fernández Juárez.**

Jefa de Servicio en Nefrología. Hospital Universitario La Paz

- **María José Castro Notario.** Enfermera. Hospital Universitario La Paz
- **Olga Costero Fernández.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Gloria del Peso Gilsanz.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **María Elena González García.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Carlos Jiménez Martín.** Jefe de Sección de Nefrología. Hospital Universitario La Paz
- **María Ovidia López Oliva.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Almudena Pérez Torres.** Dietista-Nutricionista. Hospital Universitario Santa Cristina
- **Begoña Rivas Becerra.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Amir Shabaka Fernández .** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz
- **Rafael Jesús Sánchez Villanueva.** Facultativo Especialista de Área en Nefrología. Hospital Universitario La Paz

### STRATEGIC OBJETIVES

- The strategic objective of this care-research group is to enable, by developing a deep understanding of the various components that make up nephrology (kidney diseases in initial stages, progression of kidney disease, particular and general complications of dialysis and kidney transplantation), access by affected patients to the best diagnostic and therapeutic interventions available at any time. Each of the areas must ensure a minimum level of research and development activity representing the innovation in these areas. The lines of research are at times cross-sectional to the four components indicated for overall nephrology

### RESEARCH LINES

1. Glomerular nephropathies:
  - Role of PLA2r levels in membranous nephropathy.
  - Study of the alternative pathway of complement in glomerular pathologies: vasculitis, membranous nephropathy, IgA glomerulonephritis...
  - Morbidity, mortality and progression of diabetic nephropathy and other glomerular nephropathies.
  - Adult polycystic kidney disease. Family studies and therapeutic approaches.
  - Association between cardiovascular disease and progression of nephropathies (NEFRONA multicenter studies).
2. Renal replacement therapy:
  - Evolution of peritoneal function in peritoneal dialysis. Implications for patient and technique survival. New peritoneal dialysis devices and solutions. Aquaporin 1 and its genetic polymorphisms. Involvement of alternatively activated macrophages and CC
  - Cardiovascular risk in dialysis patients. Study of endocrine alterations in dialysis patients. Role of FGF 21 in uremic insulin resistance.
  - Mouse model for peritoneal dialysis: exploration of the effects of dialysis fluids, pharmacological interventions and genetic manipulation (KO, transgenic).
3. Complications of renal transplantation.
  - Infection and CMV disease in renal transplantation. Personalized treatment.
  - Graft tolerance.

- Quality of life of the transplanted patient. Patient-reported transplant outcome.
- Individualization of immunosuppression.
- Knowledge of graft cortical microcirculation.
- Continuous active collaboration with the Spanish renal transplant group (SENTRA), some led by the La Paz group: Covid disease, renal prevention (iSGLT-2), pregnancy in renal transplantation, bacterial infections, thrombotic microangiopathy, asystole donation, relapses of different renal diseases after transplantation...

#### 3.4 Large System Pathologies Area

#### RESEARCH ACTIVITY

##### Doctoral theses

- **Tejera Muñoz A.** El factor 2 de la red de comunicación celular (CCN2) ejerce un papel esencial en el mantenimiento de la estructura y las respuestas vasculares de la aorta en ratones.[dissertation]. *Madrid: UAM: 2023(24/03/2023). Director: Ruiz Ortega M, Rodríguez Díez, R.*

### 3.4 Large System Pathologies Area

#### Research projects

- **del Peso Gilsanz, Gloria.** Clinical validation of a continuous flow peritoneal dialysis system, with dialysate regeneration (CORDIAL). UE. 2020-2024. *Managment centre:* FIBHULP
- **del Peso Gilsanz G.** Relación de la funcionalidad de la membrana peritoneal y la patología cardiovascular en pacientes en diálisis peritoneal tratados con soluciones biocompatibles. repercusión sistémica de un problema local (PI22/00574). ISCIII. 2023-2025. *Managment centre:* FIBHULP
- **del Peso Gilsanz, Gloria.** Las células mesoteliales del efluente crecidas ex vivo reflejan las alteraciones peritoneales encontradas en la biopsia peritoneal. Oportunidades adicionales para biomarcadores en el efluente. Fundación SENEPRO. 2016-Ongoing. *Managment centre:* FIBHULP
- **Fernández Juárez GM.** Aproximación diagnóstica y terapéutica de las microangiopatías trombóticas. Alexion Pharma Spain S.L. 2022-Ongoing. *Managment centre:* FIBHULP
- **Fernández Juárez GM.** Descifrando el papel de factor h-related proteins en las enfermedades renales relacionadas con complemento (PI19/01695 ). ISCIII. 2020-2023. *Managment centre:* FIBHULP
- **Fernández Juárez GM.** Nefropatías asociadas con desregulación del complemento: estudio genético y de proteínas para determinar facto-

res de riesgo y de progresión de daño renal (PI-2749). SEN. 2023-Ongoing. *Managment centre:* FIBHULP

- **González García ME.** Prevalencia de fragilidad en pacientes con enfermedad renal crónica en lista de espera de trasplante renal en España: un estudio multicéntrico. SET. 2022-2023. *Managment centre:* FIBHULP
- **Jiménez Martín C.** Desarrollo y aplicación de un programa grupal de atención psicológica basada en las preferencias y valores con el objetivo de mejora de resultados en salud en el paciente con trasplante renal. Astellas Pharma, S.A. 2018-Ongoing. *Managment centre:* FIBHULP
- **Jiménez Martín C.** Evaluación de la microcirculación cortical del trasplante renal a largo plazo medida por ecografía con contraste y su correlación histopatológica por biopsia renal. Sociedad Madrileña de Trasplantes. 2019-Ongoing. *Managment centre:* FIBHULP
- **Sánchez Villanueva R.** Abordaje nutricional en pacientes con enfermedad renal. Fresenius Kabi España S.A.U. 2021-Ongoing. *Managment centre:* FIBHULP
- **Sánchez Villanueva R.** Creación de un centro de referencia para el estudio de los mecanismos implicados en las reacciones de hipersensibilidad a las membranas de hemodialisis basadas en polysulfona. Nipro Europe Nv. 2017-Ongoing. *Managment centre:* FIBHULP

#### Cibers and Retics

- **RD21/0005/0018 Bajo Rubio MA.** Inflamación e inmunopatología de órganos y sistemas. ISCIII. (31/12/2024). FIBHULP
- **RD21/0005/0030 Fernández Juárez GM.** Inflamación e inmunopatología de órganos y sistemas. ISCIII. (31/12/2024). FIBHULP

#### Clinical trials

- **Del Peso Gilsanz G.** A study to evaluate the efficacy and safety of xylocore, a glucose sparing experimental solution, for peritoneal dialysis. *Type/Phase:* III  
*Sponsored by:* Iperboreal Pharma, S.R.L  
*Signed date:* 13/11/2023
- **Del Peso Gilsanz G.** Seguimiento de las trayectorias de tratamiento en pacientes adultos con hiperpotasemia (track). estudio longitudinal, prospectivo y no intervencionista de la evolución del tratamiento de pacientes adultos con hiperpotasemia. *Type/Phase:* E0m prospectivo  
*Sponsored by:* Astrazeneca Ab  
*Signed date:* 24/01/2023
- **Del Peso Gilsanz G.** Seguimiento de las trayectorias de tratamiento en pacientes adultos con hiperpotasemia (track). estudio longitudinal, prospectivo y no intervencionista de la evolución del tratamiento de pacientes adultos con hiperpotasemia. *Type/Phase:* E0m prospectivo  
*Sponsored by:* Astrazeneca Ab  
*Signed date:* 28/09/2023
- **Sánchez Villanueva RJ.** A phase 3 randomized, double-blind, placebo-controlled study evaluating the efficacy and safety of dose-titrated pls240 in the treatment of secondary hyperparathyroidism in individuals with end stage kidney disease on hemodialysis (path-1) with an open-label extension. *Type/Phase:* III  
*Sponsored by:* Pharmaceutical Product Development Spain, S.L  
*Signed date:* 10/10/2023

- **Sánchez Villanueva RJ.** Relief census: estudio transversal para evaluar la prevalencia y la carga del prurito urémico en pacientes que se someten a hemodiálisis. *Type/Phase:* No EPA  
*Sponsored by:* Vifor Pharma-Vifor International Inc  
*Signed date:* 12/05/2023

#### Patents and trademarks

- **Selgas Gutiérrez R, Bellón Heredia T, Rodríguez Sanz AI, Álvarez Builla J, Vaquero López JJ, Sánchez Alonso P, Alajarín Fernández R, inventors; FIBHULP, Universidad de Alcalá, assignees.** Use of compounds derived from salts of piridazine[3,2-b]benzimidazolium as anti-inflammatory agents. P201430411, PCT/ES2014/070603; 2013 July 25.

### 3.4.6 Diagnosis and Treatment of Allergic Diseases

**Publications:** 55 | **Q1:**34

#### COMPOSITION

**Santiago Eugenio Quirce Gancedo.**

Jefe de Servicio de Alergología. Hospital Universitario La Paz

- **María Pilar Encarnación Barranco Sanz.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **María Teresa Caballero Molina.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **María Luisa Caballero Soto.** Facultativo Especialista de Área en Farmacia hospitalaria . Hospital Universitario La Paz
- **Francisco Javier Contreras Porta.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **Leticia de las Vecillas Sánchez.** Facultativo Especialista en Alergología. Hospital Universitario La Paz
- **Francisco Javier Domínguez Ortega.** Jefe de Sección de Alergología. Hospital Universitario La Paz

- **Ana Fiandor Román.** Jefe de Sección de Alergología. Hospital Universitario La Paz
- **Carmen Gómez Traseira.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **Juan Alberto Luna Porta .** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **María Magdalena Lluch Bernal.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **María Pedrosa Delgado.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **Elsa Phillips Angles.** Facultativo Especialista de Área en Alergología Pediátrica. Hospital Universitario La Paz
- **Mónica Rodríguez Álvarez.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **María Rosa Rodríguez Pérez.** Investigadora Senior. Contrato Miguel Servet (I2). Hospital Universitario La Paz
- **Margarita Tomás Pérez.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz
- **Ana María Umpiérrez Rodríguez.** Facultativo Especialista de Área en Alergología. Hospital Universitario La Paz

#### STRATEGIC OBJETIVES

- These group members are specialists in various areas of allergic diseases, which enable them to perform clinical studies and basic research on the main allergic diseases (food allergies, asthma and rhinitis, urticaria/ angioedema and drug allergies). The group's strategic research objectives include:
  - The development of new techniques to improve the diagnosis of food allergies by determining the molecular sensitisation profile
  - The study of hyperresponsiveness and airway inflammation in asthma, as well as the role of allergen exposure and comorbidities in this disease
  - The study of the pathogenesis and treatment of eosinophilic diseases of the airways (asthma, eosinophilic bronchitis) and the gastrointestinal tract (eosinophilic oesophagitis)
  - The characterisation of various types of angioedema caused by Bradykinin (hereditary and acquired) and improvements in their diagnosis and treatment
  - Research on the epidemiology and pathomechanisms of severe adverse reactions caused by immune hypersensitivity reactions to drugs

#### RESEARCH LINES

- Food allergy (milk, egg, fruit, cereals): molecular diagnosis (by allergenic components) and treatment with oral desensitisation
- Epidemiology, physiopathology, diagnosis and treatment of angioedema and urticaria
- Studies on bronchial hyperresponsiveness to direct and indirect agents and airway inflammation
- Eosinophilic diseases of the respiratory tract (eosinophilic bronchitis) and digestive system (eosinophilic esophagitis)
- Persistent and difficult to control asthma: study on the influence of common and occupational allergens, comorbidities and new therapies
- Aspirin-exacerbated respiratory disease (AERD): inflammatory markers and desensitisation protocol
- Adverse immunologic reactions to drugs: study on the cellular and molecular mechanisms involved.
- Identification and characterization of new environmental allergens and modulating factors of allergenicity.

#### STRATEGIC OBJETIVES

- Stratifying risk in the critically ill patient
- Stratify pulmonary thromboembolism risk
- Try to diagnose the potentially ill polytraumatized patient at the emergency room Enhance the use of blood products
- Critically ill patient coagulopathy
- Early diagnose of anemia at the emergency room
- Intravenous iron usage
- Anticoagulation Reserval
- Patient Blood Mangement Implementation

#### RESEARCH LINES

- Critical Bleeding
- Anticoagulation reversal
- Fragility
- COVID19
- Interrelation in Cardiovascular Diseases and Cares

#### STRATEGIC OBJETIVES

- Care is an indispensable activity for survival, since humanity exists. Care has been relevant as a primary function to promote and develop all those activities that make people live.
- This research group aims to collaborate on growing clinical evidence on health care. The real gap between what generates scientific knowledge and the decisions that are made in the day to day is ethically unacceptable. Between 30 and 40% of patients do not receive care consistent with the results of the research and around 20-25% of care may be unnecessary or potentially harmful. Evidence-Based Practice (PBE) or Evidence is based on the fact that greater knowledge and use of research results in clinical practice will contribute to improving the health of the population. Today, it is well known that the implementation of the best scientific evidence available in the clinical practice improves quality of care and clinical outcomes.
- In addition, decision-makers based on available evidence tend to be more satisfied with their role and focus on improving the quality of care given to patients.
- Finally, it should be noted that using evidence in daily practice can achieve health goals at a minimum cost.
- Cost-effectiveness studies have been conducted in which evidence-based care is linked to a reduction in health costs compared to traditional care.
- At the same time, society is facing new economic, political, demographic, social and cultural challenges that require health services capable of meeting the growing health needs of the population.
- It is necessary to investigate in clinical practice the most advanced care in order to achieve the full development of care and ensure the achievement of the best results in terms of overall health and quality of life of patients, Effectiveness of interventions, greater cohesion of health care teams, and of course, all contribute to the sustainability of the health system and user satisfaction.

#### RESEARCH LINES

- Vital Processes and complex care
- Technological innovation and its application in health care
- Management of care and results of professional practice

#### STRATEGIC OBJETIVES

- Our group will investigate new strategies to address very different pathologies that are presented in our emergency department, national referent in different fields of diagnosis and treatment. This heterogeneous group of specialists, will approach 6 main lines of research, which aim to contribute to the better definition of clinical, diagnostic and treatment strategies.
- We collaborate with other research groups, to study clinical and prognostic usefulness tests in cardiology, to develop new strategies for the treatment and diagnosis of infectious diseases, and to investigate new antibiotics with the pneumology group.
- We develop a new and pioneering line of imagingdiagnostic, with the line of emergency ultrasound, being national referents in research in this field, in which we have the active support of private enterprise.
- We will investigate the possibility of supporting us in new technologies that help the clinician in the decision making in the field of the treatment of the diabetes, impelling global initiatives both at the hospital and the population level.
- Finally, we will develop a line of toxicological research, focusing both on the early recognition of the intoxicated patient, as well as their adequate treatment, in collaboration with the clinical toxicology unit (CTU), with the aim of becoming a national reference center in the Management of the intoxicated patient, as well as in the development of protocols of attention to multiple victims of biological attack.

#### RESEARCH LINES

- Integral management of the treatment and follow-up of the diabetic patient.
- Emergency ultrasound.
- Sepsis
- SARS-CoV-2 and COVID19 acute management
- Care of infectious diseases in the emergency room.
- Optimization of the management of the acute intoxicated patient and use of chemical substances for terrorist purposes.
- Attention to cardiovascular pathology of emergencies.
- Attention to respiratory pathology.

### STRATEGIC OBJETIVES

- The Hospital Pharmacy group aims to investigate on pharmacotherapy focused on both, researches on treatments and innovation technology related to the medication use process in order to optimize clinical practice.

### RESEARCH LINES

1. Evaluation of Drugs - Real World Outcomes, especially those associated with high economic impact or with limited clinical evidence. In this regard, our target is to investigate on the following fields:
  - Coagulopathies
  - Oncology
  - Biologic therapies
  - Infectious diseases
  - Rare diseases
  - Gene therapy
  - Molecular biology of the innate immune system
2. Investigation on strategies for early detection and prevention of medication errors either in patients with critical illness and patients with complex chronic conditions
3. Analysis of the impact on medication adherence and health outcomes of innovation in new technologies applied to the medication use process:
  - Telepharmacy programs including or not medications home delivery. Evaluation of their impact on medication adherence and health outcomes in different pathologies such as migraine, multiple sclerosis, prostate cancer and asthma.
  - Development and evaluation of digital health tools applied to congenital coagulopathies and its impact in terms of adherence and treatment cost-effectiveness improvement
  - Research on the effect of predictive analytics and big data on clinical decision making and pharmaceutical outcomes optimization
  - Identification of signalling pathways connecting nicotinic alpha7 receptors and negative regulators of TLR-mediated inflammation in human macrophages
4. Development of new drugs: Advanced therapies

## 3.4.11 Translational Hepatology Group

Publications: 13 | Q1:6

### COMPOSITION

**Francisco Javier García-Samaniego Rey.**

Jefe de Sección en Hepatología. Hospital Universitario La Paz. Profesor Titular. Universidad Complutense De Madrid

- **Marina Cambor Murube.** Investigadora Predoctoral. Universidad Autónoma de Madrid
- **Antonio Madejón Seiz.** Investigador Postdoctoral. CIBERehd
- **Antonio Olveira Martín.** Facultativo Especialista de Área en Hepatología. Hospital Universitario La Paz
- **Miriam Romero Portales.** Facultativo Especialista de Área en Gastroenterología. Hospital Universitario La Paz

### STRATEGIC OBJECTIVES

- The research group conducted by Dr. García-Samaniego has extensive experience in the study of liver diseases, focusing its research activity, in both, clinical and basic aspects. In recent years the group has developed its activity preferentially in the study of viral hepatitis. The expertise areas of the research group are the study of infections caused by the hepatitis viruses [hepatitis viruses B (HBV), C (HCV) and delta (HDV)] and the chronic liver disease related to HBV, HCV and HDV at a time in which highly efficient antiviral systems against HBV, and especially against HCV has been developed.
- In addition to complete the research lines, the global strategy of the group will be focused in maintaining the high level of collaboration, both with CIBERehd research groups and with external groups, as well as to increase of the cooperation ways with private enterprise.

### RESEARCH LINES

- Main research lines:
  1. Study of the epidemiological situation and optimization of the cascade of care for patients with infection by the hepatitis delta virus (HDV). Project in collaboration with the Hospital Clinic of Barcelona and Infanta Leonor of Madrid, and funded by the HDV DESCRIBE program sponsored by Gilead Scientific, S.A.
  2. Development of HCV micro-elimination strategies through the optimization and implementation of HCV detection and quantification systems at diagnostic points.
  3. Analysis of the role of epigenetic modifications induced by infection by hepatotropic viruses in the evolution of liver disease and the development of liver cancer, before and after antiviral treatment. Project performed in collaboration with the Department of Biochemistry of the Faculty of Medicine of the UAM and the Virology laboratory of the Molecular Biology Center "Severo Ochoa".
  4. Study of liver fibrosis progression factors in patients with metabolic hepatic steatosis.
- Alternative lines of work:
  1. Study of the role of the intestinal microbiota as a prognostic factor for adverse effects in biological cancer therapy. Project developed in collaboration with the Department of Biochemistry of the Faculty of Medicine of the UAM.
  2. Study of the influence of pre-existing liver disease on the evolution of COVID.

#### 3.4 Large System Pathologies Area

#### RESEARCH ACTIVITY

##### Doctoral theses

- **Gil García AI.** Análisis genético y funcional del antígeno de superficie del virus de la hepatitis B aislado de pacientes antígeno e negativo en la zona gris de tratamiento.[dissertation]. *Madrid: UAM: 2023(25/05/2023).* Director: *García-Samaniego J, Madejón Seiz A.*

Strategic Objectives	Development forecast for the coming years:	Actions
<p>Cancer and Medical Genetics area is made up of 10 groups and its objective is to deepen its knowledge in all aspects related to neoplastic disease, including the biology of the tumour, identification of therapeutic targets, development of new treatments, analysis of the efficacy of available treatments, identification of biomarkers and carrying out studies aimed at prevention and early diagnosis. In relation to human and molecular genetics, the aim is to identify genetic alterations related to human diseases in order to make an early diagnosis and prevent the development of pathologies.</p>	<p>Research in the area of cancer and genetics is expanding, both in terms of basic and translational research and in terms of clinical research. It is foreseeable that collaboration between groups in the area will continue to increase but also the collaboration with external organisations.</p>	<p>Facilitate the application request for European projects through the IdiPAZ Internalization Platform</p>
	<p>In order to facilitate its development, it will be necessary for the Institution to provide sufficient space and adequate common infrastructures</p>	<p>Support researchers to continue being a reference in the international area.</p>
	<p>It is foreseeable that this expansion will lead to the possibility of applying for European projects and leading consortiums, where once again the support of the Foundation will be essential for their application and management</p>	<p>Promote at international level the different research groups of the area, identifying possible synergies between groups and centers, new partners and funding sources, as well as to forge strategic alliances.</p>

Mitochondrial modulation with leriglitazone as a potential treatment for Rett syndrome. *J Transl Med*. 2023; 21(1): 756. Article. IF: 6.1; Q1

García-Mato A, Cervantes B, Rodríguez-de la Rosa LR, **Varela-Nieto I**. IGF-1 Controls metabolic homeostasis and survival in HEI-OC1 auditory cells through AKT and mTOR signaling. *Antioxidants*. 2023; 12(2): 233. Article. IF: 6; Q1

González-Guerrero C, Borsò M, Alikhani P, Alcaina Y, Salas-Lucia F, Liao XH, García-Giménez J, Bertolini A, Martín D, Moratilla A, Mora R, Buño-Soto A, Mani AR, Bernal J, Saba A, de Miguel MP, Refetoff S, Zucchi R, **Moreno JC**. Iodotyrosines Are Biomarkers for Preclinical Stages of Iodine-Deficient Hypothyroidism in Dehal1-Knockout Mice. *Thyroid*. 2023; 33(6): 752-61. Article. IF: 5.8; Q1

#### Scientific Events by Cancer and Human Molecular Genetics

- **16/02/2023**. Session - Sistemas notificación de incidencias: SL-NOIRES
- **23/02/2023**. Session - Detección de mosaicismo en displasias esqueléticas
- **02/03/2023**. Session - miR-124 as a liquid biopsy prognostic biomarker in small extracellular vesicles from NSCLC patients
- **09/03/2023**. Session - Síndrome de DICER1, un paradigma del doble-hit genético
- **10/03/2023**. Scientific Seminar - Utilización de iPSCs como modelo de enfermedad, aproximación a terapia y mejora diagnóstica
- **16/03/2023**. Session - Empleo de paneles customizados de NGS en cáncer pediátrico
- **23/03/2023**. Session - Espectro clínico y genético del hipopituitarismo congénito: una enfermedad compleja
- **30/03/2023**. Session - La protección de datos en investigación
- **13/04/2023**. Session - TPNI: cuánto más... ¿es siempre mejor?
- **20/04/2023**. Session - Mejoras del análisis bioinformático en un contexto asistencial de genética
- **27/04/2023**. Session - Actualización del Proyecto Impact Genómica en la C.M.
- **04/05/2023**. Session - Predisposición a la Leucemia Aguda Linfoblástica pediátrica causada por mutaciones en el gen PAX5
- **25/05/2023**. Session - Genética Molecular en Trastornos del Neurodesarrollo
- **18/05/2023**. Session - Incidencias y su resolución en el ámbito de la Calidad
- **15/06/2023**. Session - Utilidad de las vesículas extracelulares como biomarcador y tratamiento en el ictus. Investigación traslacional
- **08/06/2023**. Session - Genética Molecular en Trastornos del Neurodesarrollo
- **22/06/2023**. Session - Caracterización clínica y molecular de una cohorte de pacientes con síndrome Dup15q'
- **29/06/2023**. Session - Hipotiroidismo Gestacional y Autismo en el Ratón KO Dehal1'
- **05/07/2023**. Session - Functional characterization of Gastric Cancer and its therapeutic implications'
- **21/09/2023**. Session - Descripción de un ClinRO para el Síndrome de Wolf-Hirschhorn en una gran cohorte de pacientes
- **14/09/2023**. Session - Generación de córnea biomimética con células madre mesenquimales de tejido adiposo'
- **21/09/2023**. Session - Medioambiente y Salud en La Paz: Huella de Carbono, energía, agua, residuos y su impacto en la salud'
- **05/10/2023**. Session - Caracterización funcional de variantes de significado incierto en IHH en pacientes con talla baja y braquidactilia
- **18/10/2023**. Simposio Internacional Unity La Paz
- **26/10/2023**. Session - Epigenetic biomarkers involved in the response to chemotherapy in solid tumors
- **02/11/2023**. Session - Identificación y caracterización de variantes clínicas más allá del exoma en errores congénitos del metabolismo utilizando aproximaciones multiómicas
- **13/11/2023**. Actualización en leucemia aguda linfoblástica en el Hospital Universitario La Paz (III edición)
- **13/11/2023**. Session - Laboratorio de Biología Molecular: ADN ¿qué nos tienes que contar?
- **30/11/2023**. Session - Biomarcadores farmacogenéticos en cáncer: Farmacogenética de fluoropirimidinas
- **23/11/2023**. Session - Nuevos retos en el diagnóstico y seguimiento de la LLA pediátrica
- **14/12/2023**. Session - Cribado Neonatal
- **21/12/2023**. Session - Habilidades No Técnicas en el entorno sanitario

### 3.5.1 INGEMM - Instituto de Genética Médica y Molecular (Institute of Medical and Molecular Genetics) Group

Publications:41 | Q1:13

#### COMPOSITION

**Pablo Daniel Lapunzina Badía.**

Facultativo Especialista de Área en Genética.  
Hospital Universitario La Paz

- **Cinthia Amiñoso Carbonero.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Pedro Arias Lajara.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Sara Benito Sanz.** Investigadora Postdoctoral. Hospital Universitario La Paz
- **Ángel Campos Barros.** Investigador Senior (Contrato Miguel Servet- I2). Jefe de Laboratorio. FIBHULP
- **Ángela del Pozo Mate.** Técnico Informático. Hospital Universitario La Paz
- **Begoña Ezquieta Zubicaray.** Bioquímico Ad-junto. Hospital Universitario La Paz
- **Luis Fernández García-Moya.** Biólogo. Hospital Universitario La Paz
- **Blanca Nieves Fernández Martínez.** Técnico de Laboratorio. Hospital Universitario La Paz
- **María Victoria Fernández Montaña.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Amparo García Cardenal.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Fe Amalia García Santiago.** Bióloga. Hospital Universitario La Paz
- **Sixto García-Miñaur Rica.** Genetista. Hospital Universitario La Paz
- **Isabel Gómez Nieto.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Karen Elise Heath.** Investigadora Senior (Contrato Ramón y Cajal- I3). Jefe de Laboratorio. FIBHULP
- **Teresa López Timénez.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Alicia Llorente Alonso.** Técnico de Laboratorio. Hospital Universitario La Paz
- **María Elena Mansilla Aparicio.** Genetista. Hospital Universitario La Paz
- **Pilar Martínez González.** Bióloga. Hospital Universitario La Paz
- **Víctor Manuel Martínez González.** Investigador Postdoctoral. Hospital Universitario La Paz
- **María Cruz Martínez Martínez.** Técnico de Laboratorio. Hospital Universitario La Paz
- **José Carlos Moreno Navarro.** Facultativo Especialista de Área en Genética. Hospital Universitario La Paz
- **María Ángeles Mori Álvarez.** Bioquímico Ad-junto. Hospital Universitario La Paz
- **Julián Nevado Blanco.** Biólogo. Hospital Universitario La Paz
- **María Palomares Bralo.** Bióloga. Hospital Universitario La Paz
- **María Sol Pérez Coto.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Víctor Luis Ruiz Pérez.** Investigador Científico de OPIs. Jefe de laboratorio. IIB "Alberto Sols"
- **Carmen Sánchez Gómez.** Técnico de Laboratorio. Hospital Universitario La Paz
- **Jesús Solera García.** Facultativo Especialista de Área en Análisis Bioquímicos. Hospital Universitario La Paz
- **Mario Solís López.** Bioinformático. Hospital Universitario La Paz
- **Elena Vallespín García.** Jefa de Grupo de la Sección de Ofalmogenética Molecular. Hospital Universitario La Paz

#### STRATEGIC OBJETIVES

- This is a clinical and basic research team that conducts several lines of research into early diagnosis, disease mechanisms and new therapeutic strategies for genetic diseases, developmental disorders and congenital defects.
- It is a heterogeneous group consisting of physicians, pharmacists, molecular biologists, bioinformaticians, technicians and administrative officers.

#### RESEARCH LINES

- Subtelomeric rearrangements in patients with idiopathic mental retardation.
- Genetic and functional analysis of the SHOX and SHOX2 genes in human growth.
- Overgrowth syndromes. Clinical and molecular analysis.
- Genetic determinants of syndromic and non-syndromic proportional short stature
- Genetic detrerminants of disglycaemia: hypoglycaemia, diabetes mellitus and hyperinsulinism
- Genetic determinants of congenital hypopituitarism
- SNPs arrays in pharmacogenetics, HIV patients and genetic associations.
- CGHarrays and genomic rearrangements in patients with congenital malformations, intelectual disability and tumores.
- Molecular genetics of hypertrophic cardiomyopathy.
- Functional analysis of CLCN1 mutations in congenital myotonia.
- Molecular study of endothelial dysfunction in diabetes and ageing.
- Molecular characterization of the 22q11.2 región by MLPA, microsatélites and FISH.
- Pharmacogenetics and pharcogenomics.
- Autosomal recessive osteogénesis imperfecta.
- Genomic tools for diagnosis: oligos and SNP arrays.
- Macrocephaly-capillary malformations and syndromes with macrocephaly.
- Next generation sequencing as a new tool in the diagnosis of genetic diseases.
- Classification and Ontologies of Diseases
- Primary Pulmonary hypertension
- Análisis genómico global en el Síndrome de invdup(15) [idic(15) syndrome]
- Molecular characterization of inv dup del (8p) by Karyotype, SNP arrays and FISH

#### RESEARCH ACTIVITY

##### Doctoral theses

- **Díaz González F.** Caracterización funcional de variantes en los genes PRKG2 e IHH: Implicación en la etiología de nuevas displasias y fenotipos esqueléticos.[dissertation]. *Madrid: UAM: 2023(06/11/2023).* Director: *Heath KE.*

##### Publications

- **Aleman-Navarro M, Diz-de Almeida S, Cruz R, Riancho JA, Rojas-Martínez A, Lapunzina P, Flores C, Carracedo A.** Psychiatric polygenic risk as a predictor of COVID-19 risk and severity: insight into the genetic overlap between schizophrenia and COVID-19. *Transl Psychiat.* 2023; 13(1): 189. Article. IF: 4.7; Q1

#### Research projects

- **Campos Barros A.** Descifrando la complejidad genética del hipopituitarismo congénito (PI18/00402). ISCIII. 2019-2023. *Management centre: FIBHULP*
- **Heath KE.** Análisis genético y funcional de las displasias esqueléticas (PID2020-116263RB-I00). Ministerio de Ciencia e Innovación. 2021-2023. *Management centre: FIBHULP*
- **Heath KE.** Estudio comprensivo de la genética de las displasias esqueléticas: 1) caracterización de la regulación de shox en la placa de crecimiento humano, y 2) analisis genetico de las displasias esqueléticas mediante ACGH y NGS. Biomarin International Limited. 2012-Ongoing. *Management centre: FIBHULP*

- **Lapunzina Badía PD.** ONTOPREC. Implementación de Ontologías, taxonomías y estandarización de las enfermedades crónicas en Medicina de Precisión. Uso de los escores de riesgo poligénico (PRS) como casos de uso. (PMP21/00063). ISCIII. 2021-2023. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** An omnigenic view of genetic susceptibility to severe covid19. Fundació Marató TV3. 2021-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Análisis genético y genómico en pacientes afectados por la enfermedad de Gorham-Stout y por anomalías generales. Lymphatic Malformation Institute. 2012-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Análisis genómico global en el síndrome de invdup 15 syndrome: evaluación de la dosis genómica mediante microarrays personalizados de snps y estudio de genes candidatos del fenotipo. Fundación Inversión Duplicación del Cromosoma 15. 2017-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Análisis genómico global en el síndrome de invdup del 8p: evaluación de la dosis genómica mediante microarrays personalizados de snps y estudio de genes candidatos del fenotipo. Asociación Síndrome Duplicidad, Inversión, Delección del Brazo Corto del Cromosoma 8. 2015-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Analisis genómico y funcional de una variante patogénica en el gen klhl11 en 6 miembros de una familia sin diagnóstico. Fundación Feder. 2022-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Aplicación de técnicas genómicas (genoma completo y 4C-Seq para TDA) en pacientes con síndromes de sobrecrecimiento (PI20/01053). ISCIII. 2021-2023. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Búsqueda de mutaciones en el gen criqap y otros modificadores en pacientes con hipertensión arterial pulmonar. (I). Fundación Contra La Hipertensión Pulmonar. 2018-Ongoing. *Management centre: FIBHULP*

- **Lapunzina Badía PD.** Craniofacial microsomia> genetic causes and pathway discovery. Seattle Children-S Hospital Research Foundation. 2017-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Estudio clínico molecular en pacientes con síndrome de sobrecrecimiento. Estudio de los genes nsd1, nisp1, hras, cdkn1c, glp3, y de las regiones cromosómicas 5q35, xq26 y 11p en pacientes con ssc. Efficce Servicios Para La Investigación S.L. 2005-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Estudio genético-molecular de genes candidatos en pacientes con hipertensión pulmonar idiopática. Actelion Pharmaceuticals España. 2011-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Evaluación genómica en el síndrome de wolf-hirschhorn [síndrome 4p]: microarrays personalizados de snps y estudio de genes candidatos. Asociación Española del Síndrome de Wolf Hirschhorn. 2017-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Evaluación psicométrica en pacientes con síndrome de phelan-m dermid "síndrome de microdelección 22q13". Oryzon Genomics S.A. 2020-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Inteligencia artificial y machine learning en enfermedades humanas. Fundación Ramón Areces. 2019-Ongoing. *Management centre: FIBHULP*
- **Lapunzina Badía PD.** Screening of high-risk pediatric population using an epilepsy gene panel for early diagnosis of neuronal ceroid lipofuscinosis type 2 (cln2) disease. Biomarin International Limited. 2017-Ongoing. *Management centre: FIBHULP*
- **Martínez González VM.** En búsqueda del diagnóstico genético en pacientes con espectro pros. Fundación La Caixa. 2019-Ongoing. *Management centre: FIBHULP*
- **Moreno Navarro JC.** Biomarcadores de disrupción tiroidea gestacional y daño cerebral fetal en el ratón KO para DEHAL1 y en mujeres embarazadas y sus hijos (PI22/01375). ISCIII. 2023-2025. *Management centre: FIBHULP*

- **Moreno Navarro JC.** Diseción genética de la narcolepsia y otras hipersomnias centrales. Francisco José García Sanpedro. 2019-Ongoing. *Managment centre: FIBHULP*
- **Moreno Navarro JC.** Síndrome de resistencia a las hormonas tiroideas. estudio genético-molecular en población española. José Carlos Moreno Navarro. 2013-Ongoing. *Managment centre: FIBHULP*
- **Navado Blanco J.** Aproximación genómica en el síndrome de phelanmc dermid [síndrome de microdelección 22q13]: microarrays personalizados de snps y evaluación de los genes candidatos. Asociación Síndrome Phelan-Mcdermid. 2017-Ongoing. *Managment centre: FIBHULP*
- **Navado Blanco J.** Evaluación genómica en el S. de Wolf-Hirschhorn; microarrays personalizados de SNPs y genes candidatos: Aproximación a las alteraciones dentales y a una epilepsia compleja (P118/01433). ISCIII. 2019-2023. *Managment centre: FIBHULP*
- **Navado Blanco J.** ÚNICAS. Implementación de una red pediátrica para la medicina personalizada en enfermedades raras pediátricas. Un proyecto piloto (PMP22/00008). ISCIII. 2023-2025. *Managment centre: FIBHULP*
- **Palomares Bralo M.** Implementación y evaluación de un protocolo de secuenciación rápida del exoma en pacientes pediátricos ingresados en unidades de críticos o de alta complejidad (P119/01681). ISCIII. 2020-2024. *Managment centre: FIBHULP*
- **Palomares Bralo M.** Paving the way for personalized medicine in neonatal and pediatric intensive care units (PI22/01743 ). ISCIII. 2023-2025. *Managment centre: FIBHULP*
- **Solera García J.** Estudio de micrnas en pacientes con glucogenosis tipo ii (enfermedad de pompe) como marcadores de diagnóstico, progresión de la enfermedad y respuesta al tratamiento. Fundación Genzyme. 2013-Ongoing. *Managment centre: FIBHULP*
- **Tenorio Castaño JA.** Moving toward to a -omic classification for pulmonary arterial hypertension (PI21/01593). ISCIII. 2022-2024. *Managment centre: FIBHULP*
- **Tenorio Castaño JA.** Pasión hp-genetica de la hipertensión pulmonar. Fundación Contra La Hip-

ertension Pulmonar. 2020-Ongoing. *Managment centre: FIBHULP*

- **Vallespín García E.** Desarrollo e implementación de un protocolo integral combinado con la búsqueda de nuevos genes de cataratas congénitas bilaterales (cc) no sindrómicas. Grupo Social Once. 2020-Ongoing. *Managment centre: FIBHULP*
- **Vallespín García E.** Miopía magna de inicio precoz (<10 años) con o sin nistagmo: estudio clínico y genético (P118/01234). ISCIII. 2019-2023. *Managment centre: FIBHULP*

#### Cibers and Retics

- **CB06/07/1005 Lapunzina Badía P.** CIBER Enfermedades Raras. (CIBERER). ISCIII. (31/12/2025). FIBHULP

#### Clinical trials

- **Lapunzina Badía PD.** Estudio de fase II, aleatorizado, doble ciego, controlado con placebo y de grupos paralelos para evaluar la seguridad, la eficacia y la farmacodinámica del tratamiento con basmisanil durante 52 semanas en niños con síndrome dup15q.  
*Type/Phase: II*

### 3.5.2 Translational Oncology Group

Publications:50 | Q1:31

#### COMPOSITION

**Jaime Feliú Batlle.**

Jefe de Servicio de Oncología Médica. Hospital Universitario La Paz. Catedrático de Oncología. Universidad Autónoma de Madrid

- **Jorge Barriuso Feijóo.** Facultativo Especialista de Área en Oncología. Hospital Universitario La Paz
- **Borja Belandía Gómez.** Científico Titular. IIB "Alberto Sols"

- **Beatriz Castelo Fernández.** Facultativo Especialista de Área en Oncología. Hospital Universitario La Paz
- **Paloma Cejas Guerrero.** Investigadora Postdoctoral. Hospital Universitario La Paz
- **Roberto Crespo San Pedro.** Técnico Superior en Anatomía Patológica. Hospital Universitario La Paz
- **Ana Belén Custodio Carretero.** Facultativo Especialista de Área en Oncología. Hospital Universitario La Paz
- **Enrique Espinosa Arranz.** Jefe de Sección de Oncología Médica. Hospital Universitario La Paz. Profesor Titular de Oncología. Universidad Autónoma de Madrid

- **Juan Ángel Fresno Vara.** Investigador Senior (Contrato Miguel Servet - I2). Jefe de Laboratorio. FIBHULP
- **Alejandro Gallego Martínez.** Facultativo Especialista de Área en Oncología. Hospital Universitario La Paz
- **Ángelo Gámez Pozo.** Investigador Postdoctoral (Contrato Técnico de Apoyo). FIBHULP
- **Laura García Acebedo.** Médico Interno Residente. Coordinadora del Registro de Tumores. Hospital Universitario La Paz
- **Ismael Ghanem Cañete.** Facultativo Especialista de Área en Oncología. Hospital Universitario La Paz
- **Juan Carlos Lacal Sanjuán.** Profesor de Investigación. IIB "Alberto Sols"

#### STRATEGIC OBJETIVES

- The aim of cancer research is to improve understanding of all aspects of the disease, including deepening our understanding of the biology of the tumour, developing new treatments, analysing the efficacy of diagnostic tests and performing studies aimed at prevention and early diagnosis.
- The Translational Oncology group's objective is to conduct highly scientific applied research in such a way that basic research can be rapidly translated to clinical practice. In other words, cancer patients at La Paz University Hospital benefit almost immediately from the results of research conducted by their own physicians.
- Although important advances have been made in recent years in our understanding of the origin and evolution of cancer, their implementation in healthcare takes too much time. The Translational Oncology Unit (TOU) was established with the objective of facilitating the incorporation into clinical practice of new advances in molecular biology and the technology developed in this field.
- The main lines of study are based on digestive tumors, gynecologic tumors, urologic tumors, breast cancer and sarcomas. A series of fundamental objectives have been established for these neoplasms that can be summarised as early diagnosis, molecular classification for therapeutic goals and the search for individualised treatments. The majority of TOU projects have as their primary objective the search for predictors of susceptibility or resistance to anticancer agents and the search for prognostic factors related to the evolution of the tumour

#### RESEARCH LINES

- Identification of mechanisms of drug resistance in cancer.
- Identification of cancer biomarkers in tissues and liquid biopsy through genomic, proteomic and metabolomic approaches.
- Study of the mechanisms involved in carcinogenesis.
- Identification of new therapeutic targets in cancer.
- Efficacy and toxicity of antineoplastic therapies.
- Palliative care and supportive treatments in oncology.
- The main tumors on which we carry out our research are:
  - Breast cancer
  - Digestive tract cancers
  - Gynecological tumors
  - Sarcomas
  - Melanoma
  - Genitourinary tumors
  - Head and neck tumors

#### RESEARCH ACTIVITY

##### Doctoral theses

- **Miranda Poma J.** Validación de un modelo predictivo basado en la expresión de micrnas (BIO-MIR), para determinar el riesgo de recurrencia en pacientes con carcinoma renal de células claras en estadio temprano tratados con nefrectomía radical o parcial[dissertation]. *Madrid: UAM: 2023(12/09/2023). Director: Pinto Marín A, Gámez Pozo A.*

#### Clinical trials

- **Martínez Marin V.** B025430 (TDM4529g) Andrés redondo.  
**Type/Phase:** II  
**Sponsored by:** F.Hoffmann-La Roche Ltd  
**Signed date:** 25/04/2023
- **Redondo Sánchez A.** Ensayo fase I/II aleatorizado de Ib-100 más doxorubicina vs. doxorubicina sola en primera línea de sarcomas de tejidos blandos avanzados.  
**Type/Phase:** I  
**Sponsored by:** Grupo Español De Investigación En Sarcomas  
**Signed date:** 16/01/2023
- **Pinto Marín A.** Estudio de fase 3, aleatorizado y multicéntrico para evaluar la eficacia de tar-200 en combinación con cetrelimab en comparación con quimiorradioterapia concomitante en participantes con carcinoma urotelial de vejiga músculo-invasivo (cvmi) que no se vaya.  
**Type/Phase:** III  
**Sponsored by:** Janssen Cilag International Nv  
**Signed date:** 10/05/2023
- **Rodríguez Salas N.** Estudio en fase III, abierto y aleatorizado de tucatinib en combinación con trastuzumab y mfolfox6 frente a mfolfox6 administrado con o sin cetuximab o bevacizumab como tratamiento de primera línea para pacientes con cáncer colorrectal metastásico her2+.  
**Type/Phase:** III  
**Sponsored by:** Seagen, Inc  
**Signed date:** 28/02/2023
- **Rodríguez Salas N.** Correct-MRD I: primer estudio de validación clínica de cáncer colorrectal para predecir la recurrencia mediante un análisis de ADN tumoral circulante para detectar enfermedad residual mínima.  
**Type/Phase:** Prpducto Sanitario  
**Sponsored by:** Exact Sciences Corporation  
**Signed date:** 15/12/2023
- **Custodio Carretero A.** Ensayo de fase 1b/3, global, aleatorizado, controlado y abierto, para comparar el tratamiento con RYZ 101 frente

al tratamiento habitual en sujetos con tumores neuroendocrinos gastroenteropancreáticos bien diferenciados que expresen receptores de somatostatina (sstr+), avanzados e inoperables, que hayan progresado tras un tratamiento anterior con un análogo de la somatostatina marcado con 177Lu (action-1).

**Type/Phase:** I  
**Sponsored by:** Rayzebio, Inc  
**Signed date:** 19/12/2023

- **Redondo Sánchez A.** A phase 3, randomized, double-blind, placebo-controlled, multicenter study of upifitamab rilsodotin (xmt-1536) as post-platinum maintenance therapy for participants with recurrent, platinum-sensitive ovarian cancer (up-next).  
**Type/Phase:** III  
**Sponsored by:** Mersana Therapeutics, Inc  
**Signed date:** 21/04/2023
- **Martínez Marin V.** Ember-4: estudio de fase 3, aleatorizado, abierto, en el que se compara la administración adyuvante de imlunestrant versus terapia endocrina adyuvante estándar en pacientes que recibieron previamente de 2 a 5 años de terapia endocrina adyuvante para el cáncer de mama temprano ER+, HER2- con un mayor riesgo de recurrencia.  
**Type/Phase:** III  
**Sponsored by:** Lilly S.A  
**Signed date:** 03/08/2023
- **Zamora Auñón P.** experiencia en el mundo real europeo de pacientes con cáncer de mama positivo para her2 avanzado/metastásico previamente tratado, que acceden a trastuzumab deruxtecán a través de un programa de acceso individual.  
**Type/Phase:** EOm prospectivo  
**Sponsored by:** Daiichi Sankyo Inc  
**Signed date:** 27/02/2023
- **Castelo Fernández B.** Estudio en fase III, aleatorizado, doble ciego, controlado con placebo, de dos grupos, para evaluar la eficacia y la seguridad de xevinapant y radioterapia en comparación con placebo y radioterapia para demostrar la mejora de la supervivencia sin enfermedad en participantes con carcinoma de células escamosas de cabeza y cuello resecao, que presentan un riesgo alto de recidiva

y no son aptos para la administración de dosis altas de cisplatino.

**Type/Phase:** III  
**Sponsored by:** Merck Kgaa  
**Signed date:** 05/05/2023

- **Redondo Sánchez A.** Estudio en fase II abierto y aleatorizado de farletuzumab eteribulina (morab-202), un conjugado de anticuerpo y fármaco dirigido al receptor de folato alfa frente a la quimioterapia elegida por el investigador en mujeres con cáncer seroso de alto grado (sag) resistente al platino, de ovario peritoneal primario o de trompas de falopio.  
**Type/Phase:** II  
**Sponsored by:** Bristol-Myers Squibb International Corporation  
**Signed date:** 02/02/2023
- **Martínez Marin V.** A phase 3, randomized, open-label, multicenter trial of arv-471 (pf-07850327) vs fulvestrant in participants with estrogen receptor-positive, her2-negative advanced breast cancer whose disease progressed after prior endocrine based treatment for advanced disease (veritac-2).  
**Type/Phase:** III  
**Sponsored by:** Pfizer Inc.  
**Signed date:** 05/07/2023
- **Espinosa Arranz E.** Ensayo en fase III de fianlimab (anti-lag-3) y cemiplimab en comparación con pembrolizumab como terapia adyuvante en pacientes con melanoma de alto riesgo completamente extirpado.  
**Type/Phase:** III  
**Sponsored by:** Regeneron Pharmaceuticals, Inc  
**Signed date:** 10/03/2023
- **Espinosa Arranz E.** Estudio de primera administración en humanos, abierto, fase 1/2 para evaluar la seguridad, farmacocinética, farmacodinámica y la actividad clínica de jnj-63723283, un anticuerpo monoclonal anti-pd1 en sujetos con cáncer avanzado.  
**Type/Phase:** I  
**Sponsored by:** Janssen Cilag International Nv  
**Signed date:** 30/01/2023

- **Redondo Sánchez A.** Estudio retrospectivo, observacional, multicéntrico en vida real de dostarlimab en pacientes con cáncer de endometrio recurrente o metastásico con deficiencia del sistema mismatch repair o inestabilidad alta de microsatélites.  
**Type/Phase:** EPA-OD  
**Sponsored by:** Grupo Español De Investigación Cancer De Ovario  
**Signed date:** 02/02/2023
- **Pinto Marín A.** Estudio de fase III aleatorizado y abierto de xl092 + nivolumab en comparación con sunitinib en participantes con carcinoma de células renales no claras metastásico o avanzado.  
**Type/Phase:** III  
**Sponsored by:** Exelixis Inc  
**Signed date:** 23/05/2023
- **Rodríguez Salas N.** A phase 1/2, open-label, multi-center study of zn-c3 administered in combination with encorafenib and cetuximab in adults with metastatic colorectal cancer.  
**Type/Phase:** I  
**Sponsored by:** Pfizer, S.L.U  
**Signed date:** 28/03/2023
- **Feliú Batlle J.** Estudio para la evaluación del grado de satisfacción cutánea de las cremas cosméticas para pieles sensibles pb-011 y pb-012 en pacientes oncológicos afectados de una polineuropatía palmoplantar secundaria al tratamiento con quimioterapia o agentes quimioterapéuticos fusionados a anticuerpos monoclonales (inmunocitostáticos).  
**Type/Phase:** I  
**Sponsored by:** Prospera Biotech, S.L  
**Signed date:** 28/03/2023
- **Espinosa Arranz E.** Estudio de fase III de fianlimab (regn3767, anti-lag-3) + cemiplimab en comparación con pembrolizumab en pacientes con melanoma metastásico o localmente avanzado inoperable no tratado previamente.  
**Type/Phase:** III  
**Sponsored by:** Regeneron Pharmaceuticals, Inc  
**Signed date:** 26/01/2023

- Castelo Fernández B.** Primer ensayo en humanos, abierto, de aumento escalonado de la dosis con cohortes de ampliación para evaluar la seguridad y la actividad antineoplásica de gen1042 en sujetos con tumores sólidos malignos.  
**Type/Phase:** I  
**Sponsored by:** Genmab A/S  
**Signed date:** 04/04/2023
- Martínez Marin V.** Estudio fase ii de trastuzumab deruxtecan en el tratamiento en primera línea de pacientes con cáncer de mama localmente avanzado o metastásico (cmm) her2-positivo considerados resistentes a trastuzumab + pertuzumab + taxano debido a una recaída temprana. estudio transcender.  
**Type/Phase:** II  
**Sponsored by:** Fundacion Grupo Español De Investigación En Cancer De Mama Geicam  
**Signed date:** 04/12/2023
- Redondo Sánchez A.** Estudio de fase 1b, primero en seres humanos, de aumento escalonado y ampliación de la dosis de xmt-1536 en pacientes con tumores sólidos con probabilidad de expresar napi2b.  
**Type/Phase:** II  
**Sponsored by:** Mersana Therapeutics, Inc  
**Signed date:** 07/03/2023
- Pinto Marín A.** Estudio de fase I/II para determinar la seguridad, farmacocinética y actividad clínica preliminar de bt8009 en pacientes con neoplasias malignas avanzadas que expresan nectina-4.  
**Type/Phase:** I  
**Sponsored by:** Bicycltx, Ltd  
**Signed date:** 09/10/2023
- Feliú Batlle J.** Primer estudio en humanos, fase 1 / 2a, multicentro, abierto para la evaluación de la seguridad, tolerabilidad, farmacocinética y eficacia de pbp1510 en pacientes con cáncer de páncreas avanzado/metastásico.  
**Type/Phase:** I  
**Sponsored by:** Prestige Biopharma Limited  
**Signed date:** 15/02/2023
- Feliú Batlle J.** Estudio aleatorizado global, multicéntrico, doble ciego de fase iii de carboplatino paclitaxel con incmga00012 o placebo para participantes con carcinoma escamoso localmente recurrente o metastásico inoperable del canal anal no tratado previamente con quimioterapia sistémica (pod1um-303/interaact).  
**Type/Phase:** III  
**Sponsored by:** Incyte Corporation  
**Signed date:** 23/03/2023
- Rodríguez Salas N.** Estudio de fase 3 abierto, aleatorizado, perioperatorio de dostarlimab en monoterapia frente al tratamiento estándar en pacientes con cáncer de colon resecable con pérdida del mecanismo de reparación de apareamiento de bases (dmmr)/inestabilidad de microsatélites alta (msi-h), t4n0 o estadio III, no tratado.  
**Type/Phase:** III  
**Sponsored by:** Glaxosmithkline Research And Development Limited  
**Signed date:** 27/06/2023
- Feliú Batlle J.** Predicción de riesgo de cardiotoxicidad en las unidades de cardiooncología. valor de la genética y diferentes biomarcadores. El registro cardiotox.  
**Type/Phase:** E0m prospectivo  
**Sponsored by:** Feliú Batlle Jaime  
**Signed date:** 28/06/2023
- Ghanem Cañete I.** ADN tumoral circulante como predictor de recaída en pacientes con cáncer de recto localmente avanzado tratados con terapia neoadyuvante total seguida de observación y espera o escisión total del mesorrecto basada en la evaluación clínica de la respuesta.  
**Type/Phase:** No EPA  
**Sponsored by:** Grupo Español Multidisciplinario En Cáncer Digestivo (Gemcad) Grupo Español Multidisciplinario Del Cáncer Digestivo  
**Signed date:** 08/06/2023
- Zamora Auñón P.** Ensayo de fase iii, aleatorizado, doble ciego, controlado con placebo para probar eftilagimod alfa (lag-3 soluble) en pacientes con cáncer de mama.  
**Type/Phase:** III  
**Sponsored by:** Immuteq, S.A.S  
**Signed date:** 05/07/2023
- Castelo Fernández B.** Estudio en fase III, aleatorizado, doble ciego y controlado con placebo de debio 1143 en combinación con quimioterapia con un derivado del platino y radioterapia de intensidad modulada con fraccionamiento convencional en pacientes con carcinoma escamoso de cabeza y cuello localmente avanzado apto para quimiorradioterapia definitiva (trilynx).  
**Type/Phase:** III  
**Sponsored by:** Merck Healthcare Kgaa  
**Signed date:** 19/04/2023
- Redondo Sánchez A.** Ensayo de fase III, multicéntrico, aleatorizado, controlado con placebo y con doble enmascaramiento sobre el tratamiento de mantenimiento con selinexor tras un tratamiento sistémico en pacientes con carcinoma endometrial avanzado o recurrente sin mutaciones en la proteína p53.  
**Type/Phase:** III  
**Sponsored by:** Karyopharm Therapeutics, Inc  
**Signed date:** 19/06/2023
- Feliú Batlle J.** Estudio fase 2, abierto, de múltiples cohortes para evaluar la eficacia y la seguridad del sar408701 en pacientes con tumores sólidos avanzados positivos a ceacam5.  
**Type/Phase:** II  
**Sponsored by:** Sanofi Aventis S.A  
**Signed date:** 23/03/2023
- Zamora Auñón P.** A multicentre, retrospective, and observational study using secondary data captured in the electronic health records of patients with early breast cancer who received a neoadjuvant and/or adjuvant treatment. Artemis.  
**Type/Phase:** E0m no prospectivo  
**Sponsored by:** Astrazeneca Uk Limited  
**Signed date:** 18/12/2023
- Pinto Marín A.** a phase IV, post-authorization safety study to investigate the long-term safety of lutetium (177lu) vipivotide tetraxetan in adult participants with prostate cancer.  
**Type/Phase:** IV  
**Sponsored by:** Novartis Pharma Services Ag  
**Signed date:** 24/10/2023
- Castelo Fernández B.** Estudio de fase II, aleatorizado, con doble enmascaramiento y controlado con placebo de cemiplimab en comparación con la combinación de cemiplimab más isa101b en el tratamiento de sujetos con cáncer orofaríngeo (cof) vph-16 positivo resistente al platino.  
**Type/Phase:** II  
**Sponsored by:** Isa Therapeutics B.V.  
**Signed date:** 12/06/2023
- Redondo Sánchez A.** Randomized, multicenter, open-label, phase 3 study of mirvetuximab soravtansine in combination with bevacizumab versus bevacizumab alone as maintenance therapy for patients with fra-high recurrent platinum-sensitive epithelial ovarian, fallopian tube, or primary peritoneal cancers who have not progressed after second-line platinum-based chemotherapy plus bevacizumab (gloriosa).  
**Type/Phase:** III  
**Sponsored by:** Immunogen Inc  
**Signed date:** 12/09/2023
- Castelo Fernández B.** Estudio multicéntrico, abierto, de fase I/II de eos884448 en combinación con el tratamiento estándar y/o terapias experimentales en participantes con tumores sólidos avanzados.  
**Type/Phase:** I  
**Sponsored by:** Iteos Belgium Sa  
**Signed date:** 13/09/2023
- Pinto Marín A.** Estudio en fase III aleatorizado, abierto y multicéntrico para determinar la eficacia y la seguridad de durvalumab en combinación con tremelimumab y enfortumab vedotina o durvalumab en combinación con enfortumab vedotina para el tratamiento perioperatorio en pacientes no aptos para cisplatino que se someten a cistectomía radical para cáncer de vejiga músculo-invasivo (volga).  
**Type/Phase:** III  
**Sponsored by:** Astrazeneca Ab  
**Signed date:** 22/05/2023

- Redondo Sánchez A.** Una comparación en fase iii aleatorizada y con doble enmascaramiento de un tratamiento a base de platino con tsr-042 y niraparib frente a la práctica habitual a base de platino como tratamiento de primera línea del cáncer ovárico epitelial no mucinoso en estadios III o IV.  
**Type/Phase:** III  
**Sponsored by:** Tesaro Inc.  
**Signed date:** 09/06/2023
- Zamora Auñón P.** Ensayo fase III de trastuzumab deruxtecan (t-dxd) con osin pertuzumab versus taxanos, trastuzumab y pertuzumab en primera línea de cáncer de mama metastásico her2 positivo (destiny-breast09).  
**Type/Phase:** III  
**Sponsored by:** Astrazeneca Ab  
**Signed date:** 01/06/2023
- Castelo Fernández B.** A dose-escalation and expansion study of the safety and efficacy of x1092 in combination with immuno-oncology agents in subjects with unresectable advanced or metastatic solid tumors.  
**Type/Phase:** I  
**Sponsored by:** Exelixis, Inc  
**Signed date:** 16/10/2023
- Pinto Marín A.** Estudio de fase 3, aleatorizado, abierto, controlado, de cabozantinib (xl184) en combinación con atezolizumab frente a una segunda terapia hormonal novedosa (thn) en pacientes con cáncer de próstata metastásico y resistente a la castración.  
**Type/Phase:** III  
**Sponsored by:** Exelixis Inc  
**Signed date:** 22/05/2023
- Castelo Fernández B.** Estudio de fase III, aleatorizado y abierto para evaluar pembrolizumab como tratamiento neoadyuvante y en combinación con la asistencia habitual como tratamiento adyuvante en el carcinoma epidermoide de cabeza y cuello locorregionalmente avanzado (cecc la), extirpable, en estadio III-IVA.  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 26/06/2023
- Redondo Sánchez A.** Randomized, controlled, open-label, phase iib/iii study of lubinectedin in combination qith doxorubicin versus boxorubicin alone as first-line treatment in patients with metastatic leiomyosarcoma.  
**Type/Phase:** III  
**Sponsored by:** Pharmamar, S.A.  
**Signed date:** 21/12/2023
- Espinosa Arranz E.** Estudio abierto, multicéntrico, de fase 1b/2 con e7386 en combinación con pembrolizumab en pacientes previamente tratados con tumores sólidos específicos.  
**Type/Phase:** I  
**Sponsored by:** Eisai Eurpe Limited  
**Signed date:** 16/06/2023
- Pinto Marín A.** Psmaddition: estudio de fase III, prospectivo, aleatorizado, abierto e internacional en el que se compara 177lu-psma-617 en combinación con el tratamiento de referencia con el tratamiento de referencia en monoterapia en pacientes varones adultos con cáncer de próstata metastásico sensible a hormonas.  
**Type/Phase:** III  
**Sponsored by:** Novartis Farmaceutica, S.A.  
**Signed date:** 27/06/2023
- Redondo Sánchez A.** Estudio de fase 3, aleatorizado, comparativo con tratamiento activo, abierto y multicéntrico para comparar la eficacia y la seguridad de mk-2870 en monoterapia frente al tratamiento elegido por el médico en participantes con cáncer de endometrio que han recibido previamente quimioterapia con un derivado del platino e inmunoterapia (engot-en23/gog3095).  
**Type/Phase:** III  
**Sponsored by:** Merck Sharp & Dohme Llc  
**Signed date:** 18/12/2023
- Pinto Marín A.** Estudio de escalada y expansión de dosis para evaluar la seguridad y la farmacocinética de x1092 en monoterapia y tratamiento combinado en pacientes con tumores sólidos localmente avanzados o metastásicos inoperables.  
**Type/Phase:** I  
**Sponsored by:** Exelixis, Inc  
**Signed date:** 08/08/2023
- Redondo Sánchez A.** Estudio aleatorizado, abierto, fase 3 de tisotumab vedotina frente a la quimioterapia elegida por el investigador en segunda o tercera línea en el cáncer de cuello uterino recidivante o metastásico.  
**Type/Phase:** III  
**Sponsored by:** Seagen, Inc  
**Signed date:** 24/07/2023
- Redondo Sánchez A.** Ensayo clínico aleatorizado fase I/II de selinexor más gemcitabina en determinados sarcomas de partes blandas y osteosarcomas avanzados.  
**Type/Phase:** I  
**Sponsored by:** Asociación Europea Y Latinoamericana Selnet Investigación En Sarcomas  
**Signed date:** 31/07/2023
- Redondo Sánchez A.** A phase 1, dose-finding study of debio 0123 as monotherapy in adult patients with advanced solid tumors, followed by an expansion part to assess safety and preliminary anti-tumor activity. Estudio de fase 1, de búsqueda de dosis de debio 0123 en monoterapia en pacientes adultos con tumores sólidos avanzados, seguido de una parte de ampliación para evaluar la seguridad y la actividad antitumoral preliminar.  
**Type/Phase:** I  
**Sponsored by:** Debiopharm, S.A. Debiopharm, S.A.  
**Signed date:** 22/11/2023
- Rodríguez Salas N.** Estudio abierto, multicéntrico de fase I/II de la vacuna genética nous-209 para el tratamiento de tumores sólidos con inestabilidad de microsatélites.  
**Type/Phase:** I  
**Sponsored by:** Nouscom Srl  
**Signed date:** 07/08/2023
- Castelo Fernández B.** Estudio observacional, internacional, retrospectivo de revisión de historias clínicas, para describir las características, patrones de tratamiento y resultados clínicos en los pacientes tratados con selpercatinib dentro de un programa de acceso temprano en España y Portugal (estudio selpiber).  
**Type/Phase:** EOm no prospectivo  
**Sponsored by:** Lilly, S.A.  
**Signed date:** 18/10/2023
- Zamora Auñón P.** Estudio fase III de post-neoadyuvancia que evalúa sacituzumab govitecan, un anticuerpo conjugado, en pacientes con cáncer primario de mama HER2 negativo con alto riesgo de recaída tras el tratamiento neoadyuvante estándar - sascia.  
**Type/Phase:** III  
**Sponsored by:** Fundacion Grupo Español De Investigación En Cancer De Mama Geicam  
**Gbg Forschungs Gmbh**  
**Signed date:** 05/10/2023
- Custodio Carretero A.** Estudio en fase III abierto, aleatorizado, multicéntrico, de 2 grupos de trastuzumab deruxtecan en sujetos con adenocarcinoma gástrico o de la unión gastroesofágica (uge) positivo para her2, metastásico y/o no resecable que han progresado durante o después de una pauta que contenía trastuzumab (destiny-gastric04).  
**Type/Phase:** III  
**Sponsored by:** Daiichi Sankyo Inc  
**Signed date:** 28/07/2023

- **Pinto Marín A.** A randomized open-label phase 2/3 study of bt8009 as monotherapy or in combination in participants with locally advanced or metastatic urothelial cancer (duravelo-2).

**Type/Phase:** III

#### STRATEGIC OBJECTIVES

• Genetic and epigenetic mechanisms play significant roles in tumor progression and the development of resistance to treatment. The dynamic nature of tumors and their ability to adapt and resist therapies pose critical challenges in clinical practice. In our research, we have employed diverse strategies to address these challenges. Firstly, we have focused on the identification of novel markers throughout the course of lung cancer, aiming to uncover crucial indicators of disease progression. Additionally, we have pursued various approaches to identify specific targets involved in drug response, striving to enhance treatment efficacy. Our investigations have transcended the realm of theory, extending into the realm of clinical practice through the meticulous analysis of human samples. It is through this granular examination that we have unraveled the alterations occurring at the individual patient level. Moreover, we have successfully pinpointed epigenetic changes in tumor suppressor genes that are strongly associated with drug resistance. Furthermore, we have made significant strides in understanding the role of epigenetic regulators in lung and melanoma, particularly in the context of oxidative stress. These findings shed light on novel avenues for therapeutic interventions and provide valuable insights into the complex interplay between genetic, epigenetic, and environmental factors in cancer progression and treatment resistance.

• Through the application of genomic, transcriptomic, and expression reactivation techniques, we have made significant strides in identifying a diverse array of biomarkers, including genes and microRNAs. These biomarkers hold immense potential for non-invasive cancer diagnosis, particularly in the context of non-small cell lung cancer (NSCLC). Our pioneering research has demonstrated the efficacy of liquid biopsy as a reliable method for detecting these biomarkers, providing a promising avenue for early detection and diagnosis of lung cancer. In addition, we have focused our attention on assessing chronic obstructive pulmonary disease (COPD) patients to establish the presence of early-stage lung cancer. By leveraging these advanced techniques, we have successfully unraveled the intricate transcriptomic alterations at miRNA level, occurring during the establishment of lung cancer in COPD patients. These groundbreaking findings not only hold great promise for improving the accuracy and efficiency of cancer diagnosis but also pave the way for personalized treatment approaches that can potentially enhance patient outcomes.

#### RESEARCH LINES

1. Identification of predictive epigenetic biomarkers in the appearance of resistance to treatment in solid tumors. Within the oncological markers, those for predictive use are the most necessary to help direct therapies since the vast majority of patients are diagnosed when the tumor needs to be treated. Platinum-derived compounds are the standard treatment for high-incidence tumors such as those of the lung, ovary, and rectum, so the fact of finding markers of response to their use would allow the selection of patients, optimizing treatment and associated healthcare costs.
  - 1.1. Lung cancer: In this line we have identified the methylation of the IGFBP3 gene promoter, whose epigenetic silencing is related to platinum resistance, extending its validation to cohorts of lung cancer patients likely to benefit from its use. In addition, the effectiveness of this biomarker is being tested in liquid biopsy as a non-invasive test. This line of research has given rise to three concatenated publications (Oncogene 2010 PMID: 20023704, Oncogene 2013 PMID: 22543588, Epigenetics 2014 PMID: 25482372) and a patent in the joint exploitation phase with a Spanish biotechnology company that has licensed said patent. This patent has passed a Pre-commercial Public Purchase in SERGAS and its validation in national phases has had the support of two concatenated RETOS projects.
  - 1.2. Brain Tumors: Regarding our line with brain tumors, we assess the methylation status of the MGMT gene in glioblastomas, as a care and research task since 2014 in our laboratory, developing advanced high-sensitivity technology for its detection in liquid biopsy. The data obtained to date in more than 200 patients in a prospective trial has given rise to a recent publication (Clinical epigenetics 2021 PMID: 33750464) and a second article in process, in addition to a European patent that has just passed PCT extension, and the award of two competitive public projects, one of them a DTS20 technological project for diagnosis and blood monitoring of patients with glioblastomas, and a PLEC project (RETOS) in collaboration with Val deHebron for fine-tuning diagnostic technologies and monitoring with tracers PET. In addition, these results have allowed the defense in 2021 of the doctoral thesis of Rocío Rosas, a member of our team, who has just started her independent line in January 2022 as a "Juan Rodés" researcher.
  - 1.3. Ovarian Cancer: We also have an open line in ovarian cancer, in which we have published a recent article (Clinical Epigenetics 2021 PMID: 34454589) and has allowed us to participate as work package leaders in a Transcan European project led by Italy, which has just successfully passed the first round of evaluation.
  - 1.4. Melanoma. In this emerging line, we are focusing on the characterization of the oncogenic role of MAFG in the response to immunotherapy in melanoma. Dr. Olga Vera, recently has incorporated to the group as a Sara Borrell postdoctoral researcher to lead this line. Previous studies of Olga have identified MAFG as a potential oncogene in melanoma and with potential therapeutic applications. The successful completion of our study will significantly advance our understanding of the role of MAFG in melanoma, determine new therapeutic targets and open new lines of research focused on dissecting the oncogenic role of MAFG.
2. Study of the molecular mechanisms underlying simultaneous resistance to platinum in cancer, through the epigenetic regulation of regulatory non-coding RNAs. In this line, changes in the expression of microRNAs and lncRNAs in platinum-sensitive and -resistant human NSCLC and ovarian cancer cell lines established in our research group are studied. We have identified 7 microRNAs whose expression appears to be under epigenetic regulation. One of them under the epigenetic regulation of its regulatory region (miRNA-7) as a potential predictive biomarker of response to platinum in ovarian cancer in terms of overall survival and time to progression. Product of the development of this line has been the publication of an article in the journal (Theranostics 2017 PMID: 29158814), as well as a patent that is in the PCT phase. Based on these findings, in 2016 we began a collaboration with the MOFFITT cancer center in Tampa (USA) to study Long Non-Coding RNAs (lnc-RNAs) and their possible regulation through DNA methylation in these cell lines. With this project we assess the changes in the expression of lncRNAs and their epigenetic regulation at the level of DNA methylation, characterizing two groups of lncRNAs differentially regulated in the development of resistance to cisplatin, and thus opening the way for the identification of new ones. As a result of the activity of this collaboration, highly innovative results were obtained in this field (Epigenetics PMID: 29436261 and Translational Research 2018, PMID: 30053382), and the research activity focused on the characterization of these novel biomarkers is maintained thanks to the funding supported for the PI21/00145 and Caixa Impulse projects.
3. Identification of new therapeutic targets. In recent years we have also identified the direct regulation of the MAFG gene through miR-7 in our experimental models. The function of MAFG is associated with detoxification in a situation of oxidative stress and our in vitro studies have shown its involvement in the appearance of cisplatin-resistant phenotypes. Our translational approach indicates that MAFG could be a diagnostic marker in patients with lung and ovarian cancer treated with platinum-based chemotherapy. To date, this line has provided four articles (Translational Research 2018, PMID: 30053382; Cell Biosci. 2019 PMID: 31406565; Arch Bronconeumol (Engl Ed). 2020.PMID: 31780284; Antioxidants (Basel).PMID: 32492865) and one European patent that has just been extended to national phases in the USA and Europe, which describes the clinical use of MAFG in patients with lung and ovarian cancer. We have currently addressed the study and use of MAFG as a therapeutic target through in vitro and in vivo assays after editing the MAFG gene using CRISPR/Cas9 technology, a project funded by the ISCIII (PI18/00050, P21/000145) in addition to extending and validating its use with the potential development of a kit for clinical use thanks to obtaining a RETOS project (RTC2019-007229-1) from the 2019 call and which is ongoing with the collaboration of H. Ramón y Cajal and the companies Aptus and Atrys.
4. Identification of biomarkers in exosomes such as liquid biopsy in patients with lung and ovarian cancer. With this line we intend, through a first basic approach, to characterize and compare the protein and microRNA content of exosomes from the secretome of paired sensitive and resistant lung cancer cell lines. In the translational study of the project, the candidates identified in the cell lines in circulating exosomes from samples of lung and ovarian cancer patients are being validated, which have given rise to different results. On the one hand, two candidate miRNAs with prognostic significance in this pathology, and on the other hand, a miRNA with possible universal value has been identified as endogenous capable of normalizing the value of the content of the exosomal miRNoma, both in healthy individuals and in individuals with different tumor types. These results have given rise to a European patent that is in national phases and the obtaining of a Caixa Impulse Validate project for the constitution of a Spin-off, in our institution focused on the development of a first RUO product for the normalization of exosomal content. In human blood samples, in addition to two manuscripts in preparation, as well as the defense of Julia Jiménez's thesis in July 2019.
5. Identification of pharmacogenetic biomarkers associated with efficacy and toxicity of cancer treatments. Led by Dr R Rosas.  
 Pharmacogenetics is the field of knowledge that seeks to identify genetic variants to provide information that will allow a better understanding of drug response in terms of efficacy and toxicity, thus contributing to personalised precision medicine. Despite progress in the research and development of new cancer treatments, the efficacy and safety of these drugs vary widely between patients. In this context, this line of research aims to understand how genetic variations in individuals may influence the efficacy and toxicity

of cancer treatments. The use of pharmacogenetic biomarkers is a reality in routine clinical practice and has been shown to improve the efficacy and reduce the side effects of treatments, resulting in a better quality of life for patients and reduced costs for the national healthcare system. Our ultimate goal is to identify new pharmacogenetic biomarkers that will allow better selection of cancer treatments for each patient, thus promoting the medicine of the future with a personalised and individualised approach. This line currently has two projects awarded in public (PI22/00128) and private (José Luis Castaño-SEQC Foundation) competitive calls, led by Dr Rocío Rosas.

6. Identification of microRNA hypermethylation patterns associated with an increased risk of developing non-small cell lung cancer in patients with mild COPD and moderate to high tobacco consumption. In recent years, the potential role of epigenetic alterations in the development of lung cancer in COPD patients, mediated by changes in the activity of various microRNAs, small non-coding RNA molecules (19-25 nucleotides) with a regulatory function of gene expression, which induce the degradation of messenger RNA or inhibit its translation, has gained particular importance. It is therefore interesting to consider whether there may be hypermethylation profiles of different microRNAs that are associated with an increased risk of lung cancer in COPD patients, which would facilitate appropriate risk selection for screening programmes. This line currently has one project, which was awarded in a competitive public call (PI22/001764), under the co-direction of Olga Pernía Arias.
7. Fine-tuning of high performance techniques available to the National Health System (NHS). (NGS and Characterization of DNA methylation status). Implicit in the group's cross-cutting lines and in our commitment to support the implementation in the NHS of the technological advances derived from our research activity, we have fine-tuned the characterization of the methylation status at the PAZ genetics facilities of DNA through the use of these new aspects of NGS applied to the field of epigenetics, both from a global approach and limited to certain regions, to implement its possible care applicability in cancer patients through personalized panels in solid tumors including glioblastomas, through the use of Methyseq technology and the 850K EPIC-arrays. Likewise, in these years we have fine-tuned the use of commercial NGS panels in strict compliance with quality regulations to address the characterization of the genetic profile of tumors in patients with lung cancer. Thanks to the addition to our team such as Dra Rocío Rosas, Juan Rodés from 2022, we are starting the hospital implementation phase, in which we have already tested careers with various platforms from different commercial houses. Its fine-tuning would allow its use both for research activities and its future healthcare applicability, especially in the classification of brain tumors. This activity is financed by the Spanish Group of Transversal Oncology and Rare Orphan Tumors (Getthi), which has just financed the group with a competitive project for this purpose. Given the experience acquired by the group in the use of massive data, we have been able to participate in the EU ISIDORE project and have begun the study of predictive bioinformatic matrices of response to platinum treatment. We intend to combine the information available in public domain databases with relevant clinical information associated with our own experimental results (methylation and gene expression microarrays and microRNAs, bisulfite sequencing, RNAseq and miRNAseq) to generate a predictive matrix of response to treatment. With these analytical models, we intend to identify "global markers" that define a predictive profile for treatment with platinum in lung and ovarian cancer based on the transcriptome, microRNome, and/or methylome. **This research line is led by Carlos Rodríguez Antolín, Bioinformatic of the group.**

### Clinical trials

- **de Castro Carpeño J.** A phase 1 study to assess the effect of hepatic impairment on the pharmacokinetics of repotrectinib in advanced cancer patients.  
*Type/Phase: I*  
*Sponsored by: Turning Point Therapeutics, Inc*  
*Signed date: 21/06/2023*
- **de Castro Carpeño J.** A phase iii, open-label, randomised, multicentre study of ceralasertib plus durvalumab versus docetaxel in patients with advanced or metastatic non-small cell lung cancer without actionable genomic alterations, and whose disease has progressed on or after prior anti-pd-(l)1 therapy and platinum-based chemotherapy: latify.

**Type/Phase: III**

**Sponsored by:** Astrazeneca Ab

**Signed date:** 12/01/2023

- **de Castro Carpeño J.** Estudio abierto seguido de un estudio aleatorizado, doble ciego, controlado con placebo, de grupos paralelos y un estudio de extensión para investigar la seguridad y eficacia de gb1211 (un inhibidor de la galectina-3) en combinación con atezolizumab en pacientes con cáncer de pulmón no microcítico (cpnm).

**Type/Phase: I**

**Sponsored by:** Galecto Biotech Ab

**Signed date:** 07/02/2023

- **de Castro Carpeño J.** Estudio de diseño abierto de 2 partes, multicentro y de fase 1b de datopotamab deruxtecan (dato-dxd) en combinación con inmunoterapia con o sin carboplatino en participantes con cáncer de pulmón de células no pequeñas metastásico o avanzado.

**Type/Phase: I**

**Sponsored by:** Astrazeneca Ab

**Signed date:** 31/05/2023

- **de Castro Carpeño J.** Estudio de fase I, con aumento escalonado de la dosis y ampliación de cohortes de tsr-022, un anticuerpo monoclonal anti-tim-3, en pacientes con tumores sólidos avanzados (amber).

**Type/Phase: I**

**Sponsored by:** Tesaro Inc.

**Signed date:** 18/04/2023

- **de Castro Carpeño J.** Estudio en fase II de tratamiento combinado con adagrasib en pacientes con carcinoma pulmonar no microcítico avanzado con mutación del gen kras g12c.

**Type/Phase: II**

**Sponsored by:** Mirati Therapeutics, Inc

**Signed date:** 21/06/2023

- **de Castro Carpeño J.** Ensayo clínico fase II de quimio-inmunoterapia neoadyuvante seguida de tratamiento adyuvante según el estado de resección para el tratamiento de pacientes con cáncer de pulmón no microcítico (cpnm) con diagnóstico de tumor de pancoast. un estudio exploratorio multicéntrico.

**Type/Phase: II**

**Sponsored by:** Fundación Gecep

**Signed date:** 06/02/2023

- **de Castro Carpeño J.** Estudio de fase 1/2a, multicéntrico y abierto para evaluar la seguridad, la tolerabilidad, la farmacocinética y los indicios preliminares de actividad antitumoral basados en terapias combinadas con jab-3312 en pacientes adultos con tumores sólidos avanzados.

**Type/Phase: I**

**Sponsored by:** Jacobio Pharmaceuticals Co, Ltd

**Signed date:** 21/04/2023

- **de Castro Carpeño J.** Estudio de fase III aleatorizado y doble ciego de bgba1217, un anticuerpo anti-tigit, en combinación con tislelizumab frente a pembrolizumab en pacientes con cáncer de pulmón no microcítico irreseccable o metastásico no tratado previamente, con expresión de pd-1 y localmente avanzado.

**Type/Phase: III**

**Sponsored by:** Beigene Usa, Inc

**Signed date:** 14/02/2023

- **de Castro Carpeño J.** A randomized, double-blind, multi-center, phase III study of ak112 or placebo combined with pemetrexed and carboplatin in patients with egfr-mutant locally advanced or metastatic non-squamous nscl who have failed egfr-tki treatment (harmoni).

**Type/Phase: III**

**Sponsored by:**

**Signed date:** 28/09/2023

- **de Castro Carpeño J.** Estudio en fase IB/IIA, abierto y multicéntrico para evaluar la eficacia, la seguridad, la tolerabilidad y la farmacocinética del inhibidor de atr m1774 en combinación con cemiplimab en participantes con cáncer de pulmón no microcítico no escamoso que ha progresado a pesar de haber recibido tratamiento anti-pd-(l)1 y tratamiento con un derivado del platino.

**Type/Phase: I**

**Sponsored by:** Merck Healthcare Kgaa

**Signed date:** 14/09/2023

- **de Castro Carpeño J.** Estudio abierto, en fase I/II, sobre t3p-y058-739, una cepa genéticamente

modificada de la bacteria yersinia enterocolitica, en pacientes con tumores sólidos avanzados.

**Type/Phase: I**

**Sponsored by:** T3 Pharmaceuticals Ag

**Signed date:** 12/06/2023

- **de Castro Carpeño J.** Rosy-d: estudio maestro de continuación en pacientes que hayan completado un estudio en oncología previo con durvalumab y que el investigador considere que van a beneficiarse clínicamente de continuar el tratamiento.

**Type/Phase: III**

**Sponsored by:** Astrazeneca Ab

**Signed date:** 25/04/2023

- **de Castro Carpeño J.** A phase 3, multicenter, randomized, open-label study evaluating efficacy of sotorasib platinum doublet combination versus pembrolizumab platinum doublet combination as a front-line therapy in subjects with stage iv or advanced stage iiib/c nonsquamous non-small cell lung cancers, negative for pd-1, and positive for kras p.g12c (codebreak 202).

**Type/Phase: III**

**Sponsored by:** Amgen, Inc

**Signed date:** 16/10/2023

- **de Castro Carpeño J.** Estudio de plataforma de fase 2, aleatorizado, abierto que utiliza el protocolo maestro para evaluar nuevas combinaciones con inmunoterapia en participantes con cáncer de pulmón no microcítico localmente avanzado/metastásico, seleccionados según la expresión del ligando de muerte programada 1, que no han recibido tratamiento previo.

**Type/Phase: II**

**Sponsored by:** Glaxosmithkline Research And Development Limited ,

**Signed date:** 26/07/2023

- **de Castro Carpeño J.** Estudio en fase IB/IIA de la seguridad y la tolerabilidad de bemcentinib con pembrolizumab/carboplatino/pemetrexed en sujetos con cáncer de pulmón no microcítico (cpnm) no epidermoide avanzado o metastásico con/sin mutación de stk11 no tratado previamente.

**Type/Phase: I**

**Sponsored by:** Bergenbio Asa

**Signed date:** 20/10/2023

- **de Castro Carpeño J.** An open-label, phase 2b, global multicenter cohort trial to assess the safety and efficacy of zipalertinib in patients with locally advanced or metastatic non-small cell lung cancer with exon 20 insertion and uncommon/single or compound epidermal growth factor receptor mutations.

**Type/Phase: IIb**

**Sponsored by:** Taiho Oncology, Inc

**Signed date:** 07/11/2023

- **de Castro Carpeño J.** Ensayo abierto de un solo brazo para evaluar la actividad antitumoral, la seguridad y la farmacocinética de sar408701 utilizado en combinación con ramucirumab en pacientes con carcinoma pulmonar no microcítico no escamoso metastásico (cpnm nem) con tumores ceacam5 positivos, tratados previamente con quimioterapia a base de platino y con un inhibidor de puntos de control inmunitario.

**Type/Phase: II**

**Sponsored by:** Sanofi-Aventis Recherche & Development

**Signed date:** 30/05/2023

- **de Castro Carpeño J.** A phase 2, open-label, parallel cohort study of subcutaneous amivantamab in multiple regimens in patients with advanced or metastatic solid tumors including epidermal growth factor receptor mutated non-small cell lung cancer (paloma-2).

**Type/Phase: II**

**Sponsored by:** Janssen Cilag International Nv

**Signed date:** 04/10/2023

- **de Castro Carpeño J.** Estudio en paraguas de fase ib/ii, sin enmascaramiento, multicéntrico y aleatorizado para evaluar la eficacia y la seguridad de combinaciones de tratamientos basados en múltiples inmunoterapias en pacientes con carcinoma de pulmón no microcítico metastásico (morphus pulmonar).

**Type/Phase: I**

**Sponsored by:** Genentech Inc

**Signed date:** 18/10/2023

- **de Castro Carpeño J.** Estudio en fase II abierto, de un solo grupo y multicéntrico para evaluar la eficacia y la seguridad de taletrectinib en pacientes con cpm ros1 positivo avanzado o metastásico y otros tumores sólidos.

**Type/Phase:** II

**Sponsored by:** Anheart Therapeutics Inc

**Signed date:** 27/10/2023

- **de Castro Carpeño J.** Estudio en fase III, aleatorizado y abierto para evaluar zimberelimab y domvanlimab en combinación con quimioterapia frente a pembrolizumab con quimioterapia, como tratamiento de primera línea de pacientes con cáncer de pulmón no microcítico metastásico sin aberraciones tumorales genómicas del receptor del factor de crecimiento epidérmico ni de la quinasas del linfoma anaplásico.

**Type/Phase:** III

**Sponsored by:** Gilead Sciences Inc

#### STRATEGIC OBJECTIVE

- The systematic use of magnetic resonance imaging (MRI) has dramatically increased the diagnosis of patients with vestibular schwannoma (VS). The majority of patients with VS complain of hypoacusis or tinnitus, and very few present more debilitating symptoms. Therefore, the approach with a patient with VS is complex because the treatment of the tumour is directed towards avoiding complications arising from its growth and not necessarily towards improving the patient's quality of life. Currently, there are no factors that allow us to predict the growth of vestibular schwannoma.
- Recent advances in the field of oncogenetics have allowed us to better understand the development of VS.
- The study of the correlation between clinical variables related to the biological behaviour of VS and its genetic and epigenetic disorders aims to find the factors that predict the behaviour of VS. This will help us

identify patients who need active treatment of the tumour and avoid the morbidity associated with the treatment in those who do not need it.

- The cochlear implant (CI) is currently the only solution for relieving the condition in patients with severe or profound hypoacusis who do not benefit from a prosthetic adaptation with a conventional hearing aid. It is estimated that there are currently 120,000 adults in Spain with profound sensorineural hypoacusis. In recent years, new hearing implants have been developed including osseointegrated implants and active middle ear implants. It's excellent and often spectacular results and its low rate of complications have transformed CI from an innovative technology in the experimental phase to a routine, safe and effective procedure, capable of returning deaf individuals to the hearing world and ending their isolation, increasing their quality of life. Over the past decade the relationship between hearing loss and

cognitive decline in the older population has become the subject of research. We also explore the relationships between the cognitive function and the audiometric performances in patients wearing a CI.

- Moderate to severe hypoacusis is one of the most prevalent medical problems. Ciliated sensory cells and neurons do not regenerate in mammals, which is the main cause of sensorineural hearing loss (SNHL). Mutations altering the levels of Insulin like growth factor type 1 (IGF-1) cause SNHL in humans and mice. IGF-1 is an essential factor in the postnatal development of mammals, and its level decreases with ageing. We are studying the participation of IGF-1 in the pathophysiology of SNHL, as well as the molecular signalling networks conferring specificity in the otic cellular response to IGF-1. We are studying the signals that regulate otic damage with the objective of identifying the key factors implicated in functional repair and regeneration of inner ear cells. In short, our work contributes to the study of auditory pathophysiology, with the ultimate objective of investigating the potential clinical usefulness of IGF-1 and downstream signalling in human sensorineural deafness.
- Bell's palsy is the most common diagnosis associated with facial nerve weakness or paralysis. However, not all patients with facial paresis / paralysis have Bell's palsy. Other common causes include treatment of vestibular schwannoma, head and neck tumors, iatrogenic injuries, Herpes zoster, or trauma. The approach to each of these conditions varies widely, The addition of adjunctive major or minor facial procedures in the context of a multidisciplinary Facial Paralysis Unit improves the final facial outcome.

#### RESEARCH LINES

- Tumors of the CNS: vestibular schwannoma, meningiomas, gliomas, and other: surgery, oncogenetics, quality of life, etc.
- Auditory implants: cochlear implants, middle ear implants, bone-conduction implants: surgical aspects, telephone use, quality of life, perception of music, cognitive decline, anatomy based fitting, etc.
- IGF-I deficiency: a rare syndromic human deafness.
- Neurobiology of hearing: molecular and cellular bases of hearing loss of different aetiology (genetic, noise exposure, malnutrition, and ototoxic drugs). Identification of transcriptional networks.
- Development of experimental models of deafness (genetic, noise exposure, malnutrition, ototoxic drugs and surgery associated trauma) for pre-clinical studies with potential therapeutic molecules, thus identifying possible therapeutic targets, potential markers for diagnosis and generation of vital guidelines.
- Head and Neck tumors and voice pathology.
- The role of cellular senescence in the development of the inner ear and the auditory pathology.
- Studies on three systems implicated in the development of tumor metastasis: the tyrosine kinase receptors EGFR/ErbB2; the non-receptor tyrosine kinase c-Src; and the adaptor protein Grb7.
- Facial paralysis: evaluation, diagnosis and surgery
- Thyroid cancer
- . Vocal fold paresis and paralysis: evaluation, diagnosis and treatment options

#### STRATEGIC OBJETIVES

- The fundamental interest of our research group is centered in the study of molecular biomarkers that have a direct implication in the handling of the cancer patients with the last aim to identify and to validate therapeutic targets.
  - Ovarian cancer Research Line
- The ovarian carcinoma is the main cause of gynecological cancer mortality in the western societies. Nevertheless, the classic parameters are imperfect predictors for patients outcome, partly due to the complexity of the molecular genetic events that sublie these tumors and to the fact that they are not totally known. Research on this field could identify more precise markers to correctly stratify the patients according to their probability to recur and response to treatments.
- Angiogenesis, epithelial to mesenchymal transition and hypoxia are processes demonstrated to have an important role in the development of these tumors. The main objective of this line of investigation, therefore, is to identify discrete markers or gene expression profiles related to these events, with predictive and prognostic value for ovarian cancer patients.
  - Endometrial cancer Research Line
- Endometrial carcinoma is the fourth most common cancer in women in the developed world. Histomorphologic criteria are not strongly enough tools to distinguish more aggressive tumors. Based on molecular characterization, risk stratification systems could be useful for decision making.
- The main objective of this line of investigation, therefore, is to identify molecular markers with predictive and prognostic value for endometrial cancer patients.
  - Breast cancer Research Line
- C-Src is sobreexpressed and/or hyperactive in breast carcinoma biopsies and their implication in the tumorigenesis has been proved in murine models.
- Our studies on genetically modified human breast cancer cells and mice can establish the relevance of the function of scaffolding of SFKs in breast cancer. In addition, our work can lead to the development of new prognosis and therapeutic tools to improve the treatment of the breast cancer.
- Angiogenesis and breast cancer. Angiogenesis is a key process in tumor development. Our group has been working for years on the search of biomarkers related to this process. Specifically on breast cancer, it is important to identify patients that will benefit of evacizumab containing regimes.
  - Sarcomas Research Line
- Bone and Soft tissue sarcomas includes a group of heterogeneous pathologies that were traditionally treated in the same way. The clinical investigation has allowed the identification of sub-groups with different response to treatments. The objective of this line of work is to find biomarkers for the best stratification of the patients, as well as to get a better knowledge of the molecular mechanisms for the development of these tumors.
  - Neuroendocrine tumors Research Line.
- The neuroendocrine tumors (NET) include heterogeneous neoplasias, regarding morphologic and functionally features. They constitute a challenge for the medical management, mainly regarding diagnose and handling. Although we have improve the knowledge of molecular events related to their development in the last decade, we need to better known this tumors, in order to establish an early detection, that it improves the rates of survival.
  - In vitro 2- and 3D cell culture models for functional studies.
- The identification of potential markers in different pathologies might be complemented by functional studies, focused on the characterization of cancer and estromal cell features, important for tumor development that it improves the rates of survival.

#### STRATEGIC OBJECTIVE

- Characterize vitamin D action in stem cells and tumor microenvironment in colorectal cancer.
- Comparative study of early onset colorectal cancer (EOCRC) vs. late onset colorectal cancer (LOCRC).
- Analysis of tumor invasion, metastasis and therapy resistance mechanisms in solid tumors.

#### RESEARCH LINES

- Study of vitamin D effects on patient-derived colon normal and cancer-associated fibroblasts and organoids.
- Comparative study of early onset colorectal cancer (EOCRC) vs. late onset colorectal cancer: Effects of vitamin D (LOCRC).
- Identification of early diagnostic biomarkers in liquid biopsy in colorectal cancer.
- Cell plasticity and tumor metastasis.
- Mechanisms of tumor resistance

#### STRATEGIC OBJECTIVE

- Development of multiomic approaches aimed at improving the diagnosis of hereditary metabolic diseases.
- Study of mitochondrial dysfunction and oxidative stress as a modifier of the clinical phenotype and as a potential therapeutic target in organic acidurias.
- Development of novel therapeutic strategies: RNA therapies, pharmacological chaperone, repurposing
- Development of animal and cellular models.
- Pathophysiology studies targeted to identify new druggable targets
- Registry of patients with hereditary metabolic diseases.

#### RESEARCH LINES

- Improved diagnosis of congenital defects of glycosylation and mitochondrial defects through the application of genomic techniques
- Identification of deep intronic mutations in metabolic disorders gene by transcriptional analysis. Functional validation in cellular splicing systems.
- Development of antisense therapy and pharmacological chaperones as therapeutic approaches
- Study of oxidative stress and evaluation of common signatures of neuropathogenicity and cardiotoxicity in congenital defects of glycosylation, organic acidemias and mitochondrial diseases.
- Evaluation of drugs aimed at the recovery of mitochondrial function and biogenesis.
- Search for biomarkers as predictors of severity and as systems for the evaluation of pharmacological therapies.
- Characterization of pathophysiology in a murine model of propionic acidemia.
- Identification of dysregulated miRNA in propionic acidemia and characterization of its association with pathology and its usefulness as biomarkers.
- Generation of iPS from patient-derived fibroblast with organic acidemia and congenital defects of glycosylation. Differentiation to hepatocytes, neural progenitors or cardiomyocytes.

#### RESEARCH ACTIVITY

- **Rosa Torres Jiménez.** Investigadora Senior (Contrato Miguel Servet - I2) Jefe de Laboratorio. FIBHULP

#### STRATEGIC OBJECTIVE

- Our research is especially focused on the molecular diagnosis of dyslipidemias of genetic origin. Among dyslipidemias, Familial Hypercholesterolemia (FH) stands out for its impact on health. FH is an important risk factor in the development of early cardiovascular disease. Patients with pathogenic variants in the main genes involved in FH (LDLR, APOB, PCSK9, and LDLRAP1) are at high risk of premature coronary disease. The autosomal dominant hipercolesterolemia is caused by pathogenic variants at LDLR, APOB or PCSK9 genes. Patients with FH have a 50% of having a child with the condition. In this context, early detection of genetic alterations in patient's relatives is essential in order to establish an early treatment. Genetic studies of the family have proven to be cost-effective. The massively parallel sequencing technology (NGS) provide an useful tool to carry out this type of studies. However, it is important not only the detection of new variants but the characterization of them to determine their impact or pathogenicity. For this purpose, our research group has developed and validated functional in vitro studies for the characterization of genetic variants in the main genes associated with FH.
- An important percentage of patients with hypercholesterolemia do not present pathogenic variants in the most frequent genes. Our group has a line of research focused on the search for new candidate genes and epigenetic causes related with altered lipid metabolism. We have developed in vitro studies to determine the impact of microRNAs on the expression of LDLR and PCSK9.
- In addition to FH, we also study other genetic dyslipidemias such as familial hypertriglyceridemia and other "rare" dyslipidemias that are often not diagnosed with the usual diagnostic tools.

#### RESEARCH LINES

- Molecular diagnosis of familial hypercholesterolemia by massive sequencing of a panel of genes. Study of the exome to detect new candidate genes.
- Functional studies of genetic variants in LDLR, PCSK9 and APOB in cellular model.
- Study of microRNAs as modulators of cholesterol regulation and their impact on familial hypercholesterolemia.
- Molecular diagnosis of hypertriglyceridemia and other "rare" dyslipidemia.
- Genetic diagnosis of metabolic diseases.

### 3.5.9 Human Genetic Variability Group

Publications:7 | Q1:4

#### COMPOSITION

##### Ana Fernández Santander.

Catedrática de Genética del Departamento de Medicina. Universidad Europea de Madrid

- **Beatriz Antón Pascual.** Médico Adjunto en Oncología Médica. Hospital Universitario Doce de Octubre

- **María Gaibar Alonso.** Profesora contratada doctora. Universidad Camilo José Cela
- **Diego Malón Jiménez.** Médico Adjunto en Oncología Médica. Hospital Universitario de Fuenlabrada
- **Apolonia Novillo Villajos.** Profesora ayudante doctor. Universidad Complutense de Madrid
- **José María Rodríguez Piñas.** Profesor Adjunto. Universidad Europea de Madrid
- **Alicia Romero Lorca.** Catedrática de Bioquímica y Biología Molecular. Universidad Europea de Madrid

#### STRATEGIC OBJECTIVE

- The final objective of our group is to contribute to pharmacogenetics and precision medicine. We try to identify genetic biomarkers that could be used to predict who patients will have better response, benefit and outcome and lesser toxicity to specific drugs.
- Planned Research Projects
  - Genetic biomarkers of toxicity in oncological immunotherapy
  - Genetic biomarkers of efficacy in oncological immunotherapy
  - Worldwide genetic variability in polymorphisms associated with COVID severity
- Transfer of Results
  - Contributions in national and international congresses
  - Publications in JCR journals
- Training and education programme
  - Students of medicine, nursery, etc, will be able to join to the group as PhD students
- Dissemination
  - Publications in JCR journals and national and international congresses
  - Guides for physicians
- Internationalization
- The team will call for European programs when specific programs related to our research will be opened. Gender Equality Quality Program: Gender equality is achieved in our group because women and men have the same conditions and opportunities to belong and to work with us.

#### RESEARCH LINES

- Pharmacogenetics and cancer
  - Pharmacogenetics in breast cancer
  - Pharmacogenetics in colorectal cancer
  - Pharmacogenetics and immunotherapy
- Genetic variability of human populations

#### RESEARCH ACTIVITY

## 3.6 Surgery, Transplant and Health Technologies Area

Documents: 208 | Originals: 152 | D1: 29 | Q1: 84

**Area coordinator: Nuria Vilaboa Díaz**

*coordinadorcirugia@idipaz.es*

### RESEARCH GROUPS

**3.6.1** Bone Pathophysiology and Biomaterials - Nuria Vilaboa Díaz

**3.6.2** Cellular Engineering - María Paz de Miguel González

**3.6.3** Clinical Pharmacology - Antonio J. Carcas Sansuán

**3.6.4** Osteoarticular Surgery Research - GICOA - Enrique Gómez Barrena

**3.6.5** Translational Research in Maxillofacial Surgery and Head and Neck Cancer  
- José Luis Cebrián Carretero/Ana Sastre Perona

**3.6.6** Patients Safety and Quality Research - Elena Ramírez García

**3.6.7** Translational Research and Innovation in General and Digestive Surgery  
- Constantino Fondevila Campo

Strategic Objectives	Development forecast for the coming years:	Actions
<p>Surgery, Transplant and Health Technologies Area is composed of 10 very heterogeneous groups and the absence of common activities between them make the general objectives equivalent to the sum of the research lines of each of the groups. The main objective of the area is to locate points where synergies between groups can be established</p>	Cellular and organ engineering, underdeveloped.	Support researchers to continue being a reference in the national area.
	Stem and precursor cells. This is one of the most successful lines and the one that has motivated more collaborations between them. It is certainly one of the possibilities for the future	Identify and promote at international level the new research lines identifying as innovative and competitive.
	Animal models. Cellular models. They require personnel trained in cell culture techniques and who masters animal models of human disease	
	Minimally invasive surgery: one of the most important translational fields in recent years, a permanent demand from the population and an indicator of the quality of healthcare systems

#### STRATEGIC OBJECTIVES

- The Bone Physiopathology and Biomaterials group includes basic and clinical researchers from IdiPAZ. The group has broad experience in clinical and basic research on biomaterials for orthopaedic implants and bone tissue engineering. The main goal of the group is to improve the clinical outcome of orthopaedic surgery through research on implants and biomaterials used for manufacturing prosthetic devices.
- The group is interested in the study of mechanisms underlying joint diseases, in developing tissue engineering-based therapies as well as in evaluating biomaterials manufactured by collaborative partners. Specific areas of clinical research on implants include follow-up studies on various devices in use for osteoarticular surgery.
- The team is also involved in the manipulation of the heat shock response to generate transcriptional targeting strategies that provide tight control of the expression of therapeutic proteins. Their potential application in bone and wound healing therapies as well as in the generation of influenza vaccines with anti-herpetic activity are being explored. This strategic objective also includes the identification and characterization of the heat shock transcription factor 1 (HSF1) inhibitors as potential antitumoral agents.

#### RESEARCH LINES

- Clinical research in implants for bone repair
- Study of the pathophysiology of joint diseases and mechanisms involved in bone regeneration.
- Evaluation of new biomaterials, including scaffolds and nanoparticles, for their potential use in wound healing and bone tissue engineering application.
- Development of gene therapy switches to control the expression of transgenes to a) enhance bone regeneration and wound healing or b) generate influenza vaccines. Application of non-invasive near-infrared energy combined with photothermal nanoparticles.
- Identification and characterization of HSF1 inhibitors as antitumoral drugs.

## 3.6.2 Cellular Engineering Group

Publications:3 | Q1:3

### COMPOSITION

**María Paz de Miguel González.**

Investigadora Senior (Contrato Miguel Servet - 12). Jefe de Laboratorio. FIBHULP

- **Marta Cadenas Martín.** Investigador Predoctoral. FIBHULP
- **María Pilar González-Peramato Gutiérrez.** Facultativo Especialista de Área en Anatomía Patológica. Hospital Universitario La Paz
- **Manuel Nistal Martín de Serrano.** Catedrático Departamento de Histología y Neurociencia. Facultativo de Medicina. Universidad Autónoma de Madrid
- **Javier Francisco Regadera González.** Catedrático. Departamento de Histología y Neurociencia. Facultad de Medicina. Universidad Autónoma de Madrid
- **Elsa Umiri Condo.** Técnico de Laboratorio. FIBHULP

### STRATEGIC OBJECTIVE

- To ascertain the mechanisms responsible for converting a differentiated cell into a pluripotent cell and at the same time how these establish a relationship between cellular reprogramming and oncogenic transformation, in order to use divergent pathways governing these processes as clinical early diagnostic tools and therapeutic targets for clinical intervention.
- To develop new cell therapy approaches in diverse organs transplants.

### RESEARCH LINES

- Molecular mechanisms of cellular reprogramming in normal and neoplastic environments.
- New techniques and therapies in transplants.

### RESEARCH ACTIVITY

### 3.6.3 Clinical Pharmacology

Publications:16 | Q1:7

#### COMPOSITION

##### Antonio Javier Carcas Sansuán.

Facultativo Especialista de Área en Farmacología Clínica. Hospital Universitario La Paz. Profesor Titular. Facultad de Medicina. Universidad Autónoma de Madrid

- **Pilar Ayllón García.** Técnico de laboratorio. Universidad Autónoma de Madrid
- **Alberto Borobia Pérez.** Facultativo Especialista de Área en Farmacología Clínica. Hospital Universitario La Paz
- **Raquel de Madariaga Castell.** Enfermera. Coordinadora de Ensayos Clínicos. FIBHULP
- **Laura Díaz García.** Facultativo Especialista en Farmacología Clínica. Hospital Universitario La Paz
- **Blanca Duque Bascuñana.** Responsable de calidad. Universidad Autónoma de Madrid
- **Jesús Frías Iniesta.** Jefe de Servicio de Farmacología Clínica. Hospital Universitario La Paz.

#### STRATEGIC OBJECTIVE

- Clinical pharmacology, as a scientific and professional discipline, has the objective of achieving an effective, efficacious and efficient use of drugs, at both the individual and group level. This means that Clinical Pharmacology is a cross-sectional discipline that must establish collaborations with numerous other disciplines and health professionals.
- In this context and in the field of clinical research, the interests of our group are focused on two fundamental aspects:
  1. Customisation of drug treatments: research and development of techniques and methods that individualise the use of drugs, improve their efficacy and reduce their risks.
  2. The improvement of treatment by obtaining high quality evidence on the efficacy of clinical trials, strategies of identification, evaluation and prevention of adverse reactions to medication (pharmacovigilance programmes) and evaluation of the suitability of their use and effectiveness (studies on the use of medication).

Catedrático. Facultad de Medicina. Universidad Autónoma de Madrid

- **Alberto García Bartolomé.** Investigador Postdoctoral. Hospital Universitario La Paz
- **Irene García García.** Facultativo Especialista en Farmacología Clínica. Hospital Universitario La Paz
- **Cristina López Crespo.** Enfermera. Coordinadora de Ensayos Clínicos. FIBHULP
- **José Carlos Martínez Ávila.** Investigador Postdoctoral. Hospital Universitario La Paz
- **Lucía Martínez de Soto.** Coordinadora de Ensayos Clínicos. FIBHULP
- **Vega Mauleón Martínez.** Enfermera. Coordinadora de Ensayos Clínicos. FIBHULP
- **Pablo Molina Benítez.** Investigador Predoctoral. FIBHULP
- **Paloma Moraga Alapont.** Gestora de proyectos SCReN (Spanish Clinical Research Network). FIBHULP
- **María Cristina Murano Murano.** Investigador Postdoctoral. FIBHULP
- **Paula Prieto Correa.** Monitora de Ensayos Clínicos. FIBHULP
- **Rocío Prieto Pérez.** Gestora de proyectos SCReN (Spanish Clinical Research Network). FIBHULP
- **Laura Vitón Vara.** Enfermera. Coordinadora de Ensayos Clínicos. FIBHULP
- **Hoi Yan Tong.** Responsable de Farmacovigilancia. Hospital Universitario La Paz

#### RESEARCH LINES

- Therapeutic drug monitoring (TDM) – Development of individualised therapeutic drug monitoring programmes and pharmacogenetics.
- Getting quality evidences for the establishment of drug efficacy, safety and adequate use of medicines in humans

#### RESEARCH ACTIVITY

#### Clinical trials

- **Borobia Pérez A.** Estudio de fase 1, aleatorizado, doble ciego, controlado con placebo para evaluar la seguridad y la farmacocinética de dosis únicas ascendentes y múltiples dosis ascendentes de

cs6253 en voluntarios sanos y en portadores de apoe4.

*Type/Phase: I*

*Sponsored by: Artery Therapeutics, Inc*

*Signed date: 01/08/2023*

- **Borobia Pérez A.** Estudio de cohortes de fase 3b, no aleatorizado, abierto e internacional para describir la seguridad de las participantes que recibieron o la vacuna para inmunización materna rsvpref3 (cualquier dosis) o el placebo (grupo control) en los estudios rsv mat anteriores (rsv mat-001, rsv mat-004, rsv mat-010, rsv mat-011, rsv mat-009, rsv mat-012 y rsv mat-039), durante cualquier embarazo posterior a la vacunación con la vacuna rsvpref3 o el placebo.

*Type/Phase: III*

*Sponsored by: Glaxosmithkline, S.A.*

*Signed date: 14/02/2023*

- **Díaz García L.** Evaluación de la farmacocinética de la teicoplanina en pacientes pediátricos para la elaboración de un modelo farmacocinético poblacional.

*Type/Phase: E0m prospectivo*

*Sponsored by: Díaz García Lucía*

*Signed date: 03/05/2023*

- **Borobia Pérez A.** A phase i, single-centre, double-blind, randomized, placebo-controlled clinical trial to determine urinary xylose cut-off point for the diagnosis of hypolactasia, after a single dose of gaxilose in children between 5-11 years of age.

*Type/Phase: I*

*Sponsored by: Venter Pharma SI*

*Signed date: 21/06/2023*

- **García García I.** Optimization of atopic dermatitis treatment that requires second-line systemic therapy through multiomic predictive models of treatment response (dermatomics-ii).

*Type/Phase: IV*

*Sponsored by: García García Irene*

*Signed date: 16/08/2023*

- **Borobia Pérez A.** Estudio de fase III, multinacional, observador ciego, aleatorizado, controlado con placebo para demostrar la eficacia de una

dosis única, así como de dosis anuales de revacunación, de la vacuna en investigación rsvpref3 oa de gsk en adultos de 60 años o más de edad, con el número de protocolo 212494 (rsv oa=adj-006).

*Type/Phase: III*

*Sponsored by: Glaxosmithkline, S.A.*

*Signed date: 12/06/2023*

#### STRATEGIC OBJECTIVE

- Orthopaedic implant studies are required to assess the results of implants, detect the causes of failure, and deepen our understanding of the prevention and solution of these failures. The medical, social, and economic relevance of orthopaedic implants, and their influence on quality of life, place this technology in the centre of translational research in orthopaedic surgery. Reconstruction based on biological strategies and biomaterials is rapidly evolving, and cutting edge research on these topics may offer an advantage in clinical translational research. The group has also developed studies on sports medicine and ligament reconstruction, with various outcome approaches and devices that may enhance surgical results. In this context, a multidisciplinary clinical and basic research group on orthopaedic surgery deepens our understanding of a wide variety of current research topics in the field and provides further progress towards clinical translation.
- In order to contribute to new advances in the field, our main clinical and experimental objectives are addressed by a joint research line that covers issues related to bone and joint reconstruction. These issues include the following:
  - Failed hip and knee prostheses, including the material, biological, and clinical mechanisms of failure. This research may lead to proposals for materials and design modifications in orthopaedic implants and reconstructive devices and techniques. Functional recovery of the patient is the ultimate goal, considering various scenarios from an experimental and clinical point of view.
  - Regenerative medicine approaches to bone and joint reconstruction, to generate preclinical and clinical proposals for bone and joint regeneration and repair, both in traumatic and non-traumatic bone and soft-tissue injuries.

#### RESEARCH LINES

- Clinical and basic research in Orthopaedics implants, and in bone and joint reconstruction

#### STRATEGIC OBJECTIVE

- To improve the diagnosis and surgical treatment of patients with Oral Cancer using the latest technologies applied to the field of Head and Neck Oncology planning and treatment. Our goal is to establish a workflow in which technological and technical advances are included as part of the treatment protocol for patients with oral cavity cancer.
- The identification of biomarkers of cancer progression and therapy response in head and neck cancers (HNC). HNC are low frequent tumors with poor outcome and limited treatment options. This is due to a poor understanding on the initial steps in tumor initiation and progression, and the implication of the tumor microenvironment in these processes. Using mouse models and novel patient derived organoid models, we are defining the mechanism driving the most aggressive HNC and developing this knowledge into translational tools to guide patient management. In addition, we are applying novel functional genomics to identify genes involved in driving resistance to chemo and targeted therapies, to uncover biomarkers of treatment response and new therapeutic targets. Overall, our goal is to improve patient survival and to increase patient life quality.

#### RESEARCH LINES

1. Epigenetic characterization of oral tumors and their association with resistance to chemotherapies and immunotherapies, identification of new biomarkers that predict response: Oral squamous cell carcinomas are an aggressive type of HNC with 370.000 cases per year and 50% 5-year survival rate. This is due to the lack of understanding of the biology of the disease and, in consequence, sufficiently efficient therapies. In this line, we are carrying out an epigenetic characterization of these tumors, analyzing characteristics such as their transcriptome and enhancer landscape using novel massive sequencing techniques on patient samples. Through bioinformatics analysis and monitoring the evolution of patients, we uncovered a population of cancer cells that associates with the most aggressive cancers and predicts patients with worse outcomes. Currently we are evaluating the translational impact of these findings. This research line is funded by CP19/00063 and PI20/00329 (ISCIII) and a Luis Álvarez PI5102 grant (FIBHULP).
2. Search for vulnerabilities in oral carcinoma cells using functional genomics. To define the vulnerabilities of tumor cells, our group has established CRISPR/Cas9 screens to evaluate the function of genes involved in the response to different therapies such as chemotherapies or immunotherapies. These screens, which target all protein-coding genes, are allowing us to identify in an unbiased way mechanisms of action that will allow us to understand how cells survive chemotherapy or how they are able to escape the action of the immune system. In this way, we will be able to reuse drugs already approved for these targets or design new ones that will allow us to improve the quality of life of patients with oral tumors. This research line is funded by CP19/00063 and PI20/00329 (ISCIII).

- The implication of the tumor microenvironment in the acquisition of metastatic capacity of oral tumors. In this research line we are analyzing the connection between tumor microenvironment and the induction cancer progression programs. To this end, we are using novel co-cultures of paired organoids and TME cells from patients and measuring the influence at the level of chromatin remodeling and gene expression. This research is financed by an international competitive grant funded by the Worldwide cancer research and Scientific Foundation of the "Asociación Española Contra el Cáncer" (WWRC-23-0272), and FIBHULP Luis Álvarez grant.
- Salivary glands malignancies. Salivary gland tumors are rare tumors that account for 5% of head and neck tumors. Their histological diversity and the lack of knowledge of the molecular basis of the disease make their treatment complex. Using NGS techniques we are characterizing the mutations, methylation profiles and tumor heterogeneity of these tumors to identify biomarkers of progression, mutations with targeted therapies and possible targets within the tumor microenvironment. Funding PI22/01512, (ISCIII) and Gilead (GLD22/00166).
- Study of mechanism of initiation and progression of cutaneous squamous cell carcinoma (cSCC): In this research line, we are exploring the function of several tumor suppressor genes and how their loss of expression affects the composition on the tumor microenvironment and the response to therapy. This project is done in collaboration with L. Sastre, at IIBM Alberto Sols.
- Application of 3D Medicine in the planning and treatment of head and neck cancer. Virtual design and segmentation of facial structures for generation of biomodels, cutting guides and custom implants. Surgery and personalized medicine. Mutua Madrileña 2022 grant funding.
- Use of radiotracers and fluorescence with indocyanine green for sentinel node detection in squamous tumors and melanoma of the head and neck.

- **Yuri Fabiola Villán Villan.** Responsable de Seguridad del Paciente. Hospital Universitario La Paz

#### STRATEGIC OBJECTIVE

- The occurrence of adverse events due to unsafe care is likely one of the 10 leading causes of death and disability in the world. Research into reducing harm to patients can lead to better health outcomes, as well as significant savings in healthcare costs.
- Patient safety is the health care discipline that arises with the increasing complexity of health care systems and the consequent increase in harm to patients. Its objective is to prevent and reduce the risks, errors and damages suffered by patients during the provision of healthcare. A cornerstone of the discipline is continuous improvement based on learning from mistakes and adverse events.

#### RESEARCH LINES

- Culture of Patient Safety.
- Incident reporting system for notification and analysis of adverse events associated to Healthcare.
- Zero Infections related to Healthcare.
- Safe Surgery Saves Lives, whose purpose is to reduce the risks associated with surgery.
- Safe Medication, reduce the harm of medications.
- Zero venous thromboembolism, in order to reduce complications attributed to hospitalization.
- Safe Health Worker, Safe patients.
- Safe Transfusions, reduce adverse reactions to transfusion.
- Safe Radiations, to the right patient in the right area.
- Safe Diagnostics, reduce errors that can cause harm.
- Septicemia as a medical emergency.

#### RESEARCH ACTIVITY

### COMPOSITION

#### Constantino Fondevila Campo.

Jefe de Servicio de Cirugía General y Digestiva. Hospital Universitario La Paz

- **Ramón Cantero Cid.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Francisca García-Moreno Nisa.** Jefe de Sección de Cirugía de Urgencias. Hospital Universitario La Paz
- **Joaquín Gómez Ramírez.** Coordinador Unidad de Cirugía Endocrina. Hospital Universitario La Paz
- **Jenny Rosario Guevara Martínez.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Amelia Hessheimer.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Arnau Paniselló Roselló.** Investigador Postdoctoral. Institute George Lopez
- **Javier Muñoz Luque.** Técnico de Grado Superior. CIBEREHD
- **Elisa York Pineda.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Inés Rubio Pérez.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Isabel Pascual Miguelañez.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **María Isabel Prieto Nieto.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Javier Salinas Gómez.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Juan José Segura Sampedro.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Mario Álvarez Gallego.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Ramón Corripio Sánchez.** Facultativo Especialista de Área en Cirugía General y de Aparato Digestivo. Hospital Universitario La Paz
- **Aída Vaquero Rey.** Investigadora Predoctoral. FIBHULP
- **Jordi Vengohechea Llorens.** Investigador Predoctoral. Universidad de Barcelona

### STRATEGIC OBJECTIVE

- **PROBLEM:** Surgery and perioperative care encompass one of the most expensive and resource-intensive areas of clinical medicine. Surgical patients undergo complex interventions, with the goal of curing or at least relieving distressing symptoms from different medical conditions. These same interventions, however, may sometimes result ineffective in achieving this goal. Additionally, they can provoke complications (morbidity) and further affect a patient's physical, mental, and emotional states.
- **APPROACH:** The Translational Research & Innovation in General Surgery Group (GITIC) is a multidisciplinary group comprised of surgeons, nurses, and biologists, with various areas of dedication and expertise. The GITIC team works together with the common goal of using surgical innovation and diverse research initiatives to offer the highest level of patient care possible today.
- Given its broad knowledge base and skill set, projects that GITIC currently develops include lines of basic science and experimental research, translational and pre-clinical surgical models, clinical investigation, analysis of post-surgical outcomes, studies involving economic evaluation, the creation of mathematical models, and surgical device design and implementation.
- In order to fulfill its broad research interests and initiatives, GITIC actively collaborates not only with other groups within Hospital Universitario La Paz and IdiPAZ but also other hospitals and public and private research institutions in Spain and abroad. The following is a list of some of GITIC's current collaborations:
  - Donation & Transplantation Institute (DTI), Barcelona, España
  - Guangong Shunde Innovative Design Institution, Guangdong, China
  - Hospital Virgen de la Salud, Toledo, España
  - Universidad Internacional de Catalunya (UIC), Sant Cugat, España
  - Policlinico Universitario "A. Gemelli", Università Cattolica del Sacro Cuore, Roma, Italia
  - Instituto de Empresa (IE), Madrid, España.
  - Tekniker, Gipuzkoa, España.

#### RESEARCH LINES

- Injury, inflammation, organ failure, & transplantation:
- Assessment and implications of chronic inflammation in obesity
- Experimental models of end-stage liver disease and portal hypertension
- Applicability and results of liver transplantation in the treatment of acute-on-chronic liver failure
- Approaches to transplantation in patients with complex portal vein thrombosis
- Translation and clinical research in ischemia-reperfusion injury
- Novel preservation solutions and techniques of in situ and ex situ organ machine perfusion
- Clinical outcomes and strategies for improvement in donation after circulatory death (DCD) organ transplantation
- Assessment and clinical implications of markers of allograft dysfunction following liver transplantation
- **Surgical oncology:**
- Evaluation of a novel polyfunctional immune liquid biopsy platform to predict and improve responses to cancer immunotherapy using innate immunomodulators
- Evaluation of the utility of cryoablation to provoke immune activation and response to immunotherapy in primary breast tumors
- Evaluation of the diagnostic and therapeutic role of novel immune checkpoints in colon cancer
- Development of three-dimensional in vitro organoid biomodels of colon cancer
- Combination of "omic" and imaging techniques to identify markers associated with response to neoadjuvant therapy in rectal cancer patients
- Effectiveness and safety of hyperthermic intraperitoneal chemotherapy in the prevention of peritoneal recurrence in high-risk colorectal cancer patients
- Immunological and molecular predictors of ovarian cancer arising in the background of endometriosis (Collaboration with H.U. La Paz Gynecology Service)
- **Surgical technology & innovation:**
- Development and pre-clinical evaluation of a novel device for ex situ liver machine perfusion
- Development and clinical trial assessment on the safety and feasibility of a novel rectoscope for rectal cancer surgery
- Development and utility assessment of novel surgical drains
- Evaluation of novel surgical techniques strategies to reduce drainage following axillary lymphadenectomy in breast cancer therapy
- **Value-based care:**
- Patient safety and prevention of perioperative infection
- Evaluation of "best possible outcomes" (benchmarks) in surgical care
- Assessment of perioperative complications, patient quality of life, and postoperative disability following general surgical operations
- Cost-effectiveness and cost-utility of postoperative cancer surveillance strategies
- Economic evaluation of novel surgical approaches and technologies

#### 3.7 Maternal Infant Child and Youth Research Area

Strategic Objectives	Development forecast for the coming years:	Actions
<p>The mission of the Maternal, Child and Adolescent Health Area (MIA) is to contribute to the improvement of the health of society by reducing the negative impact of diseases in the pediatric population from birth to adolescence, as well as the mother-child binomial. This recently created area is made up of research groups that cover the entire spectrum of ages from women, through newborns, children and young people. It includes very varied areas of research and proposes to achieve a full development of the adults of the future. To achieve this, we promote and lead cooperative research of excellence, promoting innovation, a multidisciplinary approach, and the translation of scientific results into clinical practice.</p>	<p>Create a stable structure to promote research that encompasses all areas of perinatal medicine, child and adolescent medicine, and women with childbearing potential. Promote collaboration between groups in the area and provide a common space and shared infrastructure and resources that allow joint progress.</p>	<p>Create a portfolio of shared group resources, services and projects for the MIA area that facilitates common work. Hold work meetings to propose shared studies and strategic lines.</p>
	<p>Promote the search for both public and private funding for cooperative research within the MIA area. Promote participation in international projects.</p>	<p>Facilitate the application request for European projects through the IdiPAZ Internalization Platform.</p>
	<p>Promote the incorporation of new technologies in research to advance personalized and precision medicine and the transfer of research results to the scientific community and society: biomedical industry, health administration, general population and any other interlocutor and disseminate the main advances produced as a result of the research.</p>	<p>Promote at international level the different research groups of the area, identifying possible synergies between groups and centers, new partners and funding sources, as well as to forge strategic alliances.</p>

#### Scientific Events by Maternal Infant Child and Youth Research

- **13/01/2023.** Scientific Seminar - Identificación de procesos biológicos con potencial diagnóstico para enfermedades hepáticas en la infancia
- **27/01/2023.** Scientific Seminar - SafeBoosC: Safeguarding the brains of our smallest infants
- **02/03/2023.** 12º Taller de simulación de administración menos invasiva de surfactante
- **14/04/2023.** Scientific Seminar - Terapia celular para enfermedades causadas por virus: Resultados del ensayo clínico fase 2, RELEASE
- **28/04/2023.** Scientific Seminar - Trasplante combinado de órgano sólido y hematopoyético para inducir tolerancia
- **16/10/2023.** Jornada de reanimación cardiopulmonar para padres
- **18/10/2023.** II Jornadas de la Red de Terapias Avanzadas de la Comunidad de Madrid
- **07/11/2023.** II Jornadas de soporte respiratorio en bronquiolitis
- **14/11/2023.** VIII Jornadas Infecciones relacionadas con la asistencia sanitaria en Pediatría

### 3.7.1 Neonatology

Publications:37 | Q1:17

#### COMPOSITION

##### **Adelina Pellicer Martínez.**

Jefe de Sección de Neonatología. Hospital Universitario La Paz

- **Marta Cabrera Lafuente.** Facultativo Especialista de Área en Neonatología. Hospital Universitario La Paz
- **Susana Ares Segura.** Facultativo Especialista de Área en Neonatología. Hospital Universitario La Paz
- **María Carmen Bravo Laguna.** Facultativo Especialista de Área en Neonatología. Hospital Universitario La Paz
- **Antonio Buño Soto.** Jefe de Servicio de Laboratorio de Urgencias. Hospital Universitario La Paz
- **Fernando Cabañas González.** Jefe de Servicio de Pediatría y Neonatología. Hospital Universitario Quirónsalud Pozuelo; FIBHULP
- **María Dolores Elorza Fernández.** Jefe de Sección de Neonatología. Hospital Universitario La Paz
- **Paloma López Ortego.** Médico Adjunto en Neonatología. Hospital Universitario La Paz
- **Esperanza Escribano Palomino.** Médico Adjunto en Neonatología. Hospital Universitario La Paz
- **Miriam Martínez Biarge.** Facultativo Especialista de Área en Neonatología. Hospital Hammer Smith Londres
- **María Teresa Montes Bueno.** Enfermera. Hospital Universitario La Paz
- **María Jesús del Olmo Barros.** Profesora Contratada. Universidad Autónoma de Madrid
- **Laura Sánchez García.** Médico Adjunto en Neonatología. Hospital Universitario La Paz
- **Miguel Sáenz de Pipaón Marcos.** Facultativo Especialista de Área en Neonatología; Profesor Titular. Hospital Universitario La Paz Universidad Autónoma de Madrid
- **Belén Sáenz-Rico de Santiago.** Profesor Titular. Universidad Complutense de Madrid
- **Eva Valverde Núñez.** Facultativo Especialista de Área en Neonatología. Hospital Universitario La Paz. Profesor Asociado. Universidad Autónoma de Madrid
- **Carlos Zozaya Nieto.** Médico Adjunto en Neonatología. Hospital Universitario La Paz

#### STRATEGIC OBJECTIVE

- Prevent structural and functional damage to organs and systems in the high risk newborn.
- Reduce the impact of the processes that occurred in the peri-neonatal stage in later life.

#### RESEARCH LINES

- Macro- and microcirculation: non-invasive monitoring, signal processing and machine learning. Lead: María Carmen Bravo/Adelina Pellicer
- Developmental Neurobiology. Lead: Fernando Cabañas/Eva Valverde
- Nutrition, microbiota and Milkbank. Lead: Miguel Saenz-Pipaón/Marta Cabrera
- Perinatal and neonatal infectology. Immunology and vaccines. Lead: Laura Sánchez García
- Quality improvement. Lead: Adelina Pellicer/Paloma López-Ortego

- **David Vicent López.** Investigador Senior (Contrato Miguel Servet - I2). Hospital Universitario La Paz

### STRATEGIC OBJECTIVE

- Our research interest is focused on the study of the molecular mechanisms underlying the most severe paediatric liver disorders, namely cholestasis, which results from the impaired secretion of bile from the liver to the intestine.
- As such, it represents a clinical and biochemical syndrome that is produced by a wide variety of disease processes that affect the liver. Individuals with cholestasis manifest jaundice, severe itching, malabsorption of fats and lipidsoluble vitamins and, in many cases, progressive liver damage. These clinical manifestations are due to the accumulation in blood and tissues of substances normally secreted in the bile, such as bilirubin, bile acids, and cholesterol and to the absence of bile from the intestine.
- When manifested in early infancy, cholestasis is often life threatening and usually requires liver transplantation. Extrahepatic biliary atresia (EHBA), Alagille syndrome and progressive familial intrahepatic cholestasis (PFIC) constitute the main paediatric cholestatic disorders. EHBA is an enigmatic disease of unknown aetiology, characterised by a precocious and accelerated obstruction of the biliary tree. Alagille syndrome is associated with mutations in the Jag1 gene and is characterised by a paucity or absence of intrahepatic bile ducts. PFIC encompasses a heterogeneous group of autosomal recessive diseases that exhibit similar clinical features. These diseases are caused by mutations in proteins located in the canalicular membrane of the hepatocyte and in proteins involved in bile secretion, such as the bile salt export pump (BSEP; ABCB11), the phospholipid transport protein MDR3 (ABCB4) and the aminophospholipid translocase FIC1 (ATP8B1). These cholestatic disorders constitute the most common indication for liver transplantation in childhood.

### RESEARCH LINES

- Molecular basis of paediatric liver diseases
- Liver Pathobiology
- Biomarker identification

#### STRATEGIC OBJECTIVE

1. To evaluate the implication of placental energy metabolism in obstetric conditions
2. Finding new biomarkers in gestational diabetes mellitus and macrosomia
3. Find new biomarkers of fetal and perinatal neurological damage and establish new prevention strategies
4. New biomarkers in poor placentation
5. Pathophysiology and new lines of treatment of fetal heart damage in Anti-Ro positive women
6. Fetal therapy
7. Infectious diseases. Microbiota

#### RESEARCH LINES

1. Diabetes mellitus, obesity and metabolic syndrome in pregnancy. Energy metabolism in pregnancy
2. Poor placentation
3. Fetal Neurodevelopment
4. Inflammation, autoimmunity and pregnancy
5. Fetal Therapy
6. Infectious diseases. Microbiota

### 3.7.4 Pediatric Respiratory, Systemic and Neurological Infections & Host Immune Response

Publications:48 | Q1:28

#### COMPOSITION

##### **Cristina Calvo Rey.**

Jefe de Sección del Servicio de Pediatría Hospitalaria, Enfermedades Infecciosas y Tropicales. Hospital Universitario La Paz

- **María Rosa Albañil Ballesteros.** Pediatra Titular. Centro de Salud de Cuzco. Atención Primaria Hospital Universitario La Paz
- **Sonia Alcolea Ruiz.** Investigadora Predoctoral. Hospital Universitario La Paz
- **María Mercedes Bueno Campaña.** Facultativo Especialista de Área en Pediatría. Hospital Fundación de Alcorcón
- **María Cabrerizo Sanz.** Científico titular de OPIs. Instituto de Salud Carlos III
- **Sara Camarero Serrano.** Ayudante de Investigación I+D+I. Instituto de Salud Carlos III
- **Inmaculada Casas Flecha.** Investigador Científico de OPIs. Instituto de Salud Carlos III
- **Teresa del Rosal Rabes.** Médico Adjunto de Pediatría Hospitalaria y Enfermedades Infecciosas y Tropicales. Hospital Universitario La Paz

- **María Luz García García.** Jefe de Servicio de Pediatría. Hospital Universitario Severo Ochoa
- **Paula García Sánchez.** Médico Adjunto en Servicio de Urgencias Pediátricas. Hospital Universitario La Paz
- **Carlos Grasa Lozano.** Contrato Río Hortega. Hospital Universitario La Paz
- **Jara Hurtado Gallego.** Investigadora Postdoctoral. CIBER
- **María de la Montaña Iglesias Caballero.** Técnica Superior Especializada de OPIs. Centro Nacional de Microbiología. Instituto de Salud Carlos III
- **Ana María Méndez Echevarría.** Facultativo Especialista de Área en Pediatría General. Hospital Universitario La Paz
- **Claudia Millán Longo.** Médica Adjuna en Servicio de Pediatría General e Infecciosa. Hospital Universitario La Paz
- **Mar Molinero Calamita.** Colaboradora I+D+I. Centro Nacional de Microbiología. Instituto de Salud Carlos III
- **Juan Francisco Pozo Sánchez.** Científico Titular de OPIs. Unidad de Virus Respiratorios y Gripe. Instituto de Salud Carlos III
- **Clara Udaondo Gascón.** Facultativo Especialista en Reumatología Pediátrica. Hospital Universitario La Paz

#### STRATEGIC OBJECTIVE

- Infectious diseases are the most frequent pathology in childhood. Our group is focused in the study of paediatric infections with special attention to those associated to viruses.
- The acute respiratory infections (ARIs) of lower respiratory tract are the most frequent infectious diseases in humans and these suppose at least 4 million of deaths yearly in the world. A high proportion of these infections are related with viral aetiology and particularly in children. In our country, the viral ARIs are one of the most frequent causes of hospitalization in children less than 2 years old. Using the metagenomics and applying an adapted method designed and developed for ARIs study, we will have achieved an increased knowledge of viral infections in hospitalized children of all ages, as well as in outpatients. Metagenomics could allow recognizing new viruses and also permits a deeper knowledge of traditional respiratory virus groups. Any new technological tool and its application to respiratory infection will mean an improvement in the diagnosis and monitoring of these types of infections and their immediate use is specified for resolving alerts in public health associated with respiratory viral infections is like the case of MERS-CoV, avian flu, or other influenza pandemics. The pandemic caused by SARS-CoV-2 and the COVID-19 disease in childhood has occupied a large part of the research of our group since its appearance. We are also interested in the study of the immunological response of the infants to the viral infections, and the mechanisms that allow develop recurrent wheezing, or asthma (the most frequent chronic disease in children).
- Emerging viral infections have also an important role in the pathology in childhood. Recently picornaviruses, mainly human parechovirus and enterovirus are causing outbreaks and several neurological infections, morbidity and mortality. They were associated with a wide range of pathologies, from febrile syndrome to respiratory, neurological or systemic diseases. In newborns, these infections can be severe, even fatal. Surveillance of these polio-like diseases is a public health concern and it is one of our group objectives.
- Finally, to study viral infections in high risk group of children (newborn, chronic lung diseases, immunodeficiencies, oncologic patients, rheumatic diseases...) is also a priority in our group. Emerging areas of research in our group are zoonosis and invasive fungal infections in high risk children.

#### RESEARCH LINES

- Respiratory viral infections in healthy and high risk children (newborn, chronic lung diseases, immunodeficiencies, oncologic patients...). Torqueto virus in immunocompromised children.. Viral metagenomic methods applied to the severe infections of the lower respiratory tract. SARS-CoV-2 infections in children. Applying of new technologies as echography to value risk conditions in viral infections.
- Immune response of the children and interleukins profile in infants with respiratory viral infections and correlation with the development of recurrent wheezing in the first years of life. Role of microbiome.
- Detection and characterization of enterovirus (EV) and parechovirus (PeV) systemic and neurological infections in children. Neurological development in children with EV and PeV infections.
- Infections related with locomotor system. Osteoarticular infections. Infections in children with rheumatic diseases. Kawasaki disease.
- Emerging infections in high risk children: zoonosis and invasive fungal infections.

#### RESEARCH ACTIVITY

##### Doctoral Theses

- Alonso López P. Evolución pulmonar, cardiológica, ponderoestatural y neurológica de los adolescentes prematuros moderados y tardíos en comparación con los recién nacidos a término[dissertation]. Villanueva de la Cañada. Madrid: UAX: 2023(07/06/2023). Director: García García ML.
- García Ezquiaga J. Prevalencia e incidencia de alergia alimentaria en población española[dissertation]. Villanueva de la Cañada. Madrid: UAX: 2023(13/06/2023). Director: García García ML.
- Udaondo Gascón C. Infecciones en niños con Artritis idiopática juvenil (AIJ) y comparación con niños sanos[dissertation]. Madrid: UAM: 2023(31/03/2023). Director: Calvo Rey.

##### Final Degree Theses

- Andrés Blanco L. Violencia sexual en adolescentes, ¿cuestión de género?[dissertation]. Madrid: UAM: 2023(01/06/2023). Director: Echevarría AM, Sainz Costa T.
- del Rey G. Virus y sus reservorios: murciélagos[dissertation]. Madrid: Universidad Complutense Madrid: 2023(01/06/2023). Director: Casas Flechas I, Iglesias-Caballero M.

#### Clinical trials

- **Calvo Rey C.** An interventional, phase 1b, randomized, double-blind, sponsor open, placebo-controlled, multi-center, dose-finding study to evaluate safety, tolerability and pharmacokinetics of sisanotavir in pediatric participants up to age 60 months with respiratory syncytial virus (rsv) lower respiratory tract infection (lrti).  
*Type/Phase: I*  
*Sponsored by: Pfizer Inc.*  
*Signed date: 17/10/2023*
- **Calvo Rey C.** Estudio de fase II, aleatorizado, doble ciego, controlado con placebo y de 2 partes, para evaluar pautas de tratamiento de edp-938 en pacientes de 28 días a 24 meses de edad con infección por el virus respiratorio sincitial (vrs).  
*Type/Phase: II*  
*Sponsored by: Enanta Pharmaceuticals, Inc*  
*Signed date: 16/06/2023*
- **Calvo Rey C.** Estudio multicéntrico, abierto, ciego para el evaluador y aleatorizado para evaluar la seguridad y la tolerabilidad de una dosis intravenosa única de oritavancina frente al tratamiento habitual de sujetos pediátricos con infecciones bacterianas agudas de la piel y de la estructura de la piel.  
*Type/Phase: II*  
*Sponsored by: Melinta Therapeutics Inc*  
*Signed date: 22/02/2023*
- **Calvo Rey C.** Inmunogenicidad y seguridad de la vacuna antigripal tetravalente recombinante (riv4) en niños y adolescentes de 9 a 17 años y adultos de 18 a 49 años.  
*Type/Phase: III*  
*Sponsored by: Sanofi Pasteur Inc*  
*Signed date: 11/01/2023*
- **Calvo Rey C.** Open-label, multi-centre, non-inferiority study of safety and immunogenicity of bimerxv® as heterologous booster for the prevention of coronavirus disease 2019 (covid-19) in adolescents from 12 years to less than 18 years of age.  
*Type/Phase: IIb*  
*Sponsored by: Hipra Scientific, S.L.U*  
*Signed date: 03/05/2023*
- **del Rosal Rabés T.** Estudio de fase II, aleatorizado, abierto y multicéntrico para evaluar la reactividad, seguridad e inmunogenicidad de la vacuna pediátrica candidata de subunidades de herpes zóster (ped-hz/su) de gsk tras su administración intramuscular con una pauta de dos dosis a niños inmunodeprimidos receptores de trasplante renal de 1-17 años de edad..  
*Type/Phase: II*  
*Sponsored by: Glaxosmithkline Biologicals S.A*  
*Signed date: 14/04/2023*
- **Méndez Echevarría AM.** Estudio abierto de fase 2/3 con un solo grupo para evaluar la seguridad, la farmacocinética y la eficacia de obeldesivir en participantes pediátricos con covid-19.  
*Type/Phase: II*  
*Sponsored by: Gilead Sciences Inc*  
*Signed date: 04/09/2023*

### 3.7.5 Pediatric Systemic Infections; HIV, Tuberculosis, Imported and Emergent Diseases

Publications:24 | Q1:8

#### COMPOSITION

**Talía Sainz Costa.**

Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz. Profesora Asociada. Universidad Autónoma de Madrid

- **Jorge Atucha Margolles.** Técnico de Laboratorio. FIBHULP
- **Fernando Baquero Artigao.** Facultativo Especialista de Área de Pediatría. Hospital Universitario La Paz. Profesor Colaborador. Universidad Complutense de Madrid
- **Blanco Bravo Queipo de Llano.** Facultativo Especialista de Área de Pediatría. Hospital Universitario La Paz
- **Jorge Bustamante Amador.** Investigador Predoctoral. Hospital Universitario La Paz
- **Francisco José Climent Alcalá.** Facultativo Especialista de Área de Pediatría. Unidad de Patología Compleja. Hospital Universitario La Paz. Colaborador docente. Universidad Autónoma de Madrid

- **Lucía Escolano Taravillo.** Investigador Predoctoral. Hospital Universitario La Paz
- **Luis Escosa García.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Jaime Delgado Pérez.** Investigador Predoctoral. Hospital Universitario La Paz
- **Miguel García Boyano.** Investigador Predoctoral. Hospital Universitario La Paz
- **Marta García Fernández de Villalta.** Facultativo Especialista de Área de Pediatría. Hospital Universitario La Paz. Colaborador Clínico Docente. Universidad Autónoma de Madrid
- **María Milagros García López de Hortelano.** Médico Adjunto de Pediatría Hospitalaria y Enfermedades Infecciosas y Tropicales. Hospital Universitario La Paz. Colaborador Clínico Docente. Universidad Autónoma de Madrid
- **Isabel Mellado Sola.** Médico Interno Residente. Hospital Universitario La Paz
- **María Pérez Pascual.** Médica Adjunta en Pediatría. Hospital Universitario La Paz
- **Roi Piñeiro Pérez.** Jefe Asociado del Servicio de Pediatría. Hospital General de Villalba
- **Paula Rodríguez Molino.** Contrato Río Hortega. Hospital Universitario La Paz
- **Germán Vallejo Palma.** Investigador Predoctoral. Fundación GESIDA

#### STRATEGIC OBJECTIVE

1. Vertically acquired HIV infection in children: Comorbidities, biomarkers, HIV reservoir, new therapeutic approaches.
2. Epidemiology of Paediatric Tuberculosis in Spain: molecular epidemiology of drug resistant strains, new diagnostic tools and new drugs for TB: Pharmacodynamics in children and TB-drugs Off-label use in paediatrics.
3. Congenital infections: burden of disease, prompt diagnosis and in-utero and postnatal management, host immune response.
4. Epidemiology of imported and emergent diseases in children: Identification and management of emergent outbreaks. Immuno-pathogenesis, preventive measures and management. Covid-19 in children
5. Immunization strategies in children: immune response in high risk patient's vaccine effectiveness and barriers.
6. Social Determinants of Health in Pediatrics
7. Infection and immunity: microbiome at the crossroad of immunity and allergy
8. Health-care associated Infections. Resistant bacteria and antimicrobial stewardship / Infecciones asociadas con la asistencia sanitaria. Resistencias a antimicrobianos y programas de optimización de antimicrobianos

#### RESEARCH LINES

- Vertically acquired HIV infection in children
  - Immuno-pathogenesis: Immune-activation, inflammation and biomarkers
  - Epidemiology, immuno-virological factors
  - Comorbidities, long term follow-up, cardiovascular risk, bone disorders, metabolic abnormalities, neurocognitive impairment, renal dysfunction.
  - Antiretroviral treatment: new drugs, resistances, dosage, toxicity in children, simplification strategies.
  - HIV eradication: barriers, HIV reservoir, new antiretroviral drugs and other strategies to achieve HIV replication control.
  - Gut Microbiota and bacterial translocation intestinal as modulating factors for inflammation and Immune-activation in HIV-infected children.
  - Transition to adult care: barriers, strategies to maintain adherence to care.
- Epidemiology of paediatric Tuberculosis (TB).
  - Epidemiology of paediatric TB. paediatric cases as a sentinel for burden of diseases.
  - Molecular Epidemiology of paediatric TB: resistant strains.
  - Immuno-pathogenesis: New diagnostic tools in special Populations: HIV-infected, ID patients
  - Management of critical situations. Neonatal TB, multidrug resistant and extra-pulmonary TB.
- Omics for the diagnosis of pediatric TB
  - New fixed-dosed combinations. Off label drugs in children. Pharmacodynamic and pharmacokinetic.
- Congenital infectious diseases
  - Congenital Citomegalovirus and Toxoplasma infections: diagnostic barriers, prognostic factors, new therapeutic approaches.
  - CHAGAS disease and congenital TB: diagnostic barriers, prognostic factors, pharmacokinetics in newborns and new drugs.

- Epidemiology of imported and emergent diseases in children
  - Paediatric International Outbreaks: Epidemiology and public health impact: Zika. Rabies. Dengue. Chikungunya. Haemorrhagic fevers, Mers-co.
  - Imported diseases in Spain: epidemiology and special populations: adopted, migrant, refugees, travelers and ID children. Tropical and parasitic infections in children.
  - COVID-19 disease in children: epidemiology, diagnostic markers, treatment.
- Immunization strategies in children, including high risk patients
  - Immunization and vaccine response in special populations: immunocompromised children, transplant recipients, chronic patients, HIV-infected, migrants.
  - Vaccine immunogenicity: barriers in paediatric populations.
  - New challenges in vaccinology
- Microbiome in pediatric infectious diseases
  - Microbiome-related biomarkers in food allergy and intolerances
  - Microbiome-related biomarkers in childhood TB and other respiratory infections
  - Social Determinants of Health in Pediatrics
  - The burden of chronic disease in childhood
  - Health-care associated Infections.
  - The burden of antimicrobial resistance
  - Antimicrobial stewardship in pediatrics

## 3.7.6 Translational Research in Pediatric Oncology, Hematopoietic Transplantation and Cell Therapy

Publications:24 | Q1:14

### COMPOSITION

**Antonio Pérez Martínez.**

Facultativo Especialista de Área en Pediatría, Oncología y Hematología. Hospital Universitario La Paz

- **Cristina Aguirre Pórtoles.** Investigadora Predoctoral. Project Manager. FIBHULP
- **Saturnino Barrena Delfa.** Facultativo Especialista de Cirugía Pediátrica. Hospital Universitario La Paz
- **Halin Bareke.** Investigadora Postdoctoral. FIBHULP
- **David Bueno Sánchez.** Facultativo Especialista de Área en Pediatría, Oncología y Hematología. Hospital Universitario La Paz
- **Adela Escudero López.** Facultativo Especialista de Área en Genética. Hospital Universitario La Paz
- **Mikel Fernández Artaco.** Médico Interno Residente en Hematología y Hemoterapia. Hospital Universitario La Paz
- **Berta González Martínez.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Pilar Guerra García.** Facultativo Especialista de Área en Pediatría, Oncología y Hematología. Hospital Universitario La Paz
- **Elisa Izquierdo Delgado.** Investigadora Postdoctoral. FIBHULP
- **Manuel Izquierdo Pastor.** Investigador Científico CSIC. IIB "Alberto Sols"
- **Adriana Mañas Núñez.** Investigador Posdoctoral. FIBHULP
- **Carla Martín Cortázar.** Investigadora Postdoctoral. FIBHULP
- **Laura Martín Fernández.** Asistente Ejecutiva. FIBHULP
- **Isabel Martínez Romera.** Facultativo Especialista de Área en Pediatría. Hospital Universitario La Paz
- **Carmen Mestre Durán.** Investigadora Predoctoral. FIBHULP

- **Antonio Jesús Muñoz Serrano.** Facultativo Especialista de Área en Cirugía Pediátrica. Hospital Universitario La Paz
- **Alfonso Navarro Zapata.** Investigador Predoctoral. Hospital Universitario La Paz
- **Gema Pérez Chacón.** Investigadora Senior. IIB "Alberto Sols"
- **Pedro María Rubio Aparicio.** Facultativo Especialista de Área en Pediatría, Oncología y Hematología. Hospital Universitario La Paz
- **Beatriz Ruz Caracuel.** Investigadora Bioinformática. Hospital Universitario La Paz
- **Javier Ruiz Navarro.** Investigador Predoctoral. IIB "Alberto Sols"
- **Sonsoles San Román Pacheco.** Facultativo Especialista de Área en Pediatría, Oncología y Hematología. Hospital Universitario La Paz
- **Clara María Venegas Mascaró.** Investigadora Predoctoral. FIBHULP
- **Juan Manuel Zapata Hernández.** Científico Titular. IIB "Alberto Sols"

### RESEARCH LINES

- Analysis of solid/hematological tumors samples to determine their susceptibility to cell therapy, at functional, protein expression and genetic level.
- Cell therapy with activated NK cells in childhood cancer.
- Hematopoietic progenitor transplantation as a platform for cell therapy.
- Cell therapy with memory T lymphocytes as adoptive immunotherapy in transplantation of haematopoietic progenitors.
- Optimization of cell therapy by the generation of an NKG2D antigenic chimeric receptor (NKG2DCAR). Evaluation of its specificity, persistence and activity (in vitro and in vivo) for the treatment of childhood cancer.
- Optimization of CART cell therapy using nanotechnology and epigenetic regulators
- Induction of immunological tolerance in solid organ transplantation through the induction of hematopoietic mixed chimerism by cell therapy.
- Development of academic clinical trials and collaborations with the pharmaceutical industry as a strategy for the development of new therapies more effective and with fewer side effects in childhood cancer.
- Cell therapy with cytokine induced-memory like NK cells for pediatric solid tumors.
- Cell therapy with memory T lymphocytes from COVID-19 convalescent donors as an innovative therapy for COVID-19.

### STRATEGIC OBJECTIVE

- Our research program focuses on the molecular and immunological characterization of childhood cancer; the development of cell therapies, primarily through the susceptibility of tumor cells to Natural Killer cells; and the optimization of hematopoietic stem cells transplantation.

#### RESEARCH ACTIVITY

##### Doctoral theses

- **Gasior Kabat M.** Transplantation with CD45RA+ Cell Purging and Adoptive Immunotherapy with CD45RO+ T Lymphocytes in Paediatric Patients with Malignant and Non-Malignant Haematological pathologies[dissertation]. *Madrid: UAM: 2023(17/10/2023). Director: Pérez Martínez A.*
- **Gómez García LM.** Prognostic factors with impact on survival in pediatric patients with acute myeloblastic leukemia and myelodysplastic syndrome undergoing hematopoietic stem cell transplantation.[dissertation]. *Madrid: UAM: 2023(04/10/2023). Director: Pérez Martínez A.*

## 3.7.7 Congenital Malformations and Transplantation

Publications:51 | Q1:17

### COMPOSITION

**Francisco Hernández Oliveros.**

Facultativo Especialista de Área en Cirugía Pediátrica. Hospital Universitario La Paz

- **Maria Virginia Amesty Morello.** Médico Adjunto en Cirugía Pediátrica. Hospital Universitario La Paz
- **Ane Miren Andrés Moreno.** Facultativo Especialista de Área en Cirugía Pediátrica. Hospital Universitario La Paz. Pediatría Profesor Asociado. Universidad Autónoma de Madrid
- **Sara Cabezuelo Ballesterro.** Facultativo Especialista de Área en Anestesiología. Hospital Universitario La Paz
- **Carlos de la Torre Ramos.** Médico Adjunto en Cirugía Pediátrica. Hospital Universitario La Paz
- **Carlos Delgado Miguel.** Facultativo Especialista de Área en Cirugía Pediátrica. FIBHULP
- **José Luis Encinas Hernández.** Facultativo Especialista de Área en Cirugía Pediátrica. Hospital Universitario Infantil La Paz
- **Álvaro González Rocafort.** Facultativo Especialista de Cirugía Cardiovascular. Hospital Universitario Infantil La Paz

- **Juan Carlos López Gutiérrez.** Jefe de Servicio de Cirugía Pediátrica. Hospital Universitario Infantil La Paz
- **María Nieves Moreno.** Facultativo Especialista de Área en Oftalmología. Hospital Universitario La Paz
- **Susana Noval Martín.** Facultativo Especialista de Área en Oftalmología. Hospital Universitario La Paz
- **Jesús Peralta Calvo.** Facultativo Especialista de Área en Oftalmología Infantil. Hospital Universitario La Paz
- **Esther Ramos Boluda.** Jefe de Sección. Unidad de Rehabilitación y Trasplante Intestinal. Hospital Universitario La Paz
- **Fernando Reinoso Barbero.** Jefe de Servicio de Anestesiología y Reanimación Infantil. Hospital Universitario La Paz
- **Alba Sánchez Galán.** Facultativo Especialista de Cirugía Pediátrica. Hospital Universitario La Paz
- **Javier Serradilla Rodríguez.** Facultativo Especialista en Cirugía Pediátrica. Hospital Universitario La Paz
- **Paloma Triana Junco.** Facultativo Especialista de Área en Cirugía Pediátrica. Hospital Universitario La Paz
- **María Teresa Vallejo Cremades.** Jefe de Laboratorio Inmunohisto-química (Contrato de Estabilización de Técnicos de Apoyo). FIBHULP
- **Alejandra Vilanova Sánchez.** Facultativo Especialista en Cirugía Pediátrica. Hospital Universitario La Paz

### STRATEGIC OBJECTIVE

- Paediatric surgical specialities are extremely complex due to the wide spectrum of diseases included in their scope. Many of the problems are related to rare diseases and their treatment frequently requires complex procedures.
- Clinical care of paediatric surgical patients is a long-term task that requires a wide knowledge of the pathology and multidisciplinary committees. Surgical corrections usually consist of multi-step procedures, some of them in the neonatal period while others might be required in young adults.
- This line is therefore characterized by an unusually large spectrum since it encompasses the study of the cellular and molecular mechanisms leading to malformations, the biology of the malformed fetus and embryo, the prenatal chances for intervention on the malformations, and the postnatal operative and perioperative surgical and anesthetic management, including complex procedures as transplantation.

### RESEARCH LINES

- Anesthesia, pain management and perioperative intensive care: To develop new procedures for improving safety and efficacy in anesthetic procedures, and to investigate the multiple problems of pain management and anaesthesia support.
- Vascular anomalies: To investigate genetic and molecular mechanisms involved in the pathogenesis of vascular anomalies, and to evaluate new targeted therapies
- Cardiovascular surgery: To assess different organ perfusion devices and to develop new strategies for graft perfusion.
- Congenital malformations: To gain knowledge on the cellular and molecular mechanisms of malformations using animal models, organ and cell cultures and eventually genetically engineered animals.
- Ophthalmologic pathology: To investigate genetic and molecular mechanisms involved in the pathogenesis of ocular malformations and ocular rare diseases.
- Transplantation: To investigate new strategies for graft tolerance/avoidance of rejection and to analyze the impact of donation after circulatory death with normothermic reperfusion in pediatric transplantation. Additionally, the management of the conditions leading to organ failure would be included in our topics, like intestinal rehabilitation (intestinal transplantation), liver tumours (liver transplantation) and severe uropathies (renal transplantation).

### RESEARCH ACTIVITY

#### Doctoral theses

- **Roca Cabau MA.** Evolución del tratamiento del retinoblastoma en las últimas décadas en un hospital terciario español.[dissertation]. *Madrid: UAM: 2023(05/07/2023). Director: Peralta Calvo J.*
- **Triana Junco P.** Sirolimus en el tratamiento de anomalías vasculares[dissertation]. *Madrid: UAM: 2023(21/06/2023). Director: López Gutiérrez JC*

#### STRATEGIC OBJECTIVE

- Endometriosis is a debilitating gynaecological disease, responsible of pain and infertility with consequent worsening of women's quality of life. The prevalence is estimated on 10% of the fertile age women, with an impact on quality of life and reproductive health. Despite its high prevalence and the great scientific activity generated around this disease, we are facing a problem whose etiology remains unknown. Although it is a chronic illness, which begins to cause symptoms very early in a large number of cases, there is still no predictive marker of the disease, no method of early diagnosis, or any way to modify its clinical course, which is highly variable, producing great uncertainty in affected women. Despite of great advances have been made in the treatment of the disease from a global perspective that included women's fertility and pain control, there is still no etiological treatment or any form of cure.
- The endometriosis research group is committed to the following objectives in the next 5 years: to develop a scientific project for FIS 2023, to encourage young researchers, to organize a Master's Degree in Laparoscopy and Endometriosis, to increase the number of final degree projects and final master's projects, to improve the training of gynecological specialty trainee and promote internships abroad, to write publications of the results of our ongoing projects (mainly FIS 2020), to design a website for the HULP- Endometriosis group and to announce monthly workshops of patients with doctors and professionals from the Endometriosis Unit. We also set ourselves the challenge of recognizing the Endometriosis Unit-CSUR (National reference Unit) and promoting gender equality in research and innovation.
- The strategies proposed to achieve these objectives are as follows: Participation in the FIBHULP "Mentor Program", to promote collaboration between senior researcher and junior researcher to carry out research projects, congresses communication, to enable specialist trainee and junior gynecologists to perform the "Winner Project", (an educational program for Endoscopic Gynecological Surgery with 3 levels of progression), to encourage collaboration with providers in the endoscopic sector such as Storz, Olympus and Striker. In addition, we have support from IdiPaz Biostatistics and IdiPaz Biobank (PT20 / 00004) integrated into the National Network of Biobanks of Spain, technical assistance from the HULP Computer and Bioengineering Service, as well as active collaboration with national associations of patients and announcement of events in "La Paz Informa".
- Moreover, the Endometriosis Unit of Hospital La Paz has numerous strategic alliances, at the national level (Hospital Clínic of Barcelona, Hospital General of Valencia, Clínica Dexeus Barcelona) and also internationally (Oncopole -Oncology Institute of Toulouse (France), University Hospital of Bologna (Italy), University Hospital of Liège (Belgium), University Hospital of Siena (Italy), University Hospital of Malmö (Stockholm)).

#### RESEARCH LINES

- Investigation of immunological and molecular factors involved in the pathogenesis of endometriosis.
- Investigation of biomarkers to predict the risk of endometriosis malignant transformation. Our objective is to identify a panel of immune system markers and specific genetic mutations to predict endometriosis patients at increased risk of developing ovarian cancer and to identify factors that allow the use of immunotherapy in this type of cancer. In both pathologies (endometriosis and ovarian cancer), the dysfunction of the immune system favours the progression of the disease. In February 2021, the Endometriosis Group received a Health Research Fund by Health Research Institut Carlos III for the project: "Molecular and immunological factors with predictive value in endometriosis associated ovarian cancer".
- Research of new non-hormonal drugs to control symptoms and disease progression.
- Clinical research and new technologies: the advantages of Fluorescence Guided Surgery (FGS). In our operating rooms (Hospital Maternal, HULP) we use modern technology that allows real-time visualization of certain anatomical structures and helps the surgeon to reduce intraoperative stress and improve performance. Recently, the intraoperative use of indocyanine green (ICG) has shown advantages in intestinal surgery for endometriosis. ICG is a dye that is injected intravenously and rapidly reaches the blood vessels of the abdominal organs and allows the emission of fluorescence in the spectral range of the infrared ray. In this way, the vascularization of the colorectal anastomosis can be assessed after bowel resection in patients with endometriosis. We are currently investigating the use of a macromolecule linked to ICG that allows the dye to remain longer in vascularized tissues (rectum), and with a single injection at the start of surgery. This technique is also useful for delimiting endometriotic nodules before removing them.
- Clinical research focusing on the early diagnosis of endometriosis in adolescent patients (European Multicentre Project: Erasmus Project).

### STRATEGIC OBJECTIVE

- Paediatric Solid Organ Transplantation (SOT) and Haematopoietic Stem Cell Transplantation (HSCT) have dramatically changed the life expectancy of many children by providing treatment to them, who would otherwise have not survived. Worldwide, nearly 150,000 SOT1 and 80,000 HSCT are performed annually. Paediatric transplantation constitutes about 10% of the total for SOT and 20% of the total for HSCT. Between 2012 and 2016, 7,741 SOT and 14,717 HSCT were performed on children in the European Union (EU), and the number of PTs performed worldwide continues to increase.
- Paediatric SOT & HSCT replaces end-stage disease with a more sustainable chronic disease state, which enables youth to reach adulthood.<sup>3</sup> However, although transplantation can improve personal health outcomes, it can also be associated with long-term side effects that require continuous monitoring and care. Post-transplant follow-up care aims to prevent rejection and transplant-related complications, so that each person can achieve a life expectancy and quality of life (QoL) similar to healthy peers.
- The "Research on comprehensive care for transplanted children and adolescents" group arises from the need to cover gaps in knowledge about the comprehensive care of children and adolescents who receive transplants in the paediatric age.
- The group will be focus on the research of three specific topics:
  1. Transition and transfer of adolescents and young adults (AYAs) living with a transplant to adult clinics: clinical and psychosocial impact. Transition is a gradual, multifaceted, active, and purposeful process involving many important steps and key checkpoints. The process comprises three phases<sup>5</sup>: (1) transition planning and preparation, (2) transfer of care, and (3) integration into adult health care. Each of these phases has unique barriers to success and opportunities for improvement.
  2. Quality of life (QoL) in paediatric transplant setting: patient reported outcomes and experience measures (PROMs and PREMs).
  3. Innovation in health education for transplanted children and adolescents and their parents/caregivers/family: evaluation of programs and validation of tools and questionnaires.

### RESEARCH LINES

- Transition and transfer of adolescent and young adult paediatric transplant recipients to adult care: clinical and psychosocial impact.
- Quality of life in paediatric transplantation: outcome measures and patient/family reported experiences (PROMs and PREMs).
- Innovation in health education for transplanted children and adolescents and their parents/caregivers/family: evaluation of programmes and validation of tools and questionnaires.

### STRATEGIC OBJECTIVE

- To evaluate the impact of low birth weight and prematurity on cardiometabolic health with a follow-up strategy, analyzing the modulatory effect of lifestyle.
- To study the physiological mechanisms implicated in the association between risk factors and cardiometabolic programming, using animal models of prematurity and intrauterine growth restriction and dietary interventions.
- To assess the influence of sociocultural factors on women health during pregnancy and lactation, and the modulation of biological variables by lifestyle.
- Promotion of healthy habits during pregnancy and lactation.
- To extract and characterize healthy bioactive components from food by-products and to design ingredients and supplements to improve cardiometabolic health.
- To carry out intervention trials in healthy subjects with the designed ingredients, evaluating its anti-inflammatory and antioxidants properties and health effect.

### RESEARCH LINES

- Relationship between nutrition and fetal and postnatal programming of cardiometabolic disease. Involvement of oxidative stress and inflammation
- Impact of prematurity on cardiometabolic health.
- Development of new functional ingredients from food by-products focused on cardiometabolic health.
- Study of food ingredient bioactivity, bioavailability and impact on cardiometabolic health.
- Analysis of breastmilk bioactive components and its relationship with maternal and infant health.

\*Group recently created, december 2023

## 3.8 Multidisciplinary Research in Healthy Aging Area

Documents: 54 | Originals: 46 | D1: 2 | Q1: 21

#### 3.8 Multidisciplinary Research in Healthy Aging Area

Strategic Objectives	Development forecast for the coming years:	Actions
<p>The Multidisciplinary Research in Healthy Aging is a recently created area and is made up of three groups. Its main initial mission is to identify synergies between IdiPAZ research groups with professionals or research groups in the field of primary care and health care with the aim of establishing joint interdisciplinary and competitive projects. It also aims to promote the development of training activities aimed at primary care and health care professionals</p>	Increase the quality of the Area's group publications	Promoting quality and impact publishing
	Ensure generational change in the leadership of projects and groups in the area.	Include junior profiles in the groups and consider transition projects
	Improving the success rate in competitive calls for proposals	Increasing the submission rate to competitive calls for proposals and Increase the use of the Institution's resources and platforms for project applications (Mentor Programme, PAIN Platform, Innovation Support Unit, etc.).
	Implementing gender-sensitive analysis of results	Define studies that consider the gender dimension of pathologies in both patients and models.

### STRATEGIC OBJECTIVE

- To promote and improve the quality of hospital geriatric care
- Progress in the cross-speciality geriatrics
- Point of care ultrasonography in the management of diseases in the older patient

### RESEARCH LINES

- Coordination of the National Registry of Hip Fractures: a multicenter observational study including patients from 75 Spanish hospitals with an acute fragility hip fracture. The registry collects data from the acute hospital phase and a one-month follow-up from about 80 Spanish hospitals.
- Study of the influence of frailty in the implantation of transcatheter aortic valve. Multicenter project that includes data from five Spanish hospitals
- Cross-speciality Geriatrics: Co-management of old patients diagnosed of cancer in collaboration with the General Surgery, Medical and Radioterapeutic Oncology, Urology and Vascular Surgery Departments of the La Paz Hospital.
- Observational study of the evolution of old patients affected of a traumatic intracranial hemorrhage, in collaboration with the Neurosurgery Department of the La Paz Hospital.
- Point of care ultrasound sonography

### STRATEGIC OBJECTIVE

- This research area, has been developed along the last 25 years by our group, with outstanding contributions to several aspects of the field, ranging from basic science (endothelial function, role of lab and image biomarkers, magnetoencephalography, musculoskeletal function...) to clinical and epidemiological research, raising data that have allowed to promote technological devices (platform to detect, treat and monitor functional decline in a non-obtrusive way) and leading to the creation of a technological SME (MG Biomed)

### RESEARCH LINES

- Endothelial dysfunction associated with aging, diabetes and obesity.
- Clinical aspects of frailty.
- New Technologies Applied to Frailty, functional decline and Healthy Aging.

### RESEARCH ACTIVITY

#### Doctoral theses

- **Caballero Mora MA.** Papel de la marcha y equilibrio en sujetos ancianos (70-79 años) y muy ancianos (>80 años)[dissertation]. Madrid: UE: 2023(12/04/2023). Director: Rodríguez Mañas L.

### STRATEGIC OBJECTIVE

- The group's research focuses on the morbidity and mortality risks of elderly patients in the community setting, with particular attention to the study of modifiable factors such as nutrition, alcohol consumption, smoking, inappropriate use of drugs, lack of therapeutic adherence, sedentary lifestyle, and vulnerability to climate change. In addition, classic factors such as hypertension, diabetes, obesity/overweight, hypercholesterolemia, multimorbidity, and suboptimal control of blood pressure, glucose, and LDL cholesterol. Furthermore, the study of the factors that delay urgent/emergent attention of time-dependent pathologies (\*). All with a perspective of gender and vulnerability across the life course.
- (\*) Those emergency diseases in which the diagnostic or therapeutic delay negatively influences the process's evolution and prognosis since its morbidity and mortality are directly related to the delay in starting treatment.

### RESEARCH LINES

- Effect of Glycemic Variability on morbidity and mortality
- Effect of Arterial Hypertension Variability on morbidity and mortality
- Predictive model of morbidity and mortality in elderly patients residing in the community
- Predictive model of morbidity and mortality in patients with type 2 diabetes mellitus
- Effect of product of fasting glucose and triglyceride (TyG index), on incident Type 2 Diabetes Mellitus.
- Sex differences in preventive medicine.
- Incidence of mortality in adult patients diagnosed with epilepsy in the community of Madrid: EPILEPSIE-Madrid retrospective cohort.
- Mortality Rates and causes of death in patients with Type 2 Diabetes: An Analysis of MADIABETES Cohort (Spain)
- Metabolomics, genomics and nutrition for personalized medicine of cardiovascular disease (OMIC-CARD)
- LADA-type diabetes: development and validation of a high-risk score for use in Primary Care.
